(Draft) Technical Report 23644

Overview of trust anchors for DLT-based identity management

- Different types of trust anchors
  - Legal, cryptographic, social, …

- Existing trust anchors
  - PKI, Federated PKI, DIDs

- Using trust anchors
  - Dimensions of risk, chains of trust

bit4id

AWI 7603

Decentralized Identity standard for the identification of subjects and objects

- Ongoing work
- Concepts
  - SSI, Identity wallets, Integrity and provenance
- Architectural considerations
- Architectural views
