
ITU Public Webinar on the Economic implications of COVID-19 on national telecommunications/ICT infrastructure

BIO

Mr Gerry Collins, Director of Product Management in the Networks Division of Intelsat

Gerry Collins is Director of Product Management in the Networks Division of Intelsat. In this role Gerry drives Intelsat's strategy to build new and enhanced connectivity services by combining the power of Intelsat's High Throughput Satellite (HTS) fleet with the values of terrestrial communications networks. In particular Gerry has a focus on how satellite can augment the value proposition of 5G networks and services. Gerry's career so far has spanned both the satellite and cellular industries and he was most recently Director of Business Development at iDirect and Head of Remote Solutions at Altobridge (the former acquired the latter in 2014). Prior to this Gerry held senior positions in Nortel's cellular infrastructure business in Europe over a period of 12 years and worked in the Engineering divisions of cellular operators in France, the UK and Hong Kong.

Gerry holds a Bachelor of Engineering degree from University College Dublin and a Masters' degree in Business Administration from the Cranfield School of Management in the UK.

Gerry is a regular contributor at conferences on topics such as Satellite-Terrestrial Convergence, the role of satellite communications in 5G and innovative ways to connect the unconnected.

As the foundational architects of satellite technology, Intelsat operates the world's largest and most advanced satellite fleet and connectivity infrastructure. We apply our unparalleled expertise and global scale to connect people, businesses, and communities, no matter how difficult the challenge. Intelsat is uniquely positioned to help our customers turn possibilities into reality – transformation happens when businesses, governments, and communities use Intelsat's next-generation global network and managed services to build their connected future.
