

Documento WSIS/PC-3/5-S
5 de agosto de 2003
Original: inglés

Yoshio Utsumi
Presidente del Comité Organizador de Alto Nivel de la Cumbre
Secretario General de la Unión Internacional de Telecomunicaciones

INFORME SOBRE LAS ACTIVIDADES CONDUCENTES A PREPCOM-03

I Antecedentes

1 En la Resolución 73 (Minneapolis, 1998) la Conferencia de Plenipotenciarios de la Unión Internacional de Telecomunicaciones (UIT), presentada por Túnez, se resolvió encargar al Secretario General de la Unión que inscriba la cuestión de la celebración de una Cumbre Mundial sobre la Sociedad de la Información en el orden del día del Comité Administrativo de Coordinación de las Naciones Unidas ("CAC" que pasó a denominarse ulteriormente "JJE"). La reacción del CAC fue positiva y en 2000 el CAC adoptó el Plan de Acción para la organización de la Cumbre, que preparó el Secretario General de la UIT.

2 En su reunión de 2001 el Consejo de la UIT examinó el Informe del Secretario General y en su Resolución 1179 (Ref. C2001/114) apoyó la declaración de una Cumbre en dos fases, la primera en Ginebra en 2003 y la segunda en Túnez en 2005.

3 La decisión adoptada por el Consejo de la UIT fue apoyada el 21 de diciembre de 2001 por la Asamblea General de las Naciones Unidas en su Resolución 56/183, en la que ésta acogió complacida la celebración de la Cumbre Mundial sobre la Sociedad de la Información al más alto nivel posible y bajo los excelentes auspicios del Secretario General de las Naciones Unidas y la UIT como organismo rector en sus preparativos. En la Resolución mencionada se apoyó la celebración de la Cumbre en dos etapas, que había respaldado ya el Consejo de la UIT.

4 En la Resolución precitada de la Asamblea General de las Naciones Unidas se recomendó además que los preparativos de la Cumbre fueran realizados en un Comité Preparatorio intergubernamental de composición abierta, que definiría el orden del día de la Cumbre, se pronunciaría sobre las modalidades de participación de otros asociados en la Cumbre y concluiría un Proyecto de Declaración y un Proyecto de Plan de Acción. También se invitaba a la UIT a asumir la función rectora en la Secretaría Ejecutiva de la Cumbre. En diciembre de 2002 la Asamblea General aprobó la Resolución 57/238 en la que reafirmaba el apoyo dado previamente a la Cumbre en su Resolución 56/183.

II Resultados de la primera reunión del Comité Preparatorio

5 La primera reunión del Comité Preparatorio (PrepCom-1) tuvo lugar en Ginebra del 1 al 5 de julio de 2002 y en la misma se eligió Presidente de PrepCom a Adama Samassekou de Malí, así como a 14 Vicepresidentes y dos Vicepresidentes de derecho, respectivamente, de Suiza y Túnez, los cuales integraron la Mesa de PrepCom. A la reunión asistieron 969 participantes: 607 delegados de 142 Estados, así como 34 representantes del sector empresarial, 223 de las ONG y la sociedad civil, y 110 de los órganos de las Naciones Unidas y organizaciones internacionales el Informe de PrepCom y la documentación relativa a la reunión pueden consultarse en: <http://www.itu.int/wsis/preparatory/prepcom/prepcom1.html>.

6 PrepCom-1 estableció dos Subcomités para realizar sus trabajos: el Subcomité 1 sobre el Reglamento Interno y el Subcomité 2 sobre temas y resultados. La reunión adoptó el Reglamento Interno de las reuniones de PrepCom y las disposiciones de acreditación, así como un documento sobre los principios de la Cumbre.

III Actividades preparatorias conducentes a la segunda reunión de PrepCom

7 Del 16 al 18 de septiembre de 2002 se celebró en Ginebra una reunión oficiosa del Subcomité 2, con el fin de avanzar en los trabajos sobre los temas y el contenido de la Cumbre. El informe de dicha reunión puede consultarse en: <http://www.itu.int/wsis/documents>.

8 Se celebraron cuatro conferencias regionales preparatorias antes de PrepCom-2. La Conferencia Ministerial Regional Paneuropea tuvo lugar en Bucarest (7-9 de noviembre de 2002) y fue precedida por dos conferencias subregionales, una celebrada en Bishkek y otra en Moscú. Se organizaron también conferencias regionales preparatorias en Tokyo (13-15 de enero de 2003), República Dominicana (Bavaro, 29-31 de enero de 2003) y Beirut (4-6 de febrero de 2003).

9 Se celebraron además otras reuniones importantes relacionadas con la Cumbre, entre ellas la reunión de la Liga de los Estados Árabes que tuvo lugar en El Cairo (Egipto) del 16 al 18 de junio de 2003, la Conferencia Ministerial sobre el acceso a las TIC para todos, en Pointe-aux-Piments (Mauricio), del 3 al 5 de abril de 2003 y la reunión de los Ministros francófonos, en Rabat (Marruecos), del 3 al 5 de septiembre de 2003.

IV Resultados de la segunda reunión del Comité Preparatorio

10 La segunda reunión del Comité Preparatorio tuvo lugar en Ginebra del 17 al 28 de febrero de 2003. A la reunión asistieron 1 586 participantes: 918 delegados de 146 Estados, así como 60 representantes del sector empresarial, 398 de las ONG y la sociedad civil, 128 de los órganos especializados de las Naciones Unidas y 59 de otras organizaciones intergubernamentales.

11 Los Jefes de Estado de Rumania y Senegal hicieron uso de la palabra ante un Grupo de Estrategas, reunido el primer día de PrepCom-2. El informe de PrepCom-2 y la documentación relativa a la reunión pueden consultarse en <http://www.itu.int/wsis/documents>. Se recibieron más de 100 contribuciones escritas.

12 Los participantes en PrepCom-2 llegaron a un acuerdo con respecto a dos documentos de trabajo que constituirán la base de posteriores discusiones sobre el proyecto de Declaración de Principios y el proyecto de Plan de Acción. Acordaron también que las contribuciones presentadas por los Observadores tendrán que figurar en una sección separada de los documentos revisados y llevarán un título diferente, en el entendimiento de que las propuestas formuladas por los Estados constituirán la base de las negociaciones. Posteriormente se introdujeron mejoras en ambos documentos de trabajo que se publicaron en la siguiente página web de la CMSI el 21 de marzo de 2003: <http://www.itu.int/wsis/hlsoc>.

13 PrepCom-2 creó además un mecanismo intermedio que consiste en un grupo compuesto, en principio, por miembros de la Mesa a fin de seguir mejorando los documentos elaborados para la reunión de un Grupo de Redacción intergubernamental de composición abierta, que se reunió del 15 al 18 de julio de 2003 en la sede de la UNESCO en París. En <http://www.itu.int/wsis/documents> puede consultarse una información más completa sobre ese mecanismo intermedio adoptado por PrepCom-2. Por otra parte, se decidió que PrepCom-3 se celebre del 15 al 26 de septiembre de 2003 en el Centro Internacional de Conferencias de Ginebra (CICG).

14 Al 31 de mayo (plazo fijado por PrepCom-2 para la recepción de comentarios sobre el proyecto de Declaración y de Plan de Acción) se habían recibido 800 páginas de comentarios sobre ambos documentos, y posteriormente se recibieron nuevos comentarios. Con arreglo al mandato establecido por PrepCom-2, todos los comentarios al respecto se han incorporado en la página web de la CMSI (www.itu.int/wsis).

V Resultados de la reunión de París

15 La reunión del Grupo de Redacción intergubernamental de composición abierta se celebró del 15 al 18 de julio en París, gracias a la amable invitación de la UNESCO y con su apoyo logístico. Se pusieron a disposición de la reunión intermedia los tres documentos siguientes:

- i) Una primera versión mejorada del proyecto de Declaración y de Plan de Acción, que no recoge ningún nuevo aporte de interés. Se indicó que ese documento mejorado se había presentado a la Mesa del PrepCom.
- ii) Un documento de referencia en el que figuran todos los comentarios recibidos de los Estados y los Observadores hasta el 31 de mayo. Ese documento se presentó en formato de cuadro y contiene, por una parte, la primera versión del proyecto de Declaración y de Plan de Acción del 21 de marzo y, por la otra, los comentarios sobre el texto presentados por los Estados y los Observadores.
- iii) Un documento que servirá de base para los trabajos de la reunión de París, en el que se recoge la versión mejorada del documento y los comentarios formulados por los Estados directamente integrados en el texto.

16 En la reunión de París se decidió que el texto del proyecto de Declaración de Principios (Revisión 3), tal como se examinó en la última sesión plenaria celebrada el 18 de junio, debería ser enviado, sin modificaciones, a la tercera reunión del PrepCom. El texto íntegro se mantiene entre corchetes.

17 Se decidió también que el proyecto de Plan de Acción examinado en la reunión de París, así como los comentarios formulados en esa ocasión, constituirán la base de una nueva revisión de dicho Plan. El Presidente de la reunión de París se encargará de efectuar esa revisión en colaboración con los coordinadores regionales de la Mesa de la CMSI, con la asistencia de la Secretaría Ejecutiva y la supervisión del Presidente del PrepCom. El objetivo principal de la revisión es mejorar la estructura del proyecto de Plan de Acción y armonizarlo con la Declaración de Principios a fin de que el texto obtenido pueda constituir una base más idónea para las negociaciones en PrepCom-3. El proyecto de Plan de Acción revisado, que se presentará en la próxima reunión de la Mesa prevista para el 22 de agosto de 2003, será publicado en la página web de la Cumbre inmediatamente después de esa reunión.

VI Organización de la Cumbre

18 De conformidad con las decisiones adoptadas por el Consejo de la UIT y las disposiciones de la Resolución 56/183 y 57/238 de la Asamblea General de las Naciones Unidas, la función administrativa principal de la Cumbre Mundial corresponde a la UIT. La Cumbre se celebrará bajo

los auspicios del Sr. Kofi Annan, Secretario General de las Naciones Unidas. El 21 de abril de 2003 se enviaron desde Nueva York cartas de invitación oficiales firmadas por Kofi Annan a los Jefes de Estado y de Gobierno para que participaran en la primera etapa de la Cumbre. En junio de 2003, el Secretario General de la UIT envió una carta de información a los Estados y otras partes interesadas.

19 En julio, el Secretario General Adjunto de las Naciones Unidas para Asuntos Económicos y Sociales, Nitin Desai, fue nombrado Asesor Especial del Secretario General Kofi Annan para la Cumbre Mundial sobre la Sociedad de la Información.

20 La finalidad de la Cumbre propiamente dicha, que tendrá lugar del 10 al 12 de diciembre de 2003 en Ginebra (Palexpo), es incentivar la participación de los Jefes de Estado y los representantes de más alto nivel de organizaciones internacionales, del sector empresarial y de la sociedad civil. Esta reunión de tres días será la ocasión para que los Estados y los Observadores formulen breves declaraciones generales sobre la sociedad de la información. También se propone que en la Cumbre propiamente dicha se celebre un cierto número de debates sobre los temas principales de la sociedad de la información en el marco de una mesa redonda de alto nivel.

21 Se organizará además una serie de actividades paralelas sobre temas relacionados con la Cumbre, que tendrá lugar antes y durante la Cumbre propiamente dicha.

VII Actividades de la UIT

22 En su reunión de 2002, el Consejo de la UIT (Resolución 1196) estableció el Grupo de Trabajo del Consejo sobre la CMSI abierto a la participación de todos los Estados Miembros y Miembros de Sector de la Unión, con el mandato de preparar un marco en el cual se situaría la contribución sustancial de la UIT a las reuniones del Comité Preparatorio, así como de preparar un Informe sobre la marcha de los trabajos. La presidencia del Grupo de Trabajo recayó en el Sr. Yuri Grin (Federación de Rusia) y este Grupo celebró su primera reunión el 21 de septiembre de 2002 en Marrakech.

23 La Conferencia de Plenipotenciarios de la UIT (Marrakech, 2002), en su Decisión 8, decidió comunicar al Grupo de Trabajo citado el marco general que figura en el Anexo 1 a esa Decisión como orientación para que siga perfeccionado la contribución de fondo de la UIT a la Declaración de Principios y al Plan de Acción de la CMSI. El Grupo de Trabajo elaboró dos contribuciones al proceso preparatorio de la CMSI en su reunión de Lisboa, en diciembre de 2002. En la primera se recogía una versión revisada del Anexo 1 a la Decisión 8 (Marrakech, 2002), que describe las actividades pertinentes de la UIT; en la otra, una propuesta relativa a una contribución suplementaria que la UIT podría aportar a la Declaración de Principios y al Plan de Acción. En esa contribución, el Grupo de Trabajo resumió las cuestiones que examinará la Cumbre en tres puntos principales y definió las esferas en las que podrían aplicarse medidas aprovechando las competencias y conocimientos alcanzados por la UIT, a saber, el desarrollo de la infraestructura de las TIC, las normas en materia de equipos, la seguridad de las redes, la ayuda en la elaboración de políticas en el marco de las TIC, el establecimiento de mecanismos destinados a evaluar y cuantificar la brecha digital, etc. Por otra parte, en ese documento se hace referencia a las necesidades especiales de los países en desarrollo y los países menos adelantados y se afirma la necesidad de crear nuevas formas de cooperación y acuerdos de asociación innovadores.

24 El Secretario General de la UIT pronunció un discurso en la sesión plenaria durante PrepCom-2 y presentó los tres objetivos fundamentales fijados por los Estados Miembros de la Unión con respecto a la Cumbre. La contribución sustancial de los Estados Miembros de la UIT y el Informe sobre las actividades de la Unión se incorporaron como Anexo al Informe del Secretario

General de la UIT que se presentó como documento oficial de PrepCom-2 (<http://www.itu.int/wsis/documents>).

25 En su reunión de 2003, el Consejo de la UIT, mediante la Resolución 1207, resolvió encargar al Secretario General y a los Directores de las Oficinas que llevaran a cabo una evaluación de la situación y prepararan un documento de análisis para mostrar de qué manera el programa de trabajo de la UIT contribuye a la consecución de los objetivos esbozados en el proyecto de Plan de Acción de la CMSI, y colocaran ese material en los sitios web de la UIT y de la CMSI para el 1 de julio de 2003. Una vez concluidos esos trabajos, los resultados fueron publicados en <http://www.itu.int/council/wsis/CouncilRes1207/stocktaking.doc>. En la Resolución citada se enuncian otras tareas e iniciativas, entre ellas la preparación de un documento sobre la situación de las actividades de la UIT relacionadas con a la brecha digital.

26 En esa misma Resolución, el Consejo de la UIT alienta al Secretario General, en su calidad de Presidente del COAN, a que estimule a otros organismos de las Naciones Unidas y organizaciones internacionales para que lleven a cabo una evaluación similar de la situación respecto a sus propias actividades, en lo que se refiere al Plan de Acción de la CMSI. (Ver también la Sección VIII del presente Informe).

27 El Secretario General ha tomado numerosas medidas para señalar la Cumbre a la atención de los dirigentes mundiales y las principales partes interesadas, así como a los medios de comunicación. Se presentó un Informe sobre la Cumbre al Consejo Económico y Social (ECOSOC) y el Vicesecretario General hizo mención a la misma ante los miembros de dicho Consejo el 17 de julio de 2003, en Ginebra. Los participantes en las reuniones del G8 en Evian (mayo de 2003) y de los Jefes de Estado y Gobierno de la Unión Africana en Maputo (julio de 2003) reiteraron su apoyo al proceso de la CMSI.

VIII Comité Organizador de Alto Nivel (COAN) de la Cumbre

28 En el Plan de Acción aprobado por la JJE se instaba a la creación de un Comité Organizador de Alto Nivel (COAN) de la Cumbre integrado por los organismos de las Naciones Unidas interesados en participar en la preparación de la CMSI. El COAN, quedó oficialmente constituido en marzo de 2001, está presidido por el Secretario General de la UIT, Sr. Yoshio Utsumi. La labor principal del Comité es, en general, supervisar y coordinar la planificación y los preparativos de la Cumbre en favor del sistema de las Naciones Unidas. (En <http://www.itu.int/wsis/hlsoc> figura una lista de los actuales miembros del COAN y el mandato del Comité.)

29 El COAN celebró dos reuniones de alto nivel, una el 18 de octubre de 2001 (Nueva York) y la otra el 24 de abril de 2003 (París), conjuntamente con las reuniones de la JJE. El 29 de marzo, el 25 de junio, el 5 de julio y el 4 de diciembre de 2002 el COAN llevó a cabo reuniones de trabajo.

30 Por otra parte, el Secretario General de la UIT informa periódicamente a la JJE sobre los preparativos de la Cumbre. Los miembros de la JJE, en su reunión celebrada en París el 25 de abril de 2003, expresaron oficialmente, en lo que concierne a los objetivos de la Cumbre, su profundo interés y gran apoyo y estuvieron de acuerdo con las conclusiones del COAN relativas a la función y contribución permanente de los organismos de las Naciones Unidas en el proceso de la Cumbre, comprendida en particular la formulación de comentarios al respecto.

31 Los miembros del COAN participan activamente en el proceso de preparación de la Cumbre. Las contribuciones escritas que presentaron sobre temas examinados en PrepCom-1 se recogen en el Documento PC-1/CONTR/1-E. Además, nueve miembros del Comité (BIT, UIT, UNCTAD, PNUD, UNESCO, UNITAR, OMS, OMPI y el Banco Mundial) participaron en las

mesas redondas temáticas integradas por numerosas partes interesadas que se organizaron en ocasión de PrepCom-2.

32 El COAN celebró una reunión especial en la UIT (Ginebra) el 23 de junio de 2003 con la finalidad de reunir las contribuciones aportadas por los organismos de las Naciones Unidas al proyecto de Plan de Acción de la CMSI. Trece miembros del COAN presentaron sus aportes al proyecto de Declaración y de Plan de Acción antes del 31 de mayo del año en curso y otros aprovecharon esa ocasión especial para presentar sus contribuciones.

33 Los miembros del Comité respaldaron la recomendación formulada por el Consejo de la UIT en virtud de la cual cada organización debería llevar a cabo una evaluación de sus actividades vinculadas al Plan de Acción de la CMSI. Se indicó la conveniencia de efectuar una recopilación de las actividades pertinentes de los miembros del COAN en la esfera de las TIC, ya que podría servir para concebir proyectos de asociación entre las diversas partes interesadas. Sería conveniente que los resultados de la evaluación que deben llevar a cabo los miembros del Comité estuviesen listos para PrepCom-3. Se ha puesto a disposición de los miembros del COAN el modelo utilizado por la UIT para realizar esa evaluación.

IX SECRETARÍA EJECUTIVA

34 De conformidad con el Plan de Acción adoptado por la JJE, en otoño de 2001 el Secretario General de la UIT creó una Secretaría Ejecutiva en oficinas facilitadas por la UIT en Ginebra. La Secretaría Ejecutiva de la Cumbre es el órgano que organizará gran parte de los preparativos de la CMSI y está integrada por expertos enviados por gobiernos, organismos de las Naciones Unidas, el sector privado y la sociedad civil. En mayo de 2002 se nombró al Sr. Pierre Gagné Director Ejecutivo de la Secretaría Ejecutiva. Se han asignado 21 expertos, con dedicación exclusiva o parcial, para efectuar los trabajos de la Secretaría Ejecutiva (ver el Anexo A).

35 Desde el inicio de los preparativos de la Cumbre, la UIT ha puesto a disposición de la Secretaría (equipo de la CMSI de la UIT) cuatro miembros del personal con dedicación exclusiva y cinco funcionarios de categoría superior suplementarios que dedican aproximadamente la mitad de su tiempo a las actividades vinculadas a la Cumbre. Todos ellos colaboran estrechamente con la Secretaría Ejecutiva. Además, la Unión ha facilitado las instalaciones, los materiales de oficina y las tecnologías de la información y la comunicación necesarias para el funcionamiento de la Secretaría. Por otra parte, la UIT proporciona frecuentemente, en la medida de sus posibilidades, servicios gratuitos para la preparación de la Cumbre. En particular, se ocupan de ofrecer esos servicios las Oficinas del Secretario General y Vicesecretario General; la Unidad de Asuntos Jurídicos; las Unidades de Coordinación, Relaciones Exteriores y Comunicación (CEC); así como los Departamentos de Conferencias, Servicios Comunes y Servicios Informáticos. Durante la etapa ginebrina de la Cumbre, está previsto solicitar a otros funcionarios de la UIT que presten su colaboración en diversas actividades, tales como las tareas vinculadas al protocolo, la logística y la inscripción de los medios de comunicación y de los delegados.

X Finanzas

36 Aparte del apoyo directo y financiero ofrecido por los dos países anfitriones, Suiza y Túnez, la Cumbre y su proceso preparatorio debe organizarse sobre la base de las contribuciones de todas las partes interesadas. En las Resoluciones 56/183 y 57/238 no se prevé ninguna financiación para la Cumbre.

37 En la Resolución 56/183 se invita a la comunidad internacional a aportar contribuciones voluntarias a un Fondo fiduciario especial creado por la UIT en apoyo a la Cumbre, así como a facilitar la participación efectiva de representantes de los países en desarrollo, especialmente de los países menos adelantados. El Fondo fue establecido por la UIT. En el Anexo B se adjunta una lista de las contribuciones.

38 Desde PrepCom-2, los Gobiernos de Bélgica, Italia y Eslovenia se comprometieron a aportar contribuciones por valor de 35 000 EUR, 250 000 EUR y 10 000 CHF, respectivamente. La Organización Meteorológica Mundial ha enviado una segunda contribución que asciende a 15 000 CHF.

39 Mediante el Acuerdo 509, el Consejo de la UIT decidió establecer un mecanismo de garantía crediticia para financiar, llegado el caso, los preparativos de la Cumbre. Con arreglo a la Decisión 6 de la Conferencia de Plenipotenciarios de la UIT de 2002, el Plan Financiero de la UIT para 2004-2007 prevé un crédito de 1 194 000 CHF para la CMSI. Esta suma se asignará a la Cumbre durante el periodo 2004-2007, en espera de una decisión del Consejo de la UIT sobre el presupuesto bienal de la Unión.

XI Conclusión

40 Desde que se iniciaron los preparativos de la Cumbre, se han logrado notables avances para organizar la primera etapa de la misma, tanto en lo que concierne a la organización como a las cuestiones de fondo. El criterio basado en la concertación de numerosas partes interesadas que ha orientado el proceso preparatorio de la Cumbre así como el papel activo desempeñado por los organismos de las Naciones Unidas al respecto ofrecen nuevas posibilidades para la Cumbre, cuya finalidad es alentar a la comunidad internacional a aprovechar, en forma equitativa, las posibilidades ofrecidas por la revolución de las TIC.

Anexos:

Anexo A: Personal asignado a la CMSI

Anexo B: Contribuciones para la Cumbre (al 23 de julio de 2003)

ANEXO A

Personal asignado a la CMSI

1 Personal de la Secretaría Ejecutiva (los sueldos corren a cargo de las entidades a las que pertenecen los funcionarios)

Gobierno de Suiza	3 expertos
Gobierno de España	1 experto
Gobierno de Japón	2 expertos
Gobierno de Rumania	1 experto*
Gobierno de Corea	1 experto
Gobierno de Canadá	1 experto
PNUD	1 experto
UNESCO	1 experto
UNITAR	1 expertos
Sociedad civil (sueldos a cargo del Cantón de Ginebra)	8 expertos
KDDI Corporation [Japón]	1 experto**

* Hasta fines de octubre de 2002
** dedicación parcial

2 Instalaciones de la Secretaría Ejecutiva

Gobierno de Suiza	mobiliario
UIT	oficinas y computadoras

3 Personal de la UIT

Personal de dedicación exclusiva	4
Personal de dedicación parcial	5
Otros	Departamento de Conferencia Departamento de Servicios Comunes Unidad de Coordinación Servicio Jurídico Departamento de Servicios Informáticos

ANEXO B

Contribuciones para la Cumbre (al 23 de julio de 2003)

1 Donaciones al Fondo de la CMSI

1.1 Contribuciones recibidas

En francos suizos

Gobierno de Japón (62 691 030 yenes)	796 835
Unión Africana de Telecomunicaciones (500 USD)	750
Organización Meteorológica Mundial	30 000
Gobierno de Malta	3 512
Gobierno de Portugal	30 000
Unión Postal Universal	15 000
NTT DoCoMo (Japón) (10 000 000 yenes)	124 100
Gobierno de Burkina Faso (10 000 USD)	15 000
Gobierno de Finlandia (170 000 EUR)	245 565
OFCOM (Suiza)	208 173
Gobierno de España (100 000 EUR)	145 200
Gobierno de Suecia (210 000 EUR)	317 660
UNFCU (1 000 USD)	1 390
Agencia Suiza para el Desarrollo y la Cooperación (Suiza)	450 000
Gobierno de Canadá (1 000 000 CAD)	901 917
Total de contribuciones recibidas	3 285 102

1.2 Compromisos

OFCOM (Suiza)	103 687
UIT (Plan Financiero, 2004-2007)	1 194 000
Comisión Europea (300 000 EUR)	432 000
Agencia Suiza para el Desarrollo y la Cooperación (Suiza)	50 000
Gobierno de Bélgica (35 000 EUR)	52 500
Gobierno de Italia (250 000 EUR)	375 000
Gobierno de Eslovenia	10 000
Total compromisos	2 217 187

NOTA - La contribución y el compromiso de Suiza se añaden al apoyo directo y los servicios que dará el país anfitrión para la primera etapa de la Cumbre.

2 Préstamos

Fondo de Capital de Telecom

Hasta 5 000 000 CHF

ANNEX C

HLSOC Preparatory Activity for the World Summit on the Information Society

Yoshio Utsumi

Chairman, High-Level Summit Organizing Committee

SECRETARY-GENERAL, INTERNATIONAL TELECOMMUNICATION UNION

Based on ITU Res. 1207, and on a decision of the HLSOC during its last meeting, held in Geneva on 23 June 2003, UN agencies and other international organization have conducted a stock-taking of their own activities as they relate to the WSIS Plan of Action, to show how their programmes contribute to the fulfilment of the WSIS objectives. Contributions to this report were provided by FAO, ILO, UNIDO, UNECE, and UNCTAD.

The table structure is based on the WSIS draft Action Plan (5 June 2003), available online at:
http://www.itu.int/wsis/documents/doc_multi.asp?lang=en&id=624|626

	<p>ITU: ITU/CITEL Telecommunications Policies for the Americas Region: The Blue Book 2003</p> <p>This 3rd edition of the Americas Blue Book is aimed at enhancing the development of ICTs throughout the region. The report will focus on regulatory challenges in light of convergence, the connectivity agenda and strategies for promoting an information society in the Americas Region.</p>	<p>2. BDT/FOP/ AM</p>	
	<p>ITU: Trends in Telecommunication Reform 2003</p> <p>Explores how regulatory reform contributes to bridging the digital divide, e.g., by promoting the rise of mobile services and keeping regulatory barriers to ICT access low.</p>	<p>BDT/PSF/R RU</p>	
	<p>FAO: Address the five distinct but interrelated priorities identified by FAO and its Members in the framework of the Anti-Hunger Programme launched in 2002. FAO's work in this area comprises an interconnected series of interventions, encompassing firstly national and regional level case studies and pilot interventions on information exchange and communication, and the dissemination of the results obtained at national and regional levels through the Consultation on Agricultural Information Management (COAIM) meetings and secondly a capacity building resource network. The Organization will facilitate the process of brokering and sharing the expertise accumulated by Member States and regional/international organizations.</p>	<p>FAO</p>	
	<p>UNIDO: BISnet Programme</p>	<p>UNIDO/SM E</p>	<p>Capacity Building for Business Information Networking http://www.unido.org/file%5fid=13229)</p>
<p>3. Universal access:</p>	<p>ITU: ITU/CTO Universal Service models</p>	<p>3. BDT/PSF/R RU</p>	<p>3. A three-part model developed jointly by BDT and CTO covering universal access/service policies, regulations, and procedures. http://www.itu.int/ITU-D/treg/Events/Seminars/2002/GSR/index.html</p>
	<p>ITU: Trends in Telecommunication Reform 2003: Promoting Universal Access to ICTs, Practical Tools for Regulators</p> <p>Trends 2003 explores how regulatory reform, especially competition in an effective regulatory environment, can be used to achieve universal access; includes ITU/CTO universal service models on universal service funds used to jump start rural ICT public access projects using minimum subsidy auction mechanisms; as well as principles, policies and procedures for ICT telecentres.</p>	<p>3. BDT/PSF/R RU</p>	<p>http://www.itu.int/ITU-D/treg/</p>

	<p>ITU: GREX Virtual WiFi for Rural and Public Access conference</p>	<p>3. BDT/PSF/R RU</p>	<p>3. GREX Virtual WiFi conference explored regulatory aspects of the use of WiFi technology to achieve rural and public access. http://forum.itu.int/~grex (password only)</p>
	<p>ITU: ITU-D SG Question 7-1/1 Universal Access</p>	<p>3. BDT/PSF/R RU & BDT/IOS/STG</p>	<p>3. Study Group question examines financing for universal access. http://www.itu.int/ITU-D/study_groups/SGP_20_02-2006/SG1/StudyQuestions/SG1Quest.html</p>
	<p>ITU: “Universal Service in the Americas”, jointly published in 2000 by ITU, CITEC and AHCIEC.</p>	<p>3. BDT/FOP/AM</p>	<p>3. A joint publication highlighting the experiences of countries in Americas with Universal Service policies and financing</p>
	<p>ITU: Research project “Mobile overtakes fixed”, June 2003. In 2002, mobile subscribers worldwide have outnumbered fixed-line subscribers. The dimensions in which this cross-over gain significance are access to basic telecommunications services as well as information and communication technologies (ICTs) as a tool for economic and social development. The main issues the project will deal with regard the need for policy changes or for the re-constructions of regulatory frameworks, possible market failures, effects on building infrastructure, and the potential of mobile communication industry to continue its prosperous development in the future.</p>	<p>OSG/SPU</p>	<p>A background paper to serve as an introduction to the topic is available for download, together with other information and links: http://www.itu.int/osg/spu/ni/mobileovertakes/index.html</p>
<p>4. Broadband:</p>	<p>ITU: ITU-D Study Group 2 (Questions 12-1/2 and 20/2)</p>	<p>4. BDT/IOS/STG</p>	<p>4. Definition of Questions & 20/2 12-1/2</p>
	<p>ITU: Organization of a New Initiatives Workshop “Promoting Broadband”, which has been held in Geneva in April 2003. The workshop attempted to identify the characteristics of successful broadband deployment and use around the world, which can be used by other governments, especially in developing countries, in establishing their own broadband policies.</p>	<p>OSG/SPU</p>	<p>Background papers, country case studies and other information are available online at: http://www.itu.int/osg/spu/ni/promotebroadband/</p>

<p>2) Access to information and knowledge</p>			

13. Access to public domain information:	<p>UNECE: Management of statistical information technology systems The ECE strongly focuses on managerial aspects related to statistical information technology. It aims to assist its member countries in the development of an appropriate strategy in the implementation of IT and improve its management in statistical agencies. This includes the definition of suitable architecture for computing, communications and information holding, the choice of appropriate interface standards, the impact of IT development on the organization of statistical services in statistical agencies, the reduction of costs of statistical production, the requalification of statistical staff etc. This initiative draws upon the recommendations of the Conference of European Statisticians for international organizations: - To investigate the possibility of developing a common system (portal) for monitoring data collection activities; - To ensure the development of data sharing models; - To give both NSOs and other data providers easy access to statistics available at the international organizations in a form allowing comparisons and usage in national dissemination programmes; - To put in place secure and operational methods and tools for the transmission of sensitive information, and - To work with national statistical offices to facilitate the reuse of their standard products.</p>	UNECE-Statistical Division	
	<p>FAO: WAICENT was established to improve access to essential documents, statistics, maps and multimedia resources to millions of users around the globe. Today, WAICENT is one of the world's most comprehensive sources of agricultural information, providing access to the accumulated knowledge and expertise of FAO, improving the capacities of decision-makers, professionals and the public-at-large to obtain and use information essential for achieving sustainable agricultural development and helping to combat hunger.</p>	FAO

<p>19. ICT manufacturing capabilities:</p>			
<p>4) Capacity building: human resources development, education, and training</p>			

<p>21. ICTs in education:</p>	<p>ITU: 21&22. ITU organizes regular training courses in ICT-related subjects addressed to policy makers, regulators, operators and service providers. Approximately 200 actions are implemented per year including: face-to-face workshops and seminars; e-learning and coaching; case studies, benchmarks, best practices; regional and global meetings of specialists on ICTs. Subjects range from policy-making and regulation, to new technologies, including business and human resources management and development. A variety of agreements with ITU-D members and academia allow ITU to provide formal education programmes up to the Masters level, which use ICTs and e-learning tools for training.</p>	<p>21&22. BDT/FOP/HRD</p>	<p>21&22. http://web/itu/ITU-D/hrd/</p>
	<p>UNCTAD: Unctad has developed the following courses with distance-learning components: Commercial diplomacy, Trade, environment and development, The implementation of a competition law and policy, Negotiators of international investment agreements; Port Management Programme; Distance-learning instructors' workshop</p>	<p>UNCTAD/SITE</p>	<p>www.unctad.org/trainfortrade</p>
<p>22. Capacity building for ICT use:</p>	<p>UNCTAD: Capacity building in e-business, e-strategies, e-measurements, legal issues; training courses on Practice of e-commerce, Legal aspects of e-commerce, and Use of ICT for ports</p>	<p>UNCTAD/SITE</p>	<p>www.unctad.org/trainfortrade</p>
	<p>UNIDO: BISnet Programme "Capacity Building for Business Information Networking"</p>	<p>UNIDO/SME</p>	<p>http://www.unido.org/filestorage/download/?file%5fid=13229</p>

	<p>FAO: FAO has contributed to the establishment and/or strengthening of national and regional agricultural information centres and systems through its field activities since 1968. The scope of the early field projects was similar to the scope of AGRIS/CARIS, i.e. bibliographic information and information on on-going research.</p> <p>The FAO entity entitled “Facilitation of WAICENT Outreach” provides a strategic approach and mechanism for collaboration, capacity building and training with governments and local communities in providing technical advice and support to strengthen their information management capacities, through the effective use of ICTs. By working with partners, the programme has been assisting in the development of tailored systems according to clients’ needs, such as the development of national agricultural information systems and/or promoting the establishment of regional consortiums on the use of tools for agricultural information management. Annex 1 provides a table of on-going Regular Programme and extra budgetary field projects and activities which include an information management component, as a sample of the on-going support and collaboration with Member Nations undertaken by FAO.</p> <p>In early 2000 a distance learning initiative was launched for strengthening the capacity of national and regional institutions to manage and access agricultural information in the form of an Information Management Resource Kit. The Resource Kit is being developed and sustained by FAO in a consultative process with contributing partner organizations. The Resource Kit will be delivered starting in 2003 as a computer-based distance learning resource made up of a series of discrete modules on CD-ROM or downloadable from the Internet, with each module containing one or more inter-related topics on information management. The modules are being developed using the latest methods in interactive e-learning which are highly suitable for self-paced learning. The modules will be supplemented by Internet-based virtual community for contributors and learners, allowing them to exchange information, and to collaborate with other professionals. Software applications and tools developed by FAO and partner organizations are also being provided with each module. The Resource Kit will contain only non-proprietary materials and be made available free of charge.</p> <p>FAO is bringing about important information-based organizational innovations and partnership with other United Nations organizations, the private sector, and national and international institutions. FAO’s activities cover the use of modern information and communication technologies (ICTs) in the development and promotion of institutional innovations and capacities, such as the Virtual Extension and Research Communication Network (VERCON); farming communities networking programme (FARMNet). Also, FAO has established a working relationship with the private sector in the development of new ways of improving access to information and knowledge.</p>	<p>FAO</p>	<p>www.fao.int/waicent</p>
<p>23. Training ICT specialists</p>	<p>UNCTAD: Training of trainers who will deliver courses with distance-learning components</p>	<p>UNCTAD/S ITE</p>	<p>www.unctad.org/trainfortrade</p>

	<p>ITU in partnership with Cisco is implementing the Internet Training Centers Initiative, aimed at establishing 50 Internet training centers in least developed and developing countries. These centers will be responsible for multiplying ICT knowledge as widely as possible in their communities. ITU/Cisco immediate contribution is to set up the infrastructure of the centers and ensure the training of trainers so critical to this process. Pilot projects with a gender focus have proven to be a great success within this project.</p>	<p>23. BDT/FOP/HRD</p>	<p>23. http://web/ITU-D/itci</p>
	<p>ITU: With the objective to promote understanding to developing countries on the calculation of costs, tariffs and rates, a special “training the trainers” is being executed in order to have specialists on the use of COSITU for English, French and Spanish Speaking countries.</p>	<p>23. BDT/PSF/MEF</p>	
	<p>ITU: The ITU holds bi-annual seminars/workshops on frequency management and radiocommunication systems. Regional seminars/workshops are also held in developing regions, in cooperation with the Telecommunication Development Bureau.</p>	<p>ITU-R</p>	<p>http://www.itu.int/ITU-R/conferences/seminars/index.html</p>
<p>5) Security</p>	<p>ITU: Security standardization covering network security, information security, security management, safety, confidentiality non-repudiation, digital signature etc. These studies are led by ITU-T Study Group 17</p>	<p>TSB/SG17</p>	<p>http://www.itu.int/ITU-T/studygroups/com17/csssecurity.html and http://www.itu.int/ITU-T/studygroups</p>
<p>24. Secure and reliable infrastructure:</p>	<p>ITU: As part of its E-strategies programme, ITU provides assistance to developing countries in the implementation of projects to build security in public networks. Between 2001 and 2003, 10 Operational projects on e-security have been implemented in Africa, Asia, Latin America and the Arab Region. A training workshop for 128 countries was organized in Geneva with the participation of more than 50 industry experts on security and trust. The ITU E-strategies Programme also provides training on IT security and provides guidance to countries and regions in the elaboration of national and regional policies for security on the Internet. Workshops and seminars addressing e-security have been organized in various ITU regions and countries.</p>	<p>24. BDT/PSF/E-STR</p>	<p>24. http://www.itu.int/ITU-D/e-strategies</p>
	<p>ITU: Organization of a New Initiatives Workshop “Creating Trust in Critical Network Infrastructures”, which has been held in Seoul in April 2002</p> <p>The scope of the workshop was focused on these underlying infrastructures, their security, their availability and the public’s trust in them. Questions raised during the workshop ranged from such topics as the definition of terms of reference with regard to critical network infrastructures, the need for a global, international approach to the dissemination of information regarding the security of critical network infrastructures and ways to stimulate international and regional cooperation with respect to critical network infrastructure.</p>	<p>OSG/SPU</p>	<p>Online http://web.itu.int/osg/spu/ni/security/index.html</p>
<p>25. Information Security:</p>	<p>ITU: ITU E-strategies programme assists developing countries in the elaboration of policies and strategies for information security. Many workshops/seminars have been organized dealing with information security and operational projects have been implemented to address information security challenges for various sectors.</p>	<p>25. BDT/PSF/E-STR</p>	<p>25. http://www.itu.int/ITU-D/e-strategies</p>

<p>26. Creating a global culture of cyber-security:</p> <p>27. Fighting cybercrime:</p>	<p>ITU: 26 & 27. As one of the six priority areas for Programme 3, developing countries in Latin America (ASETA Member States), Africa (Mauritania, Cape Verde and Burkina Faso) and Asia (Mongolia) have benefited from ITU assistance in the development of model laws for ICTs (e.g., e-applications) including the prevention of cyber-crime, security and data privacy. For 2003, ITU has ongoing activities for e-legislation in Cameroon. To address global issues in relation to e-security, ITU initiated a multilateral and self-regulatory framework called World e-Trust Memorandum of Understanding.</p>	<p>26&27. BDT/PSF/E-STR</p>	<p>26&27. http://www.itu.int/ITU-D/e-strategies</p>
<p>6) Enabling environment</p>			
<p>28. Good governance:</p>	<p>ITU: “Blue Book on Telecommunication Policies in the Americas (update)”, to be jointly published by ITU and CITEEL at the beginning of 2004.</p> <p>ITU: This 3rd edition of the Americas Blue Book is aimed at enhancing the development of ICTs throughout the region. The report will focus on regulatory challenges in light of convergence, the connectivity agenda and strategies for promoting an information society in the Americas Region</p>	<p>ITU/BDT</p>	
<p>29. Market environment:</p>	<p>ITU: 28 & 29 IsAP Programme 1</p> <p>The overall objective of Programme 1 is fully in line with this section of the declaration. “to create a trustworthy, transparent, and non-discriminatory legal, regulatory and policy environment capable of promoting technological innovation and competition.</p> <p>There are many actions both already underway and planned to fulfill this objective. The preparation of reports (such as the Annual Trends Publication), models (ITU/CTO universal service), case studies identifying best practices for effective regulators, interconnection disputes, etc.</p> <p>ITU/World Bank are undertaking a joint study on the settlement of national disputes with an emphasis on consensus building and alternative dispute resolution.</p>	<p>BDT/PSF/RRU</p>	
	<p>ITU: Organization of a New Initiatives Workshop on the subject of competition policy in telecommunications, which has been held in Geneva in November 2002</p> <p>With the growing number of countries undertaking major liberalization efforts in their telecommunication markets, and the growing trend towards industry consolidation, it has become increasingly important for countries to ensure that they possess the necessary facilities and know-how to efficiently and effectively manage telecommunication competition issues in the public interest. To this end, the</p>	<p>OSG/SPU</p>	<p>For more information, see the Competition Policy in Telecommunications http://www.itu.int/osg/spu/ni/competition/index.html</p>
<p>30. Standardization:</p>	<p>ITU: Standardization work is carried out by 13 study groups in which representatives of the ITU-T membership develop Recommendations for the various fields of international telecommunications on the basis of the study of Questions (i.e. areas for study).</p>	<p>TSB</p>	<p>http://www.itu.int/ITU-T/activities</p>

	<p>UNECE: Standardisation in the field of electronic business The E-Business MoU Management Group works to foster cooperation among standards developers, so as to minimize the risk of divergent and competitive approaches to standardization, to avoid duplication of efforts, and to avoid confusion amongst users of E-Business standards.</p>	UNECE-Trade Development and Timber Division (on the basis of MOU between ISO, IEC, ITU and UNECE)	http://www.itu.int/ITU-T/e-business/mou/index.html

<p>38. E-learning:</p>	<p>ITU: e-Learning Center delivers more than 50 on-line courses per year in English, French and Spanish, not only to transfer technical and managerial know how, but also to disseminate the e-learning culture and promote the use of ICTs in training and education. ITU also provides assistance in e-learning technology policies and will be organizing a regional seminar on e-education for the Arab Region in 2003.</p>	<p>BDT/FOP/HRD</p> <p>BDT/PSF/E-STR</p>	<p>38. http://www.itu.int/ITU-D/hrd/elearning</p> <p>38. http://www.itu.int/ITU-D/e-strategies</p>
	<p>ITU: "Tele-education in the Americas", jointly published in 2001 by ITU and CITELE.</p>	<p>BDT/FOP/AM</p>	

<p>UNECE: Statistical Database UNECE maintains large databases of macro-economic statistics to support the compilation of ECE reference series. This involves the analysis and production of the Economic Survey of Europe, the socio-economic statistics used in the "Trends in Europe and North America" publications" as well as environmental statistics. The primary objective of this activity is to ensure that analyses conducted by ECE are supported by relevant, accurate, timely, understandable and easily accessible data. It also aims at providing user-friendly electronic public access to a core set of the statistics that have been collected to support ECE's analysis programmes. It is expected that the core set of ECE reference series will be extended in the coming two years to include most of the important macro-economic statistics from Eastern-Europe and CIS countries.</p>	<p>UNECE Statistical Division</p>	
<p>UNECE: Macroeconomic database domain</p>	<p>UNECE Statistical Division</p>	
<p>UNECE: Human settlements database domain</p>	<p>UNECE Environment and Human Settlements Division</p>	
<p>UNECE: Socioeconomic database domain</p>	<p>UNECE Statistical Division</p>	
<p>UNECE: Population database domain</p>	<p>UNECE Population Activities Unit (Economic Analysis Division)</p>	
<p>UNECE: Projects in the Framework of The Working Parties On Road Traffic Safety And Transport: The ECE has launched a set of projects targeting its member countries' traffic safety standards. They include a study on the safety implications of the use of mobile phones while driving, the introduction of digital tachographs on commercial vehicles engaged in international transport and the application of informatics in road safety.</p>	<p>UNECE Transport Division</p>	
<p>UNECE: The Gender Statistics Website for Europe and North America is a joint ECE/UNDP project which aims at the overall improvement and availability of gender statistics and key indicators for countries in the ECE region. This project brings together both gender statistics and policies. The main focus is on the production, dissemination and use of gender related data. In addition to statistics, this site elaborates on some of the main gender issues relevant to the UNECE region, and provides examples of policies and other initiatives within that context. This website also links these gender issues to statistical indicators developed by the UNECE/UNDP gender statistics Task Force. The database of gender statistics helps to monitor the situation of women and men in all UNECE member countries, and to evaluate the effectiveness of policies.</p>	<p>UNECE Statistical Division</p>	

<p>39. E-health:</p>	<p>ITU: ITU's e-health activities include the implementation of telemedicine projects in several countries including Mozambique, Malta, Nicaragua, Georgia, Myanmar, Senegal, Bhutan, Uganda and Ukraine. There are ongoing projects for several countries such as Cameroon, Ethiopia, Kenya, Haiti, Rwanda, Venezuela, Sudan, Mauritania, Bulgaria, Zimbabwe and Guinea. Requests for assistance from Lebanon, Tajikistan, Uzbekistan and Latvia are in consideration for future partnership action by ITU. ITU also provides assistance in elaborating national and regional ICT strategies that can enhance health services in developing countries. A regional activity is planned for the Caribbean region later this year. To address common issues related to enhancing health through ICTs, ITU for the third time, will be organizing a World Telemedicine Symposium for Developing Countries from 1-4 December 2003 in Tunis, Tunisia, just before the WSIS. This Telemedicine Symposium is being organized by ITU and WHO with Tunisia as the host country.</p>	<p>39. BDT/PSF/E-STR BDT/PSF/N&T</p>

<p>40. E-employment:</p>	<p>ILO: Tripartite meeting for the media, cultural, graphical sector entitled "The future of work and quality in the information society"</p> <p>The ILO's Governing Body decided, at its 286th Session (March 2003) to hold a week-long Tripartite meeting for the media, cultural, graphical sector entitled "The future of work and quality in the information society". It is being tentatively planned for mid-October 2004, at the ILO in Geneva. This meeting will bring together representatives of governments, employers' and workers' organizations to discuss a background document prepared by the ILO</p>	<p>Sectoral Activities</p>	<p>http://mirror/public/english/dialogue/sector/sectors/media/publ.htm</p> <p>http://mirror/public/english/support/publ/wer/index2.htm</p> <p>http://mirror/public/english/dialogue/sector/sectors/media.htm</p>
<p>41. E-environment:</p>	<p>ITU: Working with industry partners within the framework of the Global e-Sustainability Initiative, ITU plays an important role in the promotion of activities aimed at reducing the environmental effects of telecommunications and ICTs.</p>	<p>41. BDT/PSF/E-STR</p>	<p>41. WTDC-02 Recommendation 7</p>
	<p>UNECE: Internet-based reporting scheme under the Convention on Long-Range Transboundary Air Pollution (LRTAP)</p> <p>The LRTAP project, completed in 2002, aims to address the major environmental problems of the ECE region through an Internet-based approach. In this perspective, input from the Parties to the convention on LRTAP (47 ECE member states) are handled electronically, thus allowing the public to receive better and more up-to-date reports on air pollution abatement strategies in the region.</p>	<p>UNECE-Environment and Human Settlements Division</p>	

<p>Added point</p>	<p>FAO: World Agricultural Information Centre (WAICENT)</p> <p>WAICENT was established to improve access to essential documents, statistics, maps and multimedia resources to millions of users around the globe. Today, WAICENT is one of the world's most comprehensive sources of agricultural information, providing access to the accumulated knowledge and expertise of FAO, improving the capacities of decision-makers, professionals and the public-at-large to obtain and use information essential for achieving sustainable agriculture development and helping to combat hunger.</p> <p>Since 1996 the FAO Internet site has been improved in terms of quantity and quality of information. There are presently 500,000 HTML pages including dynamic pages on the FAO Web site comprising 3200 sites traceable through the WAICENT Information Finder, 87 databases available on the site, and 12,000 full text documents available in the Organization's Corporate Document Repository. In December 1999, visits to the FAO Web site averaged 360,000 (6.5 million hits) per month and Encyclopaedia Britannica ranked it amongst the top Web sites. In the first quarter of 2003, hits were recorded at 40.4 million; during the second quarter of 2003, Web site hits reached 44.4 million.</p> <p>Bridging the Rural Digital Divide</p> <p>FAO has prepared a programmatic framework which encompasses its work to empower rural people to access, use, and manage agricultural information and in support of food security and the eradication of poverty. FAO aims to contribute to achieve the goals of the World Summit on the Information Society, as well as the Millennium Development goals, and particularly to address the five distinct but interrelated priorities identified by FAO and its Members in the framework of the Anti-Hunger Programme launched in 2002. FAO's work in this area comprises an interconnected series of interventions, encompassing firstly national and regional level case studies and pilot interventions on information exchange and communication, and the dissemination of the results obtained at national and regional levels through the Consultation on Agricultural Information Management (COAIM) meetings and secondly a capacity building resource network. FAO aims to have a leading role in bridging the rural digital divide, given its international role in the elimination of hunger, seeking to establish collaborative partnerships to assist with the task of bridging the rural digital divide. The Organization will facilitate the process of brokering and sharing the expertise accumulated by Member States and regional/international organisations.</p>		
<p>8) Cultural identity and linguistic diversity, local content and media development</p>	<p>ITU: Trends in Telecommunication Reform 2003</p>	<p>8) BDT/PSF/R RU</p>	<p>8) Trends 2003 focuses on need for rural telecentres to provide content of relevance to local community and the need of local participation in telecentre projects.</p>
<p>42. Cultural and linguistic diversity.</p>			

<p>43. Content:</p>	<p>ITU/WIPO Joint Symposium on Multilingual Domain Names, held in Geneva on December 2001.</p> <p>Domain names, on which Internet mail and web addresses are based, currently use a restricted subset of Latin (ASCII) characters — even for countries that do not use Latin characters in their written language. While Internet content such as web pages have been internationalized and made available in many languages, it is only recently that there have been a number of initiatives to similarly internationalize the Internet’s domain name system. The implementation of multilingual domain names raises a number of complex issues: the objective of the Symposium was to raise wider understanding of the issues as well as offer an opportunity for further dialogue on possible approaches to these issues.</p>	<p>OSG/SPU – ITU-T</p>	<p>ITU and WIPO background papers are available online at http://www.itu.int/mlds/</p>
	<p>UNECE: Statistical Metadata This projects ai at standardisation of formats and methods and minimum requirements for methodological and descriptive metadata disseminated along with the statistical data.</p>	<p>UNECE: Statistical Division</p>	
	<p>FAO: Information Dissemination and Management Networks and Systems</p> <p>Under the WAICENT corporate framework, collaborative arrangements between FAO and external partners have developed and strengthened information networks and systems. The following list gives some examples of established networks, among others:</p>	<p>FAO</p>	
	<p>- Gender and ICTs: FAO has carried out multifaceted activities in the field of access to information technologies and improving the collection, dissemination and use of gender disaggregated data. The Dimitra project, a communication and information project aiming at increasing rural women´s visibility, has set up an on-line data base of organizations, projects, publications on FAO´s Web sites and published newsletters to about 4000 contacts in the world. ICTs are also used for e-forum conferences. The Gender and Population Division and the Statistics Division of FAO are also currently preparing a "Lessons learned" document on national experiences with incorporating gender considerations into agricultural censuses and surveys.</p>		<p>www.fao.org/sd</p>
	<p>- Access to Global On-line Research in Agriculture (AGORA): The Director-General will launch the AGORA initiative in October 2003. AGORA is a global partnership to provide free or reduced-price journal access to developing countries. It is a programme of FAO in collaboration with major scientific publishers, Cornell University, Mann Library, the World Health Organization (WHO). The long-term goal of the AGORA programme is to increase the quality and effectiveness of agricultural research and training in low-income countries, and in turn, to improve food security</p>		<p>www.fao.org</p>

<p>- <u>International Information System for the Agricultural Sciences and Technology (AGRIS)</u>: AGRIS is the international information system for the agricultural sciences and technology. It was created by the Food and Agriculture Organization of the United Nations (FAO) in 1974, to facilitate information exchange and to bring together world literature dealing with all aspects of agriculture. AGRIS is a cooperative system in which participating countries input references to the literature produced within their boundaries and, in return, draw on the information provided by the other participants. To date, 240 national, international and intergovernmental centres participate from all over the world.</p>		<p>www.fao.org/agris</p>
<p>- <u>Global Information and Early Warning System on Food and Agriculture (GIEWS)</u>: GIEWS is an information system for compiling and exchanging information that is essential for providing regular bulletins on food crop production and markets at the global level, and situation reports on a regional and country-by-country basis. GIEWS has developed an integrated information system known as "GIEWS Workstation" which consists of customized tools that include country cereal balance sheets, software for the display and analysis of maps and satellite images and an electronic news service. This is an important system for crop and food supply monitoring.</p>		<p>www.fao.org/giews</p>
<p>- <u>Food Insecurity and Vulnerability Information and Mapping System (FIVIMS)</u>: FIVIMS is a programme promoting systems that assemble, analyse and disseminate accurate and timely information related to food insecurity and vulnerability. FIVIMS is a framework within which a wide range of activities can be carried out, both at the international and national level. Two case studies were produced "Food Security Impact of Productivity Improvement on Small Farms" and "Use of Existing Information Systems for FIVIMS-related Work". A handbook on operationalizing food security information and early warning systems is available and associated training has been provided in various countries. Extensive work has been carried out related to vulnerable groups profiling, improving information in complex emergencies and on enhancing sustainable livelihoods.</p>		<p>www.fivims.org</p>
<p>- <u>World Information and Early Warning System on Plant Genetic Resources (WIEWS)</u>: is a world-wide dynamic mechanism to foster information exchange among member countries, by gathering and disseminating information on Plant Genetic Resources for Food and Agriculture, an instrument for the periodic assessment of the state of the world's PGRFA. WIEWS interface is available in four languages (Arabic, English, French and Spanish). Also, a new seed module (more than 65,000 varieties) is currently being developed and will be integrated within WIEWS.</p>		<p>www.fao.org/wiews</p>

	<p>- Information Network on Post-harvest Operations (INPhO): is an interactive platform to disseminate technical information on post-harvest operations. The INPhO Web site is the starting point for any post-production search and offers information systems support to the network of international and national organizations participating in this important programme world-wide. Some activities have been contributing to the improvement of access to agricultural information such as the inclusion of three new chapters in the Post-harvest Compendium of INPhO including the Post-harvest Operations; Potatoes Post-harvest Operations; and Millet Post-harvest Operations. Also, for those interested in accessing equipment, tools and materials needed in the post-harvest sector, the INPhO Equipment Database is available and operational for Asia and Africa.</p>		www.fao.org/inpho
	<p>- Fisheries Global Information System (FIGIS): is a global information system on fisheries aimed at providing policy makers with timely, reliable strategic information on fishery status and trends on a global scale. Designed as a policy-based information system, it will enable policy makers to make informed decisions about the key challenges of sustainable development, and will support their shifting towards sustainability-centred management by providing them with a single entry point to strategic data, information, analyses and reviews of fisheries issues and trends.</p>		www.fao.org/figis
44. Media:	<p>UNECE: Dissemination of statistical commentary The Internet dissemination of data requires improved methodologies for accompanying comments disseminated with the data, in order to ensure better interpretation of statistics.</p>	UNECE: Statistical Division	
9) Identifying and overcoming barriers to the achievement of the Information Society with a human perspective			
(Empty for the moment)			
B. Objectives			
45. Examples of possible concrete and comprehensive actions could include:	<p>ITU: A number of ITU/BDT/MEF studies and reports have proposed targets and benchmarks for ICT over the years in line with those mentioned in the WSIS draft Action Plan.</p>	45. BDT/PSF/ MEF	
a) Benchmarks:	<p>ITU: World Telecommunication Indicators (WTI) database</p>	BDT	http://www.itu.int/ITU-D/ict/
	<p>UNCTAD: ICT Benchmarking tool</p>	UNCTAD/D ITE/CSTD	http://www.tte40.net/un/
b) E-Strategies			

	<p>ITU: Country Case Studies</p> <p>Telecommunication case studies provide an analysis of modern day issues in telecommunications — and how they have been addressed in individual countries. The goals are to raise awareness among government officials, regulators and industry players in developing countries and to provide policy-makers and other players with in-depth substantive information</p>	<p>OSG/SPU – BDT/MEF and RRU</p>	<p>Online at: http://www.itu.int/osg/spu/casestudies/index.html</p>
	<p>ITU: Workshop on The Internet in South East Asia held in Bangkok, Thailand, from 21 to 23 November 2001</p> <p>The workshop presented and discussed the results of the ITU Internet Case Studies carried out in the Association of South East Asian Nations (ASEAN) in 2001. Comparative results were presented for several South East Asia countries. The workshop covered a variety of Internet-related issues, with the objective to understand the factors that help to accelerate, or which may retard, the development of the Internet in countries at different stages of economic and social development. The workshop was primarily aimed at policy and regulatory staff responsible for Internet development in their countries.</p>	<p>BDT/MEF – OSG/SPU</p>	<p>Online resources and presentations: http://www.itu.int/asean2001/documents/index.html. Internet case studies: http://www.itu.int/asean2001/reports/index.html.</p>
	<p>UNCTAD: Capacity building for the development of national e-strategies in developing countries; assisting countries in designing their e-strategies, providing guidance and producing guidelines to that end.</p>	<p>UNCTAD/SITE/ECB</p>	<p>www.unctad.org/ecommerce</p>
<p>c) Global Digital Compact:</p>	<p>ITU: IsAP Programme 1</p> <p>45c) The language promoting the launching of a Global Digital Compact gives the example, “governments create stimulating regulatory environment.” Programme 1, dedicated to the regulatory environment, could play a leading role in any action to achieve this development goal.</p>	<p>BDT/PSF/RRU</p>	
<p>d) Digital development index</p>	<p>ITU: The Knowledge Center activity</p>	<p>45d) BDT/PSF/RRU</p>	<p>http://www.itu.int/ITU-D/treg/Events/Survey/survey.asp</p>
	<p>ITU: World Telecommunication Development Reports (forthcoming issue: December 2003)</p>	<p>45d) BDT/PSF/MEF - SPU</p>	<p>WDTR 2002: http://www.itu.int/ITU-D/ict/publications/wtdr_02/index.html</p>
	<p>UNCTAD: Development of information and communication technology indices.</p>	<p>UNCTAD/DITE</p>	<p>www.unctad.org/stdev</p>
<p>e) Handbook on good practices and success stories:</p>	<p>ITU: The Global Regulators Exchange (G-REX)</p> <p>45e) The Global Regulators Exchange (G-REX), a password-protected website for national regulatory authorities and policy makers, has been very successful in facilitating an exchange of best regulatory practices through its hotline and online conferences. Regulators and policy makers have shared information on their challenges and success stories. G-REX conferences to be launched this year aim to identify best practices in addressing specific regulatory challenges</p>	<p>45e) BDT/PSF/RRU</p>	<p>http://forum.itu.int/~grex(password only)</p>

	<p>ITU Success stories website.</p> <p>This website is designed to gather some of the ongoing and successful ICT development projects taking place around the world, and showing how ICTs, and the Internet in particular, are being used to help bridge the global digital divide.</p>	OSG/SPU	<p>Online:</p> <p>http://www.itu.int/osg/spu/wsis-themes/ict_stories/index.html</p>
	<p>ITU: Trends in Telecommunication Reform</p> <p>Each year, the annual publication Trends in Telecommunication Reform identifies good practices and success stories in using regulatory reform to achieve ICT development</p>	45e) BDT/PSF/R RU	http://www.itu.int/ITU-D/treg/publications/PublicationIndex.html

<i>C. Strategies programmes, methods for implementation</i>			
46.			
47. Governments	<p>ITU E-strategies assists developing countries in elaborating national information and communication technology strategies with emphasis on harnessing the potentials of ICTs for socio-economic development and taking into account the needs of various sectors. Assistance in providing guidance in the elaboration of national and regional e-strategies has been provided to Algeria, Andean Region in Latin America, Asia Pacific Region, Burundi, Cameroon, Costa Rica and Rwanda.</p>	BDT/PSF/E-STR	<p>47. National and regional workshops and seminars have been organized to address issues aimed at putting in place comprehensive strategies for ICT development.</p> <p>http://www.itu.int/ITU-D/e-strategies</p>
	<p>UNIDO: BISnet Programme</p>	UNIDO/SM E	<p>Capacity Building for Business Information Networking</p> <p>http://www.unido.org/filestorage/download/?file%5fid=13229</p>
48. Private sector	<p>UNIDO: BISnet Programme</p>	UNIDO/SM E	<p>Capacity Building for Business Information Networking</p> <p>http://www.unido.org/filestorage/download/?file%5fid=13229</p>

49. Civil society	<p>UNECE: Databank on Regulations Concerning the World Forum for Harmonization of Vehicle Regulations (WP.29) is under implementation at the UNECE. The databank offers member states, private operators, NGO's and industry associations an easy and versatile tool to access the regulations on the basis of their subject through adequate EDP and EDI means.</p>	UNECE: Transport Division	
50. Mass media	<p>UNECE: Dissemination to information media This project aims at sharing the best practices among national statistical offices in the field of contacts with information media using Internet and other technological tools</p>	UNECE: Statistical Division	
51. Multilateral organizations	<p>ITU: IsAP Programme 51. Programme 1 strives to provide “guidance, facilitating peer dialogue, exchange of experience and best practices...” The RRU/Programme 1 works closely with organizations such as the Commonwealth Telecommunication Organisation, Inter/American Telecommunications Commission (CITEL), the World Bank and the European Commission in providing information-sharing mechanisms for national regulatory authorities and policy makers.</p>	51. BDT/PSF/R RU	<p>http://www.itu.int/itudoc/itu-d/publicat/b_book.html http://www.itu.int/ITU-D/treg/Events/Seminars/2002/GSR/Documents/07-USModel_part1_doc.pdf http://www.itu.int/ITU-D/treg/Events/Seminars/2003/Gambia/index.html</p>
	<p>ITU: . The Internet Case Studies and regional and global development reports have proposed recommendations, offered best practice examples, etc., as mentioned in this point</p>	51. BDT/MEF	
52. E-strategies and performance monitoring:	<p>ITU: . Indicators for monitoring performance are on-going part of the work</p>	52. BDT/MEF	
	<p>UNECE: ICT strategy for the UNECE UNECE is finalising its ICT strategy in view of putting its infrastructure, services and applications to the level which will provide work environment and client services adequate to the present development of ICT.</p>	UNECE: Information Systems Unit	
53. Specific initiatives:			
<i>D. International cooperation and financing</i>			
54. International cooperation:		54. BDT/PSF/R RU	
55. Financing:	<p>ITU: An initiative for financing telecommunication development is being executed with the objective to evaluate the opportunities opened up by telecommunication development and the financing required, in order to draw up a global strategy involving the participation of public and private sectors, regional and international organizations, financial institutions, operators, service providers, etc., identifying partnerships and establishing mutual commitments.</p>	55. BDT/PSF/ MEF	

<p>56. Technology transfer:</p>	<p>ITU: Pricing of telecommunication services based in IP networks: the objective of this study and direct assistances to countries, is to provide understanding to regulators, operators and service providers on how to use IP-based networks as a vehicle for real time services by creating profits.</p>	<p>56. BDT/PSF/MEF</p>	
<p><i>E. Follow up</i></p>			
<p>57. Indicators:</p>	<p>UNECE: Monitoring the Information Society: Data, Measurement and Methods(Geneva, 8-9 December 2003) In view of the upcoming World Summit on the Information Society in Geneva (10-12 December 2003) and the Declaration of Principles and Plan of Action that will result, there will be a need to monitor the progress made towards the goals stated in Geneva (2003) by the next Summit in Tunis (2005) and beyond. In light of this, it is fundamental that Information and Communication Technology (ICT) data be brought into the realm of official statistics, so that current global gaps in the data can be identified and closed. The first step in making this happen is a fundamental stock-taking exercise. This workshop will comprise a variety of themes surrounding ICTs, including (i) the role of ICTs in economic and societal transformations, (ii) individual and household use of ICTs, (iii) business usage of ICTs, and (iv) measuring social implications of ICTs (see preliminary programme attached to this information notice). Within each theme, some basic questions will be asked. Can critical data or indicators that currently do not exist but are desirable be identified? Are these even measurable? How is it possible to encourage countries that don't currently collect the relevant data to do so within their official statistics programmes? The main participants of the Workshop will be representatives from national statistical offices, policy makers and analysts in the ICT area. The key message of the Workshop will be the need for official statistics to be a central player in shaping the information society from the point of view of (i) independent information as a basic condition for democracy and other aspects of the UN Fundamental Principles of Official Statistics, and (ii) statistical monitoring with the view to obtain international benchmarking and to assess ICT trends from a core set of internationally agreed indicators.</p>	<p>UNECE: Statistical Division (Cooperation between the UNECE, ITU, OECD, UNESCO, UNCTAD and Eurostat)</p>	<p>http://wwwdev.unece.org/stats/documents/ces/sem.52/inf.1.e.pdf</p>
	<p>UNCTAD: Capacity building and assistance to developing countries in developing mechanisms for monitoring and measuring the information society, particularly statistical indicators on the use of ICT by the business sector.</p>	<p>UNCTAD/SITE/ECB</p>	<p>www.unctad.org/ecommerce</p>
<p>58. Reporting:</p>	<p>ITU: Annual Regulatory survey</p>	<p>ITU BDT/PSF/R RU</p>	<p>58. Data collected in the annual regulatory survey could assist in the assessment of universal accessibility to ICTs. http://www.itu.int/ITU-D/treg/Events/Survey/survey.asp</p>

59. Support for implementation:	FAO: Intergovernmental Process FAO established the Consultation on Agricultural Information Management (COAIM) as an intergovernmental process to discuss and set policies related to management of and access to agricultural information. COAIM is a biennial meeting that brings together policy-makers, funding agencies and major players in all relevant fields of agricultural information, as well as observers from the United Nations and the non-governmental organization community. Delegates at the Second COAIM held 23-25 September 2002 endorsed nineteen specific recommendations calling for improved effectiveness of information dissemination in national agricultural development programmes.	FAO	www.fao.org/coaim
