Digital transformation and innovation for a sustainable and
equitable digital future: Supporting the SDGs

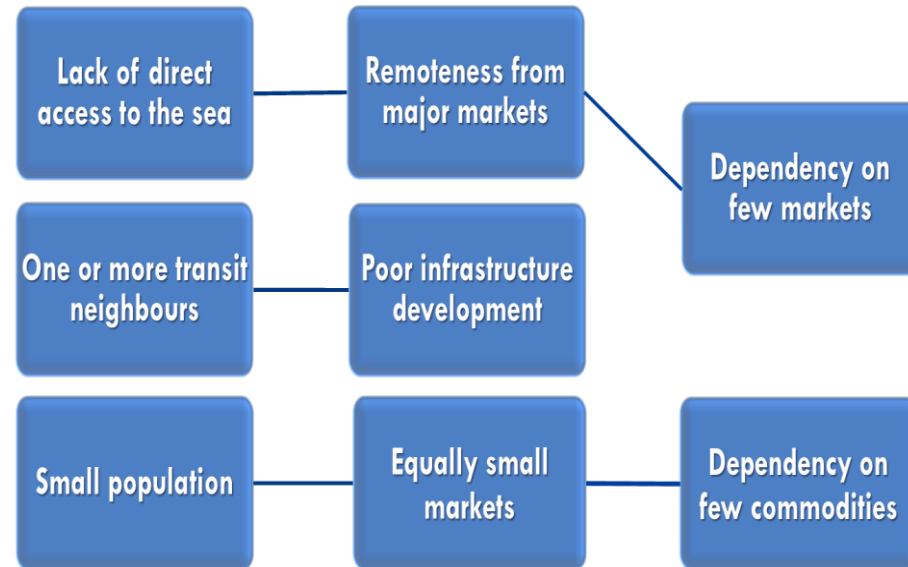

13 -15 September 2023

32 LLDCs: In Asia **10**, in Africa **16**, in Europe **4**, in South America **2**

- The total population of LLDCs is 533 million (2020) – equal to 7% of the world's population.
- LLDCs cover 15.9 million km² or 22% of the world's land area. Average distance to a seaport 1370 km.
- LLDCs account for 1.2% of world trade, and it continues to decline.
- Only a few LLDCs account for 60% of the total LLDCs exports,
- Double time and cost for exporting and importing compared to transit countries/coastal economies,
- LLDCs are 20% less developed than the countries with direct sea access.
- Half of LLDCs are least developed countries.

COMMON CHALLENGES IN LLDC

COVID impact in LLDCs

- Increased and urgent demand for health care, medical equipment and pharmaceutical products
- Highly dependent on transit countries
- More costs and times for export and import
- Heavily reliant on commodity exports;
- High levels of external debt and debt crisis
- Less remittances flows
- Food crisis

COVID-19 to Cut off Remittance Flow to Asia

and aspects of people’s life.**

World

Connectivity in the Decade of Action

The three challenges of the 2020-2030 decade:

Closing the coverage gap: even though 95 per cent of the world population is now within range of a mobile broadband network, at least 390 million people have no possibility to connect to the Internet.

Closing the usage gap: one in three individuals who could go online choose not to, mainly due to prohibitive costs, lack of access to a device, and/or lack of awareness, skills, or purpose.

Achieving meaningful connectivity for all: For many Internet users, connectivity is not good enough to do online what they want whenever they want.

ICT DEVELOPMENT GOALS IN LLDCS

Vienna Programme of Action:

Priority 2: Infrastructure development and maintenance

- (b) Energy and information and communication technology infrastructure

Sustainable Development Goals:

Target 4.4: Proportion of youth/adults with ICT skills, by type of skills

Target 5b: Proportion of individuals who own a mobile telephone, by sex

Target 9c: Percentage of the population covered by a mobile network, broken down by technology

Target 17.6: Fixed Internet broadband subscriptions, broken down by speed

Target 17.8: Proportion of individuals using the Internet

Connectivity in LLDCs

Percentage of individuals using the internet by region, 2022

Connectivity in LLDCs

Percentage of individuals owning a mobile phone, 2022

Population coverage by type of mobile network, 2022

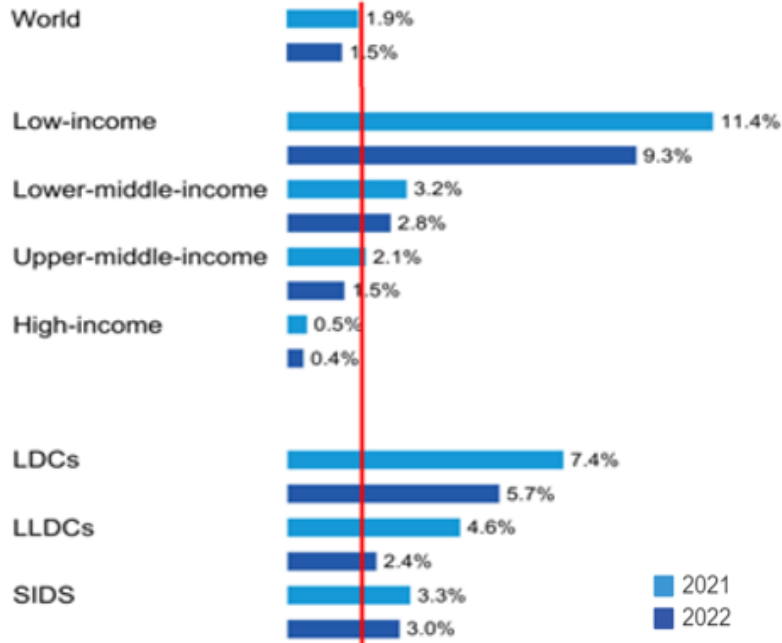

Population coverage by type of mobile network and area, 2022

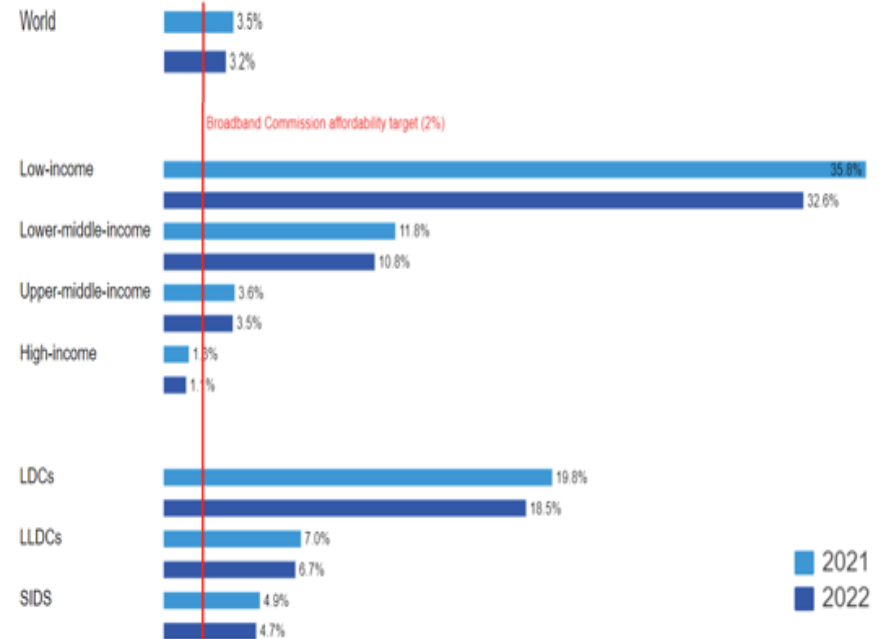

Connectivity in LLDCs

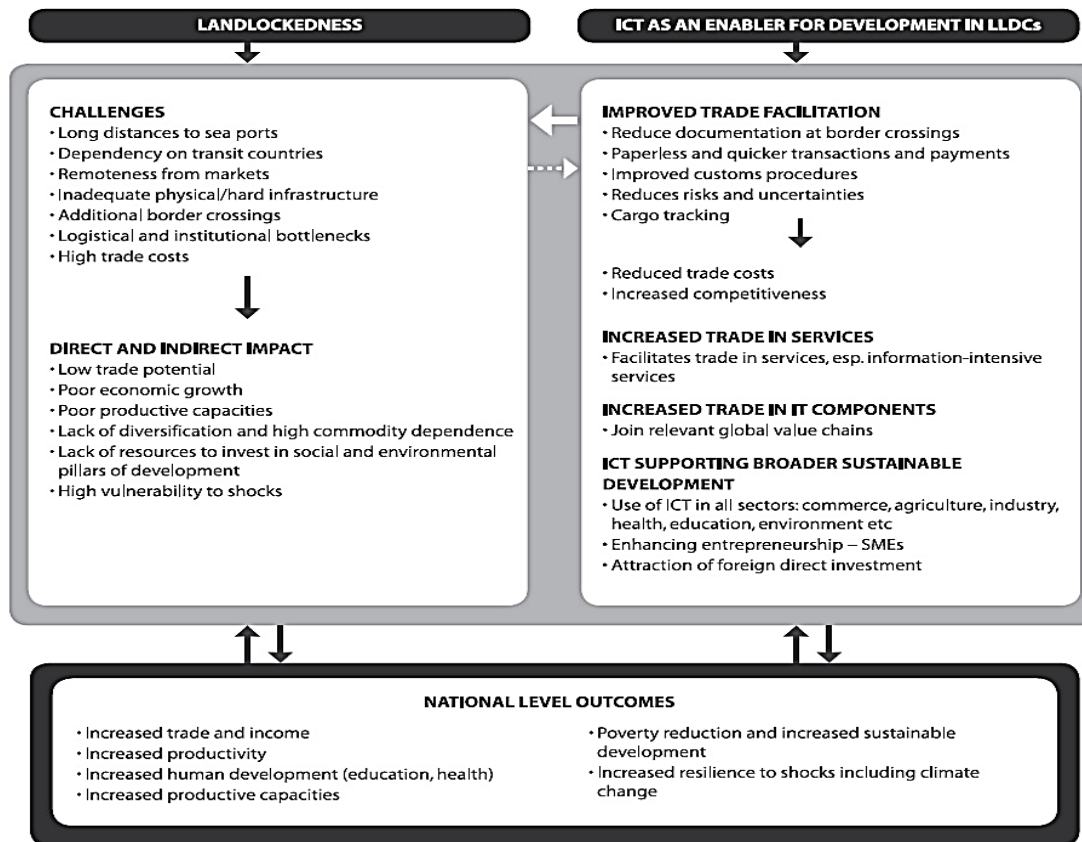

Data-only mobile broadband (2GB) basket price as % of GNI per capita, 2021-2022

Fixed broadband (5GB) basket prices as % of gross national income per capita, 2021-2022

THE ROLE OF ICT IN LLDCs

International Resolutions on ICT Development in LLDCs

- International Telecommunication Union, Resolution 30, 2010
- World Conference on International Telecommunications, Resolution PLEN/1, 2012
- World Telecommunication Development Conference, Resolution 16, 2014
- Astana Ministerial Declaration and “Achieving the Sustainable Development Goals in Landlocked Developing Countries through connectivity and trade facilitation”, 2018

Digital transformation in LLDC: Case of Mongolia

- The Government of Mongolia set out a 5 year plan to build a '**Digital Nation**'
- Mongolia wants to deliver digital transformation up to 90 percent by 2024

MINISTRY OF DIGITAL
DEVELOPMENT AND COMMUNICATIONS

- Necessary legal framework was created to accelerate digital transformation
- A set of digital development laws were approved:
 - Law on Personal Information Protection,
 - Law on Public Information,
 - Law on Cybersecurity,
 - Rules of Digital Signatures, and Virtual Asset Service Providers

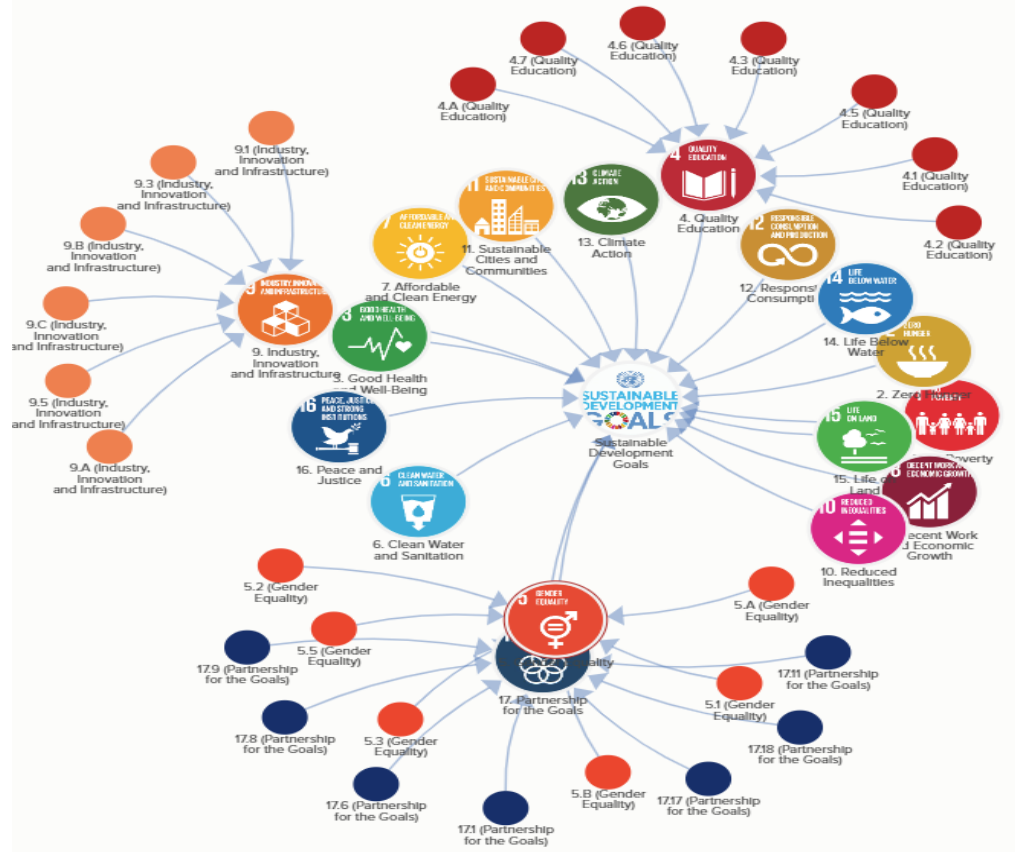

Digital transformation in LLDC: Case of Mongolia

- Startups and private sector innovation have accelerated in Mongolia.
- Digital governance has taken new steps against red-tape bureaucracy and corruption.
- The country launched the E-Mongolia platform, which provides government services online.
 - about 2,000 government services online
 - over 75 per cent of the adult population use

WAYS FORWARD

- Provide targeted support for LLDCs for policy update and development, financing new technology and infrastructure, and innovation;
- Increase investment and funding to the ICT soft and hard infrastructure development;
- Develop a regional approach to address the connectivity challenges;
- Create enabling environment for the supported development of ICT;

WAYS FORWARD

LLDCs consultations emphasized the need for streamlined customs procedures, improved infrastructure, digital connectivity, access to finance and inclusive reforms.

- ✓ Digitalize and adapt to emerging technologies for seamless, contactless, and paperless border crossings. The priority digital reforms areas include:
- ✓ Encourage the digital transition of trade finance operations in LLDCs by promoting the adoption of digital solutions and providing support to partner banks.
- ✓ Support through capacity-building initiatives, knowledge-sharing platforms, and public-private partnerships to enhance digitalization, trade competitiveness and market access.

FURTHER COOPERATION WITH ITU

- ✓ Providing support for strategic interventions through a joint research, thematic studies and policy recommendations for digital development of LLDCs
- ✓ Providing a platform for ICT knowledge sharing, support for intra-LLDC collaboration, other South-South engagement and global cooperation
- ✓ Exchanging ICT expert views and providing the best practices to LLDCs
- ✓ Providing support to develop public and private partnerships that support digitalization in LLDCs
- ✓ Organizing high-level expert group meetings and capacity building workshops
