

Ministry of Information Technology  
& Telecommunication

**DIGITAL PAKISTAN**

# Smart Village and Resilient Communication Pakistan

# Agenda

- ▶ Smart Village - A success Story for Pakistan
- ▶ Secure and Resilient Information and Communication Technology Environment for Pakistan

# Smart Village Pakistan

The background features abstract, overlapping geometric shapes in various shades of green, ranging from light lime to dark forest green. These shapes are primarily located on the right side of the page, creating a modern, layered effect. The text 'Smart Village Pakistan' is positioned on the left side of the page in a clean, sans-serif font.

# Smart Villages

Smart Villages programs are designed to address the socio-economic challenges faced by communities through a **digital transformation at the community level** with emphasis on vulnerable populations (women, youth, and persons with disabilities)

# CONTEXT

**63%** of the population is rural

**YET, IN RURAL REGIONS:**

poverty rate is  
**2 times**  
higher

3G network coverage is  
**40 %**  
lower

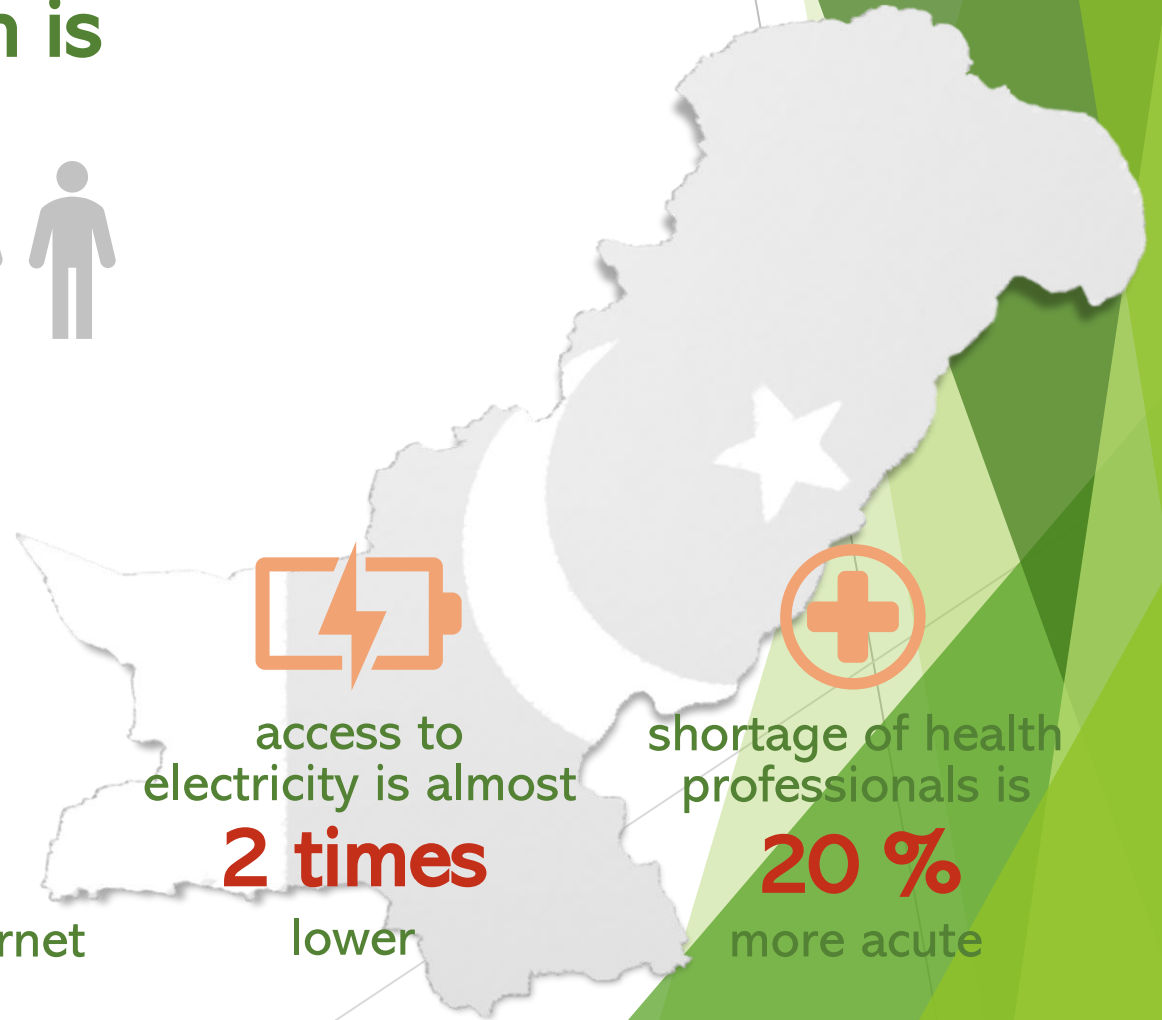

only around  
**8 %**  
use the Internet

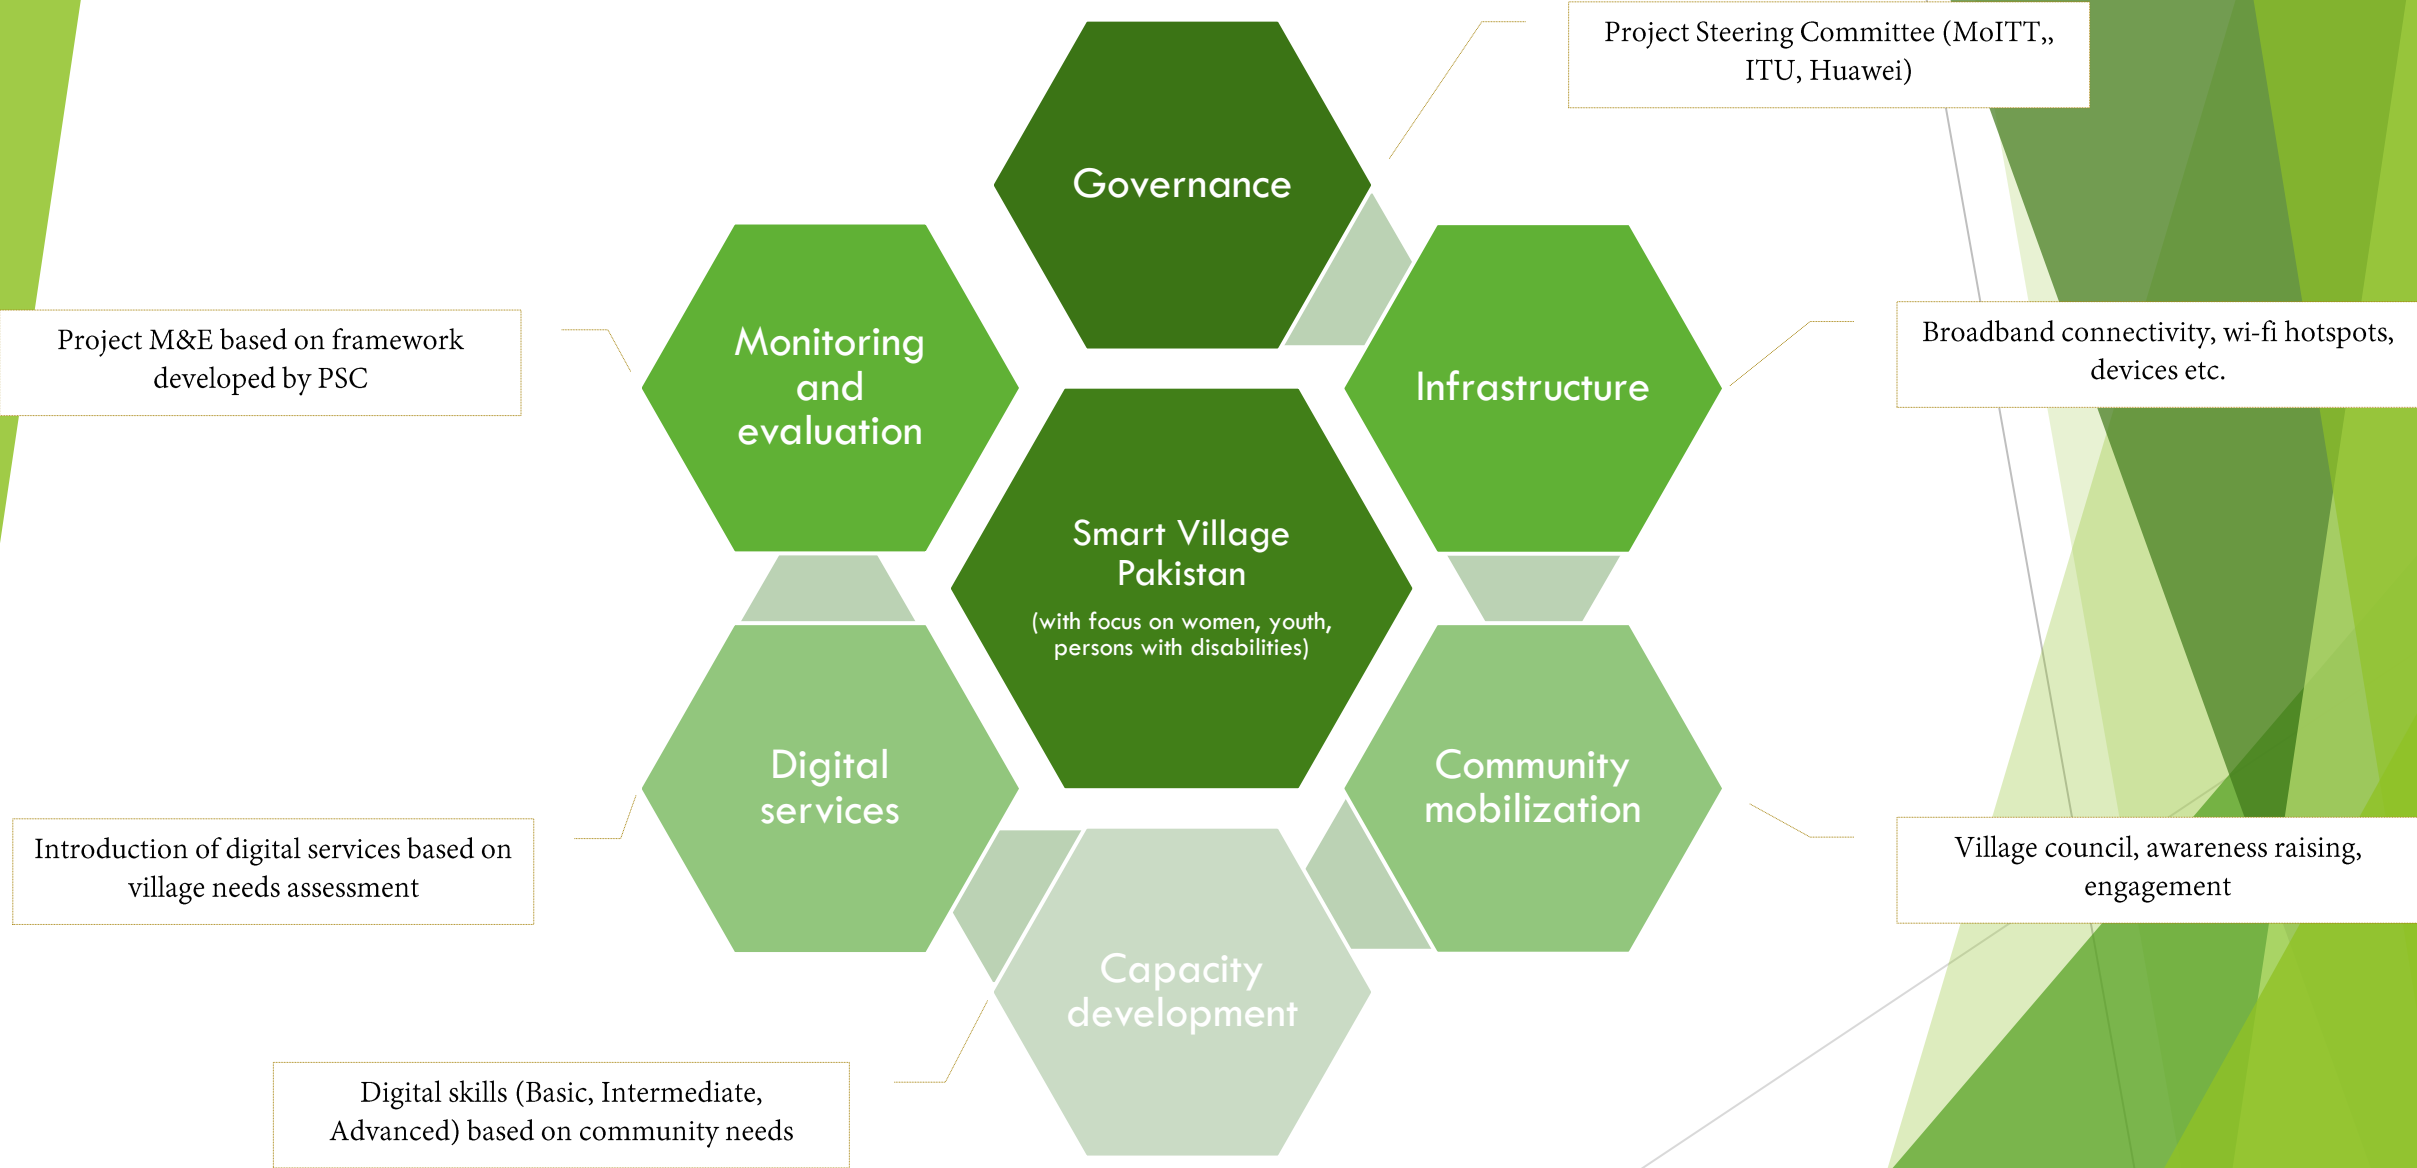

access to electricity is almost  
**2 times**  
lower

shortage of health professionals is  
**20 %**  
more acute

# PROJECT COMPONENTS

# Smart Village Pakistan- Stages of Implementation

# Smart Village Pakistan- Priority Areas

## High-priority areas identified for Smart Village Gokina

Access to Education (e-education) & Digital Skills

Access to Health Services ( e-health/telemedicine)

Digital Skills & Entrepreneurship

## Smart Village Gokina- Medium to Long term thematic areas

Access to Digital Government Services

Digital Financial Services

E-Tourism

Smart Electricity

E-Commerce

# Digital services in Gokina

## Education

- Teletaleem

2 Smart Classes are equipped by Teletaleem with digital equipment in the Gokina girls school.

More than 100 girls from grades 8 and 9 are now enrolled and learning science subjects ( 3 classes per day), which would accelerate STEM education amongst girls in Gokina.

## Health

- Sehat Kahani

Since the soft launch of Sehat Kahani's telemedicine clinic on 15<sup>th</sup> January 2023, more than **671 patients** have availed the services so far, with **82%** women representation (70 patients in the clinic+ 55 in the telemedicine camp). A dashboard is under development stage and 50% work is done

## Entrepreneurship

- Virtual University
- Jazz

With the support of Jazz (leading telecom operator), more than 100 girls will be trained in Digital Skills training till May 2023

# Smart Classrooms VS e-Learning *Learning Impact*

Taught by  
TeleTaleem Online Teachers

32%

GAIN IN GENERAL SCIENCE

29%

GAIN IN CHEMISTRY

*50% of students showed improvement in General Science  
100% of students showed improvement in Chemistry*

*-This is based on less than 3 months of instruction time  
-Learning gain and learning losses just show a trend  
-More definitive picture will emerge at the end of academic year  
2023-24*

Taught by  
School Teacher\*

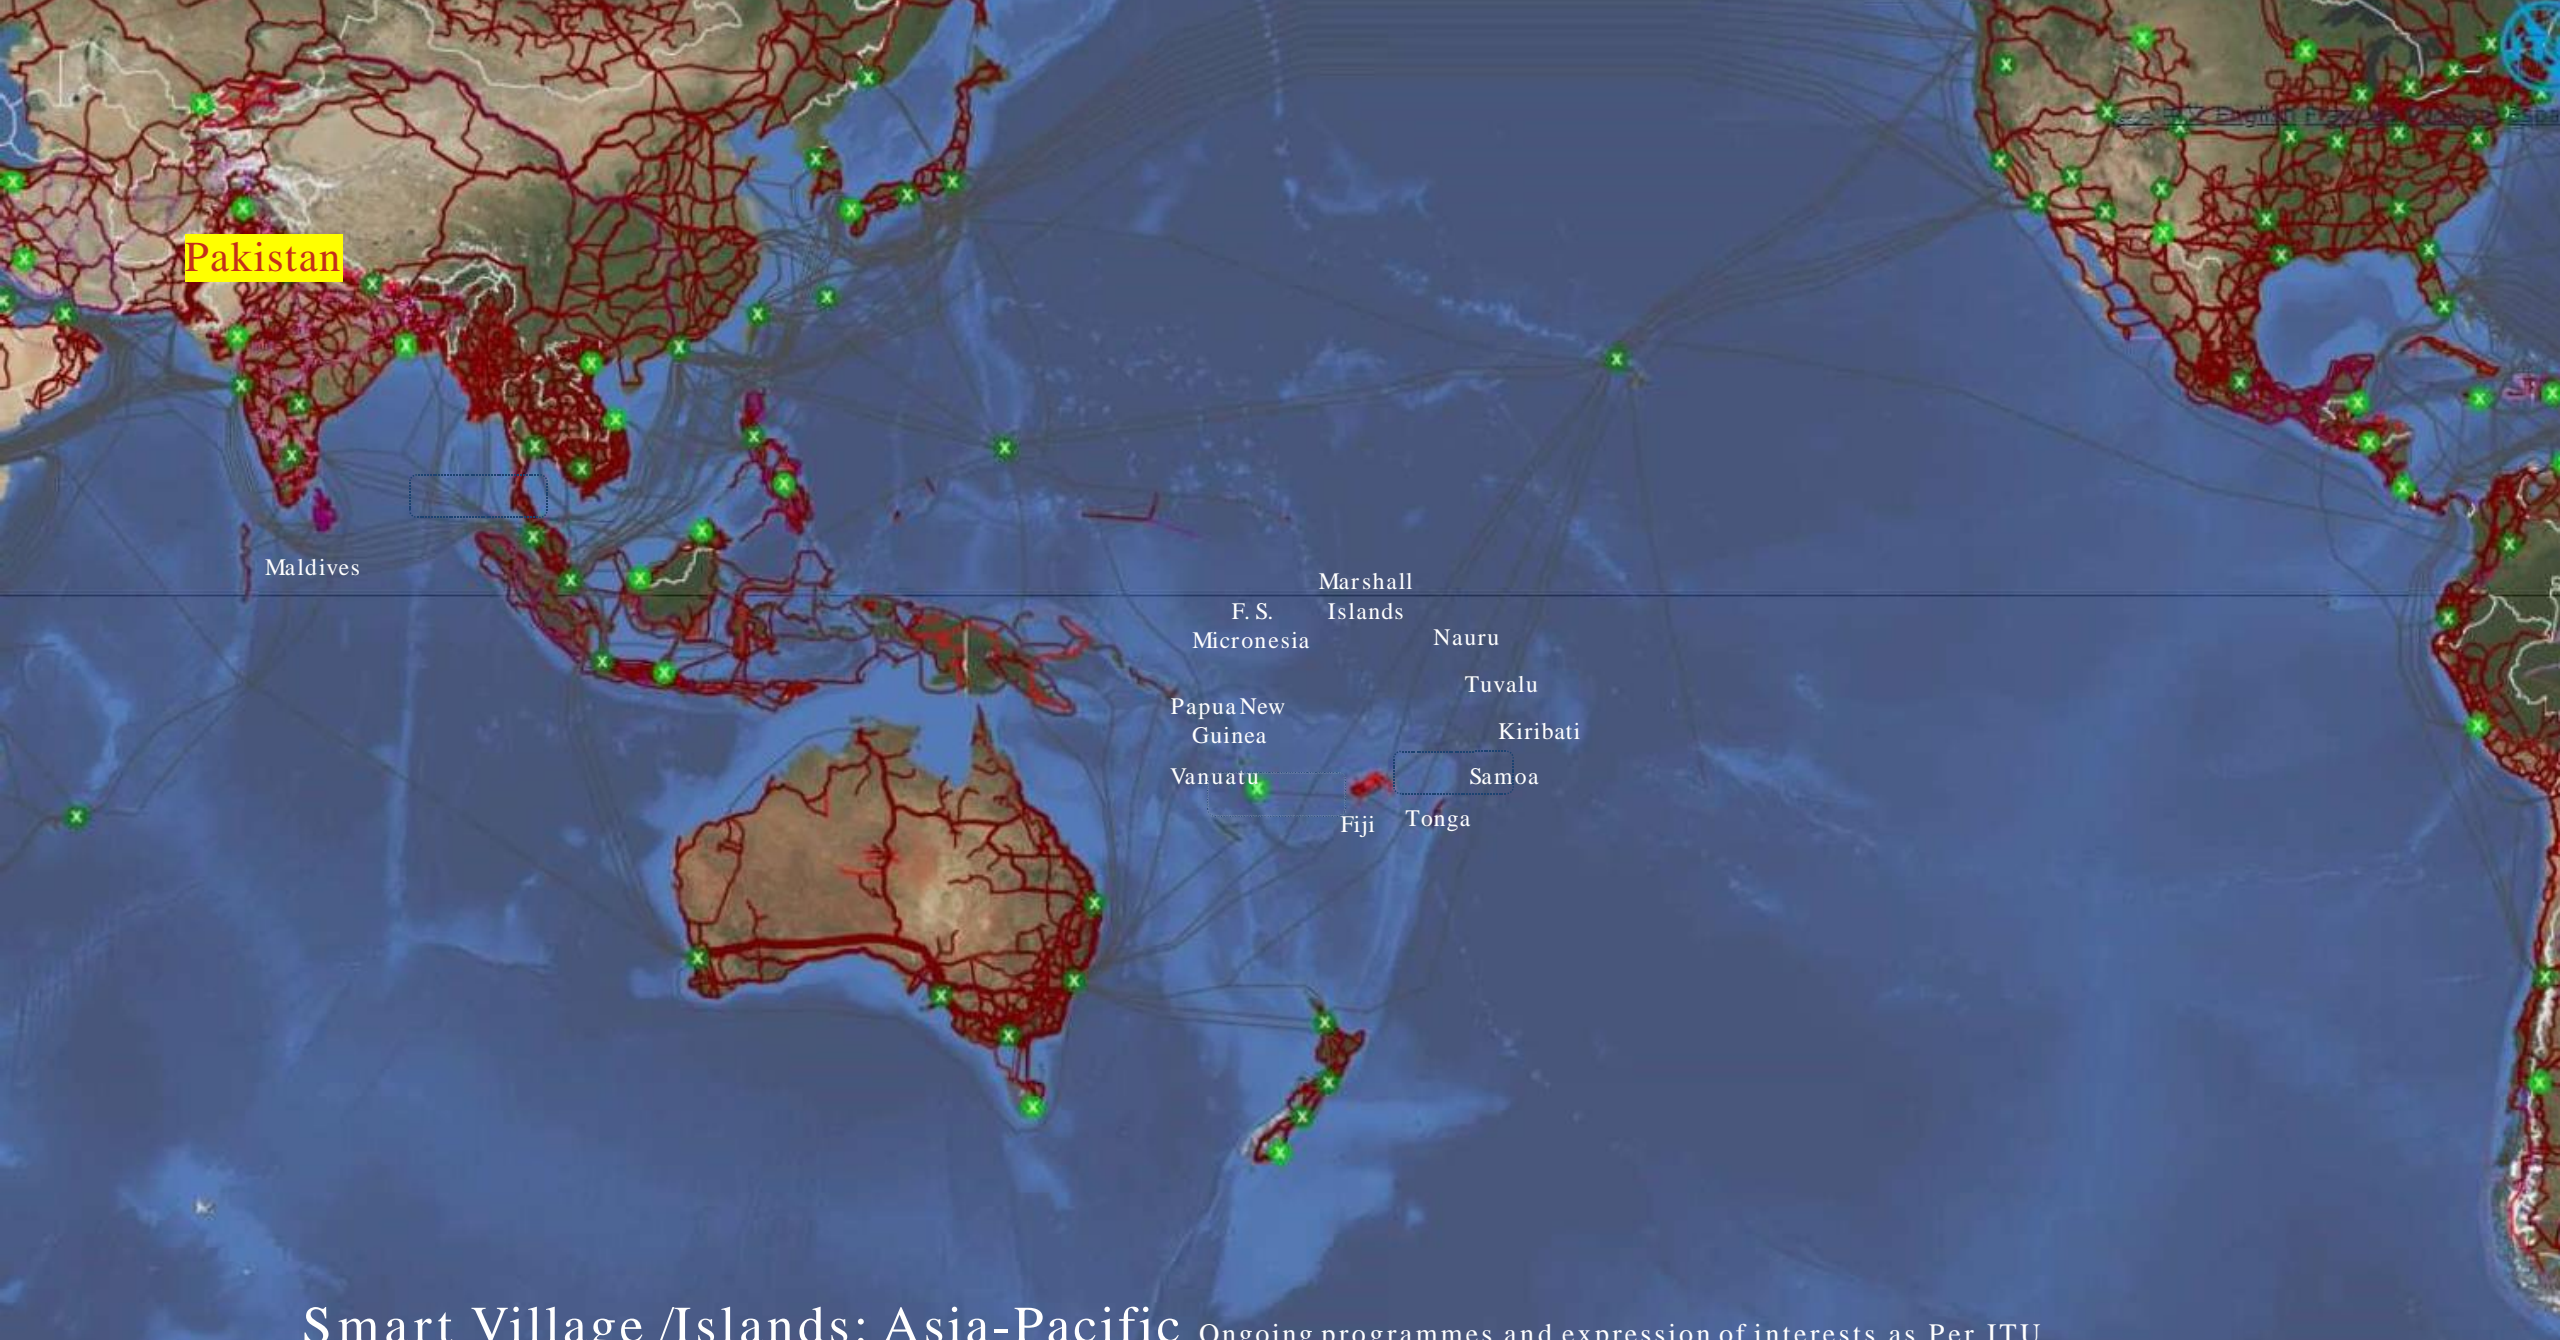

-46%

LEARNING LOSS IN PHYSICS

*None of the students showed improvement  
in Physics  
\*The teacher has now left the school and in  
the current year, Physics will also be taught  
by TeleTaleem Online Teachers*

# THE CONCEPT OF SMART VILLAGE

Smart Village /Islands: Asia-Pacific Ongoing programmes and expression of interests as Per ITU

The background features abstract, overlapping geometric shapes in various shades of green, ranging from light lime to dark forest green. These shapes are primarily located on the right side of the page, creating a modern, layered effect. The text is positioned on the left side of the page, set against a plain white background.

# Secure and Resilient Information and Communication Technology Environment

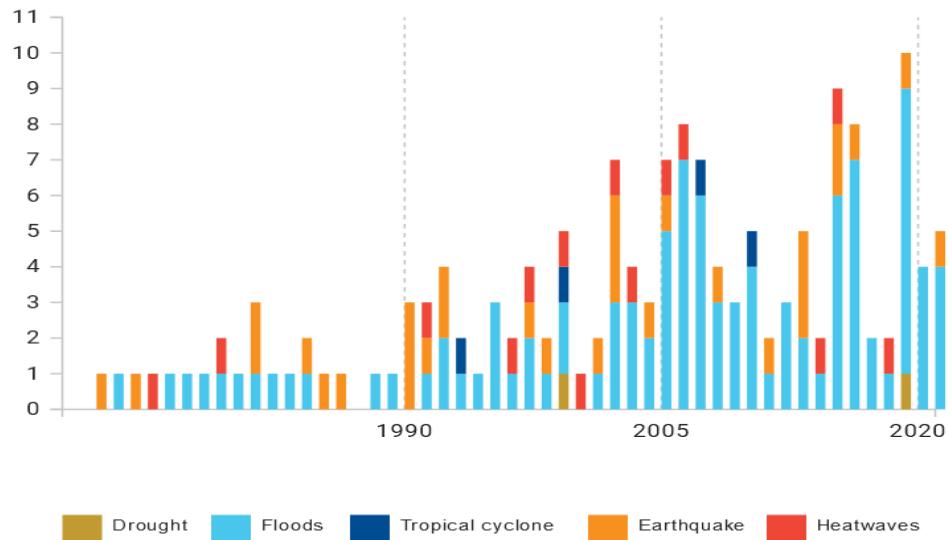

# Natural Disasters are Inevitable

We all are prone to Natural Disasters, such as:

- Earthquakes
- Floods
- Landslides
- Blizzards
- Hurricanes
- Pandemics, etc

Number of events

All hazards, in number of events

Some recent examples in Asia:

- 2004 Indian Ocean Tsunami (Multiple Countries)
- 2005 Kashmir Earthquake (Pakistan)
- 2008 Sichuan Earthquake, (China)
- 2010 Pakistan Floods (Pakistan)
- 2011 Japanese Earthquake & Tsunami (Japan)
- 2015 Nepal Earthquake (Nepal)
- 2018 Sulawesi Earthquake & Tsunami (Indonesia)
- 2022 Pakistan Floods (Pakistan)

Such hazards disrupt the essential Communication Channels for:

- Emergency services
- Rescue operations, and
- Relief efforts

Developing nations suffer even worse due to lack of preparedness and resources.

# The Tragic Earthquake in Pakistan (Oct. 2005)

- 7.6 on the Richter scale hit Northern Pakistan on 8 Oct 2005.
- Over 1000 aftershocks were recorded
- More than 76,000 persons Died including 18,000+ children
- More than 90,000 persons injured
- 3.3 million heads left homeless in Pakistan alone
- 30,000 km<sup>2</sup> area affected, included damage to:
  - Houses: 500,000 (56%)
  - Medical facilities: 365 (65%)
  - **Telecommunications: Exchanges 86 (34%)**
  - Power lines : 33,225 (13%)
  - Schools/Colleges: 6083 (50%)
  - Over 1000 hospitals

# The Tragic Earthquake in Pakistan (Oct. 2005)

- Due to the earthquake, there was a significant loss to Pakistan's infrastructure

- Collapsed and blocked roads
- Loss of household and livestock
- Total loss of clean water supply
- **Heavy loss of Telecommunications Infrastructure**
  - Demolished Fixed & Wireless networks
  - Partial loss of UN VHF system
  - Police communication lines were severely affected

- As a first response

- Government set up satellite telephones at 200 locations [VSATs]
- First Wireless BTS became functional in 03 days
- Relief operations were started through satellite VSATs

- **It was learnt that fixed or cell phones alone are not adequate for emergency telecommunications**, or to cope with large surges in usage during emergencies.

# List of high magnitude Earth Quakes in Pakistan

Date	Region	Magnitude
02/07/2017	Pasni	6.3
09/28/2013	Awaran	6.8
09/24/2013	Awaran, Kech	7.7
01/18/2011	Garhi Khairo, Quetta, Balochistan	7.2
10/29/2008	Ziarat	6.4
10/28/2008	Quetta	6.4
10/08/2005	Muzaffarabad, Uri, Anantnag, Baramula	7.6
11/20/2002	Dashkin, Doian, Mushkin	6.3
02/27/1997	Harnai-Sibi, Quetta	7.1
05/20/1992	Peshawar, Kohat, Shakkar Khel	6
06/17/1990	Baluchistan	6.3
03/04/1990	Kalat, Quetta, Mastung	6.1
02/16/1984	Hindu Kush (Chitral-Landi)	6.1
12/28/1974	Balakot, Patan	6.2
09/03/1972	Tangir, Gupis, Rawalpindi, Peshawar	6.2

# Floods and Climate Change Effects in Pakistan

The background features abstract, overlapping geometric shapes in various shades of green, ranging from light lime to dark forest green. These shapes are primarily located on the right side of the slide, creating a modern, layered effect. The text is centered on the left side of the slide.

# History Of Floods Since Pakistan Came into being

- ▶ According to the [Federal Flood Commission](#), Pakistan has witnessed 28 super riverine floods in its 75-year history.
- ▶ collectively affected 616,558 square kilometers of land,
- ▶ Death toll of 13,262 lives,
- ▶ losses worth over Rs39 billion to the national economy.

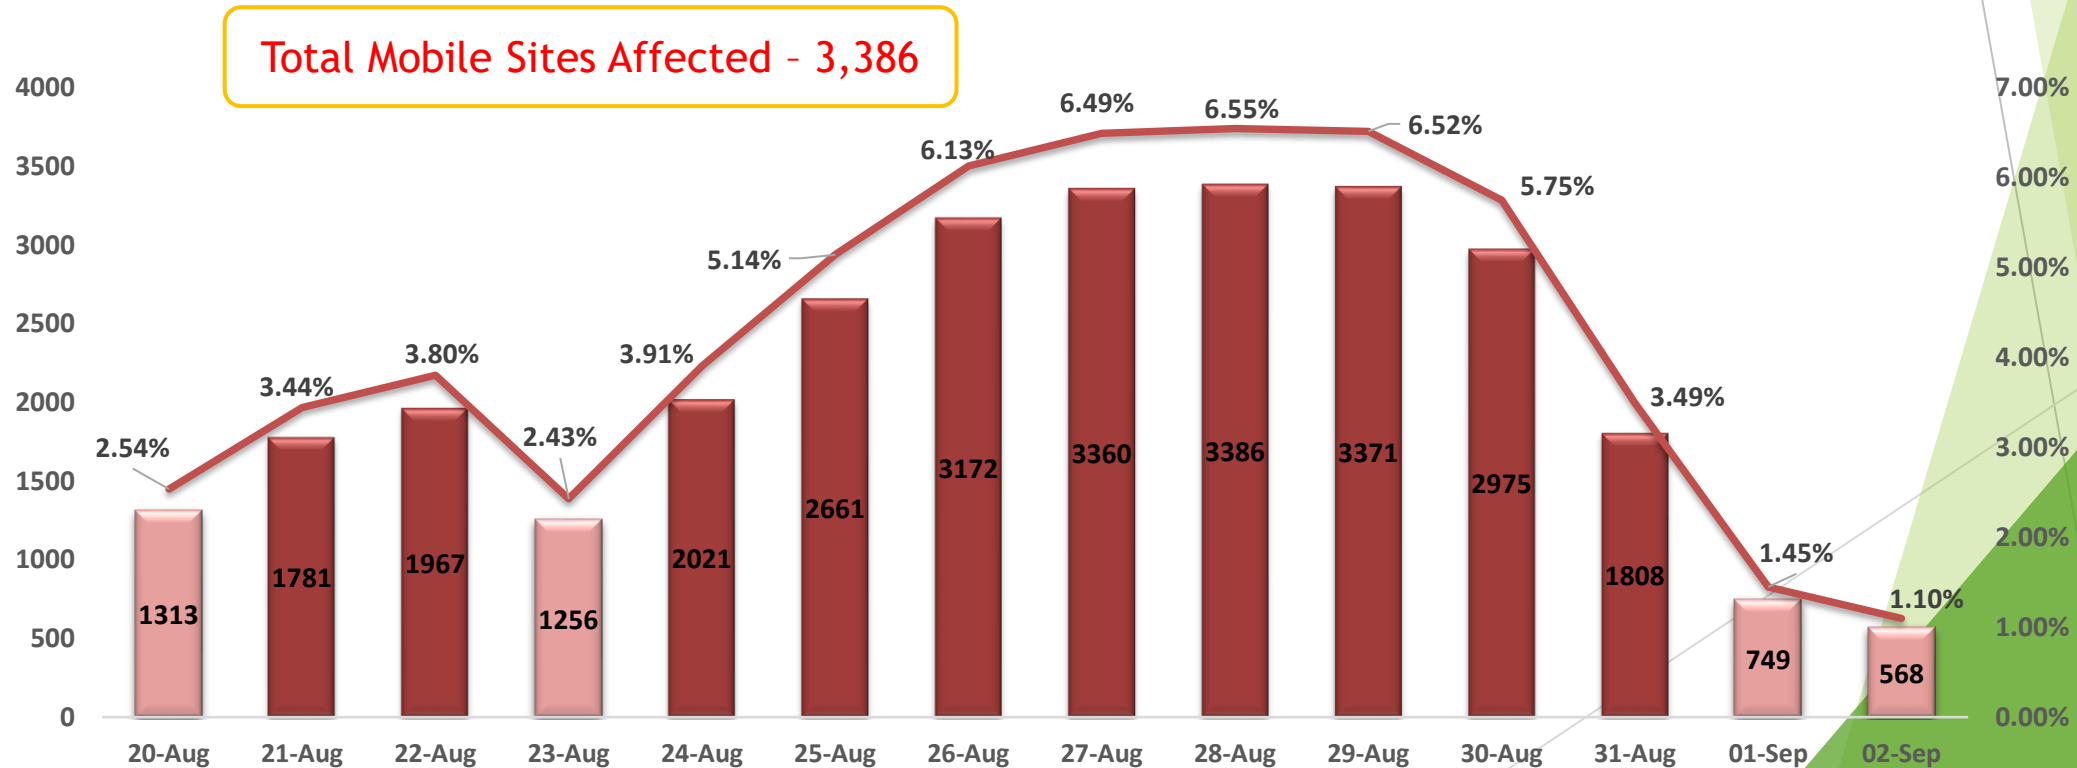

# Devastating floods in Pakistan (Aug. 2022) - A recent misfortune

- Monsoon Flooding **submerged one third of the country**
- The floods and landslides, **affected 33 Million** people [15% of country's population] and loss of hundreds of lives
- According to World Bank, estimated losses are:
  - Housing: \$ 5.6 Billion
  - Agriculture and livestock: \$ 3.7 Billion
  - Transport and Communications: \$ 3.3 Billion

# Devastating floods in Pakistan (Aug. 2022) - A recent misfortune

- Total of **3386 cell sites** were marked **inactive** across flood-impacted provinces
- More than **120 cuts** occurred to the **nationwide optical fiber** backhaul connectivity
  - Resulting in suspensions in mobile connectivity and internet services
  - Thousands of victims suffered intermittent connectivity to reach out to dear ones and relief teams
  - Even Relief teams reported difficulties in communicating with concerned departments

# Relief Measures Undertaken

Rain & Flood warning message through Ring Back Tone [RBT].

Allocation of 9999 Short Code for PM Flood Relief Fund 2022 contributions; awareness SMS broadcast

Travel Advisories in collaboration with National Highway & Motorway Police

Free On-Net voice calls in flood affected areas

**Restoration of Telecom Infrastructure, however, remained the biggest challenge**

# Some Initiatives by the Government and the Way Forward

## National Disaster Management as integral part in Telecommunications Policy - 2015

- A National Disaster Telecom Plan for provision and use of telecom services before, during and after a national disaster to be formulated, that will specify:
  - The services to be provided during each phase of a disaster
  - A catalogue of critical telecommunications elements
  - Network redundancy requirements
  - The processes to be followed in case of national disaster
  - Audit and testing processes for the Plan
- **The preparation of National Disaster Telecommunications Plan is in process with deliverables;**
  - Identification of key stakeholders
  - Formation of National Emergency Telecommunication Coordination Team (NETC)
  - Assessment report on resilience of telecom network infrastructure
  - Identifying critical telecommunication elements and key emergency services
  - Classifying Network redundancy requirements
  - Capacity development and staff training
  - Audit and testing process of the plan

**As a specialized UN agency with focus on ICTs, ITU may leverage on its experience and resources to assist GoP in materializing the National Disaster Telecommunication Plan**

“

Thank You

”

Additional Secretary IT - MoITT Pakistan
