Unlock innovation to make our lives better

>Company Strategy >Industry Strategy >National Strategy

REF xxxxxxxxx rev xxx – date This document may not be reproduced, modified, adapted, published, translated, in any w

- > Patent fees including via SEPs
- > Thales product functionalities described in a specification
- > Thales considered as key actor in a domain
- > Watchdog position on market trends
- > Guidance on future products' features
- > Success factor in RFPs for some markets
- > Unlock markets in which the whole industry can make revenues otherwise those markets would have been blocked or addressed with other solutions (Secure Element
- for SIM, for Payment etc.)

THALES Building a future we can all trust

I'm Winston Wolfe. I solve problems

What is the role of SDOs today?

Standardization is moving to industry consortia

> Fast(er) time to market?

> More control from private sector?

Why are we not an ITU-T member today?

Scope of ITU-T activities are not aligned with our activities

> Shift of standardization towards industry consortia

> general trend due to faster time to market this consortia bring?

REF xxxxxxxxx rev xxx – date Name of the company / Template: 87211168-DOC-GRP-EN-007 This document may not be reproduced, modified, adapted, published, translated, in any way, in whole or in part or disclosed to a third party without the prior written consent of Thales © 2023 THALES. Opportunities for ITU-T

> Define role and output of ITU-T including in new contexts e.g. cloud, internet protocols

- > Better promote ongoing activities
- > Clarify ITU-T vs ITU-D

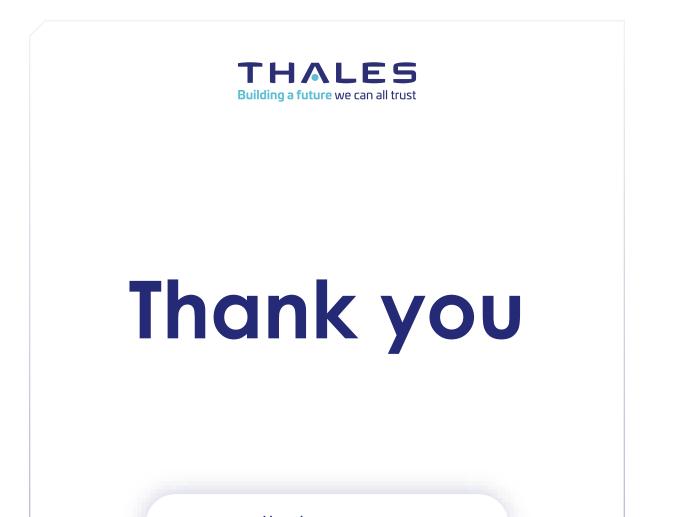

Topics of interest to us

> Key Values of 6G and anticipation of their impacts on 3GPP process

> Security of AI. Is the position of ITU-T for AI more on the applicative layer (agriculture, disaster, health)?

> Cross-border interoperability of identity wallets
