OF ITU

WORLD TELECOMMUNICATION STANDARDIZATION
ASSEMBLY
Florianópolis, 5-14 October 2004

**Resolution 53 – Establishment of a seminar and
workshop coordination committee**

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

RESOLUTION 53

Establishment of a seminar and workshop coordination committee

(Florianópolis, 2004)

The World Telecommunication Standardization Assembly (Florianópolis, 2004),

considering

- a) that it is a priority for countries, particularly developing countries¹, to participate in, and to have access to detailed information on, seminars and workshops organized by the ITU Telecommunication Standardization Sector (ITU-T);
- b) that such events are crucially important for the effective dissemination of all information designed to provide detailed and up-to-date knowledge of developments in the field of technical standardization;
- c) that mechanisms should be identified to encourage developing countries to participate more actively in the definition and organization of these events;
- d) that ITU-T should maintain its pre-eminence by attracting new and forward-looking studies in telecommunications and information technology,

noting

- a) the difficulties that countries, particularly developing countries, encounter in terms of being aware of the latest standardization trends and in terms of their effective and efficient participation in such activities;
- b) the need to prioritize the themes and issues of interest to the ITU membership in order to optimize the use of allocated resources for the implementation of workshop and seminar activities,

recognizing

- a) that there is a need to identify an appropriate mechanism for improving the process for the holding of seminars and workshops, which play a significant role in disseminating information about ITU-T's activities for the benefit of the ITU-T membership;
- b) that ITU-T's current structure does not include a standing group specifically responsible for supervising the organization of seminars and workshops and for disseminating the related outcomes and documentation;
- c) the need to continuously monitor market needs and advances and trends in telecommunications and information technology,

bearing in mind

- a) that, in accordance with Nos. 197E and 197F of the ITU Convention, the Telecommunication Standardization Advisory Group (TSAG) shall provide guidelines for the work of study groups and recommend measures to foster cooperation and coordination with other standardization bodies;

¹ In this resolution, the term "developing countries" is used in the generic sense and includes also countries with economies in transition and least developed countries.

- b) that Nos. 191A and 191B of the Convention empower the World Telecommunication Standardization Assembly (WTSA) to create “other groups” and to appoint their chairmen and vice-chairmen;
- c) that, in accordance with Resolution 22 of this assembly, TSAG shall issue advice on study group schedules to meet standardization priorities;
- d) that, in Resolution 123 (Marrakesh, 2002), the Plenipotentiary Conference resolved to instruct the Secretary-General and the Directors of the three Bureaux to work closely with each other in pursuing initiatives that assist in bridging the standardization gap between developing and developed countries,

resolves

to establish a seminar coordination committee (SCC), under the supervision of TSAG, to be specifically responsible for agile monitoring of technological evolution, transparent oversight of the organization of seminars and workshops, and continued dissemination of outcomes and related documentation,

instructs the Telecommunication Standardization Advisory Group

to implement, within one year, the seminar coordination committee (SCC), to define its terms of reference and working methods and to appoint its management team,

instructs the Director of the Telecommunication Standardization Bureau

to work closely with the Directors of the other Bureaux and provide all necessary support and advice to the committee in its task of encouraging and strengthening the participation of countries in the workshop and seminar activities of ITU-T within the existing budgetary allocation.
