ITU-T International Network Designator addresses (IND) – Start-up Phase (TSB Circular 56 of 30 July 2001)

1. ITU-T Study Group 2 (Operational aspects of service provision, networks and performance) approved, at its meeting in January 2001, ITU-T Recommendation E.191.1 entitled: "Criteria and Procedures for the allocation of ITU-T International Network Designator Addresses".

In this Recommendation, the ITU International Network Designator (ITU IND) ATM End System Address (AES) was established for use by service providers for the provision of ATM services. The ITU IND AESA enables companies, corporations and governmental institutions to implement an ATM addressing scheme for public ATM services that may or may not be offered across international borders.

(*NOTE* – Apart from the ITU IND AESA, there are several other AESA types, that each has their own characteristic properties. Please refer to ITU-T Recommendation E.191 for an overview of all existing AESA types.)

2. The format of the ITU IND AESA is as follows:

The IND field, which is three octets in length, identifies the entity to which the Domain Specific Part or DSP is assigned.

3. ITU-TSB has been designated to perform the task of Registrar for the IND field of the ITU IND AESA. At its last meeting in June 2001, ITU Council 2001 approved TSB's work plan for this service. This registration responsibility includes processing registration requests from ATM service providers and assignment of the IND values in accordance with ITU-T Recommendation E.191.1.

4. The conditions and principles concerning ITU IND AESA assignment are specified in Recommendation ITU-T E.191.1. All applicants for this resource will be validated against this Recommendation.

The application form is annexed and additional information is also available on the Internet (<http://www.itu.int/ITU-T/universalnumbers/atm/>).

5. At the Study Group 2 meeting in January 2001 in Geneva (Switzerland), the following timetable for the start-up phase for the receipt and validation of the ITU IND AESA applications was determined:

- 30 July 2001: Notification of availability
30 days prior to the commencement of acceptance of applications, the Registrar will announce ITU IND availability.
- 30 August 2001: Receipt of applications
Applications will be treated on a "first-come-first-served" basis and the INDs will be assigned in a sequential fashion, i.e. the applicant may not request a certain code.

6. A registration fee of CHF 100 was approved by Council 2001 for the registration of each IND value.

Togo (country code +228)

Communication of 5.VII.2001:

The *Autorité de Réglementation des Secteurs de Postes et de Télécommunications*, Lomé, announces that a new seven-digit closed telephone numbering plan will be introduced in Togo on 1 October 2001. The format of the number is BPQMCDU.

The transition to the new numbers will be made with the addition of a digit "B" before the numbers (PQMCDU) of the plan currently in use.

- Fixed telephony

The blocks of numbers for fixed telephony will be assigned in such a way as to distinguish the economic regions of the country and the subscribers of the various telecommunication operators.

The new numbers for fixed telephony in the seven-digit format are as follows:

<i>Locality</i>	<i>Subscriber numbers (BPQ MC DU)</i>
Lomé Municipality	2XX XXXX
Maritime region	3XX XXXX
Plateaux region	4XX XXXX
Central region	5XX XXXX
Kara region	6XX XXXX
Savannah region	7XX XXXX

- Mobile telephony

The blocks of numbers for mobile telephony are assigned in such a way as to distinguish only the subscribers of the various operators and do not take into account the economic regions.

Two digits, B = 9 and B = 0, are reserved for mobile operators. The digit B = 9 will be used when the numbering changes.

The current numbers for Togo Cellulaire will be preceded by the digit B = 9.

The current numbers for Telecel Togo will be preceded by the digit B = 9, and the second digit "P = 0" (zero) will be replaced by P = 4, giving the format 94X XXXX.

- Special services

The digits B = 1 and B = 8 are reserved for the special services:

B = 1 for emergency services

B = 8 for other services

- Number format for administrative services

The format 8 PQ MC DU is reserved for administrative services (office and domestic) throughout the territory. The second digit (P) of numbers in this format identifies the economic region:

P = 2	Lomé municipality
P = 3	Maritime region
P = 4	Plateaux region
P = 5	Central region
P = 6	Kara region
P = 7	Savannah region

- Number format for other services

Other services, i.e. freephone numbers, Internet numbers or other value-added service numbers, will take the format 8 PQ MC DU, with the second digit "P" taking only the values 0, 1, 8 or 9.

Togo Telecom, the incumbent fixed network operator, will maintain the blocks of numbers currently used in its network, preceded by the regional digit "B". The detail of the number formats is as follows:

New numbering plan for Togo

LIST OF DATA NETWORK IDENTIFICATION CODES (DNIC) (According to ITU-T Recommendation X.121 (10/00))

(POSITION ON 15 AUGUST 2001)

List of Data Network Identification Codes (DNIC)

Note from the TSB

1. The ITU-T Recommendation X.121 stipulates that the assignment of Data Country Codes (DCCs) is administered by the ITU. Assignment of network digits to create Data Network Identification Codes (DNICs) will be made by each Administration. The ITU/TSB is to be notified of any new assignments, re-allocations or removals of network digits by completing the notification form shown in the last page of the Annex.
2. In accordance with ITU-T Recommendation X.121, details concerning the assignment of Data Network Identification Codes (DNICs) have been individually published in the ITU Operational Bulletin and then collected in a "List of Data Network Identification Codes (DNIC)".
3. The List of this year replaces the previous one published in the Annex to the ITU Operational Bulletin No. 714 of 15 April 2000 and contains all amendments published in the ITU Operational Bulletins up to No. 745 of 1 August 2001.
4. In order to keep this List up-to-date, Administrations are requested to check the accuracy of the information published therein and to inform the TSB of any changes that should be made for its updating.
5. For any new assignment of Data Network Identification Codes (DNIC), Administrations should fill in the notification form (see last page of the Annex) and return it to the TSB, at the address indicated on the attached form.
6. For information, the List is also available on the ITU home page and can be consulted by subscribers by remote access.

7. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.
