

Writing YANG Profiles

Example of using profiles of IEEE YANG
in Industrial Applications

Martin Mittelberger, Siemens AG

YANG Profile in IEC/IEEE 60802

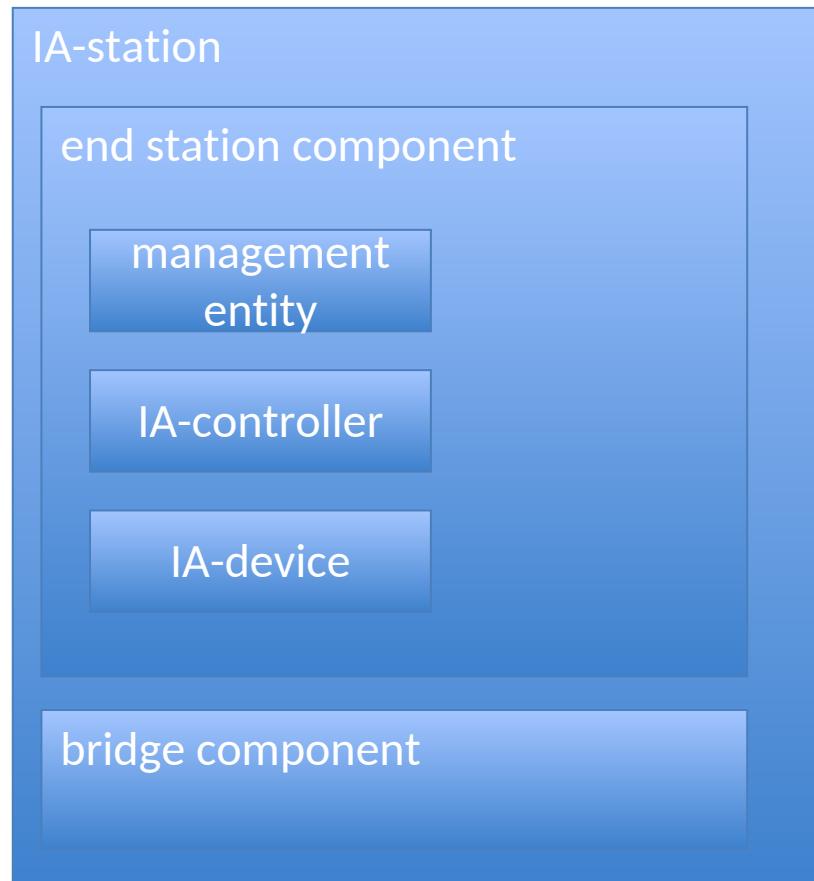

- Overview of IEC/IEEE 60802
- Digital Data Sheet
- Managed Objects of 60802 IA-stations
- Diagnostics
- Q+A

IEC/IEEE 60802 - TSN Profile for Industrial Automation

- Objective: **Interoperability** of OT and IT traffic
 - network configuration
 - stream configuration and establishment
- Selects features, options, configurations, defaults, protocols and procedures of bridges, end stations and LANs
- A common, standardized configuration interface for IA-stations is crucial for interoperability
- Standardized security measures are required

NETCONF/YANG provides all mechanisms to meet these requirements

IEC/IEEE 60802 - IA-station

- Contains a management entity
- Can contain IA-controller and/or IA-device functionality
- Can be a simple end station as source of destination for control data traffic according to IEEE Std 802-2014
- Can contain a bridge component according to IEEE Std 802.1Q

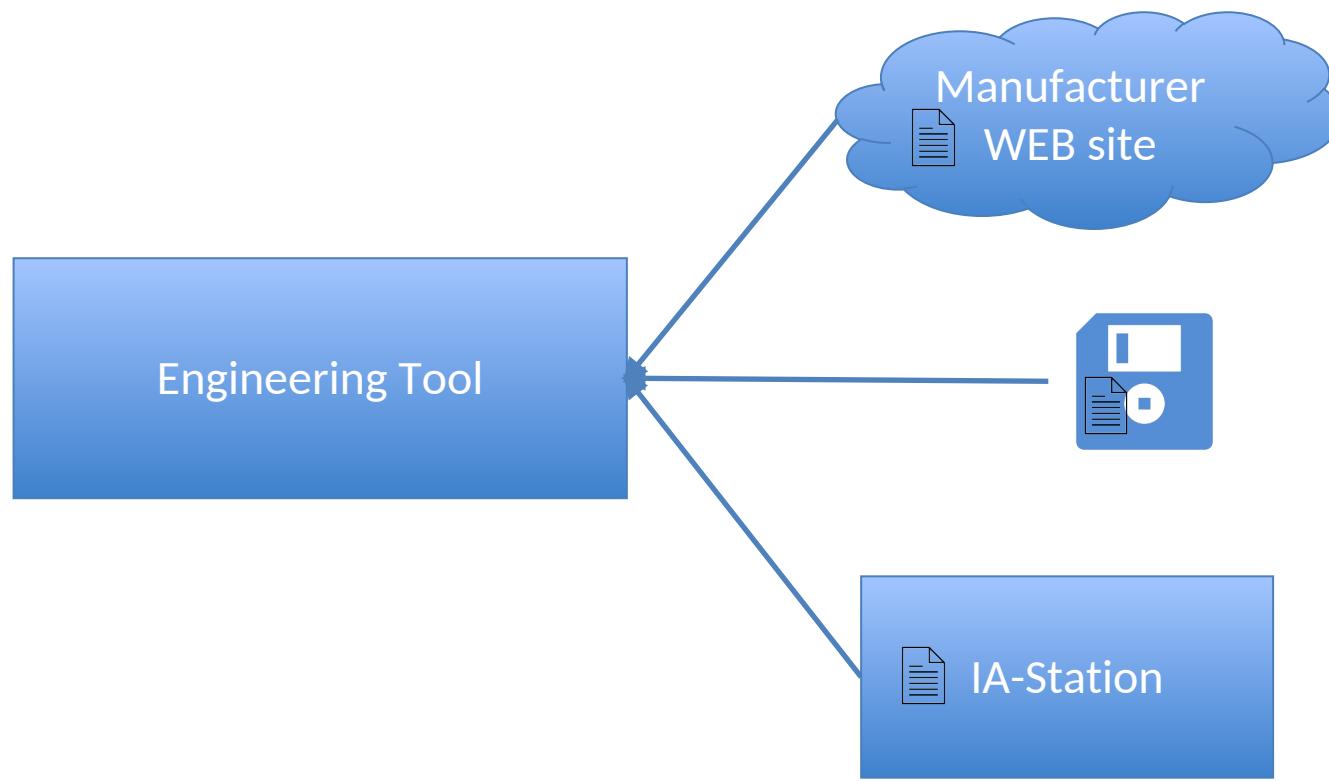

YANG Profile in IEC/IEEE 60802

- Overview of IEC/IEEE 60802
- **Digital Data Sheet**
- Managed Objects of 60802 IA-stations
- Diagnostics
- Q+A

Digital Data Sheet

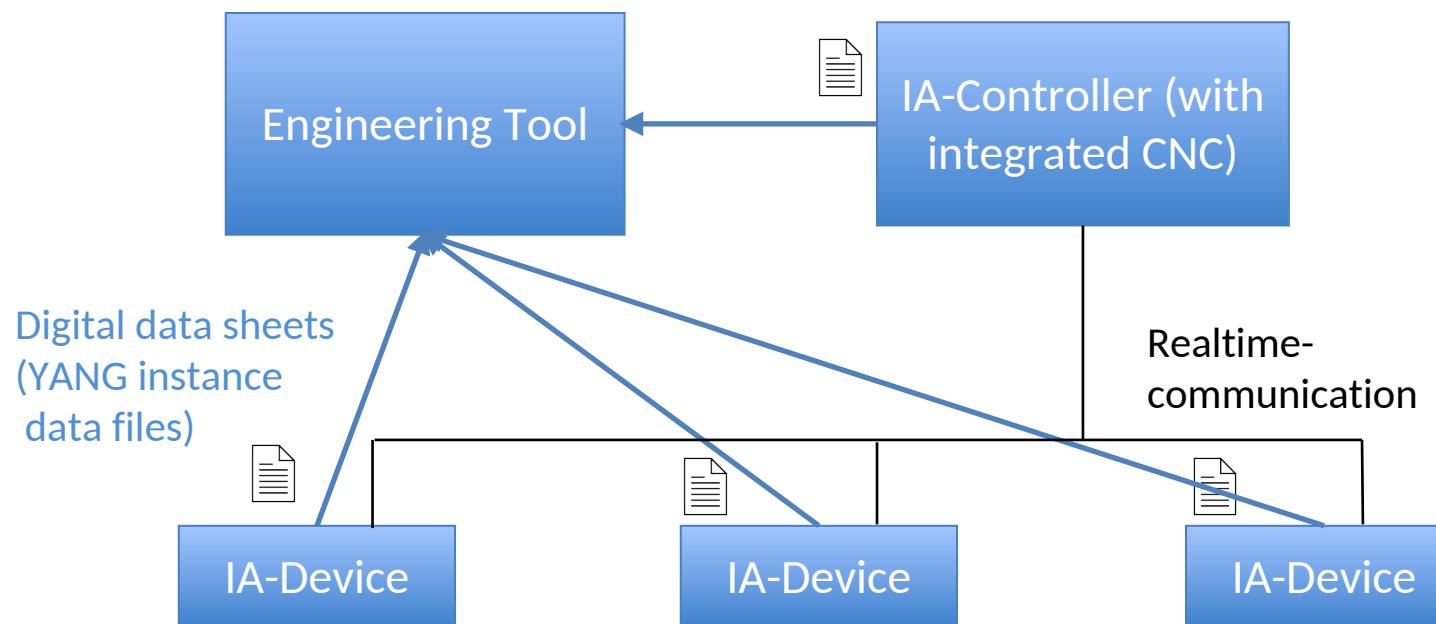

- Contains
 - capabilities
 - value ranges
 - quantities of IA-stations
- Modelled using YANG
- Online: the YANG instance data can be retrieved from the IA-stations
- Offline: in the form of a digital data sheet file
 - collection of all instantiated data nodes of all YANG modules (may be reduced to the minimum required nodes)
 - coding as XML file according to RFC 9195

How to obtain a Digital Data Sheet

- Download digital data sheet file from Manufacturer WEB site
- Load digital data sheet file from media, delivered with the device
- Read YANG instance data online from IA-Station

Obtaining Device Capabilities – Digital Data Sheet

- Engineering tool gathers capabilities of IA stations
- Engineering tool knows the structure of the YANG modules and reads required nodes

YANG Profile in IEC/IEEE 60802

- Overview of IEC/IEEE 60802
- Digital Data Sheet
- **Managed Objects of 60802 IA-stations**
- Diagnostics
- Q+A

Management

- Goal: Vendor-Independent management of IA stations for interoperability
- Selection of mandatory nodes for configuration out of IETF/IEEE YANG modules
- Selection of mandatory nodes for the digital data sheet
- Mandatory nodes are listed in the Std's Conformance-Section

Mandatory/Optional YANG Modules

ieee802-ethernet-interface

ietf-keystore

ietf-subscribed-notifications

ietf-interfaces

ietf-netconf-server

ieee802-dot1ab-lldp

ietf-truststore

ietf-notification-capabilities

ietf-dot1q-bridge

iecieee60802-subscribed-notifications

ieee1588-ptp

ietf-netconf-acm

ietf-netconf-monitoring

iecieee60802-ethernet-interface

ieee802-dot1cb-stream-identification

ieee802-dot1as-gptp

ietf-system-capabilities

ietf-system

iecieee60802-bridge

ieee802-dot1q-psfp-bridge

ieee802-dot1as-hs

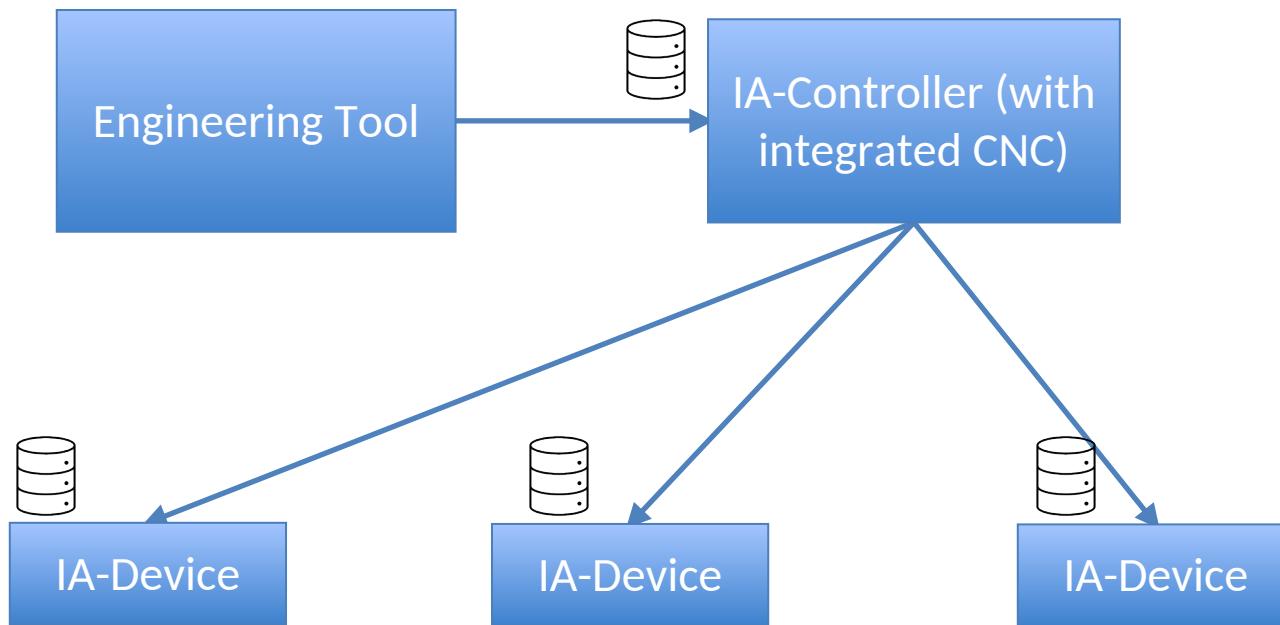

ietf-yang-library

ietf-hardware

iecieee60802-ia-station

ieee802-dot1q-sched-bridge

Configuring Device Network Interfaces – NETCONF/YANG

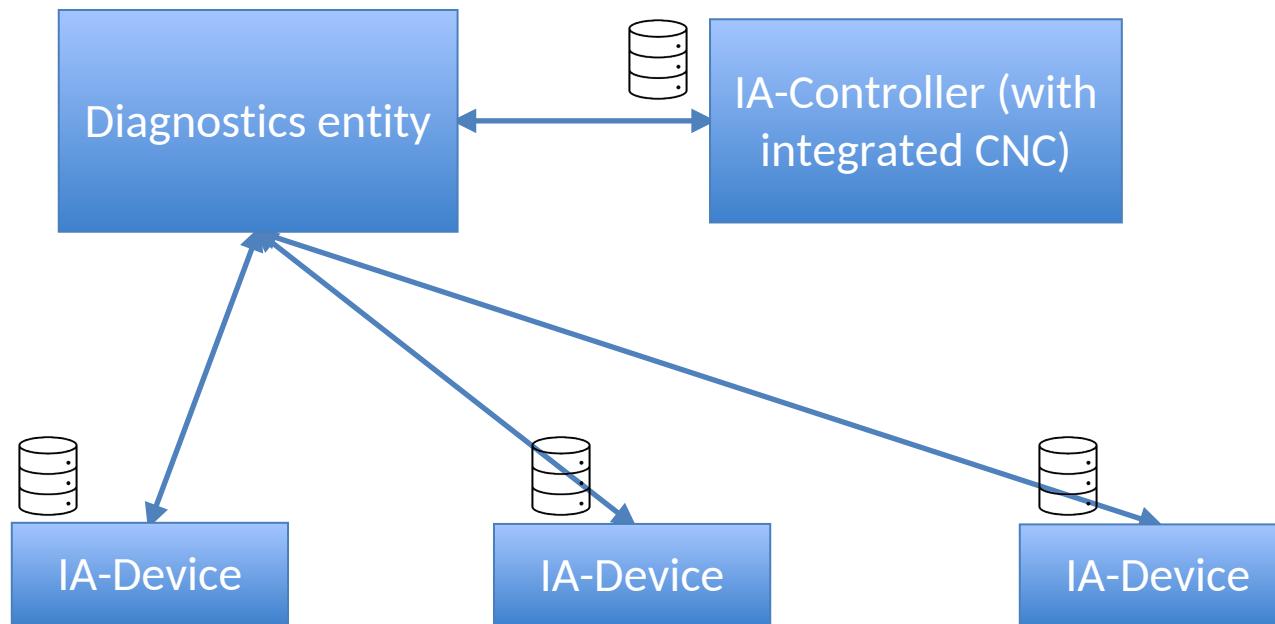

CNC northbound interface:
Used for manufacturer specific configuration (with or without streams)

CNC southbound interface:
Used for standardized configuration via Managed Objects (NETCONF/YANG)

YANG Profile in IEC/IEEE 60802

- Overview of IEC/IEEE 60802
- Digital Data Sheet
- Managed Objects of 60802 IA-stations
- **Diagnostics**

Obtain Diagnostics Information – YANG Push / NETCONF Notifications

Configure notifications in IA-stations and subscribes for diagnostic events:

- YANG-Push subscriptions according to IETF RFC 8641 (YANG Push) and
- IETF RFC 8639 (Subscribed Notifications)

Mandatory diagnostic data selection

- Selection of mandatory diagnostic data nodes:
 - Change of link-status per Ethernet port (/ietf-interfaces/interface-state/interface/oper-status)
 - Change of MAU-type per Ethernet port (/ieee802-ethernet-lldp/lldp/port/operational-mau-type)
 - Change of sync-status for ptp-instances
 - some selected Statistic counters

YANG Profile in IEC/IEEE 60802

- Overview of IEC/IEEE 60802
- Digital Data Sheet
- Managed Objects of 60802 IA-stations
- Diagnostics
- Q+A
