Resolution 55 – Mainstreaming gender in ITU-T activities

FOREWORD

The International Telecommunication Union (ITU) is the United Nations specialized agency in the field of telecommunications. The ITU Telecommunication Standardization Sector (ITU-T) is a permanent organ of ITU. ITU-T is responsible for studying technical, operating and tariff questions and issuing Recommendations on them with a view to standardizing telecommunications on a worldwide basis.

The World Telecommunication Standardization Assembly (WTSA), which meets every four years, establishes the topics for study by the ITU-T study groups which, in turn, produce Recommendations on these topics.

The approval of ITU-T Recommendations is covered by the procedure laid down in WTSA Resolution 1.

RESOLUTION 55

Mainstreaming gender in ITU-T activities

(Florianópolis, 2004)

The World Telecommunication Standardization Assembly (Florianópolis, 2004)

noting

- a) Resolution 70 (Rev. Marrakesh, 2002) of the Plenipotentiary Conference, on the inclusion of gender perspective in the work of ITU;
- b) Resolution 44 (Istanbul, 2002) of the World Telecommunication Development Conference, which resolved that the ITU Telecommunication Development Sector (ITU-D) should include gender initiatives in each of the programmes established under the Istanbul Action Plan,

noting further

- a) Resolution 1187, adopted by the Council at its 2001 session, on gender perspective in ITU human resources management, policy and practice, which requests the Secretary-General to allocate appropriate resources, within existing budgetary limits, to establish a gender unit with full-time dedicated staff;
- b) the Memorandum of Understanding between ITU, the United Nations Development Programme (UNDP) and the United Nations Development Fund for Women (UNIFEM), signed in July 2000, which promotes cooperation to enable women to participate in, and benefit from, the current communications revolution,

recognizing

- a) that the role of standardization is essential for effective development of globalization and information and communication technologies;
- b) that many women, including women engineers, are competent to contribute to this development;
- c) that statistically very few women are included in the national and international standardization processes,

considering

- a) the progress made by ITU, particularly in ITU-D, in awareness-raising on gender issues, specifically over the last six years, in increasing women's participation in international forums, and in studies, projects and training;
- b) the Declaration of Principles and Action plan of the World Summit on the Information Society,

resolves

that ITU-T should encourage the inclusion of a gender perspective in the work of the Telecommunication Standardization Advisory Group and the study groups of the ITU Telecommunication Standardization Sector over the next four-year cycle,

invites the Director of the Telecommunication Standardization Bureau

1 to encourage the mainstreaming of a gender perspective in the work of the Telecommunication Standardization Bureau in accordance with the principles already applied in ITU;

2 to encourage Member States and Sector Members to contribute to meeting gender-equality objectives through participation of qualified women and men in standardization activities as well as in leadership positions,

invites Member States and Sector Members

to support active involvement of women experts in standardization groups and activities.
