

Proximus has clear targets to achieve net zero emissions by 2040 and already become truly circular by 2030

proximus ambitions

	2019	2025	2030	2040	>
Carbon Emissions	100% renewable electricity (Scope 2 = 0)	Fossil fuel free management cars (Scope 1)	100% renewable energy (Scope 1 + 2 = 0)	Net Zero Emissions (SBTi aligned) (Scope 1 + 2+ 3 = 0)	
Circularity		90% waste recycled	Zero Waste (100%) Truly circular		

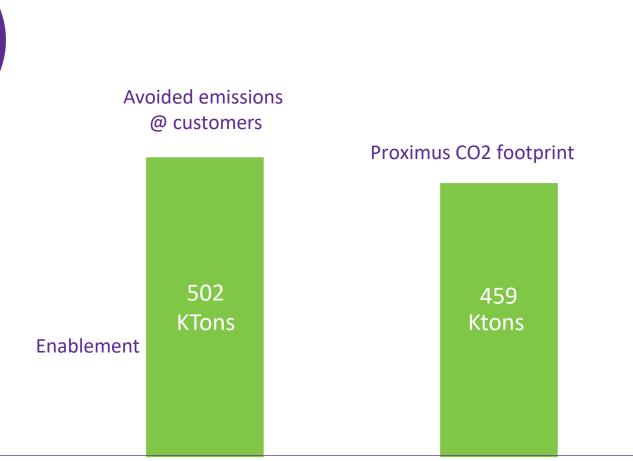

Breakdown of Proximus CO2 footprint in 2021 (Scope 1-2-3)

(the figures are rounded)

2021 enablement measurement

Going forward, to achieve our net zero carbon emissions & truly circular ambitions we are taking a 4 pillar approach

Truly circular

100% renewable energy (Scope 1+2=0)

Play a leading role in Belgium's green transition

(Scope 1+2=0)

Net Zero Emissions (Scope 1+2+3=0)

Circularity

- Extend 5 circular business model to existing gaps
- Focus on mobile devices, refurbishment towards enterprise & a circular network plan

Energy

- Rule out all remaining fossil fuel through green buildings& clean transportation
- Implement energy efficiency programs & roll-out Fiber &
 5G to mitigate energy consumption

Enablement

- Bring innovative solutions that provide insights into a customers' footprint
- Increase # digital solutions avoiding CO2 emissions at customers

Value chain

Strong Supplier Engagement
Program, adapted to each
one's maturity, is implemented
to involve various suppliers
