Tanzania (country code +255)

Communication of 8.II.2005:

Tanzania Communications Regulatory Authority (TCRA), Dar-Es-Salaam, announces that number changes in the National Destination Codes (NDC), and subscriber number length for mobile cellular services, are currently under implementation in the United Republic of Tanzania and will continue up to 31 December 2005.

It is proposed to extend the mobile subscriber length from six to seven digits. This will also be in line with the PSTN (Public Switched Telephone Network) subscriber numbers. Along with this plan, the National Destination Code (NDC) for both mobile and fixed subscribers shall be standardized by reducing the mobile network access code from three digits to only two digits. By introducing standardized lengths in this way, loss of inbound traffic to mobile networks will no longer occur as a result of the NDC differing from that of fixed networks.
