- A Member State-led process (facilitated by the UN) with broad participation from major stakeholders that has identified a wide range of areas
  - economic growth
  - social justice
  - environmental sustainability
- SDGs were adopted at the UN Sustainable Development Summit - September 2015
  1. 17 Goals
  2. 169 Targets

# The SDG indicators framework

- UN Statistical Commission set up the Inter-agency Expert Group on Sustainable Development Goal Indicators (IAEG-SDGs) to take the lead role in developing a final list of indicators
  - 28 representatives of NSOs
  - Observers: regional commissions and regional and international agencies - including ITU and others that were responsible for global reporting on the MDGs to provide technical advice and support

# ICT indicators for the SDGs

- The current draft outcome document recognizes that *“the spread of information and communications technology and global interconnectedness has great potential to accelerate human progress, to bridge the digital divide and to develop knowledge societies, as does scientific and technological innovation across areas as diverse as medicine and energy.”* (Draft Outcome Document of the UN Summit for the Adoption of the post-2015 Development Agenda)
- While none of the SDGs is specifically about ICTs, several targets make references to ICTs and technology
- ITU has lead role on ICT indicators for the SDGs, in cooperation with the Partnership on Measuring ICT for Development

# SDG Indicators framework

- The proposed list of indicators was endorsed at the 47<sup>th</sup> session of the UN Statistical Commission held on 8-11 March 2016
- 232 total indicators
- Includes 5 ICT indicators collected by ITU
