

Ministero dello Sviluppo Economico

Broadband and Ultrabroadband Italian National Plan Deployment

Public Consultation

Infratel Italia S.p.A

Infratel Italia spa

- Infratel Italia, is the in-house company of the Ministry of Economic Development, engaged in:
 - **planning and construction** of optical infrastructure in **white and gray-yes** areas;
 - **funding gap identification**;
 - providing financial **contribution** to Telecommunication Operators for the deployment of new broadband and ultra broadband infrastructure;
- Based in Rome + 4 local offices;
- Operations started in 2005 - 10 people;
- 2016 - 80 people.

DAE – broadband for all

2013

100% internet coverage

Broadband National Plan

State Aid

SA 33807/2011

646/2009

2020

100% coverage of ≥ 30 Mbps

50% households take up ≥ 100 Mbps

UltraBroadband National Plan

State Aid

SA 34199/2012

EU Guidelines for the application of State aid rules in relation to rapid deployment of broadband networks

Consultation Purposes

Since 2010, Infratel Italia S.p.A. issues an **annual public consultation** which main purposes are:

- assess fixed, mobile and wireless telecommunication operator's **Broadband coverage** (ADSL, BWA, 3G/4G) and map their **Broadband access infrastructures**;
- assess **UltraBroadBand** operator's coverage (NGAN-FTTC-FTTB/H);
to clearly identify areas where there is a missing or insufficient access to broadband and ultrabroadband services and there is lack of private plans in the term of 3 years (White and Gray Areas).

Areas Definition

- 94.645 areas were defined by merging the lowest hierarchy ISTAT areas;
- Each council/municipality is thus divided in «Infratel Areas»
- Infratel Areas definition criteria:
 - No cross-municipality
 - Mapping with fixed network access nodes

Questions to operators

For each of the 94.645 Areas, Operators have to answer to the following questions (year 2015 as is-'16-'17-'18 planned):

- Population/households coverage;
- Maximum upload/download speed (BB+UBB);
- Operator uses its own network infrastructure or lease it from the wholesale market? (backhaul/access nodes);
- Would operator be interested to acquire “rights of use” of public infrastructure (fiber/ducts/poles/radio-sites) in case public infrastructures are deployed?;
- Is the plan conditioned by public funded infrastructures availability?

Process

1. Adequate **communications plan** (website and GURI) and direct mailing;
2. Four **questionnaires available (.xls) and shapefile (.shp-.dbf)** for download on website depending of kind of operator (Fixed, Wireless fixed, Mobile, Ultrabroadband);
3. **Compiled (.xls) questionnaires uploaded** on website and automatically formally verified;
4. **Elaboration and partially automatic total coverage output** per area.

Public Consultation 2015

Timing

Start
11 May 2015

7 July 2015

Publication
19 Oct 2015

Scheduling	May	June	July	August	September	October
Consultation start						
Data Collection						
Data elaboration and publication						
Plans confirmation by operators						
New public plan ready						

Critical issues

- Communications plan;
- Questionnaires compilation by operators;
- Questionnaires and aggregate dimension;
- GIS elaboration vs table elaboration.
