Sunil Bajpai

Sunil Bajpai is currently working as Principal Advisor (IT) with the Telecom Regulatory Authority of India.

He has thirty-five years of experience with the Indian government, shouldering responsibilities that have spanned across engineering, research, operational and policy-making roles.

At TRAI, he led the work on net neutrality rules for India, which received widespread support among the stakeholders. He has also worked on developing new standards for Quality of Service, specifically the benchmark for call drops.

In a path-breaking initiative, he is leading the adoption of distributed ledger technology (blockchain) for controlling spam and fraud communications, which has recently gone live and is being watched by regulators and other stakeholders from around the world.

He responsibilities at TRAI include Quality of Service, Consumer Affairs and Information Technology.

He holds an MS in Design Engineering and an M. Phil in Social Sciences.
