## Main Objectives of the Carnival

- To expose ASEAN farmers and communities to the ICT applications and ICT advancement for sustainable agriculture practices
- To bring out and provide opportunities for ASEAN farmers to interact and use ICT platform to exchange farming expertise and knowledge
- To invoke ASEAN spirit and promote solidarity and unity through ASEAN common identity

## The Carnival

- 2-day Conference and discussion fora
- 2-day running exhibition of farmers' innovation and products from the region
- Training-of-Trainers on the SAFSeN System and community empowerment
- Training on farming technique for sustainable agriculture
- Networking and sharing knowledge and experience

*Enhanced  
productivity and  
efficiency through  
appropriate  
technologies.*

f /SAFSeN Indonesia  
f /SAFSeN Laos  
f /SAFSeN Thailand

*By the community, from and for the people of ASEAN*

## About SAFSeN

SAFSeN is an Information platform ([www.sea-farmnet.org](http://www.sea-farmnet.org)), which is designed to:

- provide agricultural tips on appropriate technology to rural small-scale farmers
- bridge gaps in educational and literacy levels amongst farmers
- tackle language barriers (embracing technology through diversity) in ASEAN
- link and network ASEAN farmers

## ASEAN Smart Farmer program

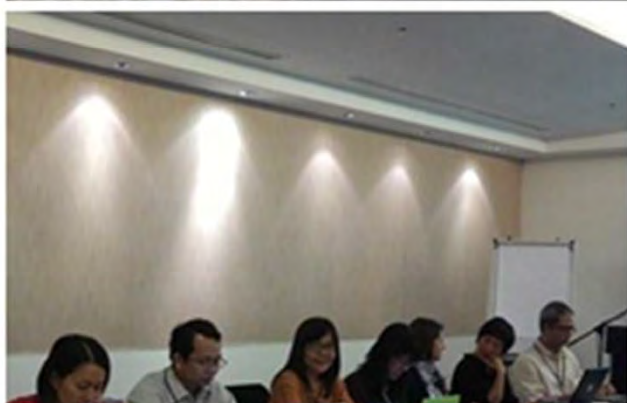

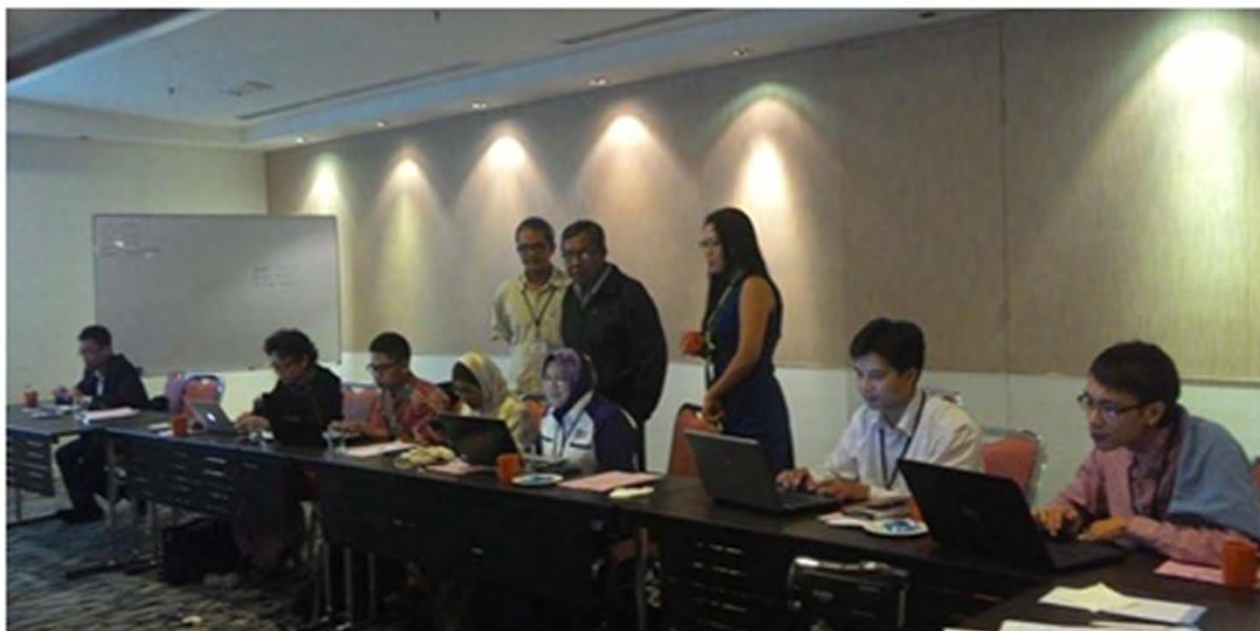

A program initiated to empower all farmers in ASEAN using ICT (Information Communication and Technology) to communicate and share for greater exposure to more opportunities and to further strengthen development foundation for self-sufficiency and ecological awareness in the region.

Currently under piloting with the Farm Women Group <http://smartfarmwomen.org/>

## Who should join this event:

- Farmers and food producers
- Rural communities, cooperatives and social enterprises
- ICT users, practitioners, developers for farm and agriculture applications
- CSOs, NGOs and community leaders
- Government and inter-government agencies
- Academic and research institutions
- Donors and supporters for rural empowerment and sustainable agriculture, food security and ICT advancement

## SAFSeN-ASEAN Smart Farmers REGIONAL CARNIVAL

ADVANCING ASEAN COMMUNITY, ENSURING FOOD SECURITY  
20-23 JANUARY 2015 MAEJO UNIVERSITY, CHIANGMAI, THAILAND

## Master plan in year 2015

At first, step forward. We started from our empowerment principle **power** joining idea and network built on trust. On Empowerment **From the power**, we could retain the power of community and good culture communicates society.

One more important group is Organic Agricultural Youth Farmer. They will be grouped together and started at home for organic products. After stable products, the shop online were utilized to promote their products same as we used throughout these community products now. In this group, each part of Guru and staff will be supported and help them to learn and do until could be started by themselves

The young farmers are from 3 different youth groups ; Young Entrepreneur , Youth Guide and Youth Reporter. They will work together as one team and will be trained with Joomla. After training we expect them to be able to work and pass on knowledge to matured farmers, so that all these farmers can be able to use the internet as a channel to promote themselves and their stories.

## Enhancing ICT skill for youth SMEs in Thailand year 3

ระหว่างวันที่ 27-29 มีนาคม 2558

ณ โรงเรียนร่มเกล้า อำเภอโนนดินแดง จังหวัดบุรีรัมย์

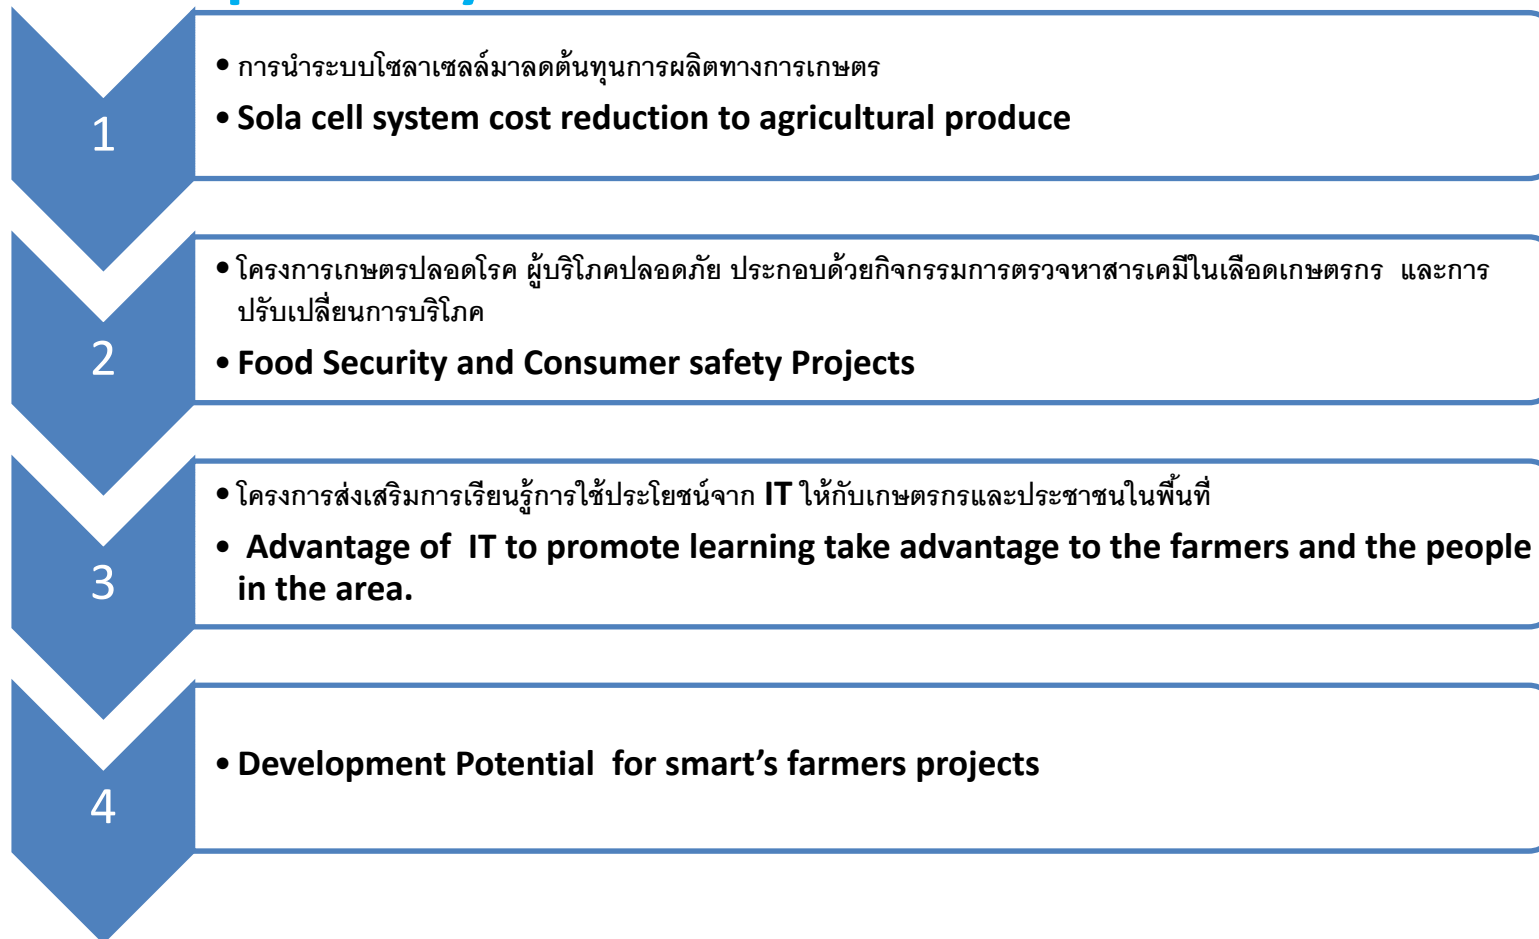

Master plan in year 2015

# Schedule Plan from Burirum SafSen-aec

## Master plan in year 2015
