GENERAL INFORMATION

Lists annexed to Operational Bulletin

Note from the TSB

The following Lists* have been published as Annexes to the ITU Operational Bulletin (OB):

OB No.

- | | |
|-----|--|
| 590 | List of Telex Destination Codes (TDC) and Telex Network Identification Codes (TNIC) (Position on 31 December 1994)
– <i>Complement to ITU-T Recommendations F.69 and F.68</i> |
| 644 | List of Telegram Destination Indicators (In accordance with ITU-T Recommendation F.32) (Position on 1 May 1997) |
| 656 | List of International Carrier Codes (According to ITU-T Recommendation M.1400) (Position on 15 November 1997) |
| 659 | List of Data Country or Geographical Area Codes (Complement to ITU-T Recommendation X.121) (Position on 31 December 1997) |
| 663 | List of Names of Administration Management Domains (ADMD) (In accordance with ITU-T F.400 and X.400 Series Recommendations) (Position on 28 February 1998) |
| 665 | Various tones used in national networks (Supplement 2 to ITU-T Recommendation E.180) (Position on 1 April 1998) |
| 669 | Five-letter Code Groups for the use of the International Public Telegram Service (According to ITU-T Recommendation F.1 (03/98)) |
| 674 | Status of Radiocommunications between Amateur Stations of different countries (In accordance with optional provision No. 2731 of the Radio Regulations) (Position on 15 August 1998) |
| 677 | List of Issuer Identifier Numbers for the international telecommunication charge card (In accordance with ITU-T Recommendation E.118) (Position on 1 October 1998) |
| 679 | Dialling Procedures (International prefix, national (trunk) prefix and national (significant) number) (In accordance with ITU-T Recommendation E.164) (Position on 1 November 1998) |
| 682 | List of Signalling Area/Network Codes (SANC) (Complement to ITU-T Recommendation Q.708) (Position on 15 December 1998) |
| 684 | List of Data Network Identification Codes (DNIC) (According to ITU-T Recommendation X.121) (Position on 15 January 1999) |
| 685 | List of Mobile Country or Geographical Area Codes (Complement to ITU-T Recommendation E.212) (Position on 1 February 1999) |
| 686 | List of International Signalling Point Codes (ISPC) (According to ITU-T Recommendation Q.708) (Position on 15 February 1999) |
| 687 | List of ITU-T Recommendation E.164 assigned Country Codes (Complement to ITU-T Recommendation E.164 (05/1997)) (Position on 1 March 1999) |
| 688 | List of ITU Carrier Codes (According to ITU-T Recommendation M.1400) (Position on 15 March 1999) |

* For information, all lists will be updated by numbered series of amendments published in the ITU Operational Bulletin, and will be reissued as necessary.

Furthermore, the lists can be consulted online (<http://www.itu.int/itudoc/itu-t/ob-lists>) in the ITU document database, under the heading "Operational Bulletin and Lists annexed".

Legal time changes

Date and hour of change	Country or area	+ = Advanced by -- minutes - = Retarded by -- minutes	Legal time will be
4.IV.1999 0800 UTC - 31.X.1999 0900 UTC	Mexique / <i>Mexico</i> / México	+ 60	UTC -7
4.IV.1999 0700 UTC - 31.X.1999 0800 UTC	- Baja California Norte	+ 60	UTC -6
»	- Baja California Sur	+ 60	UTC -6
»	- Chihuahua	+ 60	UTC -6
»	- Nayarit	+ 60	UTC -6
»	- Sonora	+ 60	UTC -6
4.IV.1999 0600 UTC - 31.X.1999 0700 UTC	- Rest of the country (including Mexico City)	+ 60	UTC -5

Assignment of Signalling Area/Network Codes (SANC) (ITU-T Recommendation Q.708)

Note from the TSB

At the request of the Administrations of Belgium, Japan and Jordan, the Director of the TSB has assigned the following signalling area/network codes (SANC) for use in the international part of the signalling systems No. 7 network of these countries/geographical areas, in accordance with ITU-T Recommendation Q.708:

<i>Country/geographical area or signalling network</i>	<i>SANC</i>
Belgium	2-097
Japan	4-082
Jordan (Hashemite Kingdom of)	4-033

 SANC: Signalling Area/Network Code.
 Code de zone/réseau sémaphore (CZRS).
 Código de zona/red de señalización (CZRS).

International Public Telecommunication Numbering Plan (ITU-T Recommendation E.164 (05/97))

Note from the TSB

- Identification Codes for Global Mobile Satellite Systems (GMSS)

Associated with shared country code 881, the following one-digit identification codes, previously reserved, have now been assigned for the following GMSS network:*

<i>Network</i>	<i>Country Code and Identification Code</i>
Globalstar	+881 8 and +881 9

* See Operational Bulletin No. 657, page 5.

Bureaufax Service

Sweden

Communication of 26.II.1999:

Sweden Post, Stockholm, announces that the Bureaufax Service ceased to operate in Sweden on 1 January 1997. Consequently, pages 196 to 198 of the Bureaufax Table, referring to Sweden, should be deleted.

Note from the TSB: See Amendment No. 48 published in this Operational Bulletin, pages 19 to 22.

Telephone Service

Barbados

Communication of 23.II.1999:

Cable & Wireless BET Ltd., Bridgetown, announces that the new central office code NXX "467" has been activated in Barbados.

The international dialling format is +1 467 NXX XXXX.

Korea (Rep. of)

Communication of 4.III.1999:

Korea Telecom, Songnam City, announces that in view to ensuring the Y2K (year-2000) compliance in Korea (country code +82), software will be upgraded between March and August 1999. Consequently, the telephone service will be temporarily suspended, according to the schedule below, whilst modifications are introduced for the following telephone offices:

<i>Telephone office</i>	<i>Number starting with</i>	<i>Date and time (local time)</i>	
Kyonggi Yongin	330, 332, 333, 334, 339	3.III.1999	0000 - 0600

Note by the Telecommunication

Standardization Bureau (TSB):

By its communication of 19 February 1999, the Administration of the Russian Federation announced the following:

“Proposed new numbering plan and new scheme for telecommunication networks of countries in the numbering zone of country code “7” (Russian Federation and Republic of Kazakstan)

The proposed new numbering plan and new scheme for telecommunication networks of countries in the numbering zone of the country code “7”, have been developed with regard to both technological changes (introduction of new technologies in telecommunication networks) and organizational changes (the changed composition of countries in the numbering zone of country code “7” and the commercialization of telecommunication networks).

Given below is a brief description of the project.

1 Main Principles of the Numbering Scheme and Plan Structure

The numbering zone of country code “7” incorporates the telecommunication networks of the Russian Federation and Kazakstan Republic.

The numbering plan of the country code “7” zone is the integrated plan common to the Russian Federation and Kazakstan Republic.

The numbering plan applicable to the telecommunication networks of countries in zone “7” provides for a common structure of the international number as follows:

+7 n(s)n

where

+	international prefix
7	country code (cc, indicatif de pays / indicativo de país)
n(s)n	national (significant) number.

The national numbering in telecommunication networks of countries in the numbering zone of country code “7” is based on the zone principle of operation according to which each numbering zone is assigned a three-digit code ABC or DEF.

The ABC code can be assigned to a geographic numbering zone. In this case, the numbering resources of one geographic zone are not allowed to be used in the territory of another geographic zone.

The DEF code can be assigned to a non-geographic numbering zone operating on the basis of:

- network (corporate)
- service

The national (significant) number of telecommunication network subscribers of countries in the numbering zone of country code “7” includes the ABC code followed by the subscriber’s zone number or the DEF code followed by the subscriber’s number of the intelligent network (IN) service or by the subscriber’s number of the network (corporate).

The subscribers’ communication for telecommunication networks of the Russian Federation and Kazakstan Republic should be effected using the toll (trunk) numbering in compliance with ITU-T Recommendation E.160 (*).

In the case of interaction between networks of countries of zone "7" and networks of other numbering zones, use should be made of the international communication principles including the world numbering in compliance with ITU-T Recommendation E.164.

The telecommunication networks of countries constituting zone "7" have the common resource of codes of geographic numbering zones ABC and non-geographic numbering zones DEF and the services organized on these networks have the resource of codes of non-geographic numbering zones DEF.

2 Solutions foreseen in the new numbering plan

Existing telecommunication networks of countries of zone "7" use the national prefix "8" and international prefix "810" to access the toll network and international network, respectively.

In accordance with ITU-T Recommendation E.164' it is planned to introduce new prefixes – national prefix "0" and international prefix "00", for access to the toll and international networks, respectively.

According to the CEPT recommendations, it is planned to introduce the numbering of emergency, order and enquiry services with use of the European services numbering (IUV).

Provision is made for introducing the emergency service number "112" and the enquiry service number "118" already applied in the European countries.

To provide for subscribers' access to alternative operators' networks during outgoing calls (international and toll) a special prefix of carrier selection is introduced ("call-by-call selection" option).

The 15-digit numbering for international communication is introduced in compliance with ITU-T Recommendation E.164.

3 Number dialling procedure used in telecommunication networks in countries of the international zone of country code "7"

- 1) For outgoing international calls, the subscriber dials one of the following international numbers:

+cc n(s)n
+cc ngl
+cc nins

where:

+	international prefix
cc	country code (indicatif de pays / indicativo de país)
n(s)n	subscriber's national (significant) number
ngl	subscriber's Global service number
nins	identification and number of network (corporate) subscriber

- 2) For outgoing toll calls the subscriber should dial:

P ABC abXXXXX

where:

P	prefix for another number of international zone "7" (national prefix):
ABC	geographic numbering zone code
abXXXXX	zone subscriber number

- 3) For outgoing zone telephone calls the subscriber dials:

P 2 abXXXXX

where:

P	national prefix
2	means communication within the numbering zone.
abXXXXX	zone subscriber number

- 4) For outgoing local calls the subscriber dials a local number which, depending on the local network capacity, can be a seven-, six-, or five-digit number:

abXXXXX, bXXXXX, XXXXX.

In the case of a seven-digit number, the local subscriber's number coincides with the relevant zone number.

- 5) For outgoing calls of a federal network mobile subscriber, the subscriber dials:
P DEF abXXXXX
where:
P national prefix
DEF non-geographic numbering zone code which indicates that a certain standard belongs to the federal network
abXXXXX zone subscriber number
- 6) To ensure access by subscribers of the public switched telephone network (PSTN) to the paging regional networks, certain serial numbers of the local telephone network are assigned.
Depending on the local network numbering, five-, six-, or seven-digit serial numbers can be distinguished:
XXXXX, bXXXXX, abXXXXX.
To ensure access to the federal paging networks, three-digit numbers can be assigned from the numbering plan of special services of local telephone networks.
- 7) Access to the international service of the global intelligent network (IN) is effected by dialling:
+CCX₁ ... X_n
where:
+ international prefix
CC three digit country code for Global services from the list of codes in compliance with ITU-T Recommendation E.164
X₁ .. X_n global subscriber's number of IN service
The number can contain up to 15 digits.
- 8) Access to the national IN service is effected by dialling:
P DEF X₁ X₂ X₃ X₄ ... X_n
where:
P national prefix
DEF non-geographic numbering zone code which defines an IN service
X₁ X₂ X₃ IN operator's code
DEF X₁ X₂ X₃ operator's number which presents a certain IN service
X₄ ... X_n logic number of an IN service subscriber
- 9) The numbering on the international networks (corporate) is made in compliance with ITU-T Recommendation E.164 and provides for an international subscriber's number up to 15 digits.
The Network (corporate) subscriber's number is as follows:
+CC Ni Ns,
where:
+ international prefix
CC country code assigned by ITU-T
Ni identification code of international network (corporate)
Ns subscriber's number.
- 10) The numbering on the national communication networks (corporate) is similar to the numbering on the mobile telecommunication networks:
P DEF abXXXXX.
- 11) The numbering plan of the integrated service digital network (ISDN) is currently based on, and will be developed in the future on the basis of the existing numbering plan applied to the networks in the international zone of country code "7", in compliance with ITU-T Recommendation E.164.
- 12) The numbering system provides a means for a selection of a toll or international operator for a "call by call selection" option.
In this case, the subscriber uses the prefix dialled after a national or international network output prefix.

4 Distinctive features of the new numbering scheme and plan

When implementing the new numbering scheme and plan it shall adhere to the existing numbering scheme and plan.

Yet, the proposed new numbering plan possesses certain distinctive features as compared to the previous numbering plan.

- 1) The main new element is the introduction of new versions of telecommunication networks in countries within the international zone of country code "7" as related to:
 - geographic numbering zones: ABC codes assigned to the networks used by the subjects of the Russian Federation and Kazakstan Republic (city, district, region, republic);
 - non-geographic numbering zones: DEF codes assigned to the networks (corporate) and services.
- 2) An essential innovation is the introduction of the carrier selection. It is the mechanism enabling national and international calling.
- 3) Introduction of the ISDN terminals numbering which makes it possible to increase the international number up to 15 digits in compliance with ITU-T Recommendation E.164.
- 4) Introduction of land mobile cellular communication numbering based on the principle of allocation of the numbering zone codes to federal standard networks.
- 5) Introduction of new numbering for emergency, order and inquiry services with use of the European standards.
- 6) Introduction of the international and national access prefixes similar to those used in other European countries.

Conclusion

The new numbering plan is designed in view of the development of new technologies and new network structures in telecommunication networks and is intended for a 20 to 30 year period. The numbering plan is expected to be introduced on a stage-by-stage basis."

(*) Former ITU-T Recommendation E.160 (amended at Helsinki, 1993) has been abrogated (see TSB Circular 47 of 16.6.1997 and Operational Bulletin No. 648 of 15.VII.1997); administrations and recognized operating agencies (ROAs) should refer to revised ITU-T Recommendation E.164 (05/1997)

Data Transmission Service (ITU-T Recommendation X.121)

International numbering plan for public data networks

Cape Verde

Communication of 22.II.1999:

In accordance with ITU-T Recommendation X.121, the Administration of Cape Verde has allocated the Data Network Identification Code (DNIC) 625 5 to *CVDATA*.

Address of the service provider:

Cabo Verde Telecom

Fax: +238 61 1217

Changes in Administrations/ROAs and other entities or Organizations

Ethiopia

Communication of 19.II.1999:

The *Ministry of Transport and Communications*, Addis Ababa, announces that, to enhance free-market economy in telecommunication services, the former Ethiopian Telecommunications Authority has been restructured by the Government of Ethiopia through Proclamation No. 49/1996. According to this Proclamation, the Authority has been divided into two bodies:

- the Ethiopian Telecommunications Agency (a regulatory body), and
- the Ethiopian Telecommunications Corporation (the operator).

The change became effective on 19 February 1999.

The Ethiopian Telecommunications Agency is the government organization which represents Ethiopia in ITU. The Ethiopian Telecommunications Corporation operates the international telecommunication services (telegram, telex, telephone, data, etc.) with the status of recognized operating agency (ROA), in accordance with the definition in No. 1008 of the Annex to the ITU Constitution (Geneva, 1992).

All correspondence with the Ministry of Transport and Communications or the Ethiopian Telecommunications Agency should be sent to the following addresses*:

- Ministry of Transport and Communications¹⁾
P.O. Box 1238
ADDIS ABABA
Ethiopia
Tf: +251 1 516166
Fax: +251 1 515665
Tlx: 980 21348 motac et

1) Except for specific requirements, correspondence shall be through the Ethiopian Telecommunications Agency (ETA).

Administration

- Ethiopian Telecommunications Agency (ETA)
P.O. Box 9991
ADDIS ABABA
Ethiopia
Tf: +251 1 516766
Fax: +251 1 531255

The Ethiopian Telecommunications Corporation address to be used for all correspondence relating to international telecommunication services (operation and accounting matters), remains the same:

Recognized operating agency (ROA)

Ethiopian Telecommunications Corporation
P.O. Box 1047
ADDIS ABABA
Tf: +251 1 510500
Tg: Gentel AddisAbaba
Tlx: 980 2100 gentel et
Fax: +251 1 515777

* The ITU Global Directory will be updated accordingly.

682	Norway

Important Notice: An up-to-date recapitulatory table of service restrictions in force is in preparation. Administrations and recognized operating agencies (ROAs) concerned are kindly requested to check any information published on their behalf in ITU Operational Bulletins and to communicate any changes in that information to ITU/TSB (Fax No. +41 22 730 5853; Tlx: 421000 uit ch).

Call-Back

Malta

Communication of 23.II.1999:

The *Ministry for Transport and Communications*, Valletta, announces that it is pursuing a policy of liberalization of the Maltese telecommunications market. Nevertheless, the provision of local, long distance and international telephone services is the exclusive right of the national operator Maltacom p.l.c. until the end of 2010.

Therefore, the provision of a telephone service between fixed points, including the practice "Call-Back" by other operators or persons on the territory of Malta is prohibited by law for the time being.

Note from the TSB

Countries/geographical areas for which an information regarding "Call-Back" has been published in the ITU Operational Bulletin (No.):

Algeria (621), Netherlands Antilles (627), Saudi Arabia (629), Azerbaijan (663), Bahrain (611), Belarus (616), Bulgaria (665), Burkina Faso (631), Burundi (607), Cameroon (671), China (599), Cyprus (626), Colombia (602), Cook Islands (681), Cuba (632), Djibouti (614), Egypt (599), United Arab Emirates (627), Ecuador (619), Ethiopia (657), Gabon (631), Guinea (681), Honduras (613), India (627), Jamaica (648), Japan (649), Jordan (652), Kazakhstan (619), Kenya (605), Kyrgyzstan (616), Kuwait (610), Latvia (617), Lebanon (642), Madagascar (639), Malaysia (603), Malta (688), Morocco (619), Niger (618), Nigeria (647), Uganda (603), Portugal (620), Qatar (593), Dem. Rep. of the Congo (672), Seychelles (631), Sudan (686), South Africa (655), Tanzania (624), Thailand (611), Turkey (612), Viet Nam (619), Wallis and Futuna (649), Yemen (622).

In addition, in Operational Bulletin No. 685 of 1 February 1999, (pages 14 to 20), information on the position of some countries concerning call-back was published under the heading "Call-Back". This information is the result of a survey made by ITU-T Study Group 3 in accordance with Resolution 21 of the Plenipotentiary Conference (Kyoto, 1994).

See also Operational Bulletin No. 658 of 15.XII.1997.

PARTIE V

PART V

PARTE V

1) BUREAUX BUREAUFAX RÉCEPTEURS INTERNATIONAUX (BUREAU TÊTE DE LIGNE)

Les messages Bureaufax à transmettre pour la Suède sont acheminés vers les bureaux des centres tête de ligne à GOTHENBURG et MALMOE. Les bureaux des centres tête de ligne transmettent les messages à tous les autres bureaux en Suède.

2) A titre d'information, en plus des bureaux têtes de ligne figurant dans la Partie III, il existe 334 autres localités disposant du service BUREAUFAX.

3) A Courrier ordinaire

Acheminement : par le centre tête de ligne à l'aide du code postal s'il est connu.

Dernier délai : 1700 heures UTC du lundi au vendredi.

Zone: : pratiquement toute la Suède, comme le courrier rapide.

Remise : le jour suivant du lundi au vendredi avant 0800 heures UTC dans les boîtes postales ou avant 1330 heures UTC dans la localité indiquée sur l'adresse.

Les messages reçus le vendredi sont remis le lundi.

Les messages reçus le samedi, le dimanche ou un jour férié sont remis le deuxième jour ouvrable suivant.

4) B Porteur spécial

Acheminement : par le centre tête de ligne à l'aide du code postal s'il est connu.

Dernier délai : 1700 heures UTC du lundi au vendredi.

Zone : pratiquement toute la Suède comme le courrier rapide, avec remise spéciale.

Remise : Le jour suivant avant 0800 heures UTC du lundi au vendredi, avant 1000 heures UTC le samedi.

Dans les zones desservies par un facteur ou dans les zones sans remise, le destinataire est avisé par téléphone et prié de venir chercher le message ou bien le message est remis au facteur.

Les messages reçus le samedi, le dimanche et les jours fériés sont remis le deuxième jour ouvrable suivant.

5) D Retrait au guichet (L'expéditeur notifie le destinataire)

Acheminement : par le centre tête de ligne à l'aide du code postal s'il est connu.

Dernier délai : Heures de bureau pour le Bureaufax de destination, du lundi au vendredi.

Remise : peut-être retiré dans un délai d'une heure au plus tard, du lundi au vendredi.

6) E Retrait au guichet avec avis téléphonique au numéro indiqué

Même chose que sous 5) D. Avis téléphonique dans un délai d'une heure au plus.

- 7) F Téléfax (avec numéro d'appel et, s'il est connu, groupe)
 Acheminement : par le centre tête de ligne à l'aide du code postal s'il est connu.
 Dernier délai : heures de bureau pour le centre tête de ligne, du lundi au vendredi.
 Zone : à tous les télécopieurs sur l'ensemble du territoire suédois.
 Remise : dans un délai d'une heure pendant les heures de bureau. Pour les messages reçus pendant la nuit lorsqu'il n'y a pas de personnel, dans un délai de deux heures après l'ouverture du bureau.
- 8) Numéro d'appel téléphonique international.
- 1) *INTERNATIONAL RECEIVING BUREAUFAX BUREAUX (GATEWAY BUREAU)*
Bureaufax transmissions to Sweden are directed to the gateway offices in GOTHENBURG and MALMOE. The exchange offices retransmit to all other offices in Sweden.
- 2) *Please note that in addition to the gateway bureaux listed in Part III, there are 334 other localities which have the BUREAUFAX service.*
- 3) A Ordinary Mail
Routing : via Gateway bureau by postal code if known.
Cut-Off Time : 1700 hours UTC from Monday to Friday.
Area : virtually throughout Sweden as First Class Mail.
Delivery : Next day delivery from Monday to Friday to P.O. Box before 0800 hours UTC or at the address locality before 1330 hours UTC.
Messages received Friday is delivered Monday.
Messages received Saturday, Sunday or Public Holiday is delivered 2nd working day.
- 4) B Special delivery
Routing : via gateway bureau by postal code if known.
Cut-Off Time : 1700 hours UTC from Monday to Friday.
Area : virtually throughout Sweden as First Class Mail with special delivery.
Delivery : next day delivery before 0800 hours UTC from Monday to Friday, before 1000 hours UTC Saturday.
In area served by rural postman and area without delivery the addressee is advised by telephone for collection of the messages, or possible delivery by rural postman.
Messages received Saturday, Sunday and Public Holiday is delivered 2nd working day.
- 5) D Counter collection (sender advice the addressee)
Routing : via gateway bureau by postal code if known.
Cut-Off Time : Business hours for destination Bureaufax office from Monday to Friday.
Delivery : ready for collection within one hour at the latest, from Monday to Friday.
- 6) E Counter collection with telephone advice to the indicated call number
Same as 5) D. Telephone advice within one hour at the latest.
- 7) F Telefax (with call number and group when known)
Routing : via gateway bureau by postal code if known.
Cut-Off Time : Business hours for gateway office from Monday to Friday.
Area : to all telefax machines throughout Sweden.
Delivery : within one hour during business hours. For messages received during the unmanned night period at the latest within two hours after opening.
- 8) *International telephone call number.*
- 1) OFICINAS BUROFAX RECEPTORAS INTERNACIONALES (OFICINA CABEZA DE LÍNEA)
 Las transmisiones Burofax a Suecia se dirigen hacia las oficinas de cabeza de línea en GOTHENBURG y MALMOE. Las oficinas centrales cabeza de línea retransmiten a todas las otras oficinas de Suecia.
- 2) Para información, además de las oficinas cabeza de línea que figuran en la Parte III, existen otras 334 localidades que disponen del servicio BUROFAX.

- 3) A Correo ordinario
Encaminamiento : a través de la cabeza de línea con código postal si se conoce.
Hora de terminación del servicio : 1700 horas UTC de lunes a viernes.
Zona : prácticamente en toda Suecia como correo de primera clase.
Entrega : de lunes a viernes, entrega el día siguiente en el apartado de correos antes de las 0800 horas UTC o en la localidad de la dirección antes de las 1330 horas UTC.
Los mensajes recibidos el viernes se entregan el lunes.
Los mensajes recibidos el sábado, domingo o en días feriados oficiales se entregan el segundo día laboral siguiente.
- 4) B Entrega especial
Encaminamiento : a través de la cabeza de línea con código postal si se conoce.
Hora de terminación del servicio : 1700 horas UTC de lunes a viernes.
Zona : prácticamente en toda Suecia como correo de primera clase con entrega especial.
Entrega : de lunes a viernes entrega el día siguiente antes de las 0800 horas UTC, y los sábados antes de las 1000 horas UTC.
En las zonas atendidas por cartero rural y en las zonas exteriores a la zona de entrega se avisa al destinatario por teléfono para que venga a recoger el mensaje, con la posibilidad de entrega por cartero rural.
Los mensajes recibidos el sábado, domingo y en días feriados oficiales, se entregan el segundo día laboral subsiguiente.
- 5) D Recogida en ventanilla (el remitente avisa al destinatario)
Encaminamiento : a través de la cabeza de línea con código postal si se conoce.
Hora de terminación del servicio : horario comercial para la oficina Burofax de destino, de lunes a viernes.
Entrega : listo para la recogida una hora después a más tardar, de lunes a viernes.
- 6) E Recogida en ventanilla con aviso telefónico al número indicado
Igual que en 5) D. Se avisa por teléfono en el plazo de una hora a más tardar.
- 7) F Telefax (con número de llamada y grupo cuando se conozca)
Encaminamiento : a través de la cabeza de línea con código postal si se conoce.
Hora de terminación del servicio : horario comercial para la oficina de cabeza de línea, de lunes a viernes.
Zona : a todas las máquinas Telefax de Suecia.
Entrega : en el plazo de una hora durante el horario comercial. Los mensajes recibidos durante periodos nocturnos no atendidos se entregan a más tardar dentro de las dos horas siguientes a la apertura.
- 8) Número de llamada telefónico internacional.

INTERNATIONAL TELECOMMUNICATION UNION

TSB
TELECOMMUNICATION
STANDARDIZATION BUREAU
OF ITU

LIST OF ITU CARRIER CODES
(ACCORDING TO ITU-T RECOMMENDATION
M.1400)

(POSITION ON 15 MARCH 1999)

List of ITU Carrier Codes

Note by the TSB

1. Due to liberalisation of telecommunications and increased competition in the sector of telecommunications, there is a mandatory requirement that telecommunication operators or carriers that inter-operate be identified. A centralized List of ITU Carrier Codes has been created with the ITU/TSB as the repository. All *domestic* and *international* carriers are expected to register with ITU/TSB for a carrier code.

2. A carrier, which is any operating company that brings into service and maintains international or domestic leased circuits, switched circuits, digital blocks etc., is expected to register with ITU/TSB for an ITU Carrier Code. This List may be used to identify the carriers when filling out Layer 2 records as explained in ITU-T Recommendation M.1400.

3. This List of ITU Carrier Codes replaces that published as an Annex to the ITU Operational Bulletin No. 656 of 15.XI.1997. Since then, a number of notifications have been received at TSB and they have been published separately in various issues of the ITU Operational Bulletin. The present list recapitulates all the different amendments that have been published up to Operational Bulletin No. 688 of 15.III.1999. The data are listed in the order of the French designations.

4. This list will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU home page www.itu.int/itudoc/itu-t/ob-lists, and can be consulted by subscribers by remote access.

5. International or domestic carriers wishing to make a change to their data may do so by using the Notification Form attached to the present List. Some of the company codes have been proposed by TSB for those carriers that are listed with the mentioned '**proposed code**'. These carriers are requested to verify their data in supplying the full name of a contact-person with telephone and fax numbers. Similarly, carriers which do not appear in the List but would like to be listed should use the same form to notify their data to the TSB.

6. This List could also be made available on diskette as a database, on request.

7. Please address any comments, suggestions or new assignment concerning this List to the Director of the TSB:

International Telecommunication Union

Director of TSB

Notification Form for List of ITU Carrier Codes

A Carrier is any operating Company that brings into service and maintains international or domestic leased circuits, switched circuits, digital blocks, etc.

Study Group 4 of ITU-T believes that all international and domestic carriers for switched circuits today must have an ITU Carrier Identification Code. This code is used to identify a carrier for the purpose of registration of interconnection with other carriers.

In order to develop a listing of ITU Carrier Codes (ICC) which may be used to identify the Carriers when filling out Layer 2 records as explained in Recommendation M.1400, the following Form must be filled by each international or domestic Carrier.

1. **Company full name:**
(the name of carrier)

2. **Company Code:**

--	--	--	--	--	--

(The code by which the carrier wishes to identify itself. This code should be of Roman characters (alpha or alphanumeric), six or less in length, and should be unique at the country level. This code may be one that is in use today, provided it fits the definition.)

3. **Company official address:**
.....
.....
.....
Tel.: +
Fax: +.....

4. **Contact person:**
.....
.....
.....
Tel.: +
Fax: +.....
E-mail.....
