

**Title: “The European Quantum Technology FET Flagship”**

**Abstract:**

In my presentation I will give an overview of the European QT Flagship program, which started in 2018. I will present the basic structure of the Flagship together with its objectives and supporting actions. The projects in the fields of quantum computing, communication, sensing and simulation, funded in the ramp-up phase will be presented. An outlook on future programs and developments launched by the European Commission supporting the further developments on quantum technologies will complete my talk.
