Estonia (country code +372)

Communication of 28.VIII.2007:

The *Estonian National Communications Board (SIDEAMET)*, Tallinn, announces the introduction of a new numbering plan in Estonia.

General features of the new numbering plan:

- Estonian numbering plan is a closed numbering plan where geographic area dialling numbers (geographic area codes) are absent.
- The Estonian numbering plan establishes the location of numbers, short numbers, identification codes and prefixes necessary for the provision of electronic communications services in the telephony numbering area, the requirements for their length, the purpose of the use and the dialling procedure.
- The location of numbers, short numbers, identification codes and prefixes in the telephony numbering space, their length and purpose of the use are set out in the Annex to this Regulation.
- Calling Estonia from abroad does not change.

When dialling from abroad to Estonia, after the international access code (international prefix) and the country code of Estonia (+372), the National (Significant) Number (N(S)N) is dialled. The maximum length of an international number is fifteen (15) digits.
