Dr. Jean-Marc (Jm) Seigneur has published internationally more than 100 scientific papers on decentralized trust. With a Ph.D. in Computer Science from Trinity College Dublin in 2005, Jm has managed several EU-funded multi-million € R&D projects at the University of Geneva, where he is the director of the new Certificate of Advanced Studies (CAS) in decentralized applications development with blockchain and Distributed Ledger Technology (DLT).

In 2016, he has obtained a Google Award for Excellent Research in Academia. He has advised companies like Philips, Amazon, Thales and Swissquote. He has been a team member and adviser of several successful ICOs that have raised more than 30 million USD. He is the founder of the Reputaction company that innovates in the world of blockchain, for example, with its patent-pending hardened crypto-wallet for KYC&AML-enforced instant Bitcoin/Ether transactions, even offline.
