

Overview of ISO TC 268 and CEN/CENELEC/ETSI Sector Forum SSCC

Presentation Abstract

Dr. Bernard Gindroz will give an overview of the standardization work for smart and sustainable development of cities, conducted at ISO level (ISO TC 268), with published and under development standards consistent with the overarching ISO 37101 management system.

ISO TC 268 aims at contributing to meeting the UN Sustainable Development Goal 11 (Sustainable Cities and Communities).

In addition, Dr. Gindroz will present the recently created CEN/CENELEC/ETSI Sector Forum for Smart and Sustainable Cities and Communities, a platform of exchanges aiming to collect expectations from cities and local authorities and identify needs for further standardization development. This European Sector Forum is a unique platform welcoming any cities related stakeholder to contribute to the development of a set of relevant standards for cities. Thanks to the joint engagement of all three European Standardization Organization (ESOs), CEN, CENELEC and ETSI, this sector forum will help in developing a clear, consistent and complete tool box for cities and thus contribute to accelerating their smart and sustainable development.

Cities are invited to actively participate to the work of both ISO TC268 and the European CEN/CENELEC/ETSI Sector Forum SSCC.
