GENERAL INFORMATION

Lists annexed to the ITU Operational Bulletin

Note from TSB

A. The following Lists have been published by TSB or BR as Annexes to the ITU Operational Bulletin (OB):

OB No.

- 1295 List of International Signalling Point Codes (ISPC) (According to Recommendation ITU-T Q.708 (03/1999)) (Position on 1 July 2024)
- 1293 List of Signalling Area/Network Codes (SANC) (Complement to Recommendation ITU-T Q.708 (03/1999)) (Position on 1 June 2024)
- 1283 List of Issuer Identifier Numbers (In accordance with Recommendation ITU-T E.118 (05/2006)) (Position on 31 December 2023)
- 1280 Mobile Network Codes (MNC) for the international identification plan for public networks and subscriptions (According to Recommendation ITU-T E.212 (09/2016)) (Position on 15 November 2023)
- 1251 Status of Radiocommunications between Amateur Stations of Different Countries (In accordance with optional provision No. 25.1 of the Radio Regulations) and Form of Call Signs assigned by each Administration to its Amateur and Experimental Stations (Position on 1 September 2022)
- 1125 List of terrestrial trunk radio mobile country codes (Complement to Recommendation ITU-T E.218 (05/2004)) (Position on 1 June 2017)
- 1117 List of mobile country or geographical area codes (Complement to Recommendation ITU-T E.212 (09/2016)) (Position on 1 February 2017).
- 1114 List of Recommendation ITU-T E.164 assigned country codes (Complement to Recommendation ITU-T E.164 (11/2010)) (Position on 15 December 2016)
- 1096 Legal time 2016
- 1060 List of ITU Carrier Codes (According to ITU-T Recommendation M.1400 (03/2013)) (Position on 15 September 2014)
- 1015 Access codes/numbers for mobile networks (According to ITU-T Recommendation E.164 (11/2010)) (Position on 1 November 2012)
- 1002 List of Country or Geographical Area Codes for non-standard facilities in telematic services (Complement to ITU-T Recommendation T.35 (02/2000)) (Position on 15 April 2012)
- 1001 List of the national authorities designated to assign ITU-T Recommendation T.35 terminal provider codes (Position on 1 April 2012)
- 1000 Service Restrictions (Recapitulatory list of service restrictions in force relating to telecommunications operation) (Position on 15 March 2012)
- 994 Dialling Procedures (International prefix, national (trunk) prefix and national (significant) number) (In accordance with ITU-T Recommendation E.164 (11/2010)) (Position on 15 December 2011)
- 991 Call-Back and alternative calling procedures (Res. 21 Rev. PP-06)
- 980 List of Telegram Destination Indicators (In accordance with ITU-T Recommendation F.32 (10/1995)) (Position on 15 May 2011)
- 978 List of Telex Destination Codes (TDC) and Telex Network Identification Codes (TNIC) (Complement to ITU-T Recommendations F.69 (06/1994) and F.68 (11/1988)) (Position on 15 April 2011)
- 977 List of Data Network Identification Codes (DNIC) (According to ITU-T Recommendation X.121 (10/2000)) (Position on 1 April 2011)
- 976 List of Data Country or Geographical Area Codes (Complement to ITU-T Recommendation X.121 (10/2000)) (Position on 15 March 2011)
- 974 List of Names of Administration Management Domains (ADMD) (In accordance with ITU-T F.400 and X.400 series Recommendations) (Position on 15 February 2011)
- 955 Various tones used in national networks (According to ITU-T Recommendation E.180 (03/1998)) (Position on 1 May 2010)
- 669 Five-letter Code Groups for the use of the International Public Telegram Service (According to ITU-T Recommendation F.1 (03/1998))

B. The following Lists are available online from the ITU-T website:

List of ITU Carrier Codes (ITU-T Rec. M.1400)	www.itu.int/ITU-T/inr/icc/index.html
Bureaufax Table (ITU-T Rec. F.170)	www.itu.int/ITU-T/inr/bureaufax/index.html
List of recognized operating agencies (ROAs)	www.itu.int/ITU-T/inr/roa/index.html

Approval of ITU-T Recommendations

By AAP-55, it was announced that the following ITU-T Recommendations were approved, in accordance with the procedures outlined in Recommendation ITU-T A.8:

- ITU-T G.9930 (07/2024): Point to point fibre-in-the-premises
- ITU-T G.9941 (07/2024): High speed fibre-based in-premises transceivers - physical layer specification
- ITU-T G.9942 (07/2024): High speed fibre-based in-premises transceivers - data link layer
- ITU-T H.273 (V4) (07/2024): Coding-independent code points for video signal type identification
- ITU-T J.153 (06/2024): System architecture for cable television services to use IMT-2020 radio system
- ITU-T J.198.2 (2024) Cor. 1 (06/2024)
- ITU-T J.298 (06/2024): Requirements and technical specifications of a cable TV hybrid set-top box compatible with terrestrial and satellite TV transport
- ITU-T J.1036 (2023) Cor. 1 (06/2024)
- ITU-T J.1291 (06/2024): Requirements and functional specification of Audio and Video interface on cable set-top box
- ITU-T J.1305 (2023) Cor. 1 (06/2024)
- ITU-T J.1306 (2023) Cor. 1 (06/2024)
- ITU-T J.1311 (06/2024): Technical Requirements for Cloud Gaming Service Platforms
- ITU-T J.1630 (06/2024): End to End network characteristics requirement for video services over integrated broadband cable network
- ITU-T Q.3064 (06/2024): Signalling architecture of NICE (Network intelligence capability enhancement) in support of awareness capabilities
- ITU-T Q.3648 (06/2024): Signalling architecture of data channel enhanced IMS network
- ITU-T Q.3742 (06/2024): Signalling requirements and data models for SD-DCI service
- ITU-T Q.4047 (06/2024): Interoperability testing between software-defined networking (SDN) and hypervisor based computing virtualization
- ITU-T Q.4072 (06/2024): Monitoring Parameters for Intelligent Speech in Future Networks
- ITU-T Q.4073 (06/2024): Framework for interconnection testing of Voice, Video over 5G
- ITU-T Q.4074 (06/2024): Testing of robotics based on a model network
- ITU-T Q.4075 (06/2024): Test specifications for remote testing of Internet of Things using the probes
- ITU-T Q.4102 (2022) Amd. 1 (06/2024)
- ITU-T Q.4103 (2022) Amd. 1 (06/2024)
- ITU-T Q.4104 (06/2024): Hybrid peer-to-peer (P2P) communications: Signalling requirements for data streaming service
- ITU-T Q.4105 (06/2024): Hybrid peer-to-peer (P2P) communications: Signalling requirements for feature-based video services
- ITU-T Q.4142 (06/2024): Signalling architecture for service orchestration in computing power network
- ITU-T Q.4143 (06/2024): Signalling requirements for cloud-based control plane and pooled user plane of vBNG (virtualized Broadband Network Gateway)
- ITU-T Q.5009 (06/2024): Signalling Requirements and Protocols for enhanced quality assured connections in IMT-2020 network and beyond
- ITU-T Q.5011 (06/2024): Signalling requirements and interfaces of edge-aided energy management agent at intelligent edge computing
- ITU-T Q.5012 (06/2024): Signalling architecture of WLAN access network for interworking with 5G network

- ITU-T Q.5013 (06/2024): Signalling Requirements and Protocol procedures for two-way QoS mechanism between access networks and core networks in IMT-2020 network and beyond
- ITU-T Q.5029 (06/2024): Data management interfaces in digital twin smart aquaculture system with intelligent edge computing
- ITU-T Q.5030 (06/2024): Data management interfaces for intelligent edge computing-based flowing-water smart aquaculture system
- ITU-T Q.5031 (06/2024): Protocol for traffic flow coordination of multi-modality communication
- ITU-T Q.5032 (06/2024): Network coding protocol for network repeaters
- ITU-T T.800 (V4) (07/2024): Information technology - JPEG 2000 image coding system: Core coding system
- ITU-T Y.3551 (04/2024): Cloud computing - Framework and functional requirements of cloud data mobility management

By TSB Circular 215 of 8 July 2024, it was announced that the following ITU-T Recommendations were approved in accordance with the procedures outlined in Resolution 1:

- ITU-T E.212 (06/2024): The international identification plan for public networks and subscriptions
- ITU-T E.218 (06/2024): Management of the allocation of terrestrial trunk radio Mobile Country Codes
- ITU-T E.1121 (06/2024): Mechanisms and processes for audits of assigned ITU-T international naming, numbering, addressing and identification (NNAI) resources

By TSB Circular 216 of 10 July 2024, it was announced that the following ITU-T Recommendations were approved in accordance with the procedures outlined in Resolution 1:

- ITU-T D.212 (07/2024): Charging and Accounting Principles for The Use of Signalling System No. 7

Telephone Service (Recommendation ITU-T E.164)

France (country code +33)

Communication of 5.VII.2024:

The *Autorité de Régulation des Communications Électroniques, des Postes et de la Distribution de la Presse (Arcep)*, Paris, announces the following national numbering plan in France:

- a) Overview:
The minimum number length (excluding the country code) is 4 digits.
The maximum number length (excluding the country code) is 13 digits.
- b) Link to the national database (or any applicable list) with assigned ITU-T E.164 numbers within the national numbering plan (if any): <https://extranet.arcep.fr/uploads/MAJNUM.csv>
- c) Link to the real-time database reflecting ported ITU-T E.164 numbers (if any): Not publicly available.
- d) Detail of numbering plan:

NDC (national destination code) or leading digits of N(S)N (national (significant) number)	N(S)N number length		Usage of ITU-T E.164 number	Additional information
	Maximum length	Minimum length		
105	9 digits	9 digits	<i>Fix numbers</i>	
110 to 161	9 digits	9 digits	<i>Fix numbers</i>	
162 to 163	9 digits	9 digits	<i>Verified fix numbers</i>	
164 to 199	9 digits	9 digits	<i>Fix numbers</i>	
210 to 261	9 digits	9 digits	<i>Fix numbers</i>	
265 to 267	9 digits	9 digits	<i>Fix numbers</i>	
270 to 271	9 digits	9 digits	<i>Verified fix numbers</i>	
272 to 299	9 digits	9 digits	<i>Fix numbers</i>	
310 to 376	9 digits	9 digits	<i>Fix numbers</i>	
377 to 378	9 digits	9 digits	<i>Verified fix numbers</i>	
379 to 399	9 digits	9 digits	<i>Fix numbers</i>	
410 to 423	9 digits	9 digits	<i>Fix numbers</i>	
424 to 425	9 digits	9 digits	<i>Verified fix numbers</i>	
426 to 499	9 digits	9 digits	<i>Fix numbers</i>	
516 to 522	9 digits	9 digits	<i>Fix numbers</i>	
524 to 525	9 digits	9 digits	<i>Fix numbers</i>	
531 to 567	9 digits	9 digits	<i>Fix numbers</i>	
568 to 569	9 digits	9 digits	<i>Verified fix numbers</i>	
570 to 589	9 digits	9 digits	<i>Fix numbers</i>	
601 to 638	9 digits	9 digits	<i>Mobile numbers</i>	

NDC (national destination code) or leading digits of N(S)N (national (significant) number)	N(S)N number length		Usage of ITU-T E.164 number	Additional information
	Maximum length	Minimum length		
640 to 652	9 digits	9 digits	<i>Mobile numbers</i>	
653 to 655	9 digits	9 digits	<i>MSRN codes</i>	
656 to 689	9 digits	9 digits	<i>Mobile numbers</i>	
695	9 digits	9 digits	<i>Mobile numbers</i>	
698 to 699	9 digits	9 digits	<i>Mobile numbers</i>	
7000 to 7004	13 digits	13 digits	<i>Mobile numbers for machine to machine</i>	
730 to 789	9 digits	9 digits	<i>Mobile numbers</i>	
800 to 805	9 digits	9 digits	<i>Freephone services</i>	
806 to 809	9 digits	9 digits	<i>Standard rate services</i>	
810 to 829	9 digits	9 digits	<i>Premium rate services</i>	
836	9 digits	9 digits	<i>Data services</i>	<i>Resources will disappear on 1st January 2031</i>
860	9 digits	9 digits	<i>Dial-up internet access</i>	<i>Resources will disappear on 1st January 2031</i>
868	9 digits	9 digits	<i>Dial-up internet access</i>	<i>Resources will disappear on 1st January 2031</i>
890 to 899	9 digits	9 digits	<i>Premium rate services</i>	
9010 to 9014	13 digits	13 digits	<i>Fix numbers for machine to machine</i>	
902 to 936	9 digits	9 digits	<i>Fix numbers</i>	
937 to 938	9 digits	9 digits	<i>Fix numbers for exchange with a platform</i>	
9390 to 9394	9 digits	9 digits	<i>Fix numbers for exchange with a platform</i>	
940 to 946	9 digits	9 digits	<i>Fix numbers</i>	
948 to 949	9 digits	9 digits	<i>Verified fix numbers</i>	
950 to 975	9 digits	9 digits	<i>Fix numbers</i>	
977 to 998	9 digits	9 digits	<i>Fix numbers</i>	
1000 to 1099	4 digits	4 digits	<i>Short numbers for operator's support</i>	
3000 to 3007	4 digits	4 digits	<i>Short numbers for freephone services</i>	
3009 to 3169	4 digits	4 digits	<i>Short numbers for freephone services</i>	
3180 to 3199	4 digits	4 digits	<i>Short numbers for freephone services</i>	
3200 to 3299	4 digits	4 digits	<i>Short numbers for premium rate services</i>	

NDC (national destination code) or leading digits of N(S)N (national (significant) number)	N(S)N number length		Usage of ITU-T E.164 number	Additional information
	Maximum length	Minimum length		
3400 to 3499	4 digits	4 digits	<i>Short numbers for premium rate services</i>	
3600 to 3699	4 digits	4 digits	<i>Short numbers for premium rate services</i>	
3900 to 3999	4 digits	4 digits	<i>Short numbers for premium rate services</i>	
118000 to 118099	6 digits	6 digits	<i>Short numbers for directory enquiry services</i>	
118200 to 118999	6 digits	6 digits	<i>Short numbers for directory enquiry services</i>

Guadeloupe (French Department of) (country code +590) (including French part of Saint Martin)

Communication of 5.VII.2024:

The *Autorité de Régulation des Communications Électroniques, des Postes et de la Distribution de la Presse (Arcep)*, Paris, announces the following numbering plan in Guadeloupe:

- a) Overview:
The minimum number length (excluding the country code) is 9 digits.
The maximum number length (excluding the country code) is 12 digits.
- b) Link to the national database (or any applicable list) with assigned ITU-T E.164 numbers within the national numbering plan (if any): <https://extranet.arcep.fr/uploads/MAJNUM.csv>
- c) Link to the real-time database reflecting ported ITU-T E.164 numbers (if any): Not publicly available.
- d) Detail of numbering plan:

NDC (national destination code) or leading digits of N(S)N (national (significant) number)	N(S)N number length		Usage of ITU-T E.164 number	Additional information
	Maximum length	Minimum length		
590	9 digits	9 digits	<i>Fix numbers</i>	
690 to 691	9 digits	9 digits	<i>Mobile numbers</i>	
7005	12 digits	12 digits	<i>Mobile numbers for machine to machine</i>	
7090	9 digits	9 digits	<i>MSRN</i>	
800 to 805	9 digits	9 digits	<i>Freephone services</i>	
806 to 809	9 digits	9 digits	<i>Standard rate services</i>	
810 to 829	9 digits	9 digits	<i>Premium rate services</i>	
836	9 digits	9 digits	<i>Data services</i>	<i>Resources will disappear on 1st January 2031</i>
860	9 digits	9 digits	<i>Dial-up internet access</i>	<i>Resources will disappear on 1st January 2031</i>
868	9 digits	9 digits	<i>Dial-up internet access</i>	<i>Resources will disappear on 1st January 2031</i>
890 to 899	9 digits	9 digits	<i>Premium rate services</i>	
9015	12 digits	12 digits	<i>Fix numbers for machine to machine</i>	
9395	9 digits	9 digits	<i>Fix numbers for exchange with a platform</i>	
9475	9 digits	9 digits	<i>Verified fix numbers</i>	
9760 to 9761	9 digits	9 digits	<i>Fix numbers</i>	
9768	9 digits	9 digits	<i>Fix numbers</i>	
3000 to 3007	4 digits	4 digits	<i>Short numbers for freephone services</i>	
3009 to 3169	4 digits	4 digits	<i>Short numbers for freephone services</i>	
3180 to 3199	4 digits	4 digits	<i>Short numbers for freephone services</i>	
3200 to 3299	4 digits	4 digits	<i>Short numbers for premium rate services</i>	

NDC (national destination code) or leading digits of N(S)N (national (significant) number)	N(S)N number length		Usage of ITU-T E.164 number	Additional information

Mexico (country code +52)

Communication of 5.VII.2024:

Telephone numbering plan

The Basic Technical Numbering Plan (“Numbering Plan”) was published in the Official Gazette of the Federation on 21 June 1996. It lays the foundation for proper administration and use of national numbering in that it allocates the available resources efficiently, fairly, equitably and in a non-discriminatory fashion. Its adoption enabled the country to increase its numbering resources, re-organize existing allocations, harmonize the criteria for allocating long-distance codes and comply with the relevant international recommendations.

On 12 November 2014, the Official Gazette of the Federation published the Agreement of the Plenum of the Federal Institute of Telecommunications issuing number portability rules and modifying the Basic Technical Numbering Plan, the Basic Technical Signalling Plan and the operational requirements for the introduction of geographic and non-geographic number portability.

On 11 May 2018, the Official Gazette of the Federation published the Agreement of the Plenum of the Federal Institute of Telecommunications approving and issuing the Basic Technical Numbering Plan, the Basic Technical Signalling Plan and modification of the number portability rules published on 12 November 2014. These new plans will enter into force on 3 August 2019.

In particular, the new Numbering Plan envisages replacing the concepts of local and geographic numbers with that of national numbers; eliminates the concept of regional codes to delimit geographic areas for the purposes of number assignment and use, adopting in their stead a geographic division of 8 (eight) areas; establishes the need to accredit 85 per cent (eighty five per cent) usage of numbers previously assigned to a specific mode of use and inside one area in order to allocate additional numbering resources to telecommunication service providers (“Providers”).

Additionally, it establishes electronic procedures for the handling and management of procedures related to numbering resources and clear, detailed and concise assessment criteria for their sources; eliminates long-distance originating operator identification codes (ABC) and maintains the assignments of long-distance destination operator identification codes (BCD) — however, these will be used as identification codes for the local originating and destination network (IDO/IDD); requires all fixed and/or mobile service providers to have an administrative identification code (IDA); and incorporates the mobile network code (MNC) assignment procedure.

The new Numbering Plan also requires the submission of bimonthly disaggregated reports on the use of national numbers/non-geographic numbers assigned directly and monthly disaggregated reports on the use of numbers provided by other licensees; it establishes a procedure for the return of numbering resources where the use of one or more national number blocks is not required, their use is not initiated within the set period, a usage of less than 51 per cent (fifty one per cent) is reported for six successive two-month periods, in cases of public interest or national security, as well as pursuant to any legal provision, administrative decision or regulation issued for that purpose.

Furthermore, it establishes a uniform 10-digit dialling procedure for the entire national territory, whether for fixed-line or mobile calls; eliminates the prefixes: 01, 02, 044 and 045; eliminates the prefix 1 in dialling procedures for incoming international calls to mobile numbers in the “calling party pays” mode; and eliminates groups of special service codes and the selection by prior subscription service.

Areas

For the purposes of number assignment and administration, the national territory is divided into eight areas. Thus, all national numbers beginning with the same digit belong to the same area.

The areas are as follows:

Area	Area number
East	2
West	3
North	4
Central	5
North-West	6
South-West	7
North-East	8
South-East	9

With the division of the national territory into areas, for the purposes of number assignment and administration, resources currently allocated to Providers, and those to be assigned, may be used in any population centre that the Provider considers appropriate, bound only by the geographic limits of the area.

National numbering

Structure of national numbering

National numbers shall comprise 10 digits and take the following form:

National numbers	
Area number (1 digit)	9 digits
A	b c d e f g h i j

Where:

A = 2, 3, 4, ..., 9

b = 1, 2, 3, ..., 9

c, d, e, f, g, h, i, j = 0, 1, 2, 3, ..., 9

No national number shall begin with the sequence 9-1-1.

Dialling procedures

The dialling procedure for domestic calls originating from numbers in fixed-line, CPP mobile and MPP mobile (called party pays) modes is as follows:

Destination number modes of use	Dialling procedure
Fixed-line	10-digit national number
MPP mobile	
CPP mobile	

Non-geographic numbering

Structure of non-geographic numbers

Non-geographic numbers shall comprise 10 digits and take the following form:

Geographic numbers	
10 digits	
Non-geographic service code (3 digits)	User number (7 digits)
AON	d e f g h i j

Where:

A = 2, 3, ..., 9

N = 0, 1, 2, ..., 9

d, e, f, g, h, i, j = 0, 1, 2, ..., 9

Dialling procedure

The dialling procedure for calls to non-geographic numbers is as follows:

Non-geographic numbers
10 digits

Non-geographic service keys

The keys assigned for non-geographic services are as follows:

Non-geographic service key	Description
200	Mobile or fixed satellite telephone service with payment at the point of origin (geostationary systems)
201	Mobile or fixed satellite telephone service with payment at the point of origin (low-orbit systems)
300	Services with charges shared between the points of origin and destination
500	Personal numbers with call transfer; the user making the call pays the local access tariff and the user receiving the call pays the difference
700 ¹	Access numbers for each operator's virtual private network
800	Non-geographic numbers with reverse charging
900	Non-geographic numbers with surcharge for the service provided

AON combinations not defined in the table above remain available for other non-geographic services, which must follow the procedures for the creation of new keys.

¹ The non-geographic numbers corresponding to this service shall be independently administered by each operator.

Special service codes

Structure of special service codes

Special services may be provided by Providers or government entities.

Special service codes use the following structure:

Special service codes (3 digits)
ONX

Where:

N= generic for special service provided = 1, 2, 3, ...,9

X= 0, 1, ...,9

Any numbering sequence of two or more digits other than those already established or the sequence used as prefix for access to the long-distance international service (00) may be used by Providers as long as they do not clash with the national and non-geographic numbering assigned by the Institute. For the services they provide their users directly or via third parties, Providers may use “#”, “*” and other non-numeric characters, except for the structures “*ONX” and “#ONX”, which are reserved.

Under no circumstances should the sequence “911” be used, or any other sequence which might cause confusion with the national emergency services number, 911, such as *911, #911, etc.

Dialling procedures

The dialling procedures for calls to special service codes are as follows:

Special service codes
3 digits

Established special service codes

The established special service codes are as follows:

Code assigned	Special service	Special service provider
010- 019	Available	
020	Operator call assistance service	Telecommunication service providers
021-029	Available	
030	Exact time	Telecommunication service providers
031	Alarm clock	Telecommunication service providers
032-039	Available	
040	Information on national telephone numbers	Telecommunication service providers
041-049	Available	
050	Complaint reception and processing	Telecommunication service providers
051	Generation of PINs	Telecommunication service providers
052-069	Available	
070	Community information	Government entities
071	Electricity services	Government entities
072	Public service reports and complaints	Government entities

Code assigned	Special service	Special service provider
073	Drinking water and sewage system	Government entities
074	Traffic information	Government entities
075	Guidance and support for personal safety	Government entities
076	Available	
077	Federal entity and election bodies	Government entities
078	Tourist information	Government entities
079	Available	
080-087	Available	
088	Federal public security services	Government entities
089	Whistle-blowing service	Government entities
090	International long-distance service via operator	Telecommunication service providers
091-099	Available	

The single number used throughout the country for emergency services comprises three digits and takes the following form: 911 (nine, one, one).

Special service codes should be available for dialling from any national line. To that end, all Providers must follow up the changes in the corresponding routing matrices and update their systems accordingly in order to ensure access and correct routing for calls made to the special service numbers.

Providers must provide free and unrestricted access to the following services, including for, but not limited to, telephones of users without credit or with restricted service and public telephones: receipt and processing of complaints (050), generation of PINs (051), federal public security services (088), whistle-blowing service (089), single emergency service number (911).

Dialling procedure for international long-distance services

Access prefix for international long-distance service

The access prefix for the international long-distance service to be used by all Providers is as follows:

Prefix	Purpose
00	Automatic international long-distance call

Dialling procedures for outgoing international calls

The dialling procedures for calls to international users' numbers and non-geographic numbers of other countries are as follows:

International long-distance calls
00 + International number

Calls to international non-geographic numbers
00 + International non-geographic number

The international non-geographic number includes the country code. International non-geographic number services may be restricted by international agreements between operators.

Telecommunication service provider identification codes

Providers must have the necessary identification codes for performing billing, call routing and portability functions. To that end, the Institute shall assign to each Provider the identification code required for its activities, except for the code 000, which will be held in reserve.

Originating network identification code (IDO)

Public telecommunication networks originating traffic must have an IDO code so that there is sufficient information in the signalling exchanged regarding to whom the traffic's interconnection charges should be billed.

The IDO code comprises 3 digits and takes the following form:

Originating network identification code
IDO (3 digits)

Where:

I = 0, 1, 2, ..., 9

D = 0, 1, 2, ..., 9

O = 0, 1, 2, ..., 9

Destination network identification code (IDD)

Public telecommunication networks carrying out traffic termination activities must have an IDD code so that there is sufficient information in the signalling exchanged for the user's destination network to be identified in order to ensure delivery.

The IDD code comprises 3 digits and takes the following form:

Destination network identification code
IDD (3 digits)

Where:

I = 0, 1, 2, ..., 9

D = 0, 1, 2, ..., 9

D = 0, 1, 2, ..., 9

Administrative identification code (IDA)

Companies must have an IDA code in order to be identified as a Provider with numbering assigned by the Institute or provided by another licensee and used under any commercial agreement.

The IDA code comprises 3 digits and takes the following form:

Administrative identification code
IDA (3 digits)

Where:

I = 0, 1, 2, ..., 9

D = 0, 1, 2, ..., 9

A = 0, 1, 2, ..., 9

No IDA code used by a company may be the same as an IDO/IDD code assigned to a licensee.

Mobile network codes

IMSI structure

The International Mobile Subscription Identity (IMSI) serves to identify a single subscription. It comprises 15 digits, grouped into three fields, and takes the following form.

Mobile Country Code (MCC) 3 digits	Mobile Network Code (MNC) 3 digits	Mobile Subscription Identification Number (MSIN) 9 digits
----- IMSI -----		

Where:

The **MCC** is the first three digits of the IMSI and represents the **mobile country code**. The MCC assigned to Mexico by ITU is 334.

The **MNC** is the next three digits of the IMSI and represents the **mobile network code**. It is administered by the Institute and assigned to mobile service providers.

The MSIN makes up the last nine digits of the IMSI and represents the **mobile subscription identification number**. The MSIN is administered directly by the mobile providers that have an MNC assigned by the Institute.

Providers requiring IMSI resources must apply to the Institute for the assignment of an MNC allowing them to clearly identify the mobile network in such a way that they can administer the MSINs of the entire IMSI block.

Myanmar (country code +95)

Communication of 4.VII.2024:

The *Ministry of Transport and Communications*, Nay Pyi Taw, announces that the following updated numbering scheme has been added to the national numbering plan of Myanmar:

Auto Exchange Numbering (Geographic)

Sr No.	Area Code	Number Series	Area	Type Of Exchange	Digit Length (including area code)	Licensee
1	1	83 70 000 ~ 83 99 999	MAUNGTAULAY-4	S-12	8	Myanma Posts and Telecommunications
2	1	75 00 000 ~ 75 39 999	HANTHAWADDY	S-12	8	Myanma Posts and Telecommunications
3	1	36 40 000 ~ 36 48 999	INSEIN	S-12	8	Myanma Posts and Telecommunications
4	1	76 48 000 ~ 76 48 499	HLAING THAYA	SX 3000 (MSAN)	8	Myanma Posts and Telecommunications
5	1	86 35 000 ~ 86 37 999, 86 39 000 ~ 86 39 999	MINGALARDON	DMS-10	8	Myanma Posts and Telecommunications
6	1	86 38 000 ~ 86 38 999	PALE MYOTHIT	DMS-10 (RSU)	8	Myanma Posts and Telecommunications
7	1	74 37 000 ~ 74 37 999	HTAUKKYANT	KY-1000 XM	8	Myanma Posts and Telecommunications
8	1	95 40 000 ~ 95 49 999	BAHAN-1	DMS- 100	8	Myanma Posts and Telecommunications
9	1	95 54 000 ~ 95 58 999	BAHAN-2	S-12	8	Myanma Posts and Telecommunications
10	1	84 00 000 ~ 84 01 999	KYAIAKKASAN	TWD-06	8	Myanma Posts and Telecommunications
11	1	75 70 000 ~ 75 73 999	THINGANGYUN-2	CS 1500	8	Myanma Posts and Telecommunications
12	1	75 77 000 ~ 75 79 999	THINGANGYUN-3	S-12	8	Myanma Posts and Telecommunications
13	1	86 50 000 ~ 86 68 999	MAYAGONE-1	NEAX- 61	8	Myanma Posts and Telecommunications
14	1	86 50 000 ~ 86 52 999	MAYAGONE-2	DMS-100	8	Myanma Posts and Telecommunications
15	1	90 00 000 ~ 96 99 999	MAYAGONE-3	SX 3000	8	Myanma Posts and Telecommunications
16	1	36 80 000 ~ 36 85 499	BAYINTNAUNG	DMS-100	8	Myanma Posts and Telecommunications
17	1	96 90 000 ~ 96 90 999	NORTH OKKALAPA-1	SX 3000(MSAN)	8	Myanma Posts and Telecommunications
18	1	96 91 000 ~ 96 91 999	NORTH OKKALAPA-2	KY-1000 XM	8	Myanma Posts and Telecommunications
