

Vincenzo Lobianco is in AGCOM, the Italian NRA, from year 2000. Currently he is Chief Technology and Innovation Officer. In his role, he reports directly to the AGCOM Board, carrying out studies and investigations and providing advices on technical and regulatory issues related to electronic communication networks and infrastructures and radio spectrum.

Before holding the post of Chief Technology and Information Officer, Vincenzo Lobianco has been, from 2006 to 2014, Director of the Electronic Communication Network and Services Directorate of AGCOM charged, inter alia, for regulating wholesale telecommunications markets, NGA networks, for the approval of Telecom Italia Reference Interconnection Offers (RIO), the preparation of frequency and numbering assignment plans, for the monitoring and the enforcement of AGCOM decisions, in wholesale telecommunication markets, for the evaluation of regulatory accounting systems of notified operators and for dispute resolutions between telecom operators.

Vincenzo Lobianco represented Italy in the Radio Spectrum Policy Group of EU and in several international frequency coordination meetings and events.

Vincenzo Lobianco holds an MS in Electronic Engineering. Before joining AGCOM, he worked for the Ministry of Communication from 1985 to 1999 and for the European Commission (1995-1998). He also served as member of the ETSI Board from 1999 to 2002.
