

RECEIVABILITY OF SPACE NOTICES

Chuen Chern Loo
BR/SSD/SPR

RECEIVABILITY OF THE NOTICES

- **Entry examination of the notice received by the Bureau**
 - Submission of information in electronic format (RES 55)
 - application of the Radio Regulations and Rules of Procedures (ROP) with respect to
 - *its completeness* (Annex 2 of AP 4) and *its correctness*
- └ **Result of the entry examination**
 - ***Acknowledgment*** by the Bureau
 - Confirmation of the Bureau registry date - establishment of the ***formal regulatory date of receipt***

Basic ROP related to receipt of notices

- BR registry date

- §2 - *It is incumbent on all ADM to meet deadlines established in the RR and, accordingly, to take account of possible mail delays, holidays or periods during which ITU may be closed.*
- Having regard to the various means available for transmission and delivery of notices and other related correspondence:
 - Mail received through the postal service shall be recorded as received on the first working day (following the period of closure) on which it is delivered to the BR's office registry
 - E-mail or telefax documents shall be recorded as received on the actual date of receipt, irrespective of whether or not that is a working day at the BR's offices in Geneva
 - In the case of E-mails, an administration is required to send, within 7 days of the date of the E-mail, a confirmation by either telefax or mail which shall be regarded as being received on the same date as the original E-mail.

Basic ROP related to submission of the notices

- All mail must be sent to the following address:
Radiocommunication Bureau, ITU
Place des Nations, CH-1211 Geneva 20
Switzerland
- All telefaxes must be sent to: +41 22 730 5785 (several lines)
- All E-mail must be sent to: brmail@itu.int
- In case of E-mail submission a confirmation by telefax or letter is required from the Administration within 7 days of the date of the E-mail
- Administration shall not use the BR staff E-mail address for submission of their notices to the BR Registry.

Establishment of Date of Receipt (1)

- If a notice does not contain all of the mandatory information as defined in the AP 4 of the RR, or for example - the email from ADM is without attached data or a letter with an empty CD-ROM etc..., further processing of the notice will remain in abeyance and a date of receipt will not be established until the missing information is received
- If all mandatory data have been submitted and further clarification is required concerning the correctness of the mandatory data, the Bureau shall request the ADM to provide the clarification within 30 days
- If the information is received within the 30 days period, the original date of receipt is retained, otherwise, a new date of receipt will be established

Establishment of Date of Receipt (2)

- Nevertheless, for replies received within the above period of 30 days, a new formal date of receipt (and cost recovery) is established in those cases (or for the concerned part of the network) where the information submitted subsequently is outside the scope and beyond the objective of the Bureau's enquiry, if the new or modified data has impact on the regulatory and technical examination, irrespective of whether the newly provided information adds new affected administrations or not
- The Bureau is keeping any pending submission containing incomplete information for one year.

Establishment of Date of Receipt (3)

- When a Coordination request or Notification is communicated to the BR at the same time as the API, the formal date of receipt of this information is established as follows (No. 9.1) :
 - For the Assignments that require coordination under Sect II of Article 9
 - 6 months after the date of receipt of API
 - For the Assignments that do not require coordination under Sect II of Article 9
 - 6 months after the date of publication of API

List of “as received” under Res 55

- Coordination Requests or Notifications “as received” are made available by the BR within 30 days (RES 55) on the BR IFIC (Space services) DVD-ROM
- This information can also be monitored through the ITU website at: <http://www.itu.int/ITU-R/space/snl/>
- This advance version of the information received from the ADM with a date of receipt in the registry of the Bureau is not to be confused with the official publication of the relevant PART or Special section with a formal date of receipt which is yet to occur

Radio Regulations relating to receivability - API

- 9.2A If the information is found to be incomplete, the Bureau shall immediately seek from the administration concerned any clarification required and information not provided.
- 9.2B On receipt of the complete information sent under Nos. 9.1 and 9.2, the Bureau shall publish it in a Special Section of its BR IFIC within three months.....

API (1)

- Advance Publication Information (API) is obligatory, before coordination phase or notification
- No priority in being first to start advance publication
- Formal date of receipt of the API (No.9.1) starts the “regulatory clock”

API (2)

- Relevant Rules of Procedure (ROP) on Receivability
 - 1: electronic filing (resolves 5 of RES55)
 - 3.2: completeness (Annex 2 of AP 4) and correctness of the information
 - 3.4: Administrations are encouraged to run the validation software themselves in order to overcome any difficulties in the notices before they are submitted to the Bureau.
- Select the proper notice type in Spacecap
 - coordination not required (non-GEO)
 - coordination required (GEO, non-GEO)
 - mixed

API (3)

- The use of an **additional frequency band** or **modification of the orbital location by more than $\pm 6^\circ$** for a space station using the geostationary-satellite orbit will require the application of the advance publication procedure for this band or orbital location, as appropriate (i.e. new date of receipt will be given)
- API will be suppressed if no request for coordination is submitted for the bands within 24 months from API receipt (No. 9.5D)

API (4)

- for API where coordination is not required by Section II of Article 9, the modification of the reference body or the modification of the direction of transmission for a space station using a non-GEO satellite orbit will require the application i.e. new date of receipt

Radio Regulations relating to receivability – CRC

- 9.34 On receipt of the complete information sent under No. 9.30 or No. 9.32 the Bureau shall promptly:
 - 9.35 a) examine that information with respect to its conformity with No. 11.31.....
- 9.40A If the information is found to be incomplete, the Bureau shall immediately seek from the administration concerned any clarification required and information not provided.

Coordination Request - CR (1)

- No. 9.1 - CR shall be considered as having been received not earlier than 6 months after date of reception of the API
- No. 9.2 - Check if the CR frequency bands are covered by the API. If no, will require the application of the API for this band and new CR date +6 months (and cost recovery)
- No. 9.2 - Check modification of the orbital position whether not more than +/-6 degrees vis-à-vis the API

Time Limit check of No. 9.5D

- Coordination information (No. 9.30) must be sent within 24 Months from the formal date of Receipt of API in BR
- BR sends a reminder (CT ITU), 3 months before the end of the regulatory date
- If received beyond the Time Limit, BR will cancel the API. If the administration wishes the Coordination information will be considered as a new API and Coordination data sent at the same time (RoP under No.9.5D)

Coordination Request - CR (3)

- Validation of graphical data
- ART 5 (Regional service area restrictions)
- AP4 and CR 58 and IFRB Circular Letter 769
- Steerable beams (No. 1.191, AP4 B.3.b)
- The maximum co-polar isotropic gain, in dBi is required where a steerable beam (see No. 1.191) is used
- GSO diagrams (AP4 B.3.e)
- if the space station is operating in a band allocated in the Earth-to-space direction and in the space-to-Earth direction
- Check with respect to ROP
- No. 21.16 – PFD limits for steerable beams

Radio Regulations relating to receivability – Notifications

- 11.27 Notices not containing those characteristics specified in Appendix 4 as mandatory or required shall be returned with comments to help the notifying administration to complete and resubmit them, unless the information not provided is immediately forthcoming in response to an inquiry by the Bureau.

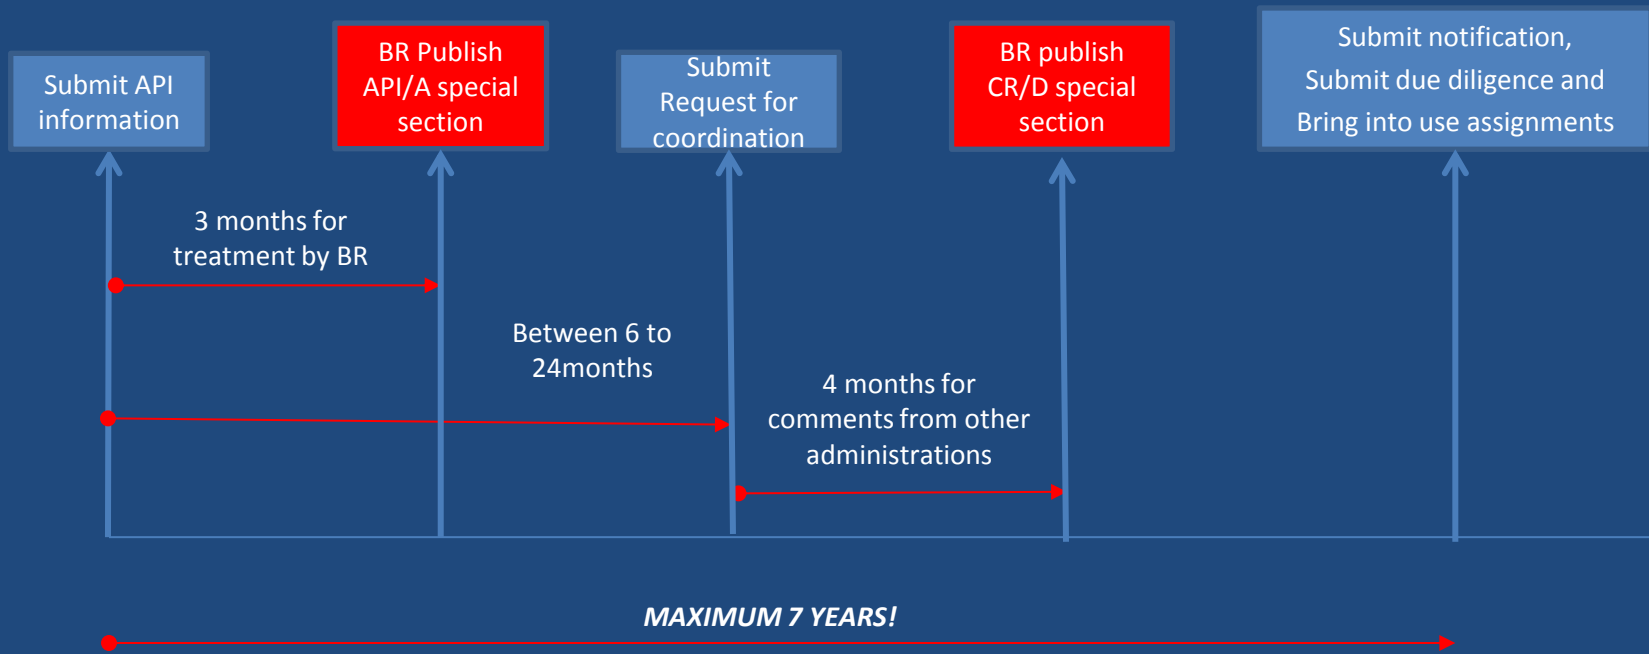

Notification for recording in the Master Register

- Notification not earlier than 3 years before dBiU (No. 11.25)
- Relevant AP4 data have to be provided – see No. 11.15 (WRC-07) – RES-55 apply. No more “only changes” to No. 9.29 (CR)
- ROP 4.3 multiple procedures (API – (C) – N)
- previously applicable procedures have to be effected
- for earth station: associated space station supported by an API
- assignments that require coordination under Sect II of Article 9 is not supported by a publication of coordination request (CR/C)
- assignments that do not require coordination under Sect II of Article 9 is not supported by an API

Notification (2) - Publication of Complete Notification

- Complete notices are published in PART I-S of the BR IFIC (Space services) with the date of receipt. This publication shall constitute the acknowledgement to the notifying ADM of receipt of its notice.
- PART I-S notices will be used for further technical and regulatory examination by the Bureau

ITU Filing Process

Time Limit under RES49

- ADM shall submit Spacecraft Manufacturer and Launch Service provider details with frequency bands etc. before the time limit under No.11.44 (7 years from date of receipt of API);
or
- Before the date of bringing into use if notified earlier (para 12 of Annex 1 of RES49)
- In the absence of RES49 information beyond 7 years notice will become unreceivable; or provisional recording will be deleted and assignments will not be taken into account by BR and Administrations (para 11 of Annex 1 of RES49)
- BR Sends Reminders 6 month before this date

Time limit for resubmission (No.11.46)

- Date before which Notice has to be Resubmitted after return by the BR in the PART III-S under Nos.11.37/11.38
 - = Date stamped on the Return letter by BR + 6 months
- If resubmitted after 6 months BR advises to restart API procedure when period for submission under No. 11.44.1 of first notice has expired
- If resubmitted after 6 months it will be treated as first submission (cost recovery fee) and shall comply with provisions of No. 11.44.1
- The submission is accepted as valid first Notice ONLY within 7 year period

Conclusions concerning time limits

- It is extremely important to keep track and to take action within the Time Limits for your networks.
- Valuable time will be lost (and cost recovery fee) in applying the procedure all over again if the time limits are not respected
- BR may send telefax and Circular Telegrams to remind administrations However, administrations should keep track of the regulatory Time Limit, on their own, without waiting for the reminder from BR
- The Board does not accept non-receipt of reminders as a good reason for consideration.

Receivability of space notices

Any questions?
