Experiences

» Generally - success! :)

» Problem with finding participants

  » Huge number of emails sended to regulators and ministries in Europe

  » Two weeks before the date I considered to cancel the workshops

» Problem with two possibilities of registration
(paper form and by ITU Academy)

  » On our second Course we had participants that I did not expected (from Spain and Indonesia) - I was surpised, that they were, and they were surpised, that… I was surprised :(- They registered by ITU Academy

» Problem with „speed of invoicing" by ITU

  » At the end of the year I received request from participants to send them an invoice (they write me, that they will not pay If they receive it after finishing the year) - and I don't know if they recive it on time - last information I had got from ITU was, that till now they had not payed.
