

ITU Radiocommunication Seminars

Laptops requirements

Given the amount of expected practical training during the workshops, each participant is required to bring a laptop.

In order to accurately run the ITU Software Tools to be used during the workshops, laptops shall perform according to the following set of minimal specifications:

Windows 7/8 Minimum/recommended system requirements	32-bit OS	64-bit OS
Processor (CPU)	1 GHz	
Memory (RAM)	1 GB	2 GB
Graphics	128 MB	

- Available free disk space: at least 10 GB (recommended 20 GB)
- USB port and/or DVD Reader
- Wireless (Wi-Fi) adapter
- Software environment:
 - Microsoft Office 2003 (or higher) or any other compatible suite (as e.g. OpenOffice)
 - Any internet browser (IE, Chrome, Firefox, Safari, ...)
 - Adobe Reader or any other PDF reader

Users shall have necessary permissions on their laptops for installing new software (i.e. local administrator rights).

Please note that some ITU Software Tools to be used:

- Might experience unexpected difficulties when running on Windows 8
- Could require configuring regional settings in English
