
ITU Arab Regional Workshop on Mobile Roaming: National & International Practices

27 to 29 of Oct, 2015 in Sudan - Khartoum

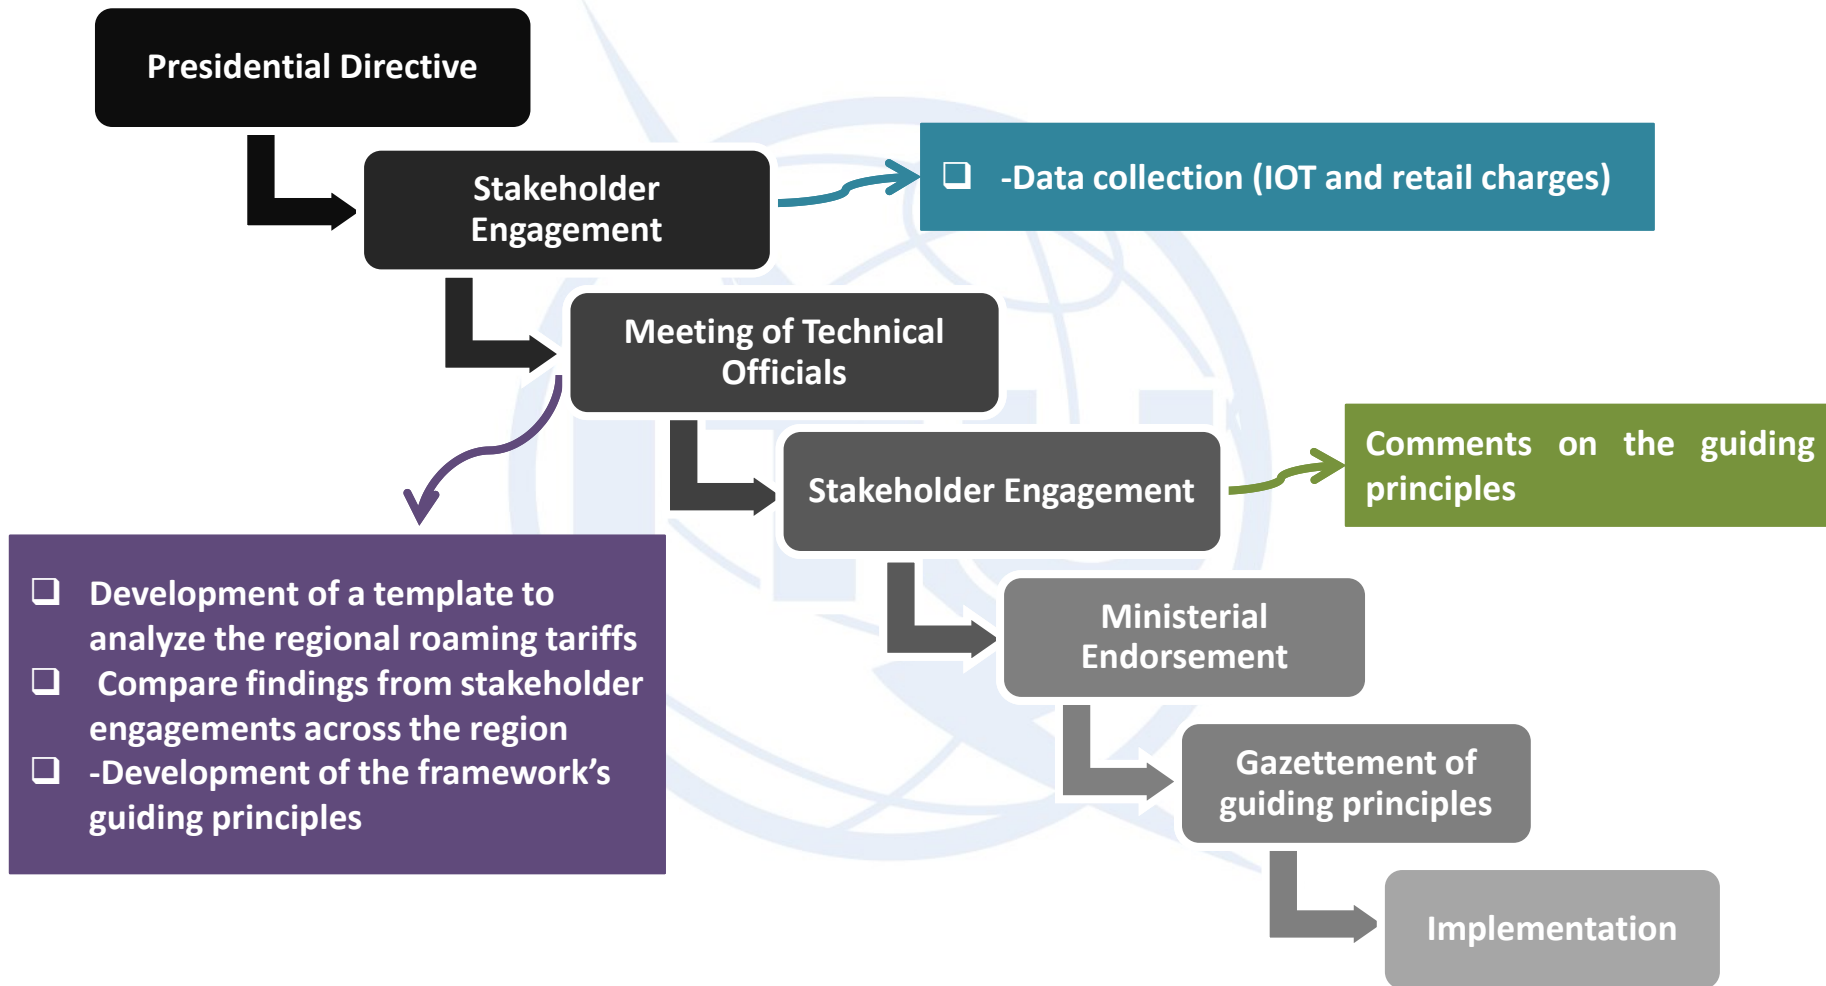

One-Network Area Roaming Initiatives within East Africa: Lukas Musembi

Regional Issue

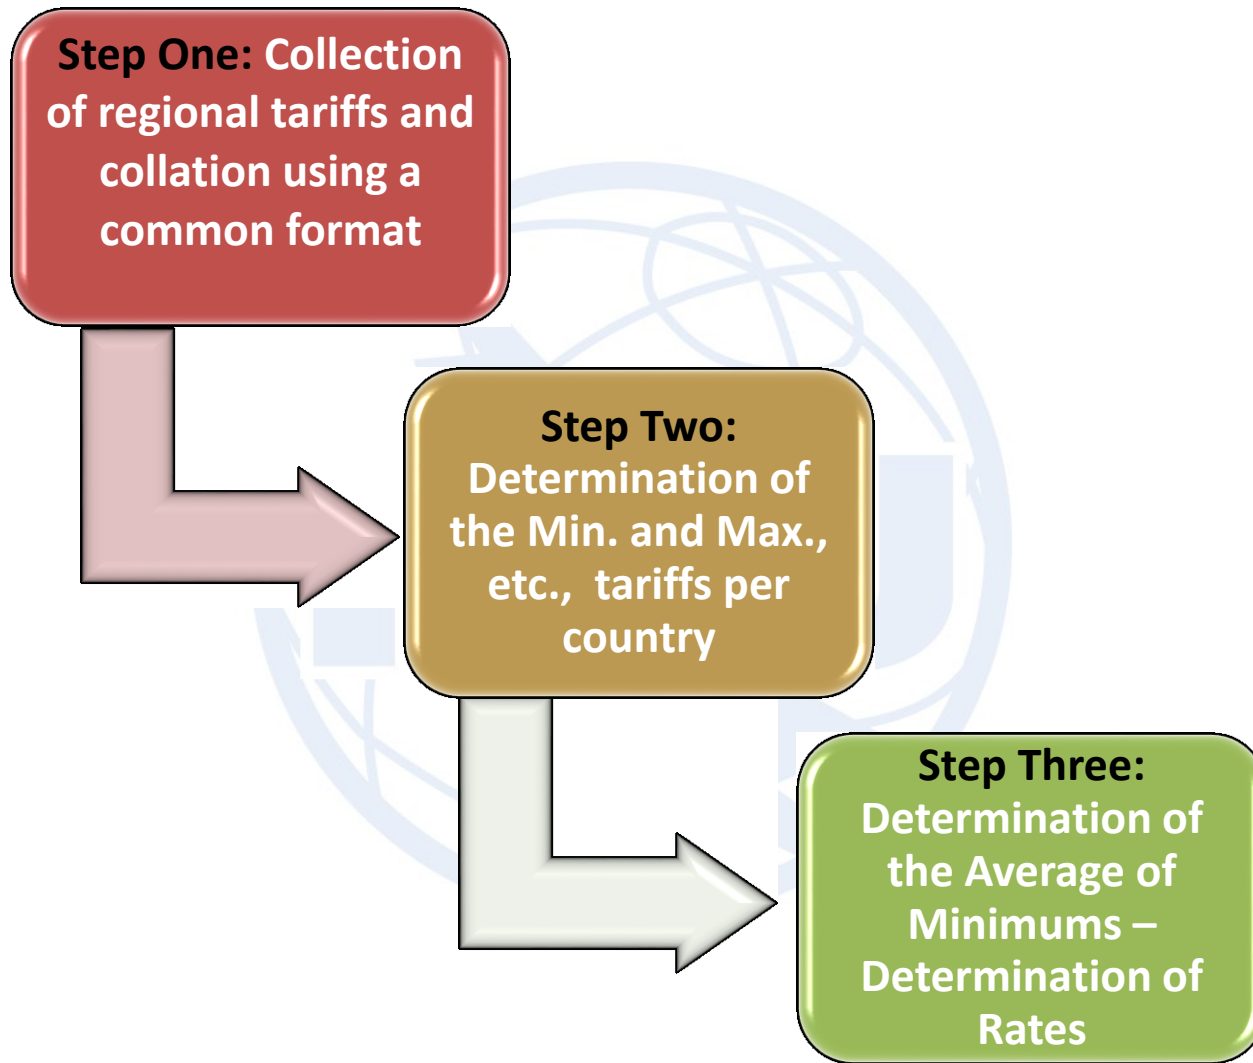

- High IMR price is an obstacle to the **regional integration** efforts
- Growth in regional (EAC) **travel** due to opening of economies
- Significant tariff differentials while roaming on different networks within the host country in EAC
- Roaming Cross Border Services – Absence of Regulatory oversight single country or NRA cannot tackle this issue alone
- Weak/Limited Competitive Forces in the Roaming Market Segment
- International roaming services involve many stakeholders (operators, regulators, taxation authorities) and a regional policy framework is paramount

Development of a harmonized Regional Roaming Framework - The Process

Steps in the development of the Rates

Development of a harmonized Regional Roaming Framework – Guiding Principles

1

- The framework only applies to traffic originating and terminating within the EAC Region;

2

- The said traffic is exempted from Surcharges on international incoming traffic (SIIT);

3

- Regional Retail tariff capped at USD 0.10 per minute. This retail rate included an inter-operator tariffs (IOT) for the Region capped at USD 0.07 per minute; *-based on the average of the minimums of the countries*

4

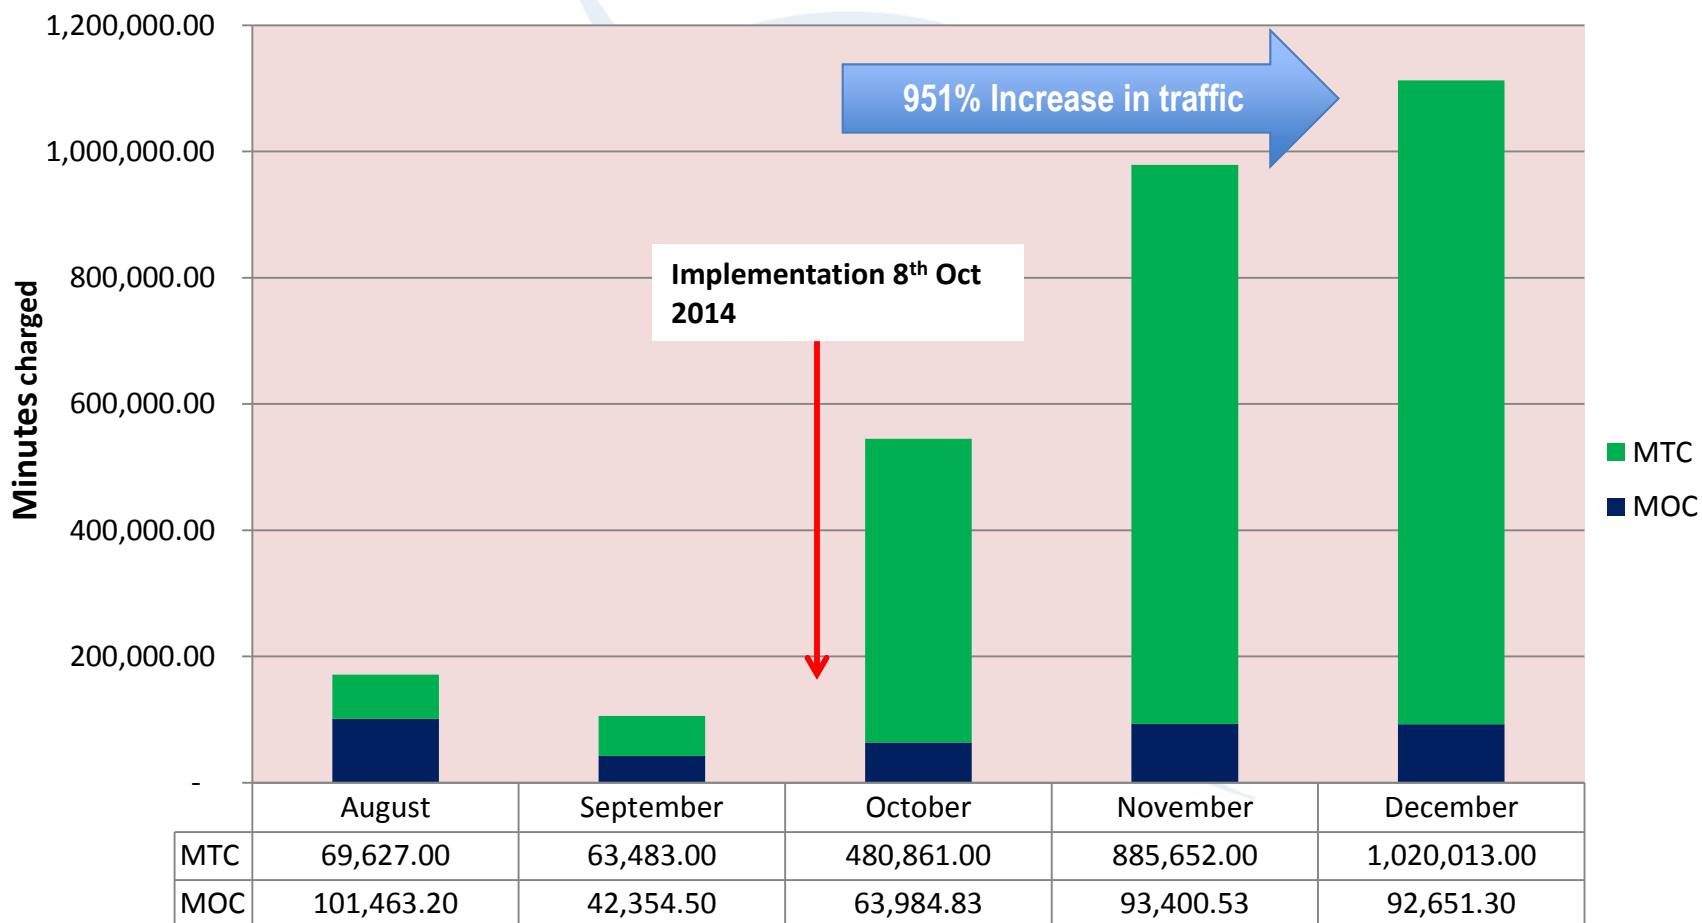

- No charges for receiving calls while roaming;

5

- The prevailing local tariff rates in the visited country shall apply to in-bound roamers (non-discrimination between in-bound roamers and subscribers of visited networks)

Key outcomes as at Implementation: KENYA- RWANDA

(Inbound roaming traffic from Rwanda)

Key outcomes as at implementation Cont...

(Outbound roaming traffic to Rwanda)

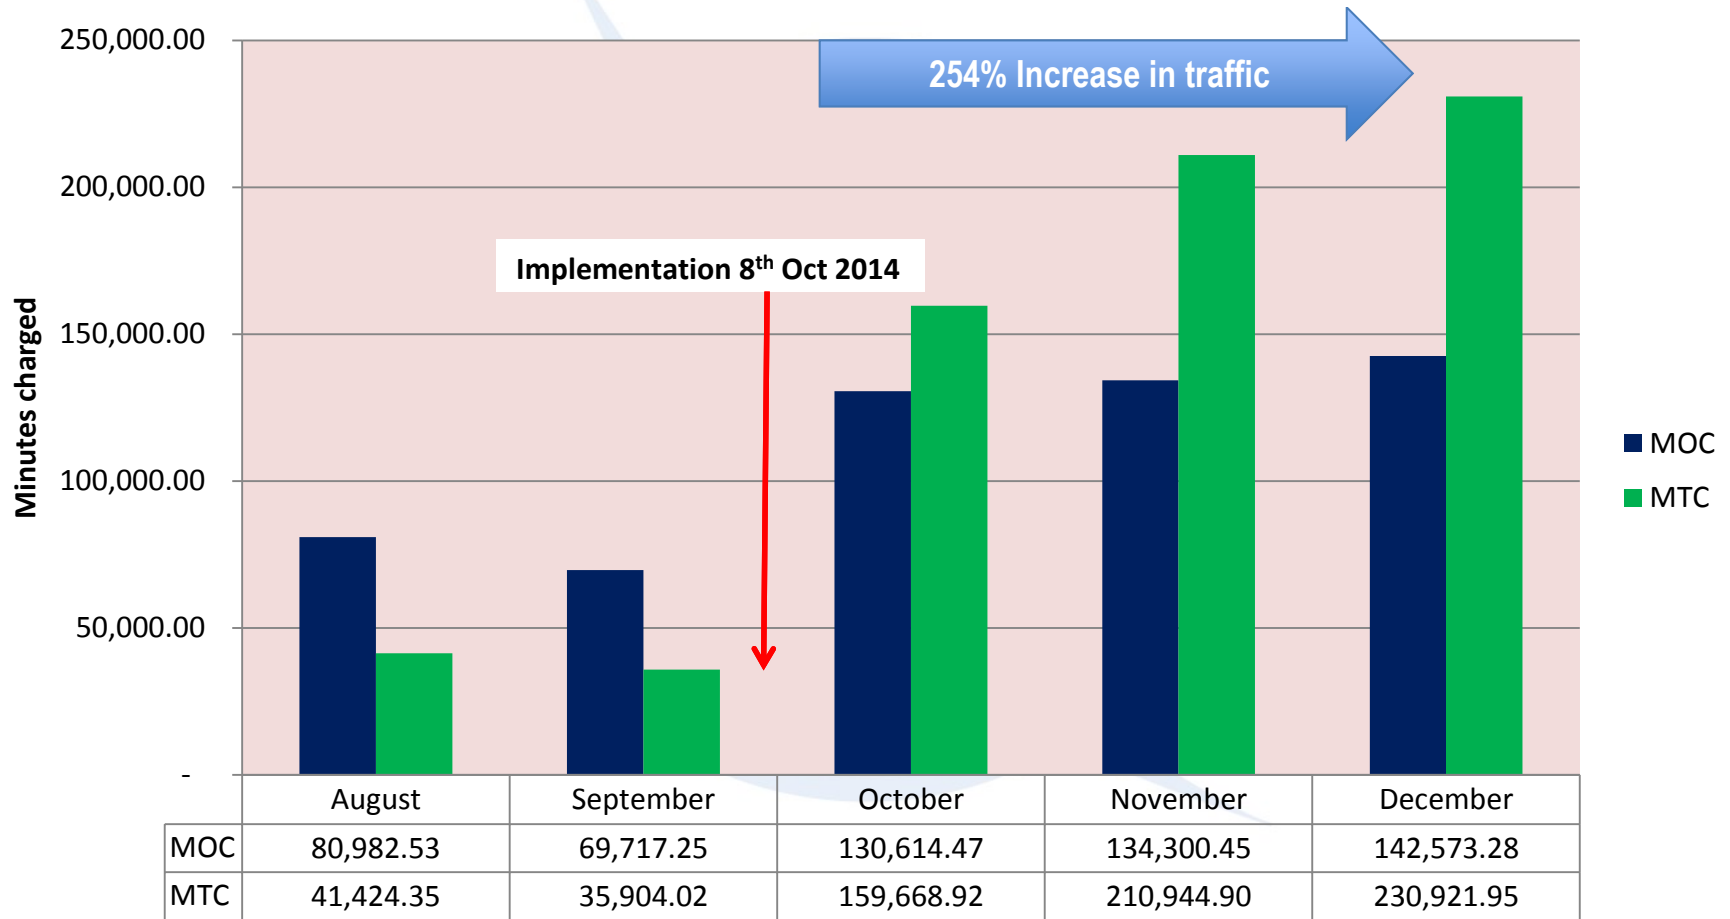

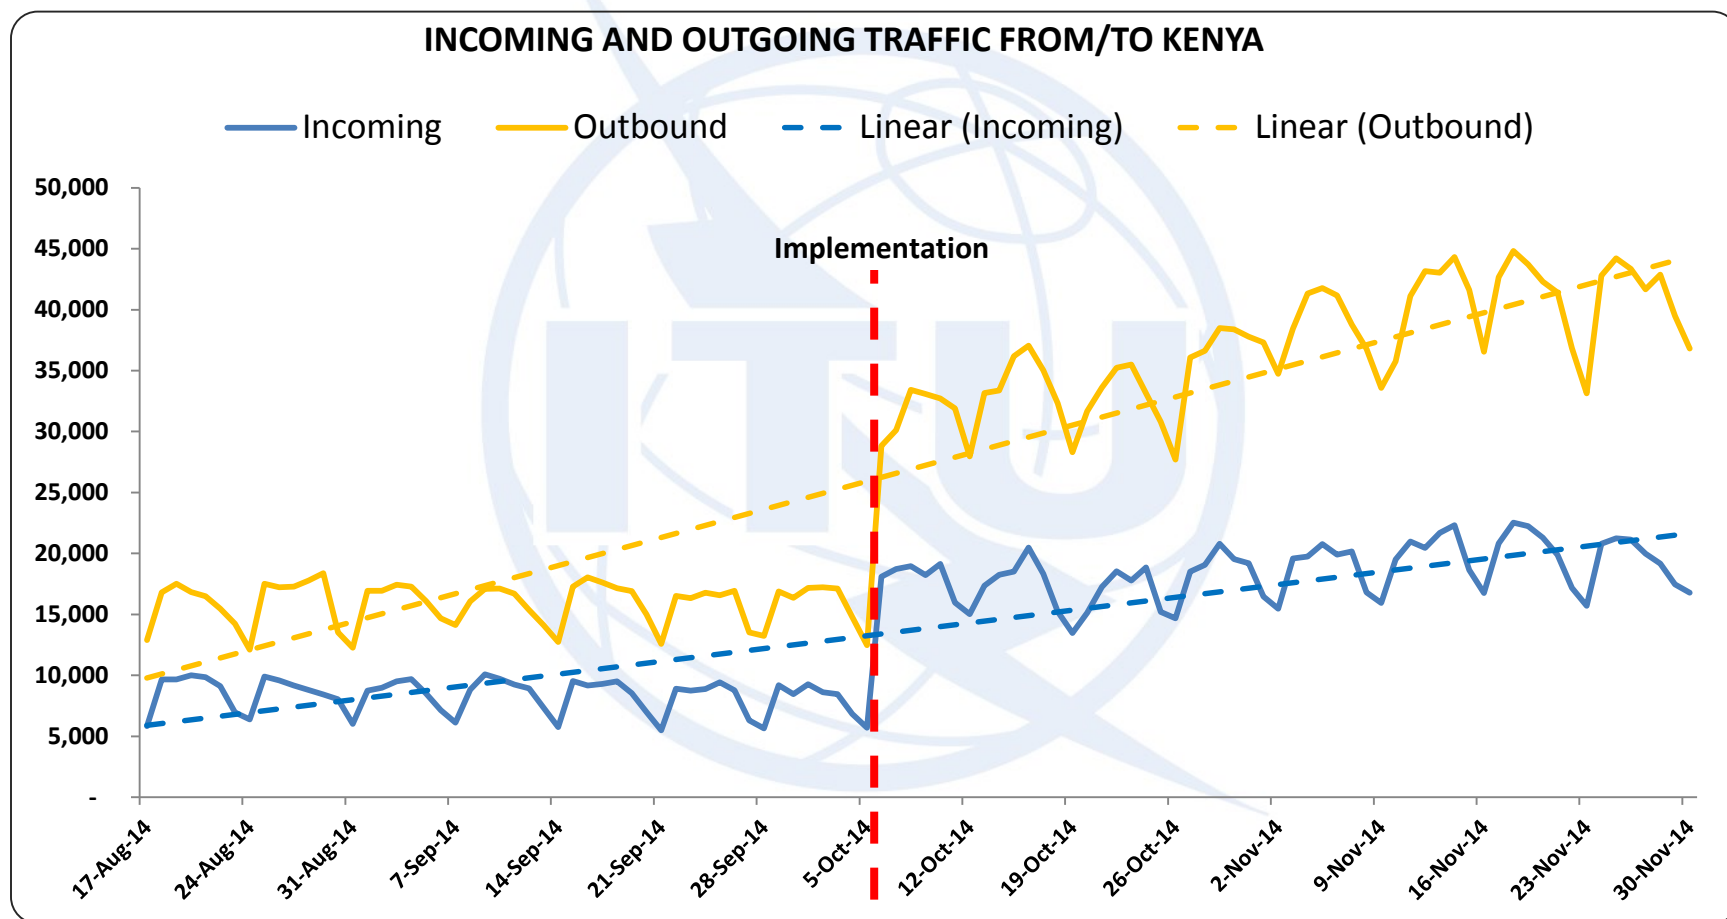

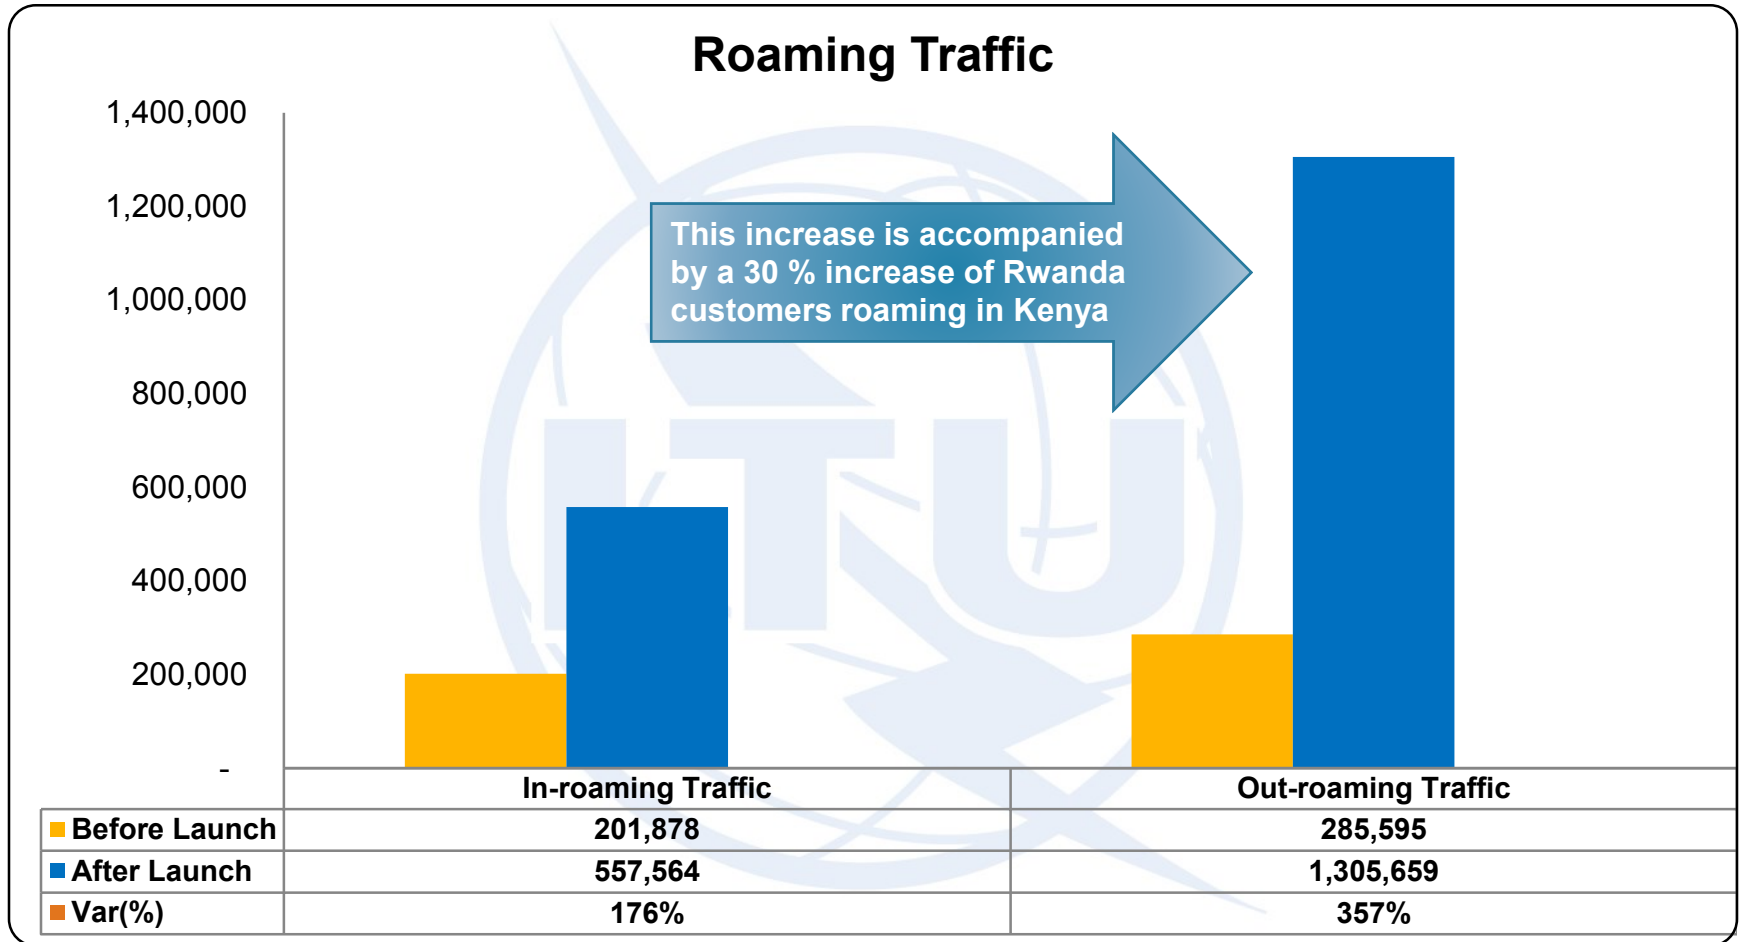

Illustration of traffic before and after launch on one network area (weekly evolution) Kenya and Rwanda

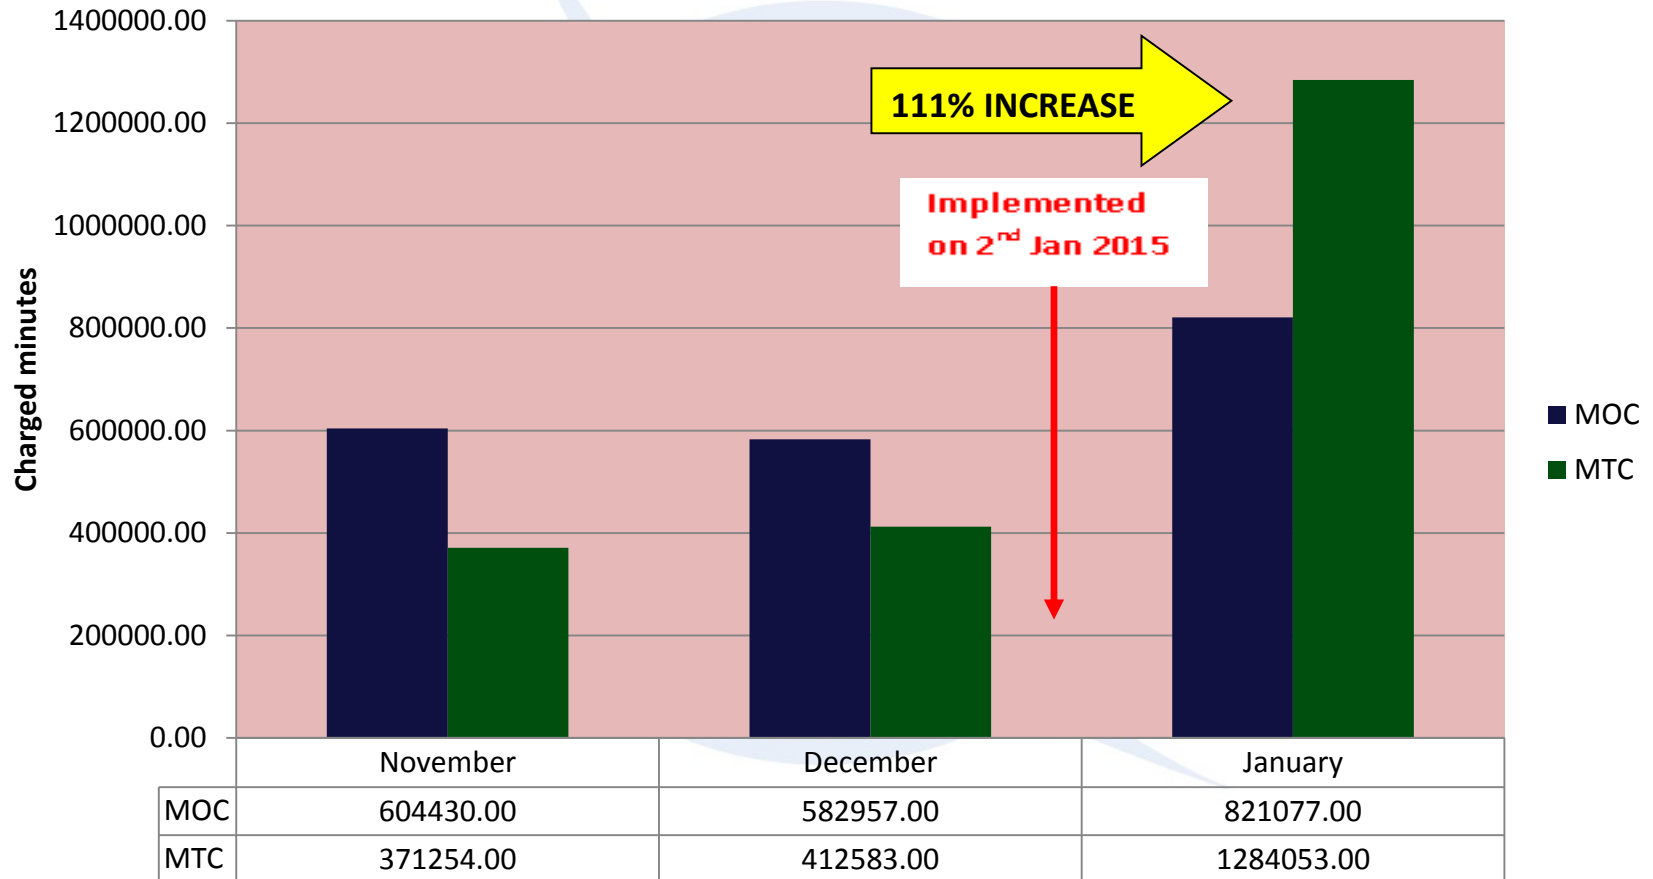

Impact on roaming traffic before and after one network area

Key outcomes as at Implementation: KENYA-UGANDA

(Inbound Roaming Traffic)

Key outcomes as at implementation Cont...

(Outbound roaming traffic to Rwanda)

Roaming charges with Uganda

CALL TARIFFS FOR CUSTOMERS ROAMING IN UGANDA

Phase 2 – ONA for SMS Services

Heads of State directed the implementation of “One-Network-Area” for **SMS services** by 31st May 2015

The Guiding Principles:

The maximum IOT within the Member States of the Northern Corridor should be **USD 0.03 per SMS**;

The maximum retail price for SMS within the Member States of the Northern Corridor should be **USD 0.06 per SMS** inclusive of **all applicable taxes**; and

These rates shall apply for both roaming and cross border SMS traffic within the Northern Corridor.

Implementation of the framework between Kenya, Uganda and Rwanda operators by **1st September 2015**

Other Benefits of One Network Area

Enhance Regional Socio-Economic Integration

Fast-Tracks the Regional Common Market

Reduced cost of doing business for Members states

Spurs other Economic Activities such as Trade and Services

Increased Government Revenues from increased usage of ICT services

What Next?

Harmonization framework for
data services...
