

Bill Lan

Vice President

Wireless Network Development
Huawei Technologies

Bill Lan is the Vice President of Wireless Network Development as well as Chief Regulatory Officer of Huawei Technologies where he is responsible for ICT policy and regulatory consultancy, strategic planning, network and business consulting and the management of key projects. He is also a core member of the Huawei National Broadband Network team cooperating with ITU driving broadband business development and network deployment worldwide.

Most recently, Mr. Lan managed various broadband network consulting projects for Huawei's key customers in Europe, Middle East, Africa and Asia Pacific. In addition, Mr. Lan draws on his deep knowledge of telecommunications industry trends and global best practices to deliver successful business plans for regulators and operators in fields such as national ICT, national broadband network, spectrum roadmap, spectrum management, mobile licensing regime and network construction standards.

Mr. Lan has more than 20 years of experience in the business consulting, venture capital, telecommunications and ICT industries. He has held various positions in global renowned companies, including Deloitte Consulting, Lucent Technologies and China Development Industry Bank. Mr. Lan holds a MBA from University of Manchester, UK.
