If the database that is opened in SpaceCap does not contain any Advance Publication Information notice from which the wizard could create a notification notice, the program prompts the user to select a database with such information.

We recommend that you use the latest SRS database or download the space station's API database from the dedicated SNS online site for this purpose, <u>https://www.itu.int/sns/notification.html</u>, to ensure the most up to date information is used to create the Notification notice.

Cre	ting First Notification Wizard
