

Notification of Frequency Assignment for Recording in the Master Register and Modification of Regional Plans

**Ms. Sujiva Pinnagoda
Terrestrial Services Department
Radiocommunication Bureau**

**Liberia, Monrovia
16 - 18 September, 2019**

International treaty ratified by all Member States

Obligation

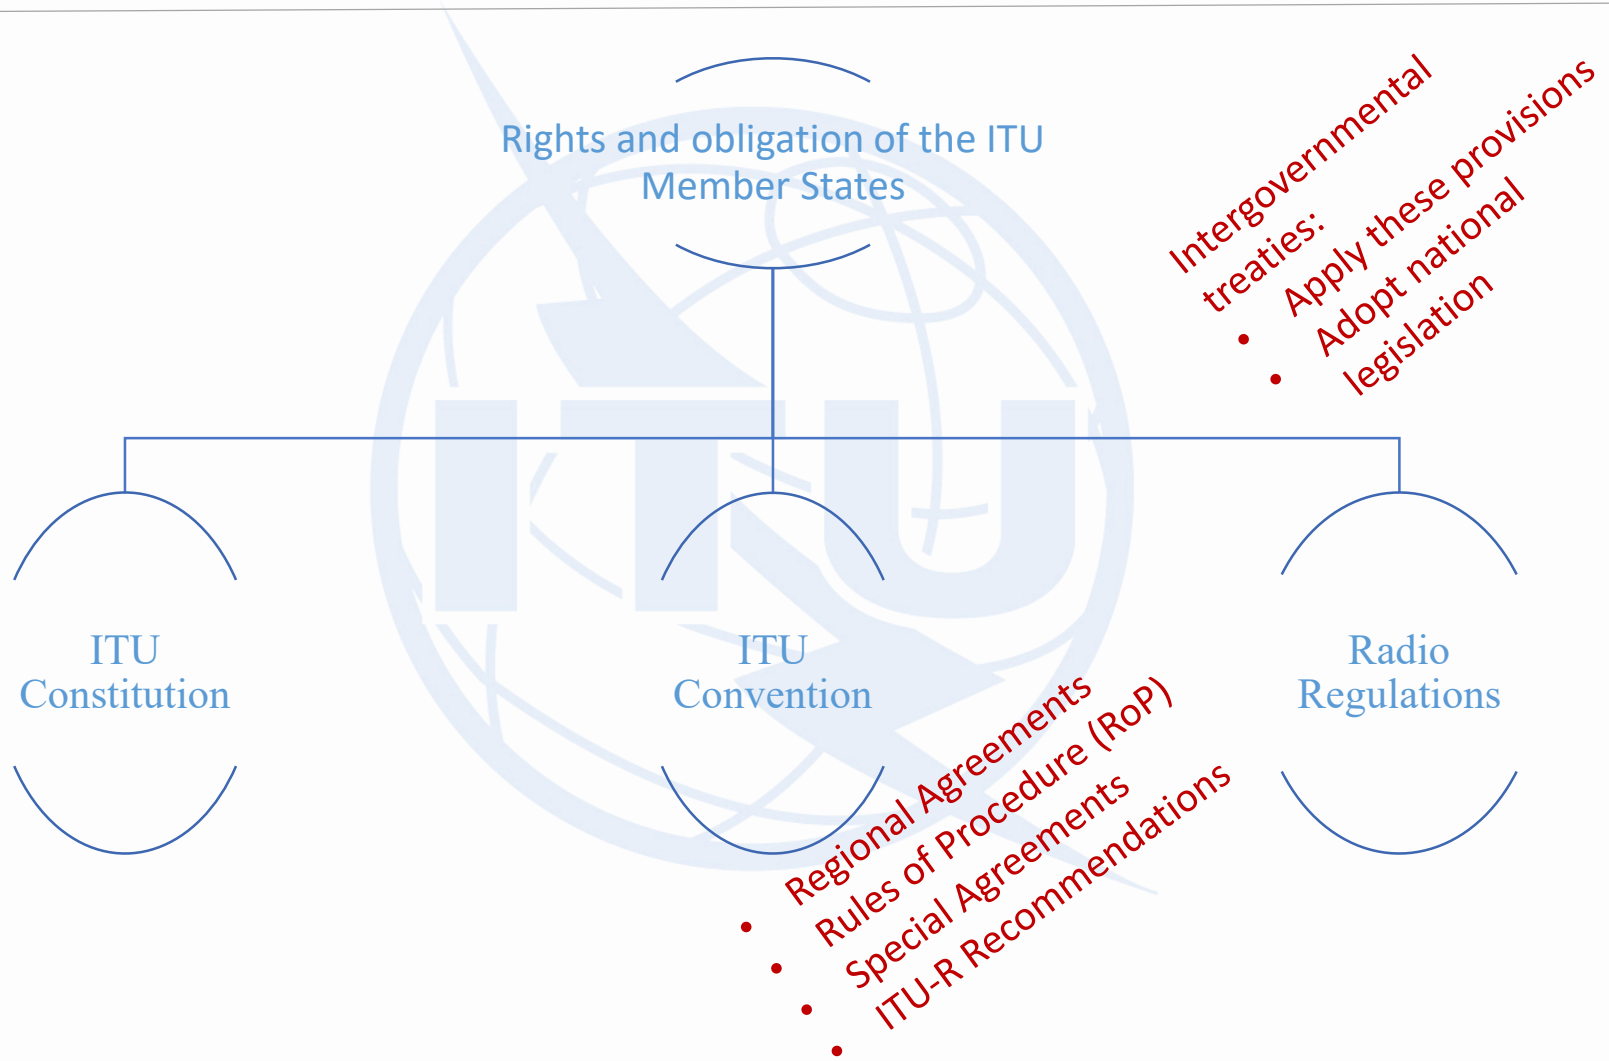

Notification?

Claim for international recognition

Rights

Other administration must take this assignment in to account when creating a new or when modifying its existing assignments

Regulatory Aspects

Radio Regulations (RR)

Principal instrument for international radio regulatory arrangement

Based on the use of two main concepts

Frequency block allocations:

- Table of Frequency Allocations in Article 5;
 - ❑ Allocated to mutually compatible services

Obligatory or Voluntary regulatory procedures

- Coordination, notification and recording

- Revised during WRCs by the ITU Member States – every 3 – 4 years
- WRC-19 will be held in Sharm el-Sheikh, 28 – 22 November 2019

Table of frequency allocations – Article 5

- **The Regulatory frequency band 8.3 kHz - 1 000 GHz;**
- **It is segmented into smaller bands and allocated to more than 40 radiocommunication services;**
- **Radio services are identified as Primary and Secondary services:**
 - ❑ Secondary services shall not cause harmful interference to - nor claim protection from, primary services;
 - ❖ *Primary services are in capital letters (i.e. FIXED) and secondary services are in lower case (i.e. Mobile);*
- **Footnotes are used to further specify how certain frequencies are to be assigned or used.**
- **It is organized into three Regions of the world**
 - supplemented by plans for some bands and services
 - and/or by mandatory coordination procedures.

Frequency Plans

- **It is to ensure equitable access to the radio spectrum to member states:**
 - Frequency planning is done during regional planning conferences. At the end of these conferences, participating administrations obtain frequencies with given technical characteristics. These frequencies are only planned to be used;
 - To obtain international recognition, administration must notify to the Bureau to be recorded in the Master Register.

Steps to apply the RR

- **The moment a frequency is selected to be put in to operation in a given service. Start by checking**
- table of allocation (Article 5 of the Radio Regulation)
 - is the frequency governed by a regional or a world plan – the frequency must already be in the Plan before it could be put into operation;
 - Is there mandatory or voluntary coordination;

Administrations must apply these steps in order to be in conformity with the different provisions of the Radio Regulations;

It safeguards administration's right by claiming for International recognition.

Notification Article 11 of RR

➤ **Notification of frequency assignments to the Radiocommunication Bureau is the way to safeguard the Rights of administrations**

- Informing neighboring countries that a station is in use;
- In compliance with the Radio Regulation;

Other administration must take this assignment in to account when creating a new or when modifying its existing assignments

International recognition

What to notify?

Nos. 11.2-11.9

Assignments shall be notified if

capable of causing harmful interference

used for international radiocommunication

subject to a world or regional frequency plan

subject to the coordination procedure of Article 9

international recognition is desired

non-conforming recorded for information only

Shall not be notified (Nos. 11.13 - 11.14): assignments to amateur service, to ship stations and to mobile stations of other services and common frequencies

What information?

- **Characteristics of stations in Appendix 4**
- **Appendix 4**
 - Annex 1: Characteristics of stations in the terrestrial services
- **Preface to the BR International Frequency Information Circular (BR IFIC)**
 - Symbols and codes

No. 11.15

How to notify?

Individual notice of each frequency assignment

Assignments to a number of stations may be notified as a typical station

No. 11.17

Individual notices for broadcasting stations, terrestrial stations within the coordination area of an earth station, etc.

Notice types

LFMF

sound broadcasting in low and medium
frequency bands
T03 (and T04)

FMTV

sound and television broadcasting in
VHF/UHF frequency bands
T01, T02, G02, GS1, GT1, GS2, GT2, GB1

FXM

fixed, mobile and other terrestrial services
T11, T12, T13, T14, T15, T16, T17
G11, G12, G13, G14

Electronic Information only

The information must be provided electronically using a specific format

List of available notices

VHF/UHF broadcasting notices LF/MF broadcasting notices FM notices

- G11 - Terrestrial transmitting station (TX) in the fixed service
- G12 - Terrestrial transmitting station (TX)
- G13 - Terrestrial receiving land station (RX)
- G14 - Terrestrial typical transmitting station (TP)
- T11 - Terrestrial transmitting station (TX) in the fixed service
- T12 - Terrestrial transmitting station (TX)
- T13 - Terrestrial receiving land station (RX)
- T14 - Terrestrial typical transmitting station (TP)
- T15 - Frequency allotment in the maritime mobile service (AP25)

OK Cancel

Online validation

- **Complete check of all data elements**
- **Batch mode processing**
- **Validation report to the user**
- **Strongly recommended before submitting**
- **Available for all TIES Services users free of charge at:**
<http://www.itu.int/ITU-R/terrestrial/OnlineValidation/Login.aspx>

WISFAT (Submission of electronic notices)

■ Secured web Interface

- WISFAT (Web Interface for Submission of Frequency Assignments for Terrestrial services)
- Immediate acknowledgement report to the notifier

■ Access restricted to registered notifiers

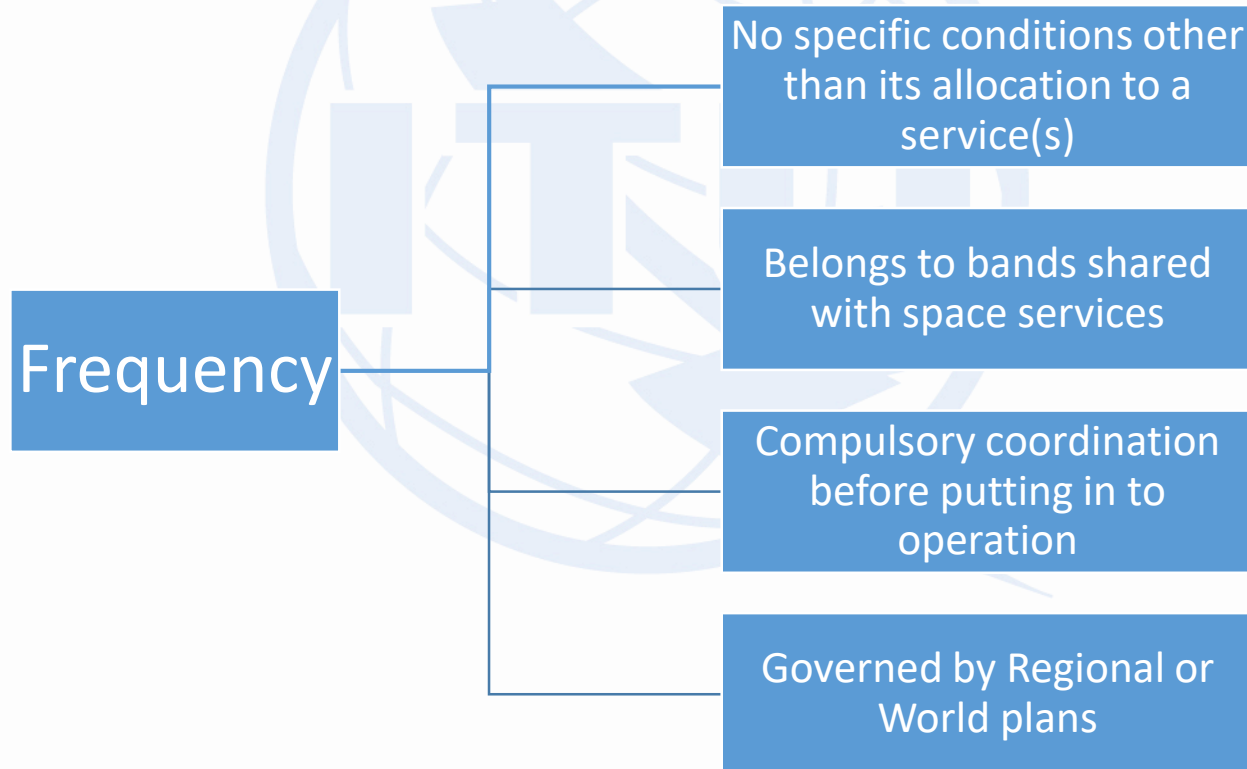

Official request from the Administration:

- Name, position, service e-mail, ITU Username (TIES services)
- As many as needed
- Administration's responsibility to keep list of notifiers up to date
- Access to WISFAT at:

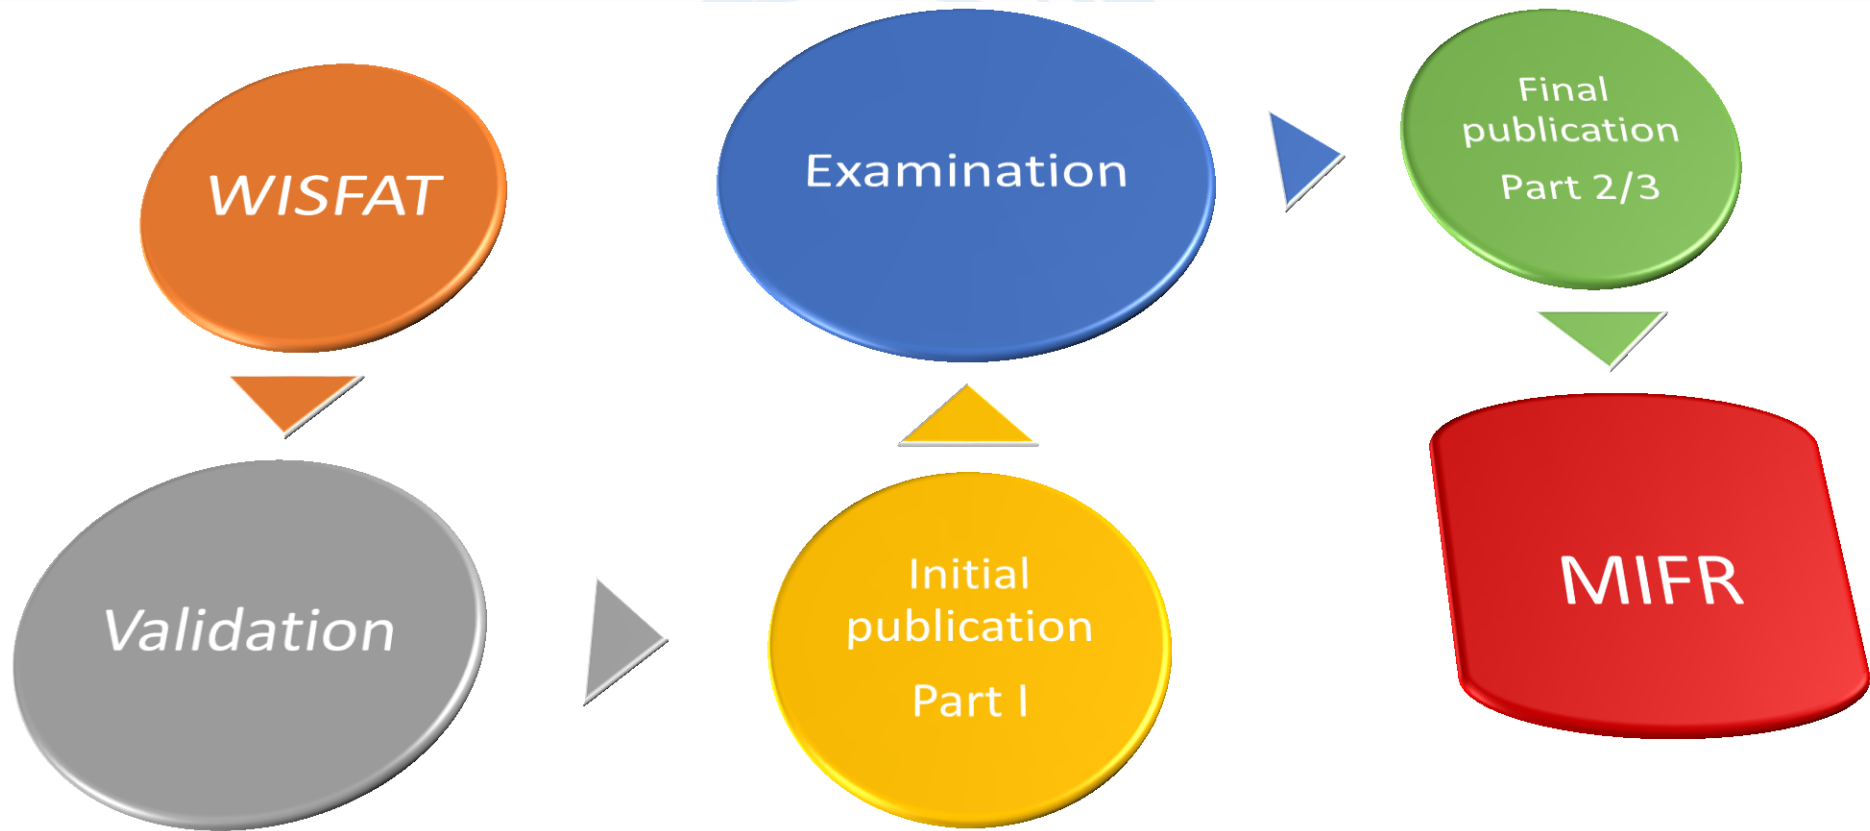

<http://www.itu.int/en/ITU-R/terrestrial/tpr/Pages/Submission.aspx>

BR Processing 1/2

- **After validation the processing depends on the frequency**

BR Processing 2/2

Final remarks

- **Notification has two aspects (rights and obligations)**
 - Obligation to apply the provisions of the RR (treaty)
 - To claim for international recognition and rights
- **The MIFR is the main instrument for frequency management**
- **Published every two weeks in BR IFIC**
- **Should be consulted before assigning frequencies**
- **Value of the MIFR depends on the data submitted**
- **Notify to preserve the rights of your Administration!**

Thank you
