Tonga Multi Disaster Early Warning System

“APT Pilot Project for e-disaster communication network in rural island environment”

Presented by: Stan Ahio

Ministry of Meteorology, Environment, Information,
Disaster Management, Energy, Climate Change and
Communications

Outlines

- Objectives of the project
- Project output
- Project Sites
- Partner organizations
- Project schedule
- Network Configuration
- Evaluation

Objectives of the project

- Introduce a broadband IP radio network and OFC as e-disaster communication infrastructure of the pilot system
- Introduce multi-purpose Early Warning System using loud speakers for securing information dissemination to the residence in vulnerable area.
- Establish Disaster Information System (DIS) which supports Disaster Management activities.
- Implement experiments on ambitious technologies to find feasibilities in South Pacific environment as research activities.

Project output

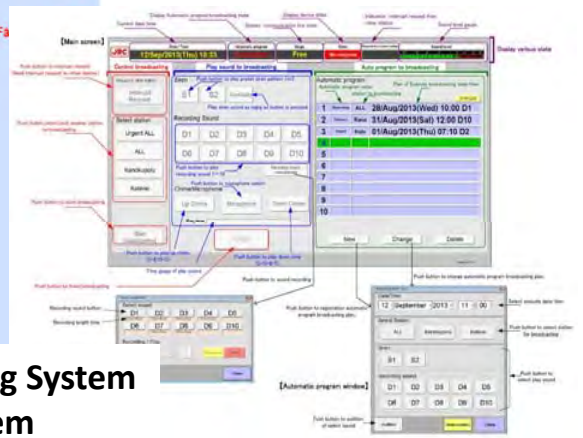

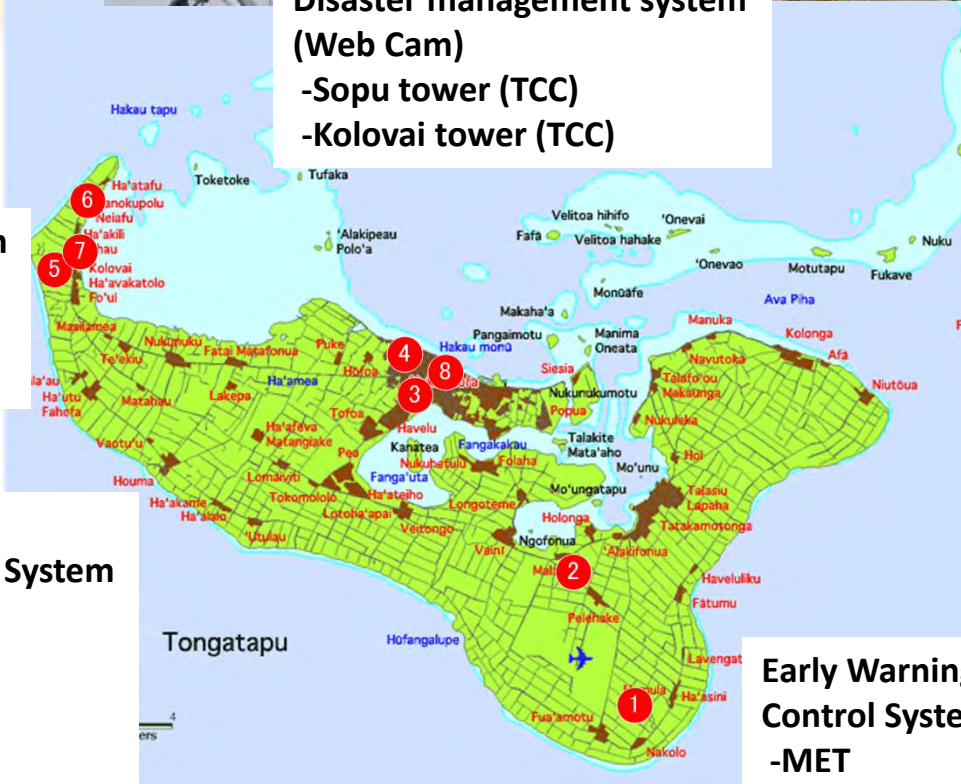

Disaster management system
(Web Cam)
-Sopu tower (TCC)
-Kolovai tower (TCC)

Disaster management system
(Large screen, Portal site)
-NEMO

Early Warning System
Speaker System
-Kanokupolu
-Kolovai

Infrastructure
4.9GHz Wireless LAN System
-Kanokupolu
- Kolovai
- Sopu
- Malapo
- MET

Early Warning System
Control System
-MET
-NEMO

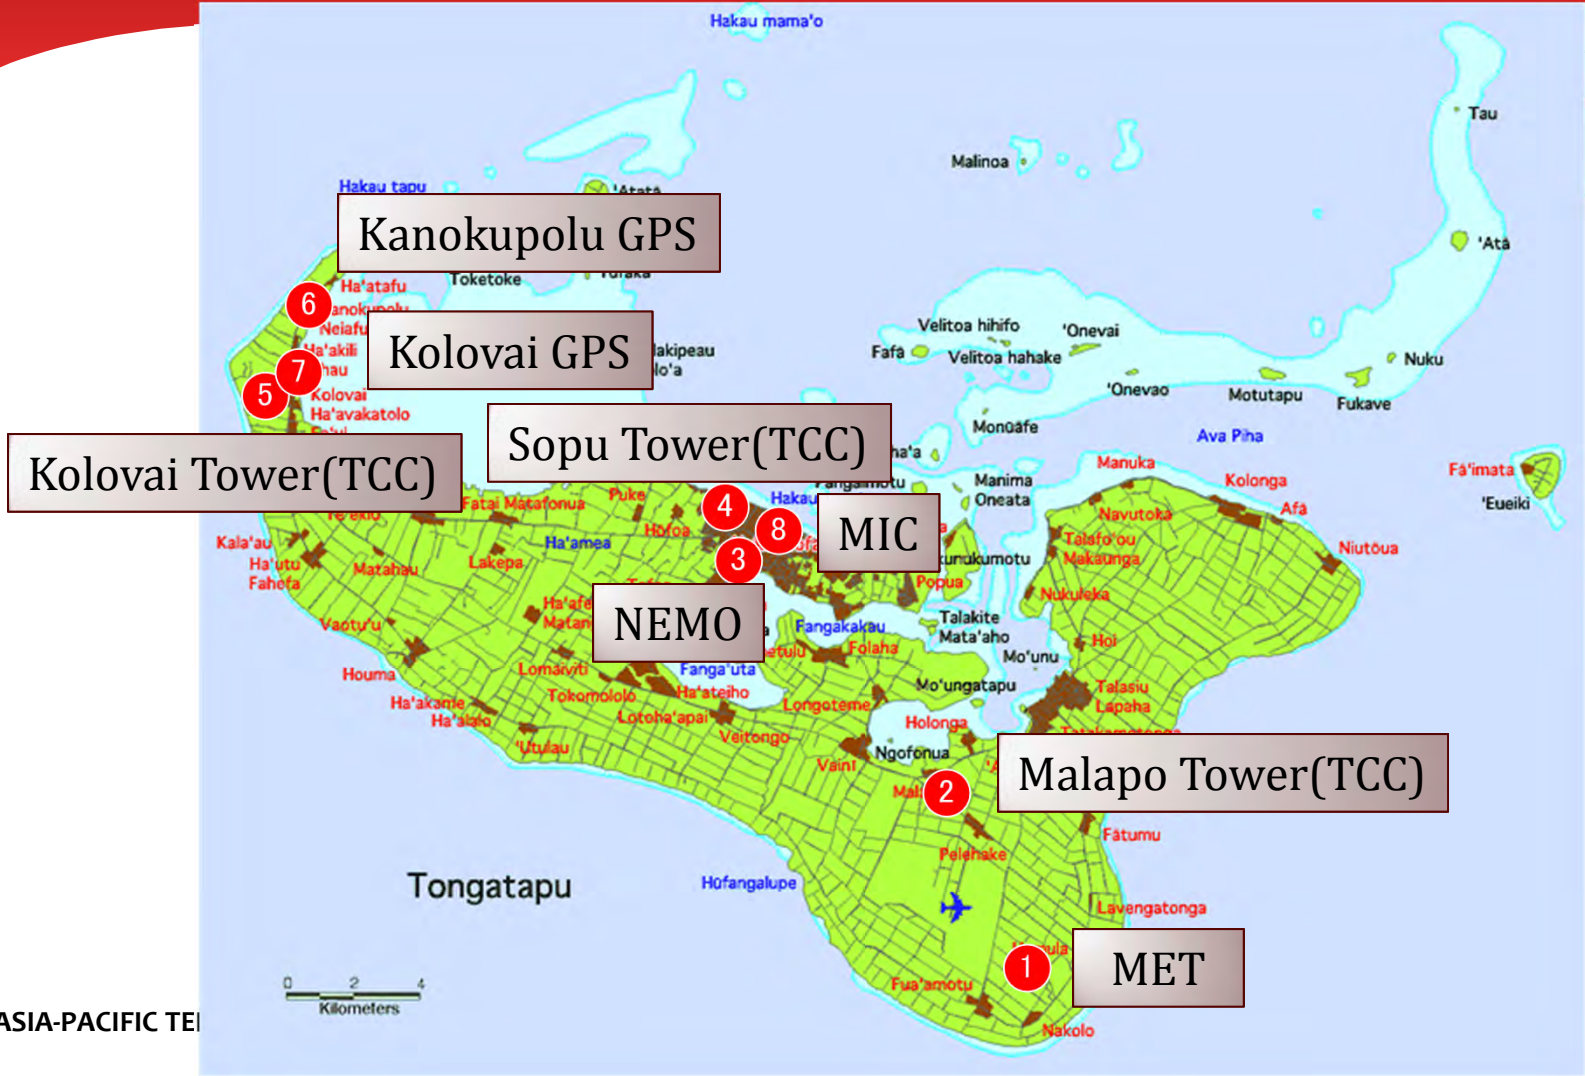

Project output

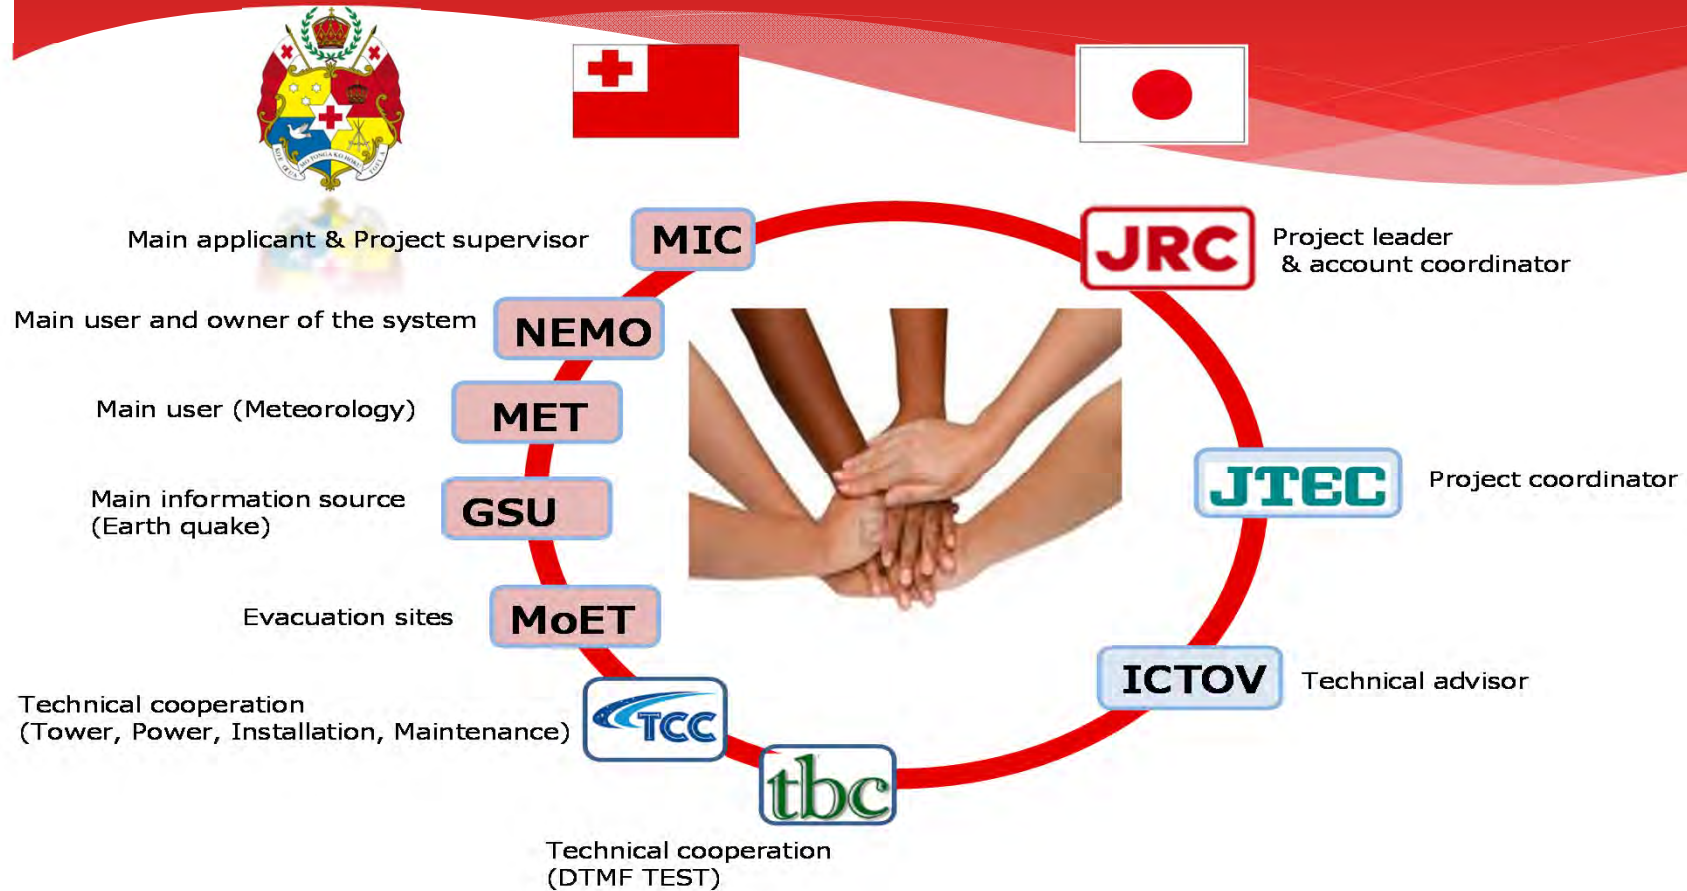

Technical demonstration on “Horn array long range speaker” in Nuku’alofa downtown was implemented for multi-purpose standalone PA system.

Final report

Network Configuration

Infrastructure of IP Network

Evaluation (Early Warning System/Speaker)

Evaluation of the loud speaker service area

Kanokupolu

Kolovai

At all evaluating points got rating “four or more”.

Rating	Criterion of judgment	Remarks
5	Excellent, understand well (no echo)	
4	Very good, understand well	
3	Good, understand	
2	Not good, but understand	
1	if it is heard carefully, understand	
0	Cannot understand what is said	

Thank you. Malo 'Aupito.
