AI for Natural Disaster Management

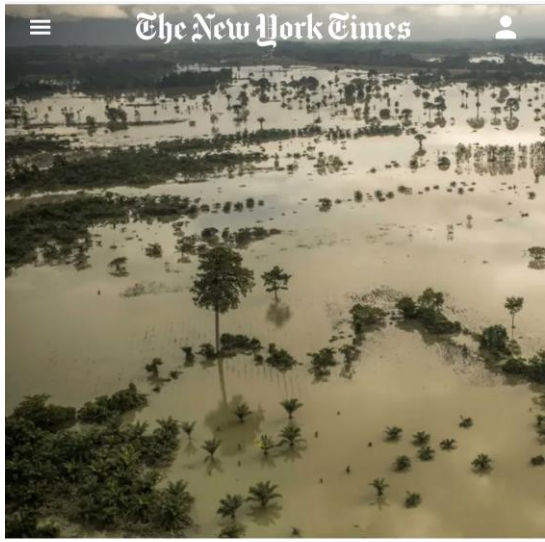
ITU Focus Group

Monique Kuglitsch
Fraunhofer HHI

The challenge

Natural disasters are damaging physical events caused by natural hazards.

The situation is exacerbated in **certain regions** and for certain **populations;** and is expected to **worsen**.



A view of the vast flooding in Guatemala after Hurricanes Eta and Iota struck one after the other last month.

(4 Dec 2020, NYT)

2 Hurricanes Devastated Central America. Will the Ruin Spur a Migration Wave?

The challenge

Natural disasters feature prominently in the activities of multiple **UN organizations** and **programmes** including

- SDGs
- policy-guiding publications (e.g., Sendai Framework, IPCC SREX)

13 CLIMATE ACTION

TAKE URGENT ACTION TO COMBAT CLIMATE CHANGE AND ITS IMPACTS

Sendai Framework for Disaster Risk Reduction 2015 - 2030

MANAGING THE RISKS OF EXTREME EVENTS AND DISASTERS TO ADVANCE CLIMATE CHANGE ADAPTATION

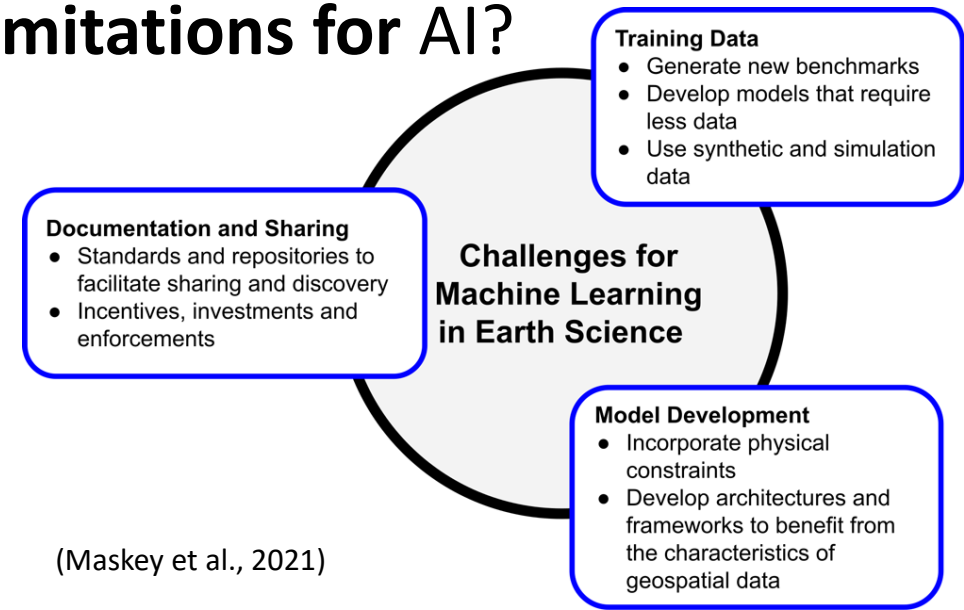
The questions

Through tapping the **potential of AI**, can we improve our **understanding** of natural hazards, our ability to **detect** events in real-time, our ability to **forecast** events, and our ability to effectively **communicate** an impending or ongoing disaster?

What are the **best practices** and **limitations for** AI?



(Maskey et al., 2021)

The goals

Explore best practices in:

- **data** collection, monitoring, and handling;
- **AI-based algorithms** for reconstructing, detecting, and forecasting events; and
- effective **communication**.

Data

Some questions to explore are:

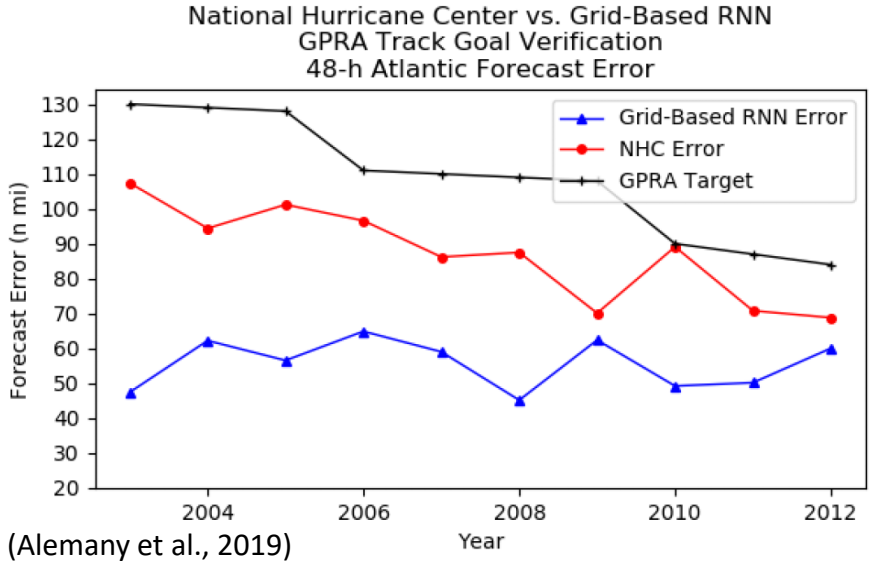
- what **requirements** should data meet when being used to train or test an AI-based algorithm?
- can AI-based algorithms be used to **enhance** data quantity and quality?

Campbell Scientific

AI-based algorithms

Some questions to explore are:

- what is the current **gold standard** method to reconstruct, detect, or forecast events? How can AI-based algorithms bring these methods to the **next level**?
- what should be considered when **training** and **evaluating** an AI-based algorithm?



(Alemany et al., 2019)

Communication

Some questions to explore are:

- once an event has been forecast or triggered, how can AI assist with the immediate response?
- how do we ensure that communication methods are reliable and trusted by the population? Are they accompanied by a clear set of protocols to ensure that individuals know how to respond?

Key deliverables

- **Workshops**
- **Roadmap**
- **Glossary**
- Three non-normative **technical reports**
- **Educational materials**

FG-AI4NDM

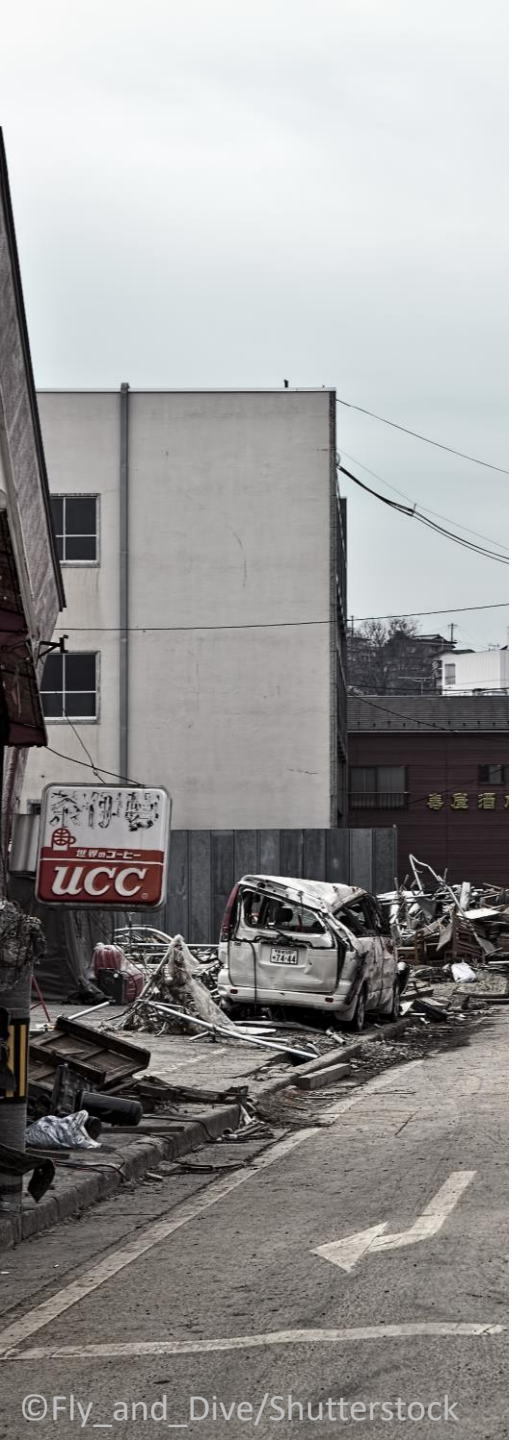
What is an **ITU Focus Group**?

- Supports the efforts of an associated **ITU Study Group**.
- Provides a working environment for **pre-standardization or standardization** activities in a chosen area.
- Can be rapidly established and has freedom to choose working methods, leadership, financing, and desired outputs.

FG-AI4NDM

ITU/WMO/UNEP Focus Group on AI for Natural Disaster Management (**FG-AI4NDM**) converges the ICT expertise of ITU with natural disaster expertise from the WMO and UNEP.

Creates an atmosphere that is conducive to international, multi-stakeholder, and interdisciplinary collaboration.



FG-AI4NDM

Management Team

ITU TSB

Hiba Tahawi, Secretariat

WG-Data | WG-Modelling | WG-Comms | WG-Roadmap

Technical reports & roadmap

- TG-AI for flood monitoring and detection
- TG-AI for landslide monitoring and detection
- TG-AI for tsunami geodetic enhancements to tsunami monitoring and detection
- TG-AI for snow avalanche monitoring and detection
- TG-AI for volcanic eruption forecasting
- TG-AI for wildfire monitoring and detection
- TG-AI for multihazard communication technologies

Chair
Monique Kuglitsch
Fraunhofer HHI, Germany

Vice Chair
Elena Xoplaki
University of Giessen, Germany

Vice Chair
Juerg Luterbacher
WMO

Vice Chair
Muralee Thummarukudy
UNEP

Vice Chair
Srinivas Chaganti
DOT, India

Vice Chair
Rakiya Babamaji
NASRDA, AfSTAG-DRR, & UNDRR-GRAF, Nigeria

Vice Chair
Yan Chuan Wang
China Telecom, China

Get involved!

Visit our website (https://itu.int/go/fgai4ndm)

Peruse our **onboarding document** for guidance on how to:

- Create a free **ITU user account**
- Join our low-volume **mailing list**
- **Register** for our workshops/meetings
- Use our remote participation platform (**MyMeetings**)
- Access our **collaboration site**
- Submit written **contributions**

Get involved!

Join our meeting on **31 Aug, 1 Sep, & 2 Sep**!

Share your expertise!
