# **RESOLUTION ITU-R 71**

# Role of the Radiocommunication Sector in the ongoing development of television, sound and multimedia broadcasting

(2019)

The Radiocommunication Assembly,

#### considering

*a)* that the scope of ITU as a whole, and of the standardization activities within ITU in particular, is very important to the evolving broadcasting industry;

b) that enhancements to the broadcasting systems have been and will be pursued;

c) that the implementation of broadcasting systems is expanding and that these systems are being continuously developed in line with user and technology trends;

*d)* that the deployment of broadcasting systems on a global basis continues to be developed through a collaborative effort among the three ITU Sectors,

noting

*a)* that ITU recognized in 2012 through its efforts to implement the outcomes of WSIS:

- development of road maps for the transition from analogue to digital broadcasting,

updated guidelines on digital broadcasting, and

– training programmes for the transition from analogue to digital broadcasting;

*b)* Resolution ITU-R 9, on liaison and collaboration with other recognized external organizations,

## resolves

1 that a roadmap for ITU-R activities for broadcasting should be developed by the relevant Radiocommunication Study Group to ensure that this work is progressed effectively and efficiently with other ITU-R Study Groups, ITU-T and ITU-D as well as organizations external to ITU;

2 that taking into account the established processes for intersector coordination activities between ITU-R and ITU-D concerning broadcasting, these activities should be continued and enhanced;

3 that taking into account the established processes for intersector coordination activities between ITU-R and ITU-T concerning audio visual quality assessment and accessibility, audio and video coding, integrated broadcast-broadband, multimedia, and other emerging technologies and applications, these activities should be continued and enhanced,

## instructs the Director of the Radiocommunication Bureau

to report to future Radiocommunication Assemblies on the results of implementing this Resolution.
