Intelligent, Agile, Automated, and on the Cloud

Digital Farming Initiatives

An Introduction

© 2018 Tata Consultancy Services Limited

Digital Farming Initiatives - Overview

InteGra - Digital Farming Platform

Cloud – Remote Sensing Analytics

Intelligent Edge – IoT (Internet of Things)

Analytics – Image Processing

Digital Farming Initiatives Overview

Digital Farming Initiatives - Mission

Improve Farmer Livelihoods via Technology and Partnerships

Smart Villages
(Climate and Market Smart)

Sustainable Ecosystems

Mobility and Pervasive Computing, Cloud, Big Data,
Artificial Intelligence & Robotics and Social Media

**Digital 5 Forces + GIS +
Agri Knowledge Base**

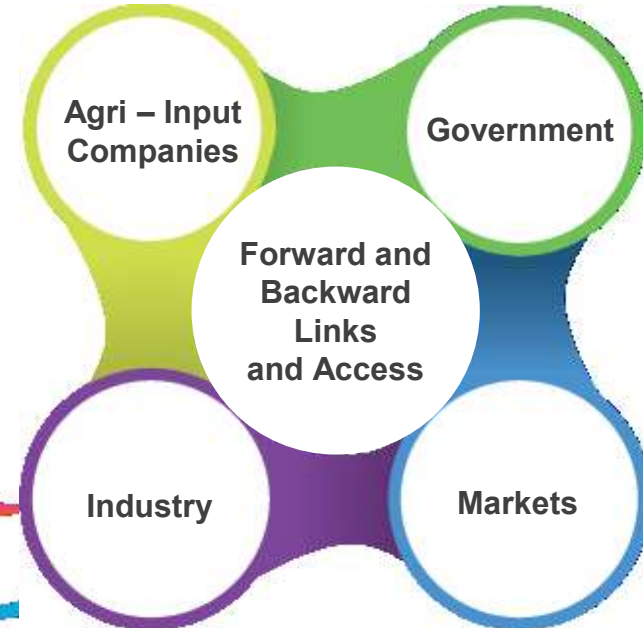

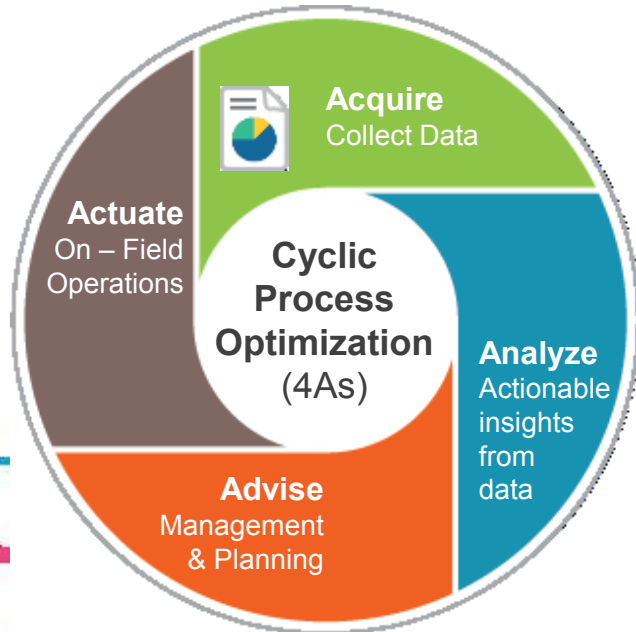

Digital Transformation

Digital Farming Initiatives - Objectives

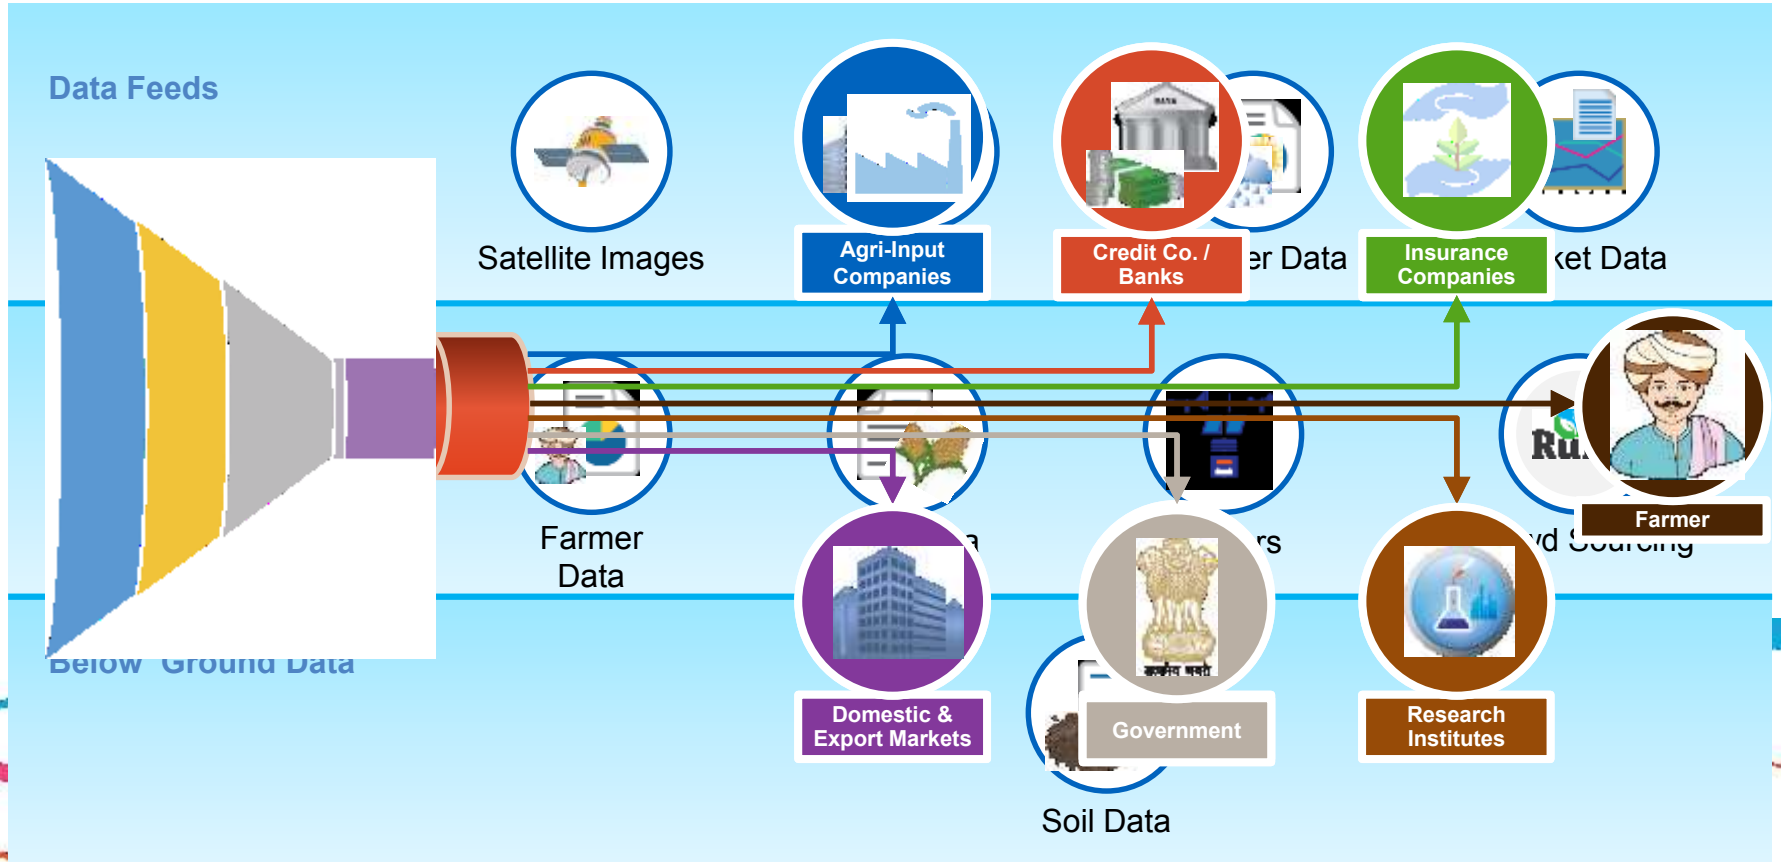

**Improve
Crop Production
& Efficiency**

**Establish Links
Across Ecosystems**

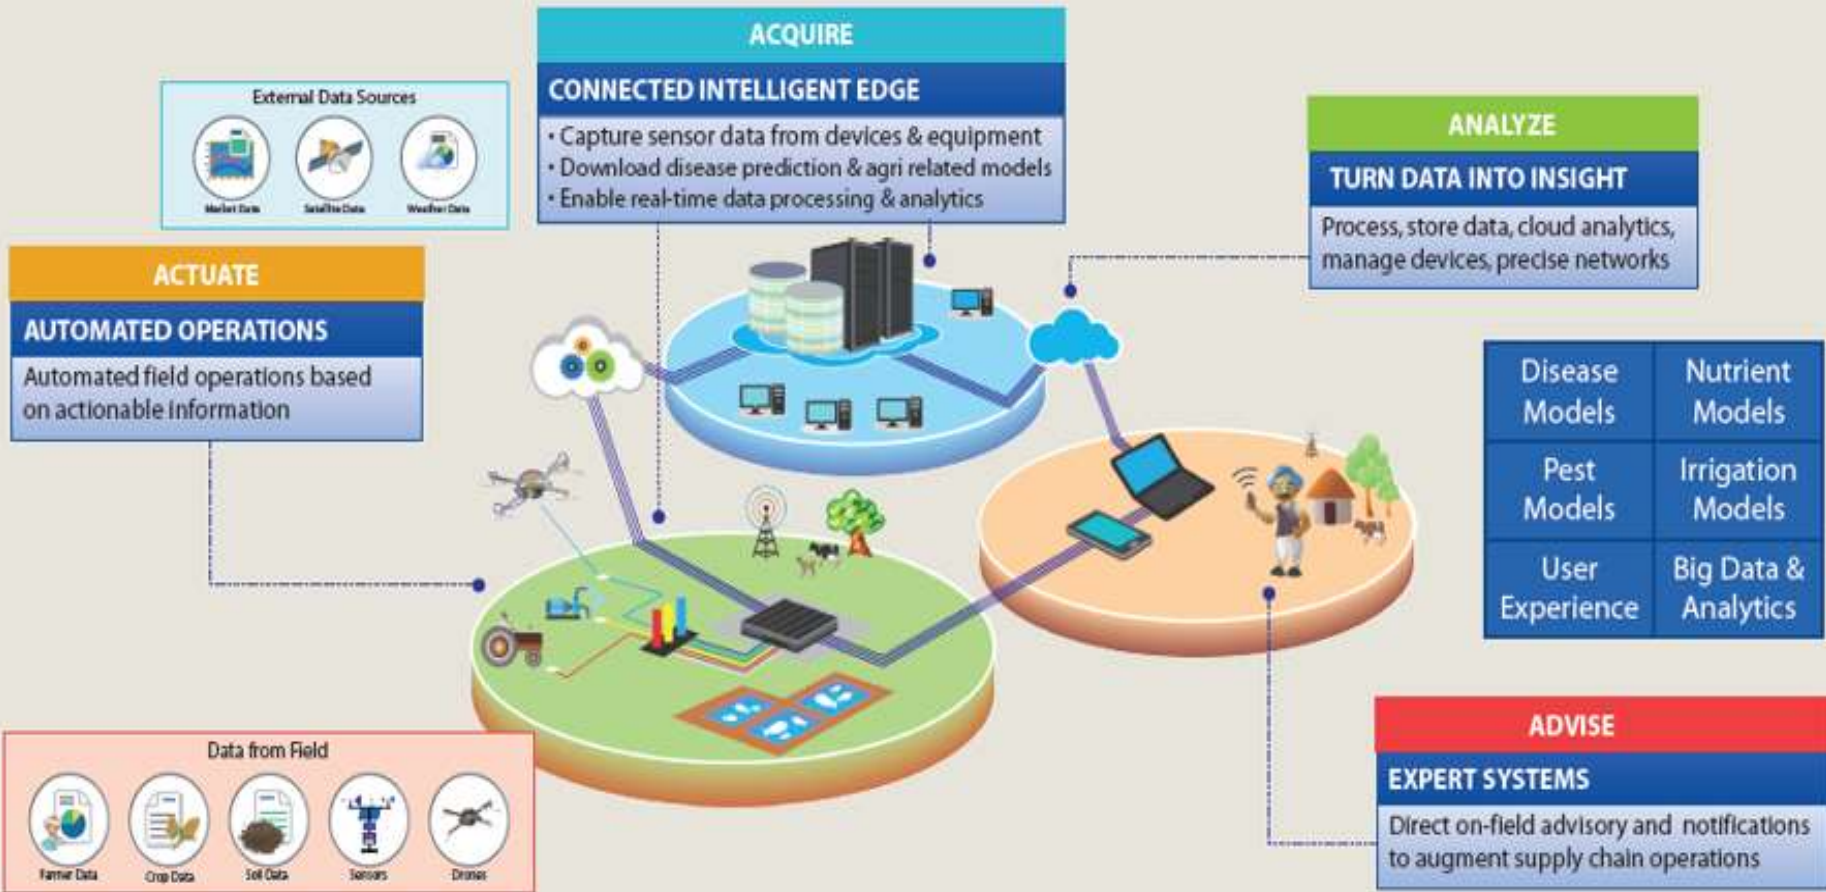

Data Driven Approach

Digital Farming Platform Overview

InteGra -Digital Farming Platform

DFI Focus Areas Driving Next Gen Agriculture

01

Cloud

Scale operations through Satellite, Drones data based Crop/Soil Assessment etc. on cloud

02

Intelligent Edge

Sensor Data acquisition layer and Low Cost IoT sensors for Micro Climatic Monitoring

03

AgriKnoB

Comprehensive Agriculture Knowledge base on all Crops providing contextual data

04

Data Analytics

Machine Learning based Crop specific decision science models, Pest/Disease predictions, Image Processing based on Edge/Cloud data

Cloud - Remote Sensing Analytics

agEYE Overview

	Historical Condition	Current State	Future Projection*
Automatic Crop Acreage Estimation			
Crop Health			
Soil Moisture			
Crop Yield			
Disease and Pest Incidence			
Weather Projections			
Credit Score for Farms			
Irrigation and Fertilizer Recommendation			
Drought Status and Agricultural Water Usage			

- 1) **Macro agricultural intelligence platform** that provides insights on state-of-the-crops across large regions.
- 2) Multiple agricultural data types handled seamlessly and synergistically.
- 3) Farmer-centric and client-centric for higher productivity and sustainability.
- 4) Auto-feedback mechanisms built-in for data-driven prediction improvement.

Satellite Imagery

Summary

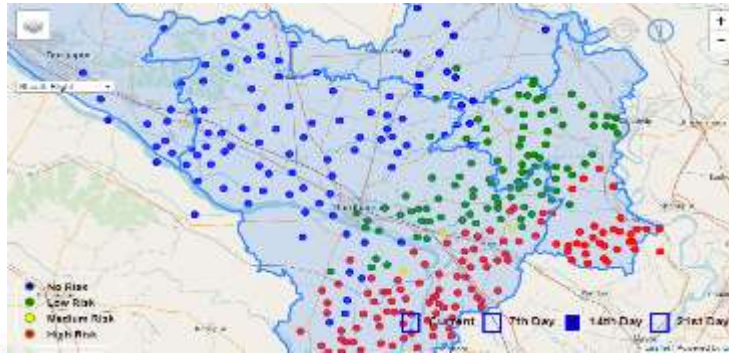

Time Series

* Future projections available for at least up to 15 days.

“ Real time Crop health and automatic crop acreage estimation helps in planning crop management activities.”

“ Strategize crop protection activities for each crop with our disease/ pest prediction models.”

“Understand current/ future drought conditions and water usage conditions like never before with soil moisture maps.”

Intelligent Edge - IoT

Digital Farm @TCS SP Pune Campus

Objective of the Digital Farm is to leverage technology to gather insights on all aspects of crop during the lifecycle and trigger appropriate actions

Sensors used @Demo Farm

Meteorological Sensors:

1. Air Temperature Sensor
2. Relative Humidity Sensor
3. Barometric Pressure Sensor
4. Anemometer
5. Wind Direction Sensor
6. Global Solar Radiation Sensor
7. Tipping Bucket Rain Gauge

Plant Sensors:

1. Leaf Wetness Sensor
2. Leaf Temperature Sensor
3. Automatic DEW Point and ET calculation as a virtual sensor

Soil Sensors:

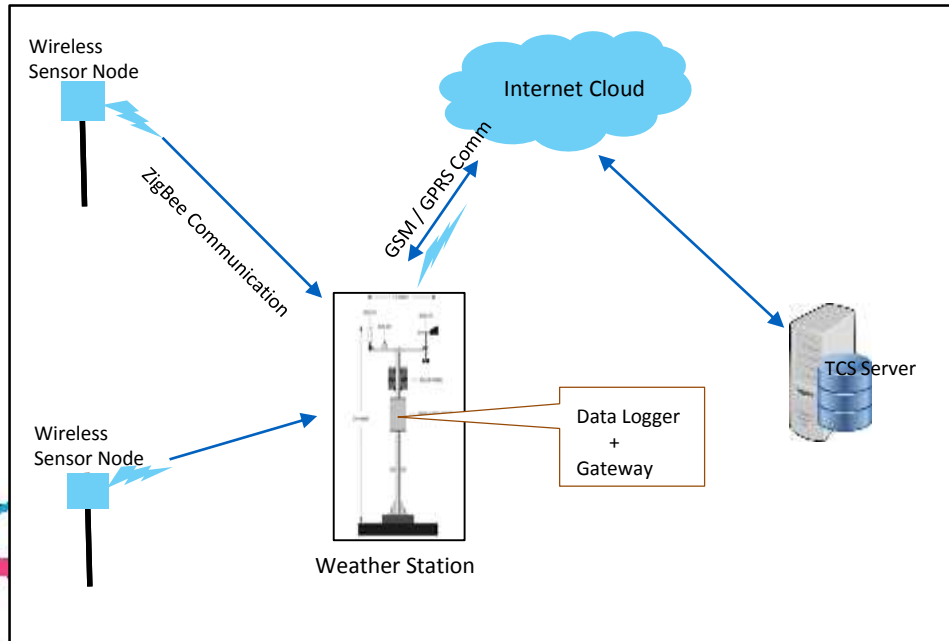

1. Soil Moisture Sensor
2. Soil Salinity Sensor

Digital Farm @TCS SP Pune Campus - Results

Health and Yield Monitoring of Cabbage & Capsicum

- 4 nodes and 1 gateway on the farm
- Nodes and gateway communicate over ZigBee
- Gateway streams measurements to **InteGra** every hour

Achievements -

1. Predict the behavior through various sensors and recommend action (DSS system)
2. Demonstrate platform end to end technology, interoperability of application, integration of technologies etc.
3. Increased Crop Yield by 25% and Reduce Cost of cultivation by 20%

Digital Farm @TCS SP Pune Campus - Output

Cabbage Crop

Capsicum Crop

Capsicum Crop with
bamboo support

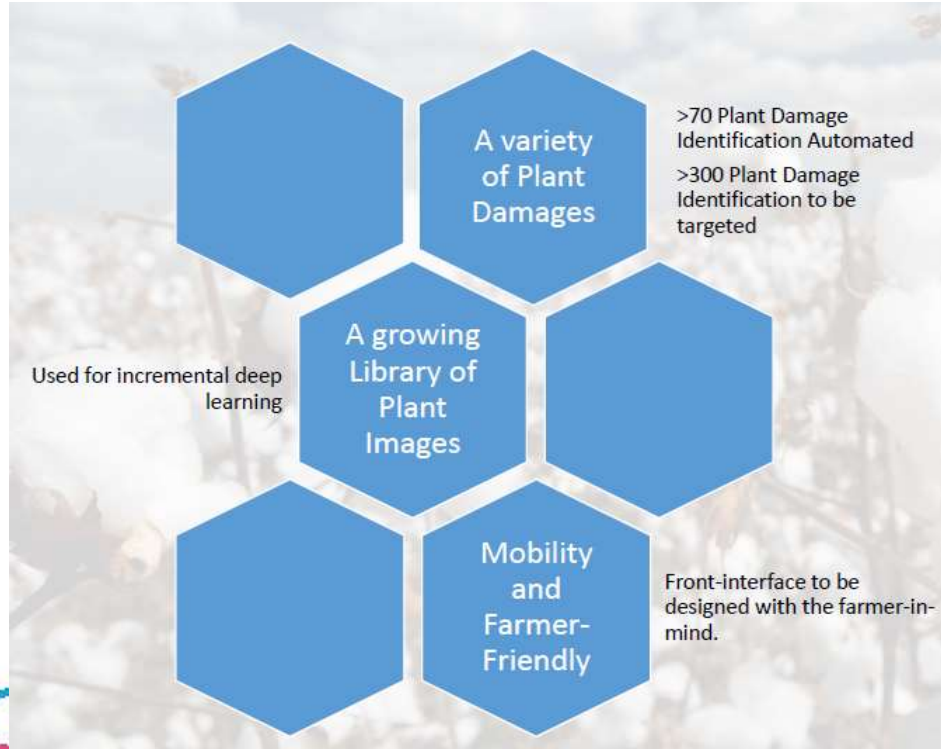

20% more Output
Produced

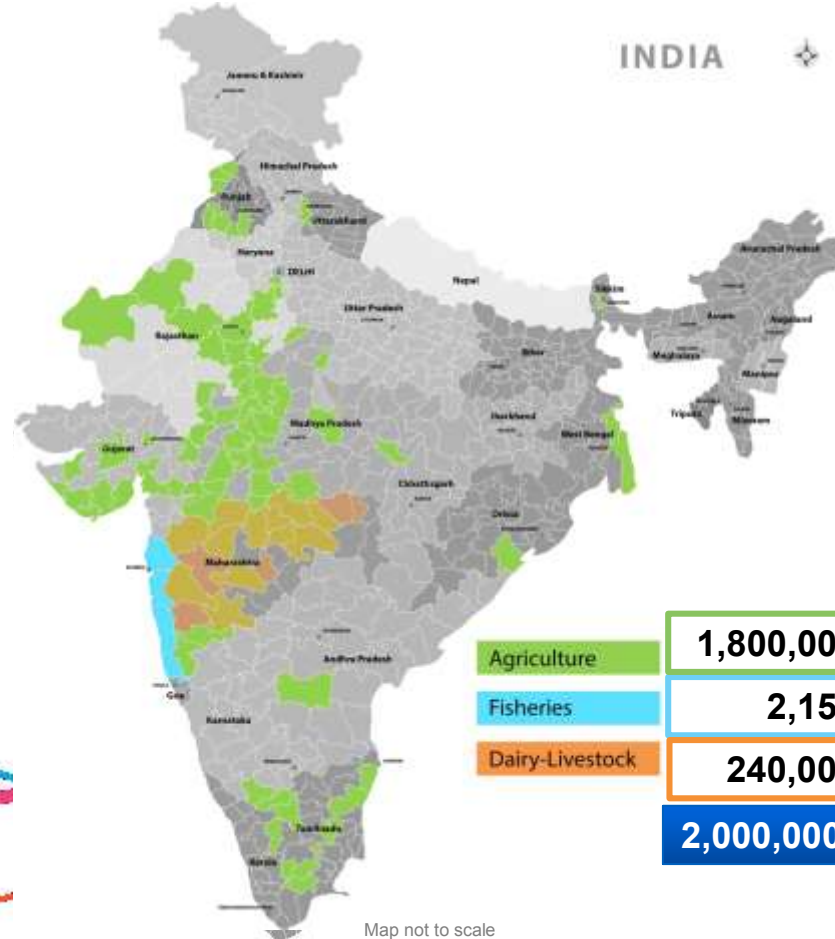

Data Analytics - Image Processing

Problem Identification in Crops

Current Areas of Operation

Journey So far

- Wall Street Journal Global Innovation Technology Award (2008)
- Golden Peacock Award for Innovation (2008)
- India Innovation Initiative (i3) Award (2009)
- Aegis Graham Bell Innovation Award (2010)
- Business in the Community - Big Tick (2013)
- Technology patented in US (2015) and India (2016)
- Top 20 Social Innovation
- **Fortune - “Change the World” Initiatives - 2017**
- Express I.T Awards 2017 - Winners in categories - IT Innovation & Mobility Solutions

THANK YOU

“

In a free enterprise the community is not just another stakeholder in our business but it is in fact the very purpose of its existence.

”
