

VIETNAM ICT DATA COLLECTION

(Resources and Statistics Division, VNTA)

CONTENT

- Purpose
- Legal Provision
- Data Processing
- Dissemination and Use Data
- Discussion

Purpose

- Assessment of socio-economic development of Telecommunications field in Vietnam.
- To measure the information society including the ICT Development Index (IDI).

Legal Provision

- Law on Telecommunications.
- Law on Statistics.
- Decree No 60/2018/ND – CP, Detailing the content of the national statistical reporting regime.
- Decree No 97/2016/ND – CP, Stipulate the content of statistical indicators in the National Statistical Indicator System.
- Circular No. 10/2018/TT-BTTTT and 15/2017/TT-BTTTT

Data Processing

- Under the provisions of Circular No 10/2018/TT-BTTTT, enterprises make Periodic reports (month / quarter / year).
- Viet Nam Telecommunications Authority is focal point for receiving report from Enterprises.
- Viet Nam Telecommunications Authority Data-analysis and synthesis, report MIC, implement the national statistical reporting regimes

Dissemination and Use Data

- Detailed statistics are published in the web <http://vnta.gov.vn/thongke/Trang/dulieuthongke.aspx>

Discussion

- 1. Vietnam statistics fixed telephone subscribers by calculating the endpoints which have been assigned a subscriber number on both PSTN and fixed broadband. Are fixed broadband subscribers which have not been assigned a subscriber number also counted as fixed telephone subscribers?

Discussion

- 2. Vietnam does not limit the flow of fixed broadband subscribers, it means that a subscriber using a subscription package will not be subject to traffic restriction so it can be shared to many different terminals. (This affects slowly subscriber growth but the usage still increases rapidly). Do other countries provide fixed broadband service like VN? and how will ITU have recommendations on this issue?

Discussion

- 3. Regarding the indicators collected through statistical surveys such as individual Internet usages, if no investigation is conducted, which method can be used to estimate the data?

Discussion

- 4. In Vietnam, mobile-broadband Internet traffic per mobile-broadband subscription per month is 4GB. How about other country?

THANK YOU
