Tax on Brazilian telecom industry

ITU meeting - Brasilia, Brazil - june 13th to 17th

Ildeu Borges - ildeu@sinditelebrasil.org.br

The tax impact on Brazilian telecom industry is the highest compared to 17 countries

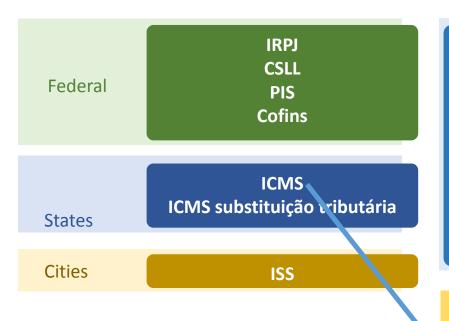

Source: Teleco, 2015. http://www.teleco.com.br/precos pais.asp

This the result of several taxes combined

FUST:

 R\$ 20 BILLIONS between 2001 and 2015

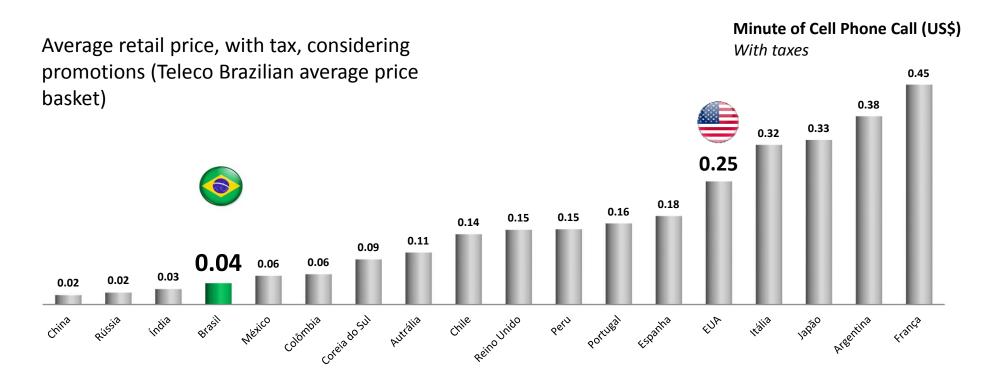

Fust Funttel Fistel (TFF e TFI, Condecine, CFRP) PPDUR

Setorial taxes and funds

ICMS:

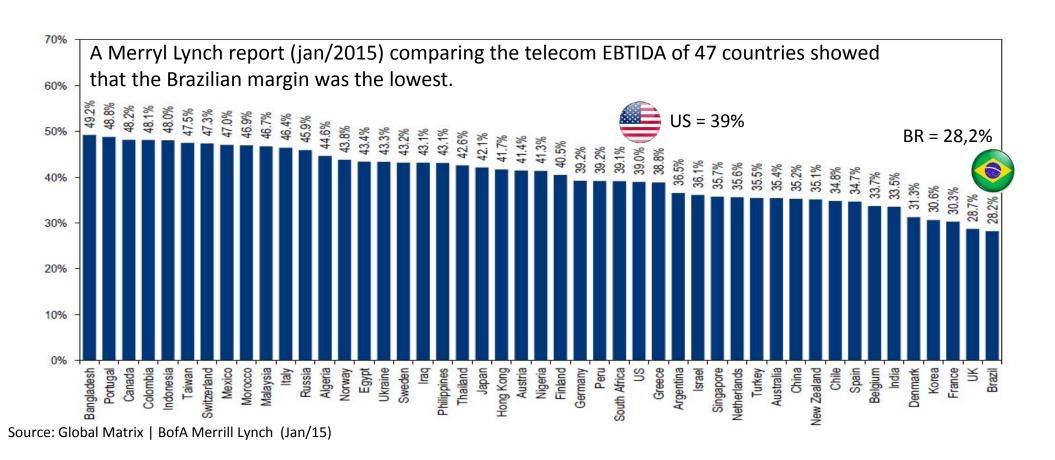

- R\$ 34 BILLIONS in 2015
- 8,5% of total ICMS revenues

Besides that, due to the local competition and low local income, the Brazilian telecom prices are low

As a consequence, the Brazilian telecom operator margins are low and decreasing ...

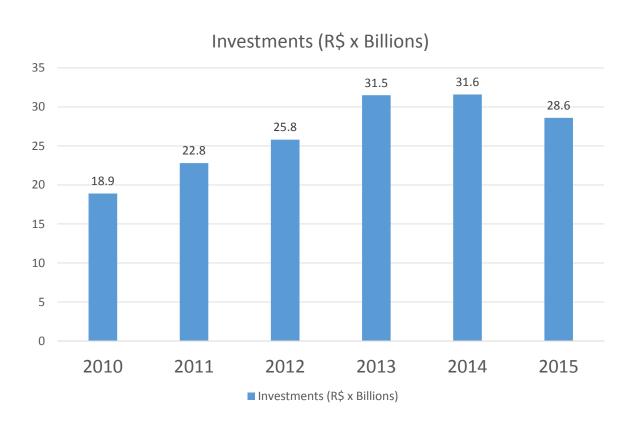

As a consequence, the Brazilian telecom operator margins are low and decreasing ...

- Since 2012 the return over investments is lower than the WACC and since 2013 is than the basic interest rate also;
- This show a risk related to investments in telecom in Brazil and one alternative to help solve this is to decrease the tax weight of the industry.

Source: Bloomberg

... Besides this, the Brazilian companies still mantain the investment levels

But, to improve the investments, some measures will be welcomed in the tax field:

- Simplify the tax system;
- Decrease the total tax weight and avoid further increases;
- Reinvest the funds in the industry itself;
