

ITU-T FG-DPM: Key Activities and Future Plans

Presentation Abstract

This talk aims to introduce the ITU-T FG-DPM. Firstly, it provides a brief introduction of SG20 as the parent group of this FG. Then, it introduces background and important tasks of the FG-DPM. Based on this, it presents details of key activities and a list of deliverables, along with the FG structure. Finally, it discusses future standardization including collaboration issues with other SDOs and communities as well as standardization strategy on related topics.
