How we make Al accesible with an Open Marketplace

ITU Workshop on "Machine Learning and Beyond"

Geneva, Switzerland, 17 June 2019

Dr Jamil Chawki
CEO Orange Al Marketplace
Chairman LF Al Outreach committee

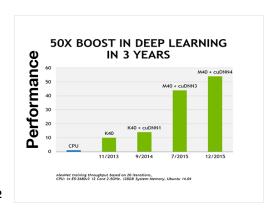

The AI development has speed-up since 2012

- 1. Development of Deep Learning neural network (100 layers & millions of neuron)
- 2. Increase of Graphics Processing Unit and distributed cloud processing
- 3. Availability of Millions of labeled data and company data lake

We are at a decisive moment in history in terms of innovation rate & disruptive potential of AI, in all fields:

Stéphane Richard, CEO of Orange (Viva Technology Event, 2017)

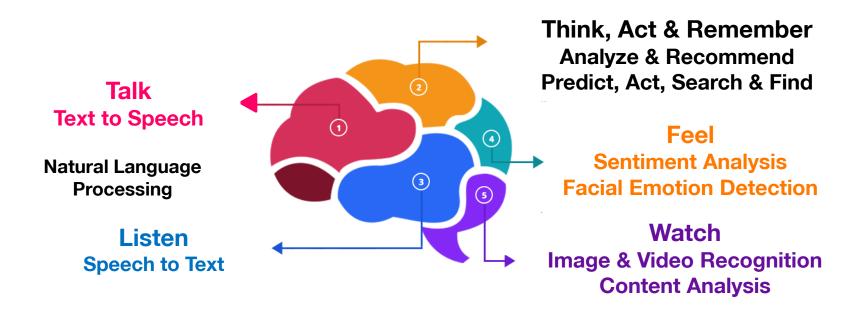

Object-recognition rate in an image 74% in 2011, 88% in 2013

97% today

The 5 senses of Al Intelligence Displayed by a machine*

^{*} using Machine and Deep Learning technologies

Al Telco use cases

1. Customer services & support

- 2. Marketing engagement
- 3. Network & IT Operations 'AlOps'

- 4. Security
- & Enterprise Apps: Finance, Smart cities, Medical, Automotive, Transportation

LF AI, Build & support an Open AI Ecosystem 'for Telcos'

LF AI has a modular approach to hosting projects

Provide the support for open source project and enabling services that include membership and funding, ecosystem development, legal, PR and marketing, events, and compliance scans

Al Platform and marketplace for Machine & Deep Learning models sharing and deploying.

A highperformance distributed ML platform based on Parameter Server

A framework to build cluster cloud services using different Deep Learning frameworks.

Distributed training framework for TensorFlow, Keras & PyTorch.
