Note from TSB

The Telecommunication Standardization Bureau (TSB) of ITU, Geneva (Switzerland), announces that it has received reports to the effect that numbers under the shared network code and identification code **+882 11** are being used to place deceptive calls to consumers, with the purpose of generating revenue by inducing customers to return the call.

Code **+882 11** has been returned to spare, that is, it is no longer assigned, so no calls should be generated using this code. Administrations and operators are invited to take steps to ensure that no calls are created or routed using this code.

LIST OF NAMES OF ADMINISTRATION MANAGEMENT DOMAINS (ADMD) AND OTHER INFORMATION CONCERNING THE IMPLEMENTATION OF MESSAGE HANDLING SERVICES

(ITU-T F.400 and X.400 SERIES RECOMMENDATIONS)

Note from TSB

1. In the Annex to Operational Bulletin No. 725 of 1 October 2000, TSB published a list of Names of Administration Management Domains (ADMD) and other information concerning the implementation of message handling services (Position on 30 September 2000).

2. In view of a number of notifications on the status of implementation of message handling services based on the ITU-T F.400 and X.400 series Recommendations received from Administrations/Recognized Operating Agencies (ROAs), a new version (Position on 15 March 2007) has been prepared which cancels and supersedes the above-mentioned Annex. This new list published as Annex to ITU Operational Bulletin No. 880 of 15 March 2007 contains all amendments published in Operational Bulletins up to this one. In order to keep this list up to date, Administrations/Recognized Operating Agencies (ROAs) are requested to check the accuracy of the information published therein and to inform TSB of any changes that should be made for its updating.

3. For information, this list will be updated by numbered series of amendments published in the ITU Operational Bulletin. Furthermore, the information contained in this Annex is also available in electronic version on the ITU home page and can be consulted by subscribers by remote access:

www.itu.int/itu-t/bulletin/index.html

4. It will be recalled that on 10 March 1994, TSB Circular 66 concerning the notification of Administration Management Domain (ADMD) names to ITU was issued, in order to permit TSB to serve the telecommunication community to its fullest capacity by publishing in the ITU Operational Bulletin a comprehensive listing of ADMD names officially in use. Administrations or responsible naming authorities who have not notified to the ITU the ADMD names known to be in use in their own countries are requested to fill in the notification form (see last page of the List) and return it to TSB at the address indicated on the Form. If necessary, additional notification forms may be requested from TSB by Fax: +41 22 730 5853 or E-mail: tsbmail@itu.int.

5. The designations employed and the presentation of material in this List do not imply the expression of any opinion whatsoever on the part of the ITU concerning the legal status of any country or geographical area, or of its authorities.
