Telegram Service

Finland

CTITU B19 of 22.I.2001:

Cessation of telegram service

Sonera reminds that the international telegram service from and to Finland (telegram destination indicator FI) has been discontinued as from 1 January 2001. *Sonera* will not replace the telegram service by any other manual service.

Sonera will meet the communication needs of its customers abroad and of foreign countries by using other up-to-date media which will be more economical for customers. Finnish customers currently have access to the following services: automatic telephone, facsimile, and telex services as well as GSM text messages, e-mail, Internet, etc., and also the postal services which are of a high quality.

For any additional information concerning the closure of the international telegram service and the replacement services, please contact:

Telephone Service

Germany

Communication of 9.I.2001:

The Regulatory Authority for Telecommunications and Posts (Regulierungsbehörde für Telekommunikation und Post (Reg TP)), Bonn, announces that additional national destination codes have been introduced for the GSM service in Germany (country code +49).

– As from 1 January 2001, the additional national destination code 1511 will be introduced for the GSM service in Germany, with an international number length of thirteen digits.

<i>National destination code</i>	<i>International dialling format</i>	<i>Service</i>	<i>Name of operator</i>
1511	+49 1511 X XX XX XX	GSM	DeTeMobil Deutsche Telekom MobilNet GmbH

– The DeTeMobil Deutsche Telekom MobilNet GmbH which uses the national destination code 160 for the GSM service in Germany assigns numbers with an international number length of thirteen digits from the numbering range 160 9 to their customers. The numbering range 160 has the following structure:

160 0 000000 to 160 8 999999
160 9 000000 to 160 9 999999

– The new national destination code 15 has been introduced for GSM and UMTS/IMT-2000 services in Germany. The international format of numbers from this numbering range is, in principle, thirteen digits, i.e. +49 15 X XX XX XX XX. However, there might be numbers with an international number length of up to fifteen digits.

Guyana

Communication of 6.I.2001*:

Guyana Telephone & Telegraph Co. Ltd, Georgetown, announces that as part of its expansion and service improvement programme, a new seven-digit telephone numbering plan will be implemented in Guyana (country code +592), scheduled to be effective 1 February 2001. The new numbering plans are given below.

In order to facilitate the smooth implementation of this numbering plan change, it is expected to implement the seven-digit numbering plan in a number of rural exchanges, namely: Port Kaituma/Mabaruma, Lethem, Ituni and Kwakwani, as from 15 January 2001.

Dual trunking will be provided for a period of three months from the effective date of the numbering plan change. During this period, both the old and new numbers can be reached. At the end of the period of the "dual trunking", a call placed to the old number would be routed to an announcement which would inform the caller of the new number.

A contact list for number plan inquiries is provided below.

Administrations and Recognized Operating Agencies are requested to ensure that the new numbering plan is programmed in their switching network and operations database.
