CRO Chairman's Mission Statement

To contribute to the enhancement of CRO as a platform to identify regulatory areas of global industry interest, effectively: addressing which issues could foster even greater co-operation between regulators and the private sector, and how cross-sector efforts could impact socio-economic growth in the world to an even greater extent.

CRO's Objectives & Priorities

1. Secure confidence of the private sector and encourage representation from all segments thus encouraging greater private sector participation in the CRO meetings, effective 4th meeting onward.

2. Increase effectiveness and efficiency of CRO to meet the dialogue and problem-solving needs of the ICT industry.

3. Serve as a tool to better define and reach consensus on contentious industry issues and emerging challenges.

4. Promote the growth of ICT and digitization, and encourage investment in-flow through improved regulatory frameworks and private sector understanding and co-operation with regulators.

5. Facilitate the fulfillment of ITU-D's mission.

6. Gain an industry-wide standing as an active medium of intellectual support and participation that achieves tangible output in support of the promotion of telecommunications and ICTs around the globe.

Greater Participation	Effectiveness	Promotion of Digital Growth

150 (ITU) 1865 2015

CRO's Mechanism

Increased Activity	Communication Consistency	Access to Information	Thought Leadership

Expected Output of CRO
