Australia

Communication of 7.IX.2000:

Telstra Australia, Sydney, announces that the country code +672 of the Australian External Territories is no longer used for Christmas Island and Cocos-Keeling Islands; the country code to be used is that of Australia (+61)*.

The number ranges of Christmas Island and Cocos-Keeling Islands are now within the Australian country code +61, as follows:

Country code	First digits after country code	Minimum number of digits after country code	Maximum number of digits after country code	Destination/Australian territory (Notes)
+61	891010 891011 891012 89162	Nine digits	Nine digits	Cocos-Keeling Islands (Notes 1, 2)
+61	891006 891007 891008 89164	Nine digits	Nine digits	Christmas Island (Notes 1, 2)
+672	10	Five digits	Five digits	Antarctica (Davis Base)
+672	11	Five digits	Five digits	Antarctica (Mawson Base)
+672	12	Five digits	Five digits	Antarctica (Casey Base)
+672	13	Five digits	Five digits	Antarctica (Macquarie Base)
+672	3	Six digits	Six digits	Norfolk Island

Note 1: The telephone networks of Cocos-Keeling Islands and Christmas Island have been integrated into the Australian mainland network and are thus now accessible via Australia's country code +61; they are no longer accessible via the Australian External Territories country code +672.

Note 2: Some of the number ranges listed may not yet be in service.

Brazil

Communication of 11.VIII.2000:

The *Empresa Brasileira de Telecomunicações (Embratel)*, Rio de Janeiro, announces that the length of subscriber numbers in Minas Gerais, Pernambuco and Rio de Janeiro, will be changed from seven to eight digits by adding digit "3" at the beginning of the existing subscriber number.

Example:

Area code	Old number (seven digits)	New number (eight digits)
34	2XX XXXX	32XX XXXX

The changes will be implemented on the following dates:

Locality	Dates
Minas Gerais	14.X.2000
Pernambuco ¹	21.X.2000
Rio de Janeiro ²	28.X.2000

¹ For Pernambuco, the digit "3" will be added to subscriber numbers for area code "81".

² For Rio de Janeiro, the digit "3" will be added at the beginning of the actual subscriber number ranges where the first digit is 3 or 8.

The list of numbering changes can be obtained from:

Guyana

– Communication of 31.VII.2000:

The *National Frequency Management Unit*, Georgetown, announces that a new telephone numbering plan will be implemented on 1 January 2001 in Guyana (country code +592).

Currently, the national (significant) number is a mixture of five and six digits. The new numbering plan will provide a uniform seven (7) digit national (significant) number access to the networks. To avoid any inconvenience, existing subscriber numbers will remain the same, as far as practicable. Additional digits will be added to the existing area code to obtain a national (significant) number of seven (7) digits.

The international dialling format of the new numbering plan is: +592 NXX XXXX where N = 2 to 9 and X = 0 to 9.

In order to ensure a smooth transition to the new numbering plan and to facilitate a satisfactory level of network service and call completion, arrangements will be made for "dual trunking" (parallel running) for a period of three months from the date of implementation of the new numbering plan change. During this period, both the old and the new numbers will work. At the end of this period of dual trunking, calls to the old number will be routed to an announcement which will advise the caller of the new number.

The list of numbering changes is as follows:

Estonia

Communication of 12.IX.2000:

Transfer of regulatory functions

The *Ministry of Transport and Communications*, Tallinn, announces that, with the entry into force of the Telecommunication Act of the Republic of Estonia and the transfer of regulatory functions to the independent regulatory body, the *Estonian National Communications Board*, the issuing of licences has gone over the Communications Board. In addition, after the entrance into force of the Telecommunications Act, neither the Department of Communications of Estonian Government nor the Estonian Telecom (which is now a recognized operating agency) have administrative tasks, so their addresses should no longer be used for administrative correspondence with the Administration of Estonia.

The new address of the Estonian National Communications Board is the following:

Estonian National Communications Board

Geneva, 2000

List of Names of Administration Management Domains (ADMD) and other information concerning the implementation of Message Handling Services

(ITU-T F.400 and X.400 series Recommendations)

Note from the TSB

1. In the Annex to Operational Bulletin No. 663 of 1 March 1998, the TSB published a list of Names of Administration Management Domains (ADMD) and other information concerning the implementation of message handling services (Position on 28 February 1998).

2. In view of a number of notifications on the status of implementation of message handling services based on the ITU-T F.400 and X.400 series Recommendations received from administrations/recognized operating agencies (ROAs), a new version (Position on 30 September 2000) has been prepared which cancels and supersedes the above-mentioned Annex. This new List published as Annex to Operational Bulletin No. 725 of 1 October 2000 contains all amendments published in Operational Bulletins up to No. 725 of 1 October 2000. In order to keep this List up to date, administrations/recognized operating agencies (ROAs) are requested to check the accuracy of the information published therein and to inform the TSB of any changes that should be made for its updating.

3. For your information, this List will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available in electronic version on the ITU home page and can be consulted by subscribers by remote access:

<http://www.itu.int/itu-t/bulletin/index.html>

4. It will be recalled that on 10 March 1994, TSB Circular 66 concerning the notification of Administration Management Domain (ADMD) names to the ITU was issued, in order to permit the TSB to serve the telecommunication community to its fullest capacity by publishing in the ITU Operational Bulletin a comprehensive listing of ADMD names officially in use. Administrations or responsible naming authorities who have not notified to the ITU the ADMD names known to be in use in their own countries are requested to fill in the notification form (see last page of the List) and return it to the TSB at the address indicated on the Form. If necessary, additional notification forms may be requested from the TSB on Fax No. +41 22 730 5853 or E-mail: tsbmail@itu.int.

5. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.
