

ON THE ROAD TO 5G

Ines Jedidi

Network Products, Ericsson Maghreb

ITU Arab Forum on Future Networks: "Broadband Networks in the Era of App Economy", Tunis - Tunisia, 21-22 Feb. 2017

AGENDA

- › Why 5G?
- › What is 5G?
- › The Road To 5G
 - › End User Experience & Spectrum Efficiency
 - › IOT as part of 5G
 - › 5G Plug-INS
 - › Deploying 5G

- Why 5G?

FASTER TO 5G

5G

MORE USAGE

8x mobile data traffic between 2016 and 2022 driven by video

MORE PEOPLE

8 billion MBB subscriptions by 2022

MORE THINGS

1.5 billion cellular IoT devices by 2022

MORE BUSINESS

Fixed Wireless Access, Smart Cities, Health Care, etc.

ACCESS COMPLEXITIES

Use Case Technical Requirements Vary Widely

Use Cases

Sensors Everywhere

Broadband and Media Everywhere

Smart Vehicles, Transport

Infrastructure, Monitor and Control

Critical Control of Remote Devices

Interaction Human-IoT

Technical Requirements

- › High User Density
- › High Capacity
- › Low Device Energy Consumption
- › Good Cell Edge Performance
- › Reduced Signaling
- › Low Latency
- › Access to New Spectrum
- › Faster Data Throughput
- › High Availability
- › Quality Uplink

- What is 5G?

WHAT IS 5G – WHAT WILL IT BRING

A Network for the Networked Society

10-100x
END-USER DATA RATES

1000x

PRESS RELEASE

JANUARY 31, 2017

ERICSSON, QUALCOMM, AND NETGEAR LAUNCH TELSTRA'S WORLD-FIRST COMMERCIAL GIGABIT LTE NETWORK WITH 150MBPS UPLOAD SPEEDS

- Telstra, Ericsson, Qualcomm Technologies and NETGEAR deliver the world's first commercial Gigabit LTE network and faster upload data rates, another step towards future 5G capabilities
- Extends Telstra's current network download speed leadership to Gigabit speeds (1Gbps) whilst doubling upload peak speed (~150Mbps)
- Technologies deployed support the evolution of advanced consumer and business applications

Speed test results:

- PING: 20 ms
- DOWNLOAD SPEED: 930.45 Mbps
- UPLOAD SPEED: 127.54 Mbps

Buttons: NEW SERVER, TEST AGAIN, SHARE THIS RESULT

Section: SLOW MAC PERFORMANCE? Run a test to identify issues and speed up your Mac. Includes a 'START NOW' button and a 'PERFORMANCE' gauge.

Section: Are you on Telstra? Take our Broadband Internet Survey!

4X4 MIMO DEPLOYMENT

4x2 MIMO

4x4 MIMO

4x4 MIMO can give additional 48% capacity gain over 4x2 MIMO

ELASTIC RAN: OVERVIEW

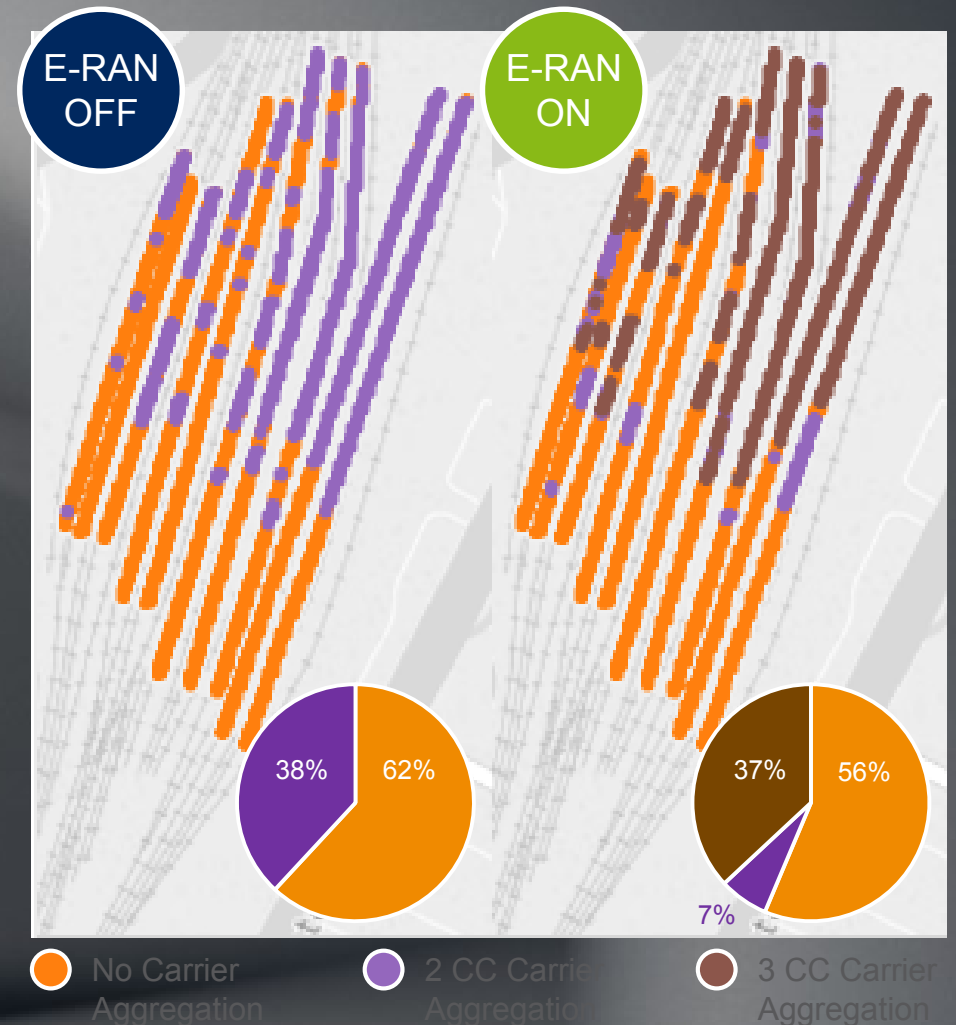

- › Borderless coordination between neighboring sites supporting both CRAN and DRAN deployments
 - UL/DL CA, CoMP, D-MIMO
- › Unlimited peer to peer architecture
- › Resilient, Scalable, Flexible, Uncompromising Performance

ELASTIC RAN AT TOKYO STATION

- › Station area covered by three bands using different grids
- › Baseband units connect with Elastic RAN to enable full inter-site Carrier Aggregation
- › Results
 - Three carriers always scheduled, where available
 - 42% average user throughput increase
 - Example: 14Mbps with 2CC => 34Mbps with 3CC
 - 250% throughput increase by enabling third carrier in CA set

MASSIVE MIMO PLUG-IN

- › Multiple transmission points with many dynamically steerable antennas
- › Information sent directly to the device instead of broadcasting across the cell
- › Significantly increases data throughput & capacity

Massive MIMO Plug-in benefits

High Capacity

Good Cell Edge Performance

Faster Data Throughput

MULTI-USER MIMO PLUG-IN

- › Increase capacity with multiple users on the same resource
- › Manage interference with user specific beam forms to spatially separate users
- › Maximize performance by dynamically switching between single user and multi user MIMO

Multi-User

5G Plug-Ins

2014 | PHASE 1

2015-2016 | PHASE 2

2017+ | PHASE 3

- › Key technology features testing
- › System level evaluation
- › Four 5G Radio Testbeds
(US, Japan, Korea, Sweden)

- › Test application of 5G
for key use cases
- › Advance technology
development

- › Complete trial network
- › Form factor for pre-commercial
deployment

PARTNERSHIP WITH OPERATORS

26

SIGNED 5G OPERATOR AGREEMENTS

PARTNERSHIP WITH OTHER INDUSTRIES

5G-ENABLED WORLD CLASS MANUFACTURING

- › Evaluate 5G technology in manufacturing industry
 - Wireless factory communication
 - Industrial Internet of Things (IIoT)
 - Mission critical clouds (MCC)
 - Data analytics

- › Improved production efficiency
- › Increased flexibility
- › Excellent traceability

INDUSTRIAL MOBILE COMMUNICATION IN MINING

- › Evaluate mobile communication infrastructure in an industrial context
- › Consider strict requirements on safety and robustness in underground mining

- › Increased productivity
- › Improved Safety
- › Industrial 5G requirements
- › Understanding new eco system, business models, etc.

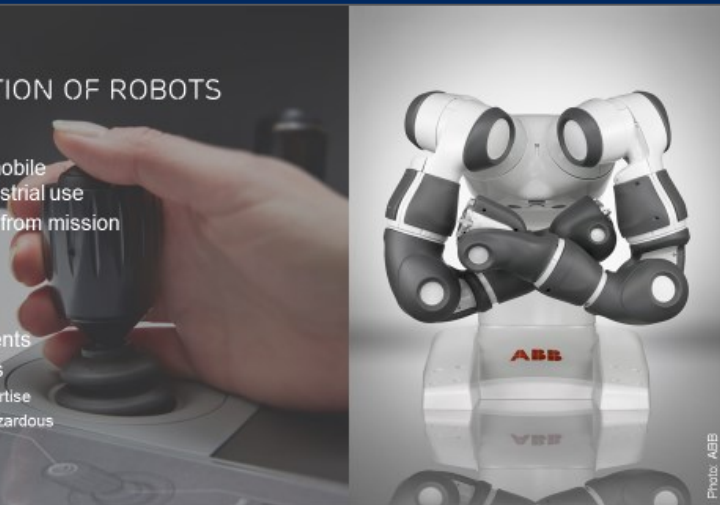

ABB REMOTE OPERATION OF ROBOTS

- › Evaluate potential of mobile communication for industrial use
- › Consider requirements from mission critical operation

- › Industrial 5G requirements
- › Transformation benefits
 - Central utilization of expertise
 - Minimize personnel in hazardous environments
 - Increased productivity

CONNECTED MOBILITY ARENA STOCKHOLM

- › Create Europe's leading test site for connected mobility
 - Open innovation platform
 - Open cellular radio connectivity
 - Management and control platform
 - Efficient management of test activities (system configuration, road authority, etc.)

- › Emergency vehicle prioritization
- › Remote-controlling of platoons
- › Automatic service orchestration

ERICSSON
