

MAKING SPECTRUM AVAILABLE FOR 5G
« Feedback from France »
3.4-3.8 GHz, 26 GHz, 700 MHz, 1.5 GHz

D Chauveau
Deputy Director
Spectrum Planning & International Affairs
11-12 October 2018
ITU - "Towards 5G enabled Gigabit Society"

To manage a public resource as spectrum “wholesalers”
.. but not only...

<p>International Negotiation « Spectrum Diplomacy »</p>	<p>Management of national Rights « Spectrum Notary »</p>	<p>Interference management, surveillance « Spectrum Police »</p>
<p>Coexistence between users « Trusted third party »</p>	<p>Public Exposure to Electromagnetic fields « Trusted third party »</p>	<p>Refarming « Spectrum refarming fund »</p>
<p>Roland-Garros, Tour de France, Ryder Cup « Major Events »</p>	<p>Innovation Hackathon & Open Data</p>	<p>Maritime Amateurs « Exam center »</p>

3.4-3.8 GHz Under process

National Frequency Allocation Table (NFAT) ✓

FS (GVT) on-going refarming (to be finalised March 2020) ✓

Thanks to the ANFR Spectrum Refarming Fund (SRF)

Fixed broadband (4G) : Supporting Broadband for all (up to 2026)

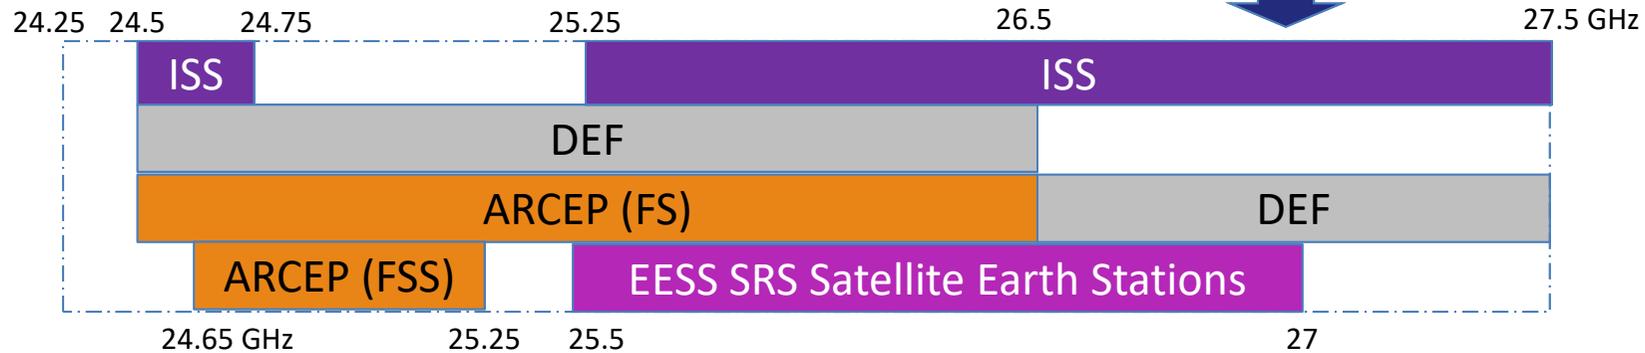

Satellite Earth Stations : “phasing out” (expiry of current authorizations) below 3800 MHz, migration above 3800 MHz

WLL: defragmentation ?

26 GHz Under preparation

EECC obligations (before end 2020) : at least 1GHz

Existing and future earth stations to be shared with ✓

Higher spectrum means easier sharing (see [ANFR study 09/18](#))

National process : location of satellite earth stations / short term plan ?

FSS : national demand ?

DEF (26.5-27.5 GHz) : 1 GHz no usage ✓

Fixed Service (FS) to be migrated or shared with ?

NFAT (under process) : update in a short time frame ✓

Spectrum Refarming Fund ? to accelerate migration DEF (FS) ?

700 MHz 4G (but ready for 5G !)

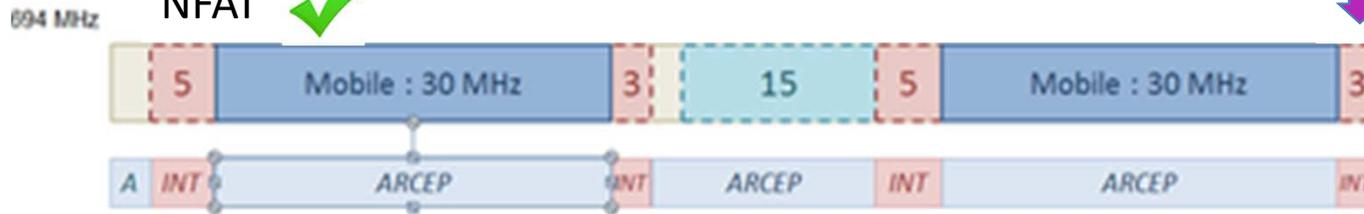

Mobile & PPDR Frequency arrangements ✓

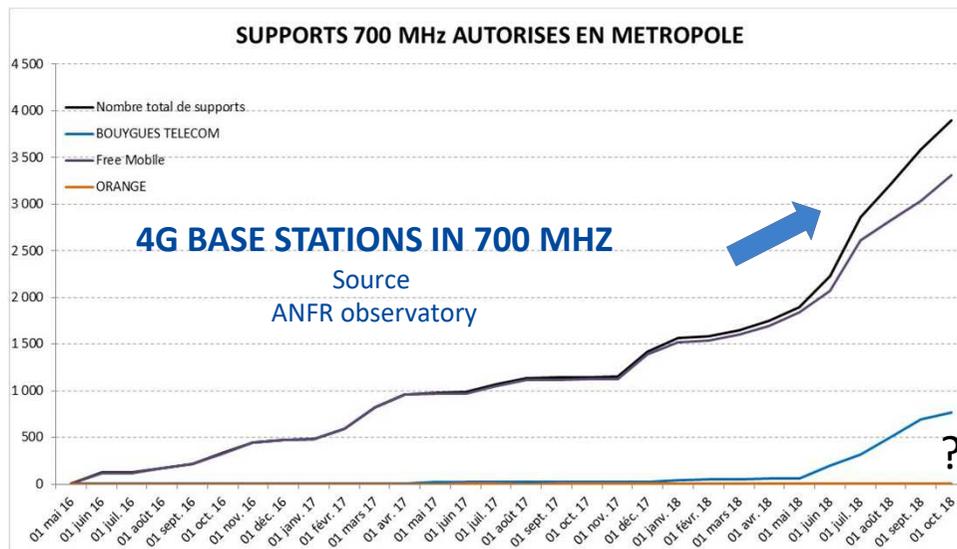

End of the migration **DVB-T** below 694 MHz : June 2019

NFAT ✓

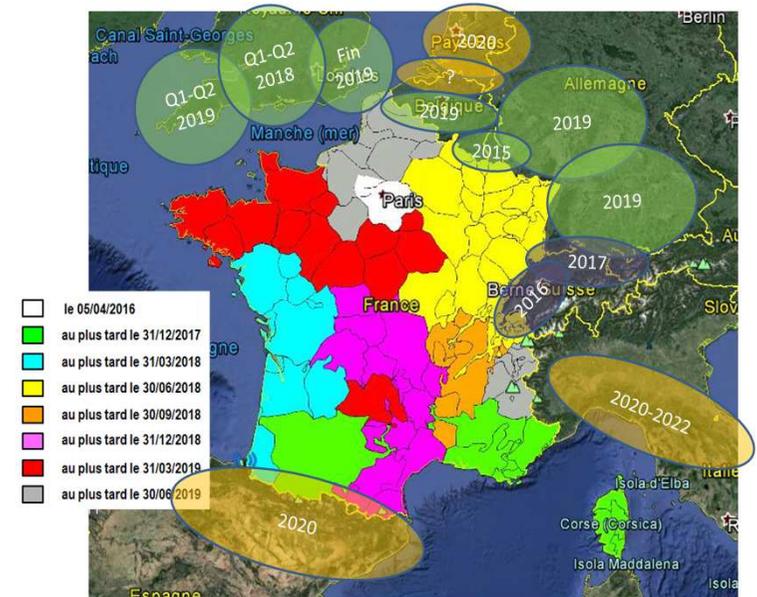

PPDR
↓ (2x5 MHz)&(2x3 MHz)

End 2015: Award process for the 2x30 MHz
4 authorisations ✓

2 mobile operators targeting 5G ?

DVB-T Migration (thanks to SRF !) ✓

An on-going phases approach ✓

Cross-border coordination agreements ✓

1.5 GHz An ambitious reorganisation

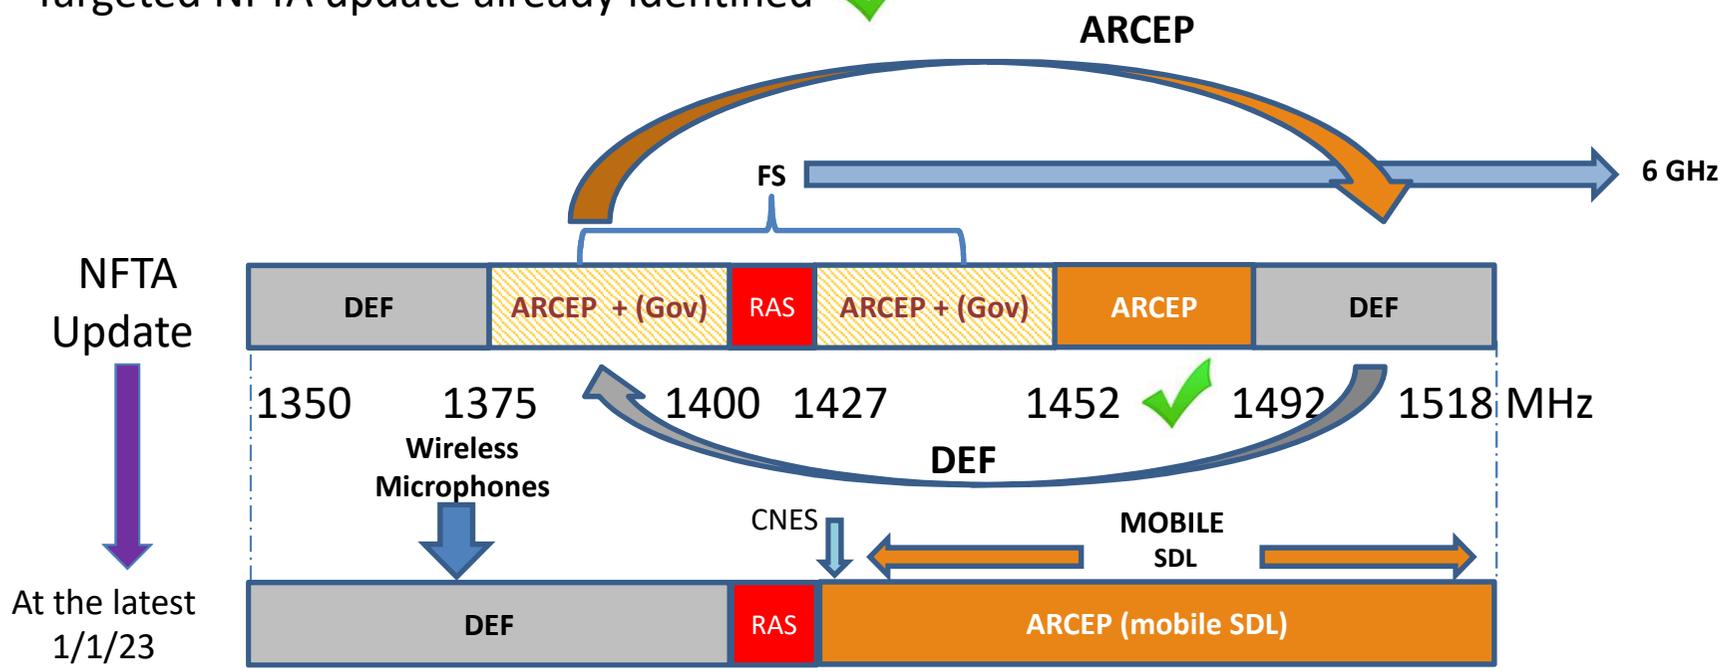

Implementation of EC DEC 1.5 GHz in NFAT 

An ambitious on-going reorganisation in order to make available 90 MHz for 5G

To migrate current FS (1375-1400 MHz/1427-1452 MHz) to FS 6 GHz band : migration plan ?

To define national conditions for the usage of wireless microphones in 1350/1375/1400 MHz

Targeted NFTA update already identified
