

Title: How to make AI accessible with an Open Marketplace

Abstract

Since five years Artificial Intelligence has entered a new dimension, thanks to the progress of machine and deep learning algorithms, the availability of high performance cloud infrastructure and labelled Data.

Artificial Intelligence is now considered as the new paradigm for the next digital wave and the industry 4.0. After an introduction of main Artificial Intelligence use cases for Telco's the talk will present LF AI open source projects and the Orange AI Marketplace where producers can publish and share AI models that can be easily used to grow company business.
