

Preparing for the World Telecommunication Standardization Assembly (WTSA-12)

Third APT Preparatory Meeting for WTSA-12
Cairns, Australia
19-21 March 2012

Arthur B. Levin
Chief, Operations and Planning/TSB

Committed to connecting the world

WTSA-12: Date and venue

- 20-29 November 2012
 - 19 Nov GSS and 3-14 Dec WCIT
- Dubai World Trade Centre, UAE

مركز دبي التجاري العالمي
DUBAI WORLD TRADE CENTRE

Outline

- Guide to WTSA-12
- GSS and Preparatory Process
- WTSA-08 Resolutions and Action Plan
- Hot Issues
- Work Program Issues

What is WTSA?

- WTSA sets direction, policy and structure for ITU-T
 - Meets every four years
 - Defines the general policy for the Sector
 - Establishes the ITU-T study groups
 - Approves work program of study groups
 - Appoints chairmen and vice-chairmen of ITU-T study groups
 - Reviews existing WTSA Resolutions (49)

Main objectives of WTSA

- Underline ITU-T's role as the most effective venue for international standardization
- Pick up new work on emerging technologies
- Increase efficiency in order to make best use of delegate time and resources
- Avoid duplication and overlap of work
- Increase participation and relevance

Who can participate?

- Member States and Sector Members
- Observers:
 - Regional telecom organizations
 - Intergovernmental organizations operating satellite systems
 - Any other regional or international organizations dealing with matters of interest
 - UN and specialized agencies of UN and IAEA
- ITU elected officials in advisory capacity
- Director TSB can make proposals

Committed to connecting the world

WTSA Proposed Structure

- COM 1: Steering Committee
- COM 2: Budget Control
- COM 3: Working methods of ITU-T
- COM 4: Work programme and organization
- COM 5: Editorial Committee

- The Plenary may set up other Committees

Practical Matters

- Contributions requested preferably two months in advance (20 Sept.) and no later than 14 calendar days before opening of Assembly (6 Nov.)
- Paperless meetings, but MS can request two and SM can request one paper copy
- Joint registration system for WTSA and WCIT through focal points starting 20 August
- One full or two partial fellowships for eligible countries

WTSA Side Events and Exhibition

- Three Side Events:
 - e-Health
 - ICT innovation and standards (coupled with academia event)
 - Network resilience and disaster relief
- Exhibition
 - Goal: 5-10 companies
 - Showcase IPTV, others

Committed to connecting the world

Possible Outcomes

Committed to connecting the world

ITU-T Snapshot in 2012

- 10 study groups
- 6 focus groups (3 established at Jan 2012 TSAG)
- 9 Joint Coordination Activities
- 2 Global Standards Initiatives (IPTV, IoT)
- 250 standards/year
- 250 Rapporteurs
- 1000 Editors

Committed to connecting the world

Study Group consolidation or restructuring

- Consolidation of current structure seems likely
- New work to be included in existing SGs
- ITU-T A.7 (focus groups): revise to allow TSB to better support Focus Groups ?
- Rules on remote participation?
- New membership initiatives

Candidatures

- WTSA Resolution 35 “...a maximum time in office of approximately eight years for study group and TSAG chairmen and vice-chairmen...”
 - Current chairs that cannot be re-elected for a second term are SG 2, SG 3, SG 15
- Objectives: to maintain level of expertise and momentum
- Expected results
 - Nomination of capable chairmen
 - Regional representation
- TSB Circular 251 sent on 24 January inviting candidates by 20 September

Committed to connecting the world

Prior to WTSA-12

Committed to connecting the world

Regional preparation meetings

- ITU organizing back-to-back meetings for WTSA/WCIT Preparations (March-May 2012)
 - RCC/Tashkent: 2-6 April
 - Arab States/Egypt: 28 April–1 May
 - Americas/Buenos Aires: 14-15 May
 - Africa/Durban: 21-24 May
- Sector Members from the region can participate in the regional preparatory meetings
- Fellowships available for RPMs

Global Standards Symposium

- Monday, 19 Nov 2012

- Themes:

- Bridging the standardization gap: from innovation to standards

- Global Standards Challenges

- e.g., e-health; resilience of networks to disasters

- Global Standards Collaboration: Roundtable

GSS 2012
Dubai, UAE

Committed to connecting the world

Implementation of WTSA-08 Resolutions

Committed to connecting the world

WTSA-08

- ICTs and climate change
- Deployment of IPv6
- Accessibility to ICTs
- Conformance and interoperability
- Encouraging academic and developing country participation
- Major reorganization of the Study Groups
- Reduced fees for SMs from developing countries

WTSA-08 Action Plan where are we?

- Reporting tool to keep membership informed
- Now at Version 7 (Sept 2011)
- Lists responsible TSB staff member, deadlines
- Details actions taken and results achieved
- URLs
 - itu.int/dms_pub/itu-t/oth/26/01/T260100504E0007XLSE.xls
 - itu.int/dms_pub/itu-t/oth/26/01/T260100504E0007MSWE.doc

WTSA-08 Action Plan – Metrics

- 49 Resolutions (21 new, 28 revised)
- 189 Action Items for 49 Resolutions, under 22 TSB staff
 - 40 Resolutions have 120 Action Items for TSB & Director
 - 24 Resolutions have 41 Action Items for SGs
 - 18 Resolutions have 30 Action Items for TSAG
 - 24 Resolutions have 46 Action Items in coop with sectors/GS
- Status Report (September 2011)
 - 103 Action Items are completed (54%)
 - 54 with ongoing activities are progressing on target (29%)
 - 22, mostly for WTSA-12, to be initiated (12%)
 - 10 pending (5%)

Committed to connecting the world

WTSA-08 Action Plan

Supporting Sector Objectives

- Bridging the Standardization Gap Action Items on:
 - Workshops; regional groups, activities and coordination; Conformance and Interoperability; Computer Incident Response Teams (CIRTs); training; remote participation
- Standardization Action Items on:
 - EWMs; security; ICT and Climate Change; external and internal cooperation; strategic activities (e.g. new FGs, JCAs); accessibility; academia participation
- Disseminating Information Action Items on:
 - Allocation and management of network resources (e.g. numbering); accessibility; IPv6; Seminar Coordination Committee; Technology Watch; Vocabulary Committee

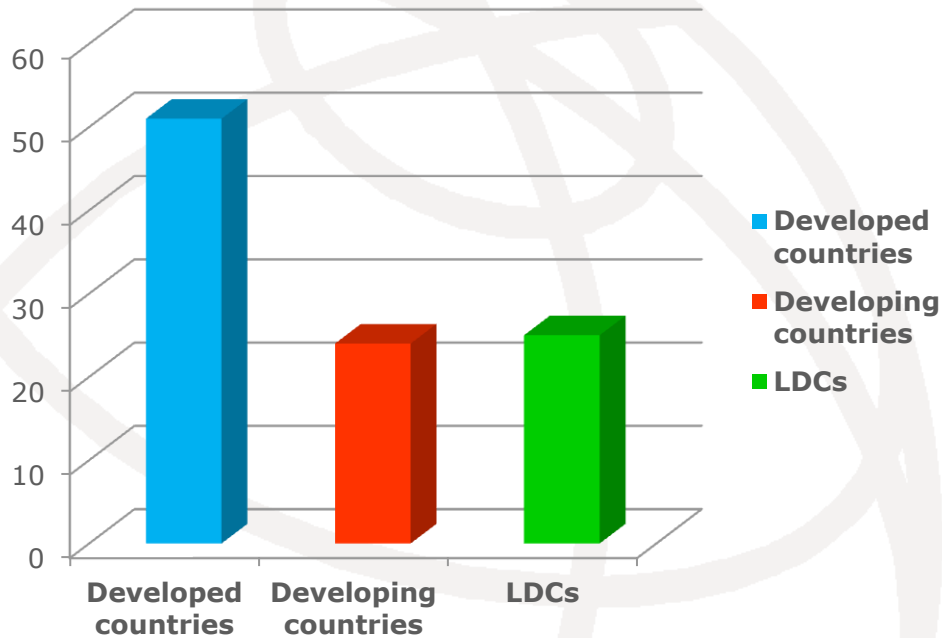

Bridging the Standardization Gap

- One of the three strategic goals of ITU-T
- BSG Fund for 2011: CHF 239,000
(Korean Communications Commission, NSN, Microsoft, Cisco)
- Reduced membership fees (CHF 3,975 PA)
- Manuals and handbooks on ITU-T Recommendations
 - Handbook on Testing (2011), Convergent Networks (2010), ITU-T Manual on Optical Transport Networks from TDM to Packet (2010) , DSL Story (2010)
- Standards Q&A Online Forum and New Focus Group
- Mentoring program for newcomers, fellowships
- Remote participation and meetings in region
- 40 new countries participating

Committed to connecting the world

Developing country participation in WTSA-08

Based on participation of 99 Member States

Committed to connecting the world

Traditional areas of strength

- Network infrastructure: optical transport
- Access technologies
- Quality of Service (QoS) and network management
- Numbering
- Economic and policy issues
- Emergency telecoms
- Multimedia codecs (voice, video)

ITU-T should strengthen presence in certain areas

- e-Health
- Accessibility
- ICTs and climate change
- Internet of Things/M2M
- Intelligent Transport Systems
- Cybersecurity including Identity management
- IPTV, cloud computing and smart grid
- Conformity and interoperability

Committed to connecting the world

Hot Topics

Committed to connecting the world

Technology Watch: Identifying the Hot Topics

- Output contributed to creation of new Focus Groups, Study Group Questions, workshops, discussions, etc.
- Widely recognized inside and outside ITU
- Open to contributions and topic proposals

Decreasing Driver Distraction

ITU-T Technology Watch Report
August 2010

Safety, mobility, and other issues with in-vehicle information and communication systems while driving is a serious concern of those interested in increasing the safety of public roadways. Technology-related driver distraction is a global problem that has led to the death of 1.2 million people globally in road accidents each year. The ITU-T Technology Watch Report provides an overview of technology-related driver distraction and an international, government and industry working group of experts that will continue to monitor and coordinate activities.

ICT as an Enabler for Smart Water Management

ITU-T Technology Watch Report
October 2010

Smart water management has become a key public issue for the ITU region. In a growing number of cities, the reliability of already scarce fresh water is under threat. In addition, growing water scarcity, increasing the need for water, and the need for water to be used more efficiently. A number of different ICT-based solutions, such as intelligent irrigation and water metering, are being implemented. The ITU-T Technology Watch Report provides an overview of the global and regional water management public and private working group that will continue to monitor and coordinate activities.

Using Submarine Communications Networks to Monitor the Climate

ITU-T Technology Watch Report
November 2010

The ITU-T Technology Watch Report gives an overview of how global submarine cables could be used to monitor climate change. Submarine cables are a key global network to monitor climate change and to provide coastal monitoring. Cable operators of global and regional networks and the capacity to carry communications, with an added temperature, salinity and pressure on the ocean floor. All this could be achieved by reusing global submarine cables. The ITU-T Technology Watch Report provides an overview of the global and regional working group of experts that will continue to monitor and coordinate activities.

Standards and eHealth

ITU-T Technology Watch Report
January 2011

The ITU-T Technology Watch Report gives an overview of how global submarine cables could be used to monitor climate change. Submarine cables are a key global network to monitor climate change and to provide coastal monitoring. Cable operators of global and regional networks and the capacity to carry communications, with an added temperature, salinity and pressure on the ocean floor. All this could be achieved by reusing global submarine cables. The ITU-T Technology Watch Report provides an overview of the global and regional working group of experts that will continue to monitor and coordinate activities.

The Optical World

ITU-T Technology Watch Report
June 2011

The use of optical technologies in computing is very promising, and the ITU-T will help to support the technical development of optical computing, and the use of optical technologies in computing. The ITU-T Technology Watch Report provides an overview of the global and regional working group of experts that will continue to monitor and coordinate activities.

Trends in Video Games and Gaming

ITU-T Technology Watch Report
September 2011

The ITU-T Technology Watch Report provides an overview of the global and regional working group of experts that will continue to monitor and coordinate activities.

Committed to connecting the world

Conformance and Interoperability Testing

Business plan:

- KPMG to present at Council-12 (July)

Conformity database

- About to receive first entries

Interoperability events

- Identify new customers/technologies

Capacity building

- In cooperation with BDT, additional forums in 2012

Assistance in the establishment of test facilities

ICTs and Climate Change

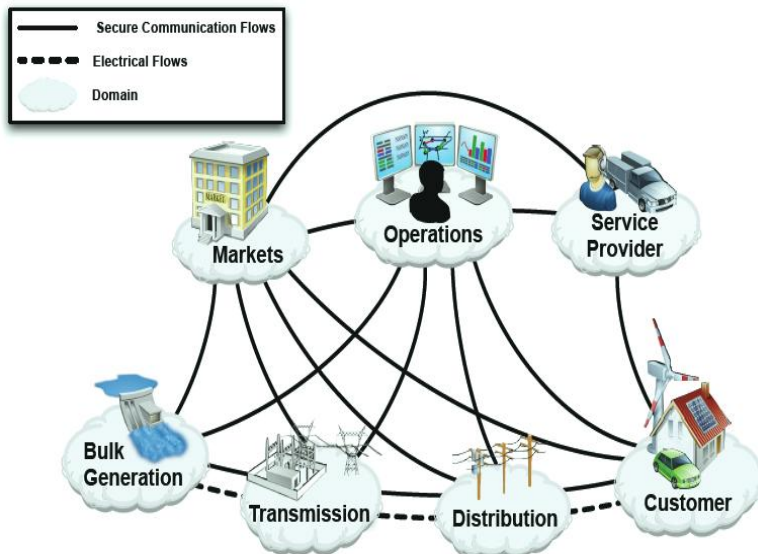

- ITU-T Universal charger: future versions to cover ICT devices other than mobile phone
- ITU-T Methodologies to assess ICT carbon footprint to be completed in 2012
- To come: standard on guidelines for recycling rare-metals in ICT products
- Joint task force with WMO and UNESCO on the use of submarine cables to monitor climate and provide tsunami warning
- 2nd ITU Green ICT Apps Challenge launched

Smart Grid

- Electric Grid Transport & Distribution Communication Standards
- Optimization of facility usage
- Integration of renewable energy sources, which are distributed and less stable
- Integration of electric vehicles

NIST Smart Grid Framework 1.0 January 2010

Committed to connecting the world

Disaster Relief

- New Focus Group on standards for Network Resilience and Recovery from disasters
- Focus:
 - (1) disaster relief for individuals (to notify the damage situation from victims to their relatives, friends, or employers)
 - (2) disaster relief guidance (to show victims the routes to evacuation shelters, home, etc.).

Internet Access through ITU standards

- Access:

- ADSL: ITU-T G.992

- Powerline Transmission:
ITU-T G.9960 (G.hn)

- FTTX (Fibre to the <x>):

- GPON (Gigabit Passive Optical Networks) ITU-T G.984

- Bendable fibers: ITU-T G.657

Optical Transport

- 95% of all international traffic runs over fibre = ITU-standards
 - MPLS-TP
 - Carrier Ethernet: ITU-T Y.1731
 - Synchronization: Mobile Backhaul
 - Optical Transport Networks from TDM to Packet
 - Optical fibres, cables and systems
 - SDH: ITU-T G.707

e-Health

- Chief Technology Officer (CTO) request to accelerate work
- Protocol to relay biometric info, connecting doctors with patients in remote locations
- Requirements and network capabilities for e-health monitoring applications
- Workshop with World Health Organization (WHO) April 2012

Accessibility

- PP-10 Res 175 ... accessibility for persons with disabilities...
- ITU provides accessibility to ICTs, and to ITU facilities for participants with visual, hearing or physical disabilities
- Voluntary fund to assist disabled participants
- Focus Group Audio Visual Media Accessibility

Internet of Things (IoT)/ Machine-to-Machine communications

- ITU's Global Standards Initiative on IoT started May in 2011
- ITU-T Focus Group M2M Service Layers created Jan 2012
 - Focus initially on e-health
 - 1st meeting April 2012
 - WHO/ITU Workshop on e-health standards and interoperability

Committed to connecting the world

Cloud Computing

- Growth opportunity for Telcos
- Opportunity for developing countries
- Security, Audit, and Privacy
- Cloud Computing picks up a lot of activity in ITU

The Economist, Oct 2009

Committed to connecting the world

Cybersecurity & Identity

The Economist, July 2010

- Strengthen the confidence and security in the use of ICTs
- Strengthen cybersecurity and combat cyber threats
- Identity Management
- Child Online Protection
- Cybersecurity Information Exchange Framework (CYBEX)

Committed to connecting the world

Intelligent Transport Systems

- In-Vehicle Multimedia applications and services
- Climate Change
- Electric Vehicles
- Road Safety
- Driver Distraction

Multimedia: Prime Time Emmy Award for ITU standards

YouTube

- Advanced video coding:
ITU-T H.264
 - Used to compress billions of clips on YouTube, high-definition content on Blu-ray Discs
- New work:
 - Joint Collaborative Team (ITU-T, ISO/IEC) to reduce data rate by 50%

Committed to connecting the world

IPTV

- ITU-T suite of IPTV standards
- ITU organized interoperability testing events and showcasing events in Geneva, Singapore, India, Brazil, United Arab Emirates
- Demo at WTSA-12
- 2nd IPTV Application Challenge to be launched – prizes at WTSA

Involving future engineers

- Academia and universities can participate in the work of ITU at a reduced fee
- Kaleidoscope events
 - International events bringing academia and industry together
 - Rigorous, double-blind, peer-review process

Major issues related to working methods of ITU-T

- Current discussions
- International collaboration platform mechanisms

Committed to connecting the world

Current discussions

Committed to connecting the world

Work methods inventory-1

- WTSA-08 Resolution 1 – in particular
 - §7: Procedure for new/revised Questions
 - §8: Selection of approval process (AAP vs TAP)
 - §9: Traditional approval process
- A-series Recommendations
 - A.1: Work methods for ITU-T study groups
 - A.7: Focus groups: Working methods and procedures
 - A.8: Alternative approval process

Work methods inventory-2

- A-series Recommendations (cont'd)
 - A.4: Communication process between ITU-T and Forums and Consortia
 - A.5: Referencing documents of other organizations in ITU-T Recommendations
 - A.6: Cooperation and exchange of information with national and regional standards development organizations
 - A.23: Collaboration with ISO/IEC JTC1

ITU-T A.4, A.5, and A.6

- Scopes:
 - A.4 - Communication between ITU-T and Forums and Consortia
 - A.6 - Cooperation and exchange of information between ITU-T and national and regional standards development organizations
 - A.5 - References to documents of other organizations in ITU-T Recommendations
- Issues
 - Nested referencing not addressed in A.5
 - Discussions on updating A-Series Supplement 3 may lead to clarifications in A.4

ITU-T A.7

- Focus groups: Working methods and procedures
- Scope
 - Defines the rules for ITU-T FGs
- Current issues
 - Refinement of rules based on recent experience
 - Funding of FG activities

Collaboration mechanisms

Committed to connecting the world

Current ITU-T collaboration toolbox

- Inter-SG collaboration
 - JCAs (high-level coordination on a theme – e.g. IPTV, IoT, NGN)
 - GSI (technical work in co-located “thematic” Rapporteur Group meetings)
- Reaching across to other ITU Sectors and external organizations
 - ITU-T A.23: Only with JTC1
 - Focus Groups

Committed to connecting the world

**JCAs (Joint Coordination
Activities),
GSI (Global Standards
Initiative) and TSR (Technical
and Strategic Review)
(defined in ITU-T A.1, clause
2.2)**

**What they are, how they interwork,
and some current issues**

JCAs - Joint Coordination Activities

- First use: JCA-NGN, circa 2004 (WTSA-04)
- Currently, nine JCAs running; two JCAs concluded
- It is a coordination mechanism for a certain topic
 - ITU-T groups
 - Can be open to other (non-ITU-T, non-ITU) entities
- Open to participation of representatives of groups
 - Not intended for the membership-at-large
- Connected to a Study Group or TSAG

GSI

- GSIs are not a group, but a bundling of “*birds-of-a-feather*” Questions, or
- A way of calling collocated, coordinated Rapporteur Group meetings
- Thematic:
 - IPTV, NGN, IoT (still running)
 - IdM (concluded)
- A GSI is not a group, but an assemblage of groups
 - Hence: no plenary, no chairman
- Expert participation: expected to do technical work
- Coordination: via the associated JCA

Issues with GSIs

- Can be complex to manage, depending on:
 - How they are implemented
 - Number of participating Questions
 - More Questions mean more complicated groups
 - GSIs have a lot of flexibility on how to organize their work

Get involved

- Regional preparatory meetings proven platform
- Regional groups should coordinate common proposals
- TSAG meeting
 - Virtual meeting 17-18 April (2 hours daily)
 - 2 – 4 (am) July 2012 in Geneva

Committed to connecting the world
