

Dr. Mohamed El Amin

Director, Regulatory Policy & International Spectrum Management

The Boeing Company

Dr. El Amin is the Director of Regulatory Policy & International Spectrum Management of the Boeing Company. He leads a Team with the responsibility to support the entire Boeing enterprise to advance and advocate Boeing global interests in spectrum, obtain the necessary spectrum licenses and regulatory authorizations to operate Boeing radio services and products globally as well as ensuring these operations are in compliance with national regulations.

Dr. El Amin joined The Boeing Company in 2003 as a member of the International Regulatory Affairs team within the Connexion By Boeing business, the first global system to deliver broadband internet on-board commercial aircraft. He was instrumental in the development & execution of a spectrum advocacy, regulatory and licensing strategy that ensured the deployment of the Connexion By Boeing service on a global basis.

Prior to joining Boeing, Dr. El Amin worked for nearly 17 years at Inmarsat where he held several senior positions in the technical, operational, planning, research, business development and regulatory divisions.

Dr. El Amin holds a B.Sc. degree in electrical & electronic engineering, an M.Sc. degree in telecommunication systems and a Ph.D. degree in satellite systems engineering from the University of Surrey in the UK.
