

## **Benjamin Stern**

Ben has extensive experience in the commercial space industry. He is responsible for Business Development in Latin America. Ben joined Surrey Satellite Technology Ltd in 2003 as a mechanical engineer and has held engineering roles on a number of missions including the GIOVE-A GNSS mission for the European Space Agency. Since 2007 he has represented the company all over the world gaining extensive commercial experience developing new Earth observation missions with SSTL's customers.

Surrey Satellite Technology Ltd is the world's leading small satellite manufacturer based in the United Kingdom. The company designs, manufactures and operates high-performance, high-value small satellites for telecommunications, Earth observation and science and has launched 49 satellites into orbit. Surrey is recognised as pioneering low-cost access to space for everyone.
