General guidelines on the New Format of the BR IFIC

Installation troubleshooting:

- Windows 8 (only the PC version is supported):
  - installation not yet supported
  - users can use the BR IFIC in "plug-and-play" mode only

- Windows 7 or Windows XP:
  - if the users do not have administrator privilege, they must use the installer.bat script, found in \Packages\Windows\Disk1\InstData

- Windows Vista:
  - if the users have administrator privilege, they may run brific.exe (the navigation menu) "as administrator" in order to be able to install from the navigation menu
  - if the users do not have administrator privilege, they must use the installer.bat script, found in \Packages\Windows\Disk1\InstData

- If there is an installation warning at the end, it can be ignored

The main features of TerRaQ

- BR IFIC Format Converter: Possibility to convert the SQLite database of the BR IFIC to MS Access
- BR IFIC Database Manager: To select an existing version of the BR IFIC database or an extract of it
- Export the results of a query to a MS Access container in addition to SQLite container
