Approval of ITU-T Recommendations

A.1 By TSB AAP-28 of 16 January 2006 it was announced that the following ITU-T Recommendations were approved, in accordance with the procedures outlined in ITU-T Recommendation A.8:

- ITU-T Recommendation G.994.1 (2003) Amendment 4 (13/01/2006)
- ITU-T Recommendation O.211 (13/01/2006): Test and measurement equipment to perform tests at the IP layer
- ITU-T Recommendation Y.1314 (14/10/2005): Virtual private network functional

Assignment of Signalling Area/Network Codes (SANC) (ITU-T Recommendation Q.708 (03/1999))

Note from TSB

At the request of the Administrations of Honduras and the United Kingdom, the Director of TSB has assigned the following signalling area/network codes (SANC) for use in the international part of the signalling system No. 7 network of these countries/geographical areas, in accordance with ITU-T Recommendation Q.708 (03/1999):

<i>Country/geographical area or signalling network</i>	<i>SANC</i>
Honduras	7-017
United Kingdom of Great Britain and Northern Ireland	7-243

SANC: Signalling Area/Network Code.
Code de zone/réseau sémaphore (CZRS).
Código de zona/red de señalización (CZRS).

Universal International Premium Rate Numbers (UIPRN) (ITU-T Recommendations E.155 and E.169.2)

Note from TSB

On the basis of discussions and agreements made at the 6-15 December 2005 Study Group 2 meeting, the Director of TSB assigned, within the international premium rate numbering resource of ITU-T Recommendations E.155 and E.169.2, the international charging indicator "0" and the numbers 767 XXXXX jointly to the International Federation of Red Cross and Red Crescent Societies (IFRC) and the United Nations Children's Fund (UNICEF) for the purposes of raising funds by using the Short Message System (SMS) service of telephone networks.

The number to be implemented by operators will thus be +979 0 767 followed by none or up to five digits.

Communication of 20.XII.2005:

The *Autorité de Régulation des Communications électroniques et des Postes (ARCEP)*, Paris, announces the introduction of a new range of digits beginning with "09" for the new services of interpersonal communications and updates the numbering plan.

ARCEP has decided to open a new range of digits (beginning with "09") for interpersonal communications. This decision follows in-depth discussions with the entire sector in order to anticipate new telephone uses and to allow the development of new services.

- A new range of digits to stimulate innovation

The aim of opening this new range of numbers is to facilitate the development of new services offered via high-speed access by operators and service providers. This range will also be used for fixed-mobile convergence offers.

Until now, these new services were not very visible to consumers. Many of them used digits beginning with "087" which consumers see as being expensive, although the cost of calls to these digits is often lower than a local call.

Initially, ten million digits beginning with "097" will be made available for non-geographic interpersonal communications services. This will allow users to associate the new range with innovative, low-cost services. Operators will enjoy more selection in the digits available for their services.

Thanks to this measure, operators can migrate services currently using the "087" prefix and will benefit from major new resources. Users of "087" digits will simply replace the "8" with a "9" (e.g.: the number 08 71 71 71 71 becomes 09 71 71 71 71) to use these new "097" digits.

- No threat to the current numbering plan

The introduction of this new range of digits is part of an update process for the numbering plan; its general organization continues to be based on major digit categories:

- geographic digits from "01" to "05",
- mobile digits beginning with "06",
- access digits to added-value services beginning with "08".

Furthermore, all the decisions relating to the numbering plan have been gathered in a new document which presents the organization of the numbering plan and specifies the conditions of usage of each category.

United Kingdom (country code +44)

Communication of 11.I.2006:

The *Office of Communications (Ofcom)*, London, reminds non-UK network providers of the level of allocation of UK telephone numbers for mobile services, so as to ensure that there is no confusion with regard to the required digit analysis and decode.

Ofcom allocates mobile numbers in the United Kingdom in blocks of 100 000. In the past, numbers have often been allocated in groups of one million numbers at a time (i.e. 10 × 100 000 number blocks). However, some new companies in the UK only need a 100 000 block of numbers.

Therefore, network providers should be aware that either four- or five-digit analysis will be required for the routing of UK mobile numbers from their country.

For example:

07822 2	100 000 numbers	Opal Telecom Limited
07702	one million numbers	02 (UK) Limited

Network providers are requested to ensure that their networks analyse the exact number of digits, according to the size of the block of numbers allocated.

Telex Service

Aruba

Communication of 16.I.2006:

The *Servicio di Telecomunicacion di Aruba (SETAR N.V.)*, Oranjestad, announces the transfer of SETAR N.V. telex service to Easylink Service Corp. as of 19 January 2006. As a result of this transfer, the telex exchange system in Aruba will no longer be available. Easylink Services Corp. shall be managing all telex messages to and from Aruba using the existing Telex Destination Code (TDC) "364" allocated to Aruba (ITU-T Recommendation F.69), including the Telex Network Identification Code (TNIC) "AW" allocated to Aruba (ITU-T Recommendation F.68). Notwithstanding, SETAR N.V. keeps ownership and control of the telex service in Aruba.

All telex service in Aruba and transit telex services from other countries where Easylink Services Corp. operates international telex service should be transited on their normal route to Easylink telex networks who will provide a switching service to other destinations.

All international telex direct circuits, as well as transit via SETAR N.V., will be taken out of operation before the cutover time.

Until 19 January 2006, the international accounting procedure and the settlements of any outstanding payments of telex service will remain unchanged. After this date, all future settlements will be conducted with Easylink Services Corp. directly.

For any questions regarding accounting and operational matters, please contact SETAR N.V. (Aruba) and Easylink Services Corp. (United States) at the following contact points:

Slovakia

Communication of 25.1.2006:

Cessation of telex service

Slovak Telecom, a.s., Bratislava, announces that as effective from 1 April 2006, it will no longer provide the telex service (international and national) to and from Slovakia.

The Telex Destination Code (TDC) "666" allocated to Slovakia (ITU-T Recommendation F.69), including the Telex Network Identification Code (TNIC) "SK" (ITU-T Recommendation F.68) (also used as telegram destination indicator), remain nevertheless reserved for use by Slovakia.

National Numbering Plan (According to ITU-T Recommendation E.129 (09/2002))

Electronic version: <http://www.itu.int/itu-t/inr/nnp/index.html>

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their web page concerning the national numbering plan as well as their contact points, so that the information, which will be available freely to all Administrations/ROAs and service providers, can be posted on the ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), Administrations are kindly requested to use the format as explained in ITU-T Recommendation E.129. They are reminded that they will be responsible for the timely update of this information.

From 1.I.2006 to 15.I.2006, the following countries have updated their national numbering plan on our site:

Falkland Islands (Malvinas) (country code +500)

Tanzania (country code +255)

**LIST OF SIGNALLING AREA/NETWORK
CODES (SANC)**

(POSITION ON 1 FEBRUARY 2006)

List of Signalling Area/Network Codes (SANC)

Note from TSB

1. This List of Signalling Area/Network Codes (SANC) replaces the previous one published as Annex to ITU Operational Bulletin No. 825 of 1.XII.2004. Since then, various new assignments have been made and they have been published separately in various issues of the ITU Operational Bulletin. The present List contains all the amendments that have been published up to Operational Bulletin No. 853 of 1.II.2006.
2. The present List includes:
 - a list of SANC codes in numerical order
 - a list of SANC codes in alphabetical order of names of countries/geographical areas.
3. ITU-T Recommendation Q.708 (03/99) states that the assignment of signalling area/network codes (SANC) is to be administered by TSB. The assignment/withdrawal of international signalling point codes (ISPC) will be made by each country who will then notify TSB.
4. A request for a SANC is to be made by the Administration in writing to the Director of TSB. In order to request an additional SANC an Administration must provide the Director of TSB notification of the current assignment of ISPCs by that Administration.
5. For information, this List will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available on the ITU home page (<http://www.itu.int/ITU-T/bulletin/annex.html>), and can be consulted by subscribers by remote access.
6. Countries who wish to take part in the international signalling network or require an additional signalling area/network code (SANC) should ask the Director of TSB for the assignment of an available SANC code. In their request they may indicate the available SANC code preferred. Please address any comments to the Director of TSB:
